

B.S. Abdur Rahman™  
**Crescent**  
Institute of Science & Technology  
Deemed to be University u/s 3 of the UGC Act, 1956

*Regulations 2021  
Curriculum and Syllabi  
(Updated upto December 2023, as per  
21<sup>st</sup> Academic Council)*

---

**B.Tech.  
(Mechanical Engineering)**

**REGULATIONS 2021**

**CURRICULUM AND SYLLABI**

**(Updated upto December 2023, as per 21<sup>st</sup> Academic Council)**

**B.TECH. MECHANICAL ENGINEERING**

## **VISION AND MISSION OF THE INSTITUTION**

### **VISION**

B.S.Abdur Rahman Crescent Institute of Science and Technology aspires to be a leader in Education, Training and Research in multidisciplinary areas of importance and to play a vital role in the Socio-Economic progress of the Country in a sustainable manner.

### **MISSION**

- To blossom into an internationally renowned Institute.
- To empower the youth through quality and value-based education.
- To promote professional leadership and entrepreneurship.
- To achieve excellence in all its endeavors to face global challenges.
- To provide excellent teaching and research ambience.
- To network with global Institutions of Excellence, Business, Industry and Research Organizations.
- To contribute to the knowledge base through Scientific enquiry, Applied Research and Innovation.

**DEPARTMENT OF MECHANICAL ENGINEERING****VISION AND MISSION****VISION**

To excel in providing quality education and training through Undergraduate and Postgraduate programs and carryout quality research in the field of Mechanical Engineering.

**MISSION**

- To provide a good learning experience through appropriate design of curriculum and syllabi that facilitate students to gain thorough understanding of the fundamental concepts and applications in Mechanical Engineering
- To equip students to solve challenging problems in Mechanical Engineering and related areas taking in to account their impact on the society
- To facilitate students to develop good communication, leadership and managerial skills through team approach in conducting experiments and projects
- To pursue academic and collaborative research activities with industry and other research institutions ensuring high quality in publications and other research outputs

## **PROGRAMME EDUCATIONAL OBJECTIVES AND OUTCOMES**

### **B.TECH. (MECHANICAL ENGINEERING)**

#### **PROGRAMME EDUCATIONAL OBJECTIVES**

PEO 1: Possess essential professional skills to develop high-quality solutions in Design, Manufacturing, Materials, Thermal, and related engineering fields.

PEO 2: Engage and succeed in professional careers through teamwork, ethical behaviour, proactive involvement, and effective communication.

PEO 3: Assume progressively managerial, leading, and influential roles in organizations and societies, with a commitment to environmental sustainability.

PEO 4: Pursue higher studies and succeed in academic teaching, research, or entrepreneurial careers.

PEO 5: Demonstrate the quest for life-long learning through professional development, practical training, and value-added programs.

**PROGRAMME OUTCOMES**

- Apply the knowledge of mathematics, science, engineering fundamentals and an engineering specialization to the solution of complex engineering problems.
- Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences
- Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations
- Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
- Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations
- Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice
- Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development

- Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice
- Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions
- Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments
- Recognize the need for, and have the preparation and ability to engage in independent and life- long learning in the broadest context of technological change

### **PROGRAMME SPECIFIC OUTCOMES**

- Apply the principles of Engineering to Model, Analyze, Design and realize physical components, processes and systems
- Work professionally in the Mechanical Systems

**REGULATIONS - 2021**  
**B.TECH. DEGREE PROGRAMMES**  
**(Under Choice Based Credit System)**

(Amendments Approved by the 19th Academic Council – September 2022)

**1.0 PRELIMINARY DEFINITIONS & NOMENCLATURE**

In these Regulations, unless the context otherwise requires:

- i) **"Programme"** means B.Tech. Degree Programme.
- ii) **"Branch"** means specialization or discipline of B.Tech. Degree Programme like Civil Engineering, Mechanical Engineering, etc.,
- iii) **"Course"** means theory / practical / laboratory integrated theory / seminar / internship / project and any other subject that is normally studied in a semester like English, Mathematics, Environmental Science, Engineering Graphics, Electronic Devices etc.,
- iv) **"Institution"** means B.S. Abdur Rahman Crescent Institute of Science and Technology.
- v) **"Academic Council"** means the Academic Council, which is the apex body on all academic matters of this Institute.
- vi) **"Dean (Academic Affairs)"** means the Dean (Academic Affairs) of the Institution who is responsible for the implementation of relevant rules and regulations for all the academic activities.
- vii) **"Dean (Student Affairs)"** means the Dean (Students Affairs) of the Institution who is responsible for activities related to student welfare and discipline in the campus.
- viii) **"Controller of Examinations"** means the Controller of Examinations of the Institution who is responsible for the conduct of examinations and declaration of results.
- ix) **"Dean of the School"** means the Dean of the School of the department concerned.
- x) **"Head of the Department"** means the Head of the Department concerned.

**2.0 ADMISSION**

**2.1a)** Candidates for admission to the first semester of the eight semester B. Tech. degree programme shall be required to have passed the Higher Secondary Examination of the 10+2 curriculum

(Academic stream) prescribed by the appropriate authority or any other examination of any University or authority accepted by the Institution as equivalent thereto.

- 2.1b)** The student shall have studied at least any three of the following courses: Physics, Mathematics, Chemistry, Computer Science, Electronics, Information Technology, Biology, Informatics Practices, Biotechnology, Technical Vocational Subjects, Agriculture, Engineering Graphics, Business Studies, Entrepreneurship at 10+2 level. In case if the student has not studied any or all the courses viz., mathematics, physics and chemistry, he / she shall undergo bridge course(s) in the concerned course(s) at 10+2 level knowledge.
- 2.2** Notwithstanding the qualifying examination, the candidate might have passed at 10+2, the candidate shall also write an entrance examination prescribed by the Institution for admission. The entrance examination shall test the proficiency of the candidate in the courses considered eligible for admission on the standards prescribed for 10+2 academic stream.
- 2.3** Candidates for admission to the third semester of the eight semester B.Tech.programme under lateral entry category shall be required to have passed minimum Three years / Two years (Lateral Entry) Diploma examination in any branch of Engineering / Technology or passed B.Sc. Degree from a recognized University as defined by UGC and passed 10+2 examination with Mathematics as a subject or Passed three year Diploma of Vocation Stream (D.Voc) in the same or allied sector or any other examination of any other authority accepted by the Institution as equivalent thereto.
- 2.4** The Institution shall offer suitable bridge courses in Mathematics, Physics, Engineering drawing, etc., for the students of diverse backgrounds.
- 2.5** The eligibility criteria such as marks, number of attempts and physical fitness shall be as prescribed by the Institution in adherence to the guidelines of regulatory authorities from time to time.

### **3.0 BRANCHES OF STUDY**

- 3.1** Regulations are applicable to the following B.Tech. Degree

programmes in various branches of Engineering and Technology, each distributed over eight semesters, with two semesters per academic year.

1. Aeronautical Engineering
2. Artificial Intelligence and Data Science
3. Automobile Engineering
4. Biotechnology
5. Civil Engineering
6. Computer Science and Engineering
7. Computer Science and Engineering (Cyber Security)
8. Computer Science and Engineering (Internet of Things)
9. Electrical and Electronics Engineering
10. Electronics and Communication Engineering
11. Electronics and Instrumentation Engineering
12. Information Technology
13. Mechanical Engineering
14. Polymer Engineering

#### **4.0 STRUCTURE OF THE PROGRAMME**

**4.1** Every programme has a curriculum with syllabi consisting of theory and practical courses such as,

- i) Basic Science Courses - BSC
- ii) Humanities and Social Sciences including Management Courses - HSC
- iii) Engineering Science Courses - ESC
- iv) Professional Core Courses - PCC
- v) Professional Elective Courses - PEC
- vi) Open Elective Courses - OEC
- vii) Laboratory Courses – LC
- viii) Laboratory Integrated Theory Courses – LITC
- ix) Mandatory Courses- MC
- x) Project - PROJ (Project work, seminar and internship in industry or at appropriate workplace)

##### **4.1.1 Mandatory Induction Programme for First year Students**

The first year students upon admission shall undergo a mandatory three week induction programme consisting of physical activity, creative arts, universal human values, literary,

proficiency modules, lectures by eminent people, visits to local areas, familiarization with departments / schools and centres, etc.,

#### **4.1.2 Personality and Character Development**

All students shall enroll, on admission, in any of the following personality and character development programmes:

- National Cadet Corps (NCC)
- National Service Scheme (NSS)
- National Sports Organization (NSO)
- Youth Red Cross (YRC)
- Rotaract
- Crescent Indian Society Training Development (ISTD-C)
- Crescent Creative Strokes
- Crescent Technocrats club

The training activities / events / camp shall normally be organized during the weekends / vacation period.

#### **4.1.3 Online Courses for Credit Transfer**

Students are permitted to undergo department approved online courses under SWAYAM up to 40% of credits of courses in a semester excluding project semester with the recommendation of the Head of the Department / Dean of School and with the prior approval of Dean (Academic Affairs) during his / her period of study. The credits earned through online courses ratified by the respective Board of Studies shall be transferred following the due approval procedures. The online courses can be considered in lieu of core courses and elective courses.

#### **4.1.4 Value Added Courses**

The students are permitted to pursue department approved online courses (excluding courses registered for credit transfer) or courses offered / approved by the department as value added courses.

The details of the value added course viz., syllabus, schedule of classes and the course faculty shall be sent to the Dean (Academic Affairs) for approval. The students may also undergo the valued added courses offered by other departments with the consent of the Head of the Department offering the course.

These value added courses shall be specified in the consolidated mark sheet as additional courses pursued by the student over and above the curriculum during the period of study.

#### **4.1.5 Industry Internship**

The students shall undergo training for a period as specified in the curriculum during the summer vacation in any industry relevant to the field study.

The students are also permitted to undergo internship at research organizations / eminent academic institutions for the period prescribed in the curriculum during the summer vacation, in lieu of Industrial training.

In any case, the student shall obtain necessary approval from the Head of the Department / Dean of School and the training has to be taken up at a stretch.

#### **4.1.6 Industrial Visit**

The student shall undergo at least one industrial visit every year from the second year of the programme. The Heads of Departments / Deans of Schools shall ensure the same.

#### **4.2 Each course is normally assigned certain number of credits:**

- one credit per lecture period per week
- one credit per tutorial period per week
- one credit for two to three periods and two credits for four periods of laboratory or practical sessions per week
- one credit for two periods of seminar / project work per week
- one credit for two weeks of industrial training or 80 hours per semester.

#### **4.3 Each semester curriculum shall normally have a blend of lecture courses, laboratory courses, laboratory integrated theory courses, etc.**

#### **4.5 The medium of instruction, examinations and project report shall be in English, except for courses in languages other than English.**

### **5.0 DURATION OF THE PROGRAMME**

#### **5.1 A student is expected to complete the B.Tech. programme in eight semesters (six semesters in the case of lateral entry scheme), but in any case not more than 14 continuous semesters reckoned**

from the date of first admission (12 semesters in the case of lateral entry students).

**5.2** Each semester shall consist of a minimum of 90 working days including the days of examinations.

**5.3** The maximum duration for completion of the programme as mentioned in clause 5.1 shall also include period of break of study vide clause 7.1 so that the student may be eligible for the award of the degree.

## **6.0 REGISTRATION AND ENROLLMENT**

**6.1** The students of first semester shall register and enroll for courses at the time of admission by paying the prescribed fees. For the subsequent semesters registration for the courses shall be done by the student one week before the last working day of the previous semester.

### **6.2 Change of a Course**

A student can change an enrolled course within 10 working days from the commencement of the course, with the approval of the Dean (Academic Affairs), on the recommendation of the Head of the Department of the student.

### **6.3 Withdrawal from a Course**

A student can withdraw from an enrolled course at any time before the first continuous assessment test for genuine reasons, with the approval of the Dean (Academic Affairs), on the recommendation of the Head of the Department of the student.

## **7.0 BREAK OF STUDY FROM PROGRAMME**

**7.1** A student may be allowed / enforced to take a break of study for two semesters from the programme with the approval of Dean (Academic Affairs) for the following reasons:

7.1.1 Medical or other valid grounds

7.1.2 Award of 'I' grade in all the courses in a semester due to lack of attendance

7.1.3 Debarred due to any act of indiscipline

**7.2** The total duration for completion of the programme shall not exceed the prescribed maximum number of semesters (vide clause 5.1).

**7.3** A student who has availed a break of study in the current semester (odd/even) can rejoin only in the subsequent corresponding

(odd/even) semester in the next academic year on approval from the Dean (Academic affairs).

- 7.4** During the break of study, the student shall not be allowed to attend any regular classes or participate in any activities of the Institution. However, he / she shall be permitted to enroll for the '1' grade courses and appear for the arrear examinations.

## **8.0 CLASS ADVISOR AND FACULTY ADVISOR**

### **8.1 Class Advisor**

A faculty member shall be nominated by the Head of the Department as class advisor for the class throughout the period of study except first year.

The class advisor shall be responsible for maintaining the academic, curricular and co-curricular records of students of the class throughout their period of study.

However, for the first and second semester, the class advisors (first year class advisors) are nominated by the first year coordinator.

### **8.2 Faculty Advisor**

To help the students in planning their courses of study and for general counseling, the Head of the Department of the students shall attach a maximum of 20 students to a faculty member of the department who shall function as faculty advisor for the students throughout their period of study. Such faculty advisor shall guide the students in taking up the elective courses for registration and enrolment in every semester and also offer advice to the students on academic and related personal matters.

## **9.0 COURSE COMMITTEE**

- 9.1** Each common theory course offered to more than one group of students shall have a "Course Committee" comprising all the course faculty teaching the common course with one of them nominated as a course coordinator. The nomination of the course coordinator shall be made by the Head of the Department / Dean (Academic Affairs) depending on whether all the course faculty teaching the common course belong to a single department or from several departments. The course committee shall ensure preparation of a common question paper and scheme of

evaluation for the tests and semester end examination.

### **10.0 CLASS COMMITTEE**

A class committee is constituted branch wise and semester wise by the Head of the Department / Dean of the School shall normally comprise of faculty members handling the classes, student representatives and a senior faculty member not handling the courses as chairman.

**10.1** The composition of class committees for first and second semester is as follows:

- i) The first year coordinator shall be the chairman of the class committee
- ii) Faculty members of all individual courses of first / second semester
- iii) Six student representatives (male and female) of each class nominated by the first year coordinator
- iv) The class advisor and faculty advisors of the class

**10.2** The composition of the class committee for each branch from 3<sup>rd</sup> to 8<sup>th</sup> semester is as follows:

- i) One senior faculty member preferably not handling courses for the concerned semester appointed as chairman by the Head of the Department
- ii) All the faculty members handling courses of the semester
- iii) Six student representatives (male and female) of each class nominated by the Head of the Department in consultation with the relevant faculty advisors
- iv) All faculty advisors and the class advisors
- v) Head of the Department

**10.3** The class committee shall meet at least three times during the semester. The first meeting shall be held within two weeks from the date of commencement of classes, in which the components of continuous assessment for various courses and the weightages for each component of assessment shall be decided for the first and second assessment. The second meeting shall be held within a week after the date of first assessment report, to review the students' performance and for follow up action.

**10.4** During these two meetings, the student members shall meaningfully interact and express opinions and suggestions to

improve the effectiveness of the teaching-learning process, curriculum and syllabi, etc.

**10.5** The third meeting of the class committee, excluding the student members, shall meet after the semester end examinations to analyse the performance of the students in all the components of assessments and decide their grades in each course. The grades for a common course shall be decided by the concerned course committee and shall be presented to the class committee(s) by the course faculty concerned.

### **11.0 CREDIT LIMIT FOR ENROLLMENT & MOVEMENT TO HIGHER SEMESTER**

**11.1** A student can enroll for a maximum of 32 credits during a semester including Redo / Predo courses.

**11.2** The minimum credits earned by the student to move to 7<sup>th</sup> semester shall not be less than 60 credits (40 credits for lateral entry students).

### **12.0 ASSESSMENT PROCEDURE AND PERCENTAGE WEIGHTAGE OF MARKS**

**12.1** Every theory course shall have a total of three assessments during a semester as given below:

<b>Assessments</b>	<b>Course Coverage in Weeks</b>	<b>Duration</b>	<b>Weightage of Marks</b>
<b>Assessment 1</b>	1 to 6	1.5 hours	25%
<b>Assessment 2</b>	7 to 12	1.5 hours	25%
<b>Semester End Examination</b>	Full course	3 hours	50%

### **12.2 Theory Course**

Appearing for semester end theory examination for each course is mandatory and a student shall secure a minimum of 40% marks in each course in semester end examination for the successful completion of the course.

### **12.3 Laboratory Course**

Every practical course shall have 60% weightage for continuous assessments and 40% for semester end examination. However, a student shall have secured a minimum of 50% marks in the

semester end practical examination for the award of pass grade.

#### **12.4 Laboratory Integrated Theory Courses**

For laboratory integrated theory courses, the theory and practical components shall be assessed separately for 100 marks each and consolidated by assigning a weightage of 75% for theory component and 25% for practical component. Grading shall be done for this consolidated mark. Assessment of theory components shall have a total of three assessments with two continuous assessments carrying 25% weightage each and semester end examination carrying 50% weightage. The student shall secure a separate minimum of 40% in the semester end theory examination. The evaluation of practical components shall be through continuous assessment.

**12.5** The components of continuous assessment for theory/practical/laboratory integrated theory courses shall be finalized in the first class committee meeting.

#### **12.6 Industry Internship**

In the case of industry internship, the student shall submit a report, which shall be evaluated along with an oral examination by a committee of faculty members constituted by the Head of the Department. The student shall also submit an internship completion certificate issued by the industry / research / academic organisation. The weightage of marks for industry internship report and viva voce examination shall be 60% and 40% respectively.

#### **12.7 Project Work**

In the case of project work, a committee of faculty members constituted by the Head of the Department / Dean of the School will carry out three periodic reviews. Based on the project report submitted by the students, an oral examination (viva voce) shall be conducted as semester end examination by an external examiner approved by the Controller of Examinations. The weightage for periodic reviews shall be 50%. Of the remaining 50%, 20% shall be for the project report and 30% for the viva voce examination.

**12.8** Assessment of seminars and comprehension shall be carried out by a committee of faculty members constituted by the Head of the

Department.

**12.9** For the first attempt of the arrear theory examination, the internal assessment marks scored for a course during first appearance shall be used for grading along with the marks scored in the arrear examination. From the subsequent appearance onwards, full weightage shall be assigned to the marks scored in the semester end examination and the internal assessment marks secured during the course of study shall become invalid.

In case of laboratory integrated theory courses, after one regular and one arrear appearance, the internal mark of theory component is invalid and full weightage shall be assigned to the marks scored in the semester end examination for theory component. There shall be no arrear or improvement examination for lab components.

### **13.0 SUBSTITUTE EXAMINATIONS**

**13.1** A student who is absent, for genuine reasons, may be permitted to write a substitute examination for any one of the two continuous assessment tests of a course by paying the prescribed substitute examination fee. However, permission to take up a substitute examination will be given under exceptional circumstances, such as accidents, admission to a hospital due to illness, etc. by a committee constituted by the Head of the Department / Dean of the School for that purpose. There is no substitute examination for semester end examinations.

**13.2** A student shall apply for a substitute exam in the prescribed form to the Head of the Department / Dean of the School within a week from the date of assessment test. However, the substitute examination will be conducted only after the last instructional day of the semester.

### **14.0 ATTENDANCE REQUIREMENT AND SEMESTER / COURSE REPETITION**

**14.1** A student shall earn 100% attendance in the contact periods of every course, subject to a maximum relaxation of 25% to become eligible to appear for the semester end examination in that course, failing which the student shall be awarded "I" grade in that course.

**14.2** The faculty member of each course shall cumulate the attendance

details for the semester and furnish the names of the students who have not earned the required attendance in the concerned course to the class advisor. The class advisor shall consolidate and furnish the list of students who have earned less than 75% attendance, in various courses, to the Dean (Academic Affairs) through the Head of the Department / Dean of the School. Thereupon, the Dean (Academic Affairs) shall officially notify the names of such students prevented from writing the semester end examination in each course.

- 14.3** If a student secures attendance between 65% and less than 75% in any course in a semester, due to medical reasons (hospitalization / accident / specific illness) or due to participation in the institution approved events, the student shall be given exemption from the prescribed attendance requirement and the student shall be permitted to appear for the semester end examination of that course. In all such cases, the students shall submit the required documents immediately after joining the classes to the class advisor, which shall be approved by the Head of the Department / Dean of the School. The Vice Chancellor, based on the recommendation of the Dean (Academic Affairs) may approve the condonation of attendance.
- 14.4** A student who has obtained an “I” grade in all the courses in a semester is not permitted to move to the next higher semester. Such students shall repeat all the courses of the semester in the subsequent academic year.
- 14.5** The student awarded “I” grade, shall enroll and repeat the course when it is offered next. In case of “I” grade in an elective course either the same elective course may be repeated or a new elective course may be taken with the approval of the Head of the Department / Dean of the School.
- 14.6** A student who is awarded “U” grade in a course shall have the option to either write the semester end arrear examination at the end of the subsequent semesters, or to redo the course when the course is offered by the department. Marks scored in the continuous assessment in the redo course shall be considered for grading along with the marks scored in the semester end (redo) examination. If any student obtains “U” grade in the redo course,

the marks scored in the continuous assessment test (redo) for that course shall be considered as internal mark for further appearance of arrear examination.

- 14.7** If a student with “U” grade, who prefers to redo any particular course, fails to earn the minimum 75% attendance while doing that course, then he / she is not permitted to write the semester end examination and his / her earlier “U” grade and continuous assessment marks shall continue.

### **15.0 REDO COURSES**

- 15.1** A student can register for a maximum of three redo courses per semester without affecting the regular semester classes, whenever such courses are offered by the concerned department, based on the availability of faculty members and subject to a specified minimum number of students registering for each of such courses.

- 15.2** The number of contact hours and the assessment procedure for any redo course shall be the same as regular courses, except there is no provision for any substitute examination and withdrawal from a redo course.

### **16.0 PASSING AND DECLARATION OF RESULTS AND GRADE SHEET**

- 16.1** All assessments of a course shall be made on absolute marks basis. The class committee without the student members shall meet to analyse the performance of students in all assessments of a course and award letter grades following the relative grading system. The letter grades and the corresponding grade points are as follows:

<b>Letter Grade</b>	<b>Grade Points</b>
S	10
A	9
B	8
C	7
D	6
E	5
U	0
W	-

I	-
---	---

**"W"** - denotes withdrawal from the course

**"I"** - denotes inadequate attendance in the course and prevention from appearance of semester end examination

**"U"** - denotes unsuccessful performance in the course.

**16.2** A student who earns a minimum of five grade points ('E' grade) in a course is declared to have successfully completed the course. Such a course cannot be repeated by the student for improvement of grade.

**16.3** Upon awarding grades, the results shall be endorsed by the chairman of the class committee and Head of the Department / Dean of the School. The Controller of Examinations shall further approve and declare the results.

**16.4** Within one week from the date of declaration of result, a student can apply for revaluation of his / her semester end theory examination answer scripts of one or more courses, on payment of prescribed fee, through proper application to the Controller of Examinations. Subsequently, the Head of the Department / Dean of the School offered the course shall constitute a revaluation committee consisting of chairman of the class committee as convener, the faculty member of the course and a senior faculty member having expertise in that course as members. The committee shall meet within a week to revalue the answer scripts and submit its report to the Controller of Examinations for consideration and decision.

**16.5** After results are declared, grade sheets shall be issued to each student, which contains the following details: a) list of courses enrolled during the semester including redo courses / arrear courses, if any; b) grades scored; c) Grade Point Average (GPA) for the semester and d) Cumulative Grade Point Average (CGPA) of all courses enrolled from the first semester onwards.

GPA is the ratio of the sum of the products of the number of credits of courses registered and the grade points corresponding to the grades scored in those courses, taken for all the courses, to the sum of the number of credits of all the courses in the semester.

If  $C_i$ , is the number of credits assigned for the  $i^{\text{th}}$  course and  $GP_i$  is the Grade Point in the  $i^{\text{th}}$  course,

$$GPA = \frac{\sum_{i=1}^n (C_i)(GP_i)}{\sum_{i=1}^n C_i}$$

Where  $n$  = number of courses

The Cumulative Grade Point Average (CGPA) is calculated in a similar manner, considering all the courses enrolled from first semester.

"I" and "W" grades are excluded for calculating GPA.

"U", "I" and "W" grades are excluded for calculating CGPA.

The formula for the conversion of CGPA to equivalent percentage of marks shall be as follows:

Percentage equivalent of marks = CGPA X 10

**16.6** After successful completion of the programme, the degree shall be awarded to the students with the following classifications based on CGPA.

Classification	CGPA
First Class with Distinction	8.50 and above and passing all the courses in first appearance and completing the programme within the prescribed period of 8 semesters for all students (except lateral entry students) and 6 semesters for lateral entry students
First Class	6.50 and above and completing the programme within a maximum of 10 semesters for all students (except lateral entry students) and 8 semesters for lateral entry students
Second Class	Others

#### 16.6.1 Eligibility for First Class with Distinction

- A student should not have obtained 'U' or 'I' grade in any course during his/her study
- A student should have completed the UG programme within the minimum prescribed period of study (except clause 7.1.1)

#### 16.6.2 Eligibility for First Class

- A student should have passed the examination in all the

courses not more than two semesters beyond the minimum prescribed period of study (except clause 7.1.1)

**16.6.3** The students who do not satisfy clause 16.6.1 and clause 16.6.2 shall be classified as second class.

**16.6.4** The CGPA shall be rounded to two decimal places for the purpose of classification. The CGPA shall be considered up to three decimal places for the purpose of comparison of performance of students and ranking.

### **17.0 SUPPLEMENTARY EXAMINATION**

Final year students and passed out students can apply for supplementary examination for a maximum of three courses thus providing an opportunity to complete their degree programme. Likewise, students with less credits in VI semester can also apply for supplementary examination for a maximum of three courses to enable them to earn minimum credits to move to higher semester. The students can apply for supplementary examination within three weeks of the declaration of results in the even semester.

### **18.0 DISCIPLINE**

**18.1** Every student is expected to observe discipline and decorum both inside and outside the campus and not to indulge in any activity which tends to affect the reputation of the Institution.

**18.2** Any act of indiscipline of a student, reported to the Dean (Student Affairs), through the Head of the Department / Dean of the School concerned shall be referred to a Discipline and Welfare Committee constituted by the Registrar for taking appropriate action. This committee shall also address the grievances related to the conduct of online classes.

### **19.0 ELIGIBILITY FOR THE AWARD OF DEGREE**

**19.1** A student shall be declared to be eligible for the award of B.Tech. degree provided the student has:

- i) Successfully earned the required number of total credits as specified in the curriculum of the programme of study within a maximum period of 14 semesters (12 semesters for lateral entry) from the date of admission, including break of study.
- ii) Successfully completed the requirements of the enrolled professional development activity.
- iii) No dues to the Institution, Library, Hostel, etc.

iv) No disciplinary action pending against him/her.

**19.2** The award of the degree must have been approved by the Institution.

## **20.0 MINOR DEGREE PROGRAMMES OFFERED FOR STUDENTS**

**20.1** The students admitted in the following B.Tech. programmes can graduate with a minor degree, which is optional, along with a major degree:

• Civil Engineering	• Mechanical Engineering
• Electronics and Communication Engineering	• Electrical and Electronics Engineering
• Automobile Engineering	• Aeronautical Engineering
• Polymer Engineering	• Biotechnology Engineering
• Electronics and Instrumentation Engineering	• Computer Science and Engineering
• Information Technology	• Artificial Intelligence and Data Science
• Computer Science and Engineering (IoT)	• Computer Science and Engineering(Cyber Security)

**20.2** The eligibility for choosing the minor degree is given as below:

<b>Sl. No.</b>	<b>Minor Degree</b>	<b>Eligible Major Degree Programmes (from other Departments)</b>
1.	Artificial Intelligence and Machine Learning	Mechanical Engineering Aeronautical Engineering
2.	Block Chain	Polymer Engineering
3.	Cyber Security	Automobile Engineering
4.	Data Science	Civil Engineering
5.	Internet of Things (IoT)	Biotechnology Electrical and Electronics Engineering Electronics and Instrumentation Engineering
6.	Virtual and Augmented Reality	Mechanical Engineering Aeronautical Engineering Polymer Engineering Automobile Engineering Civil Engineering Biotechnology Electrical and Electronics Engineering Electronics and Instrumentation Engineering Electronics and Communication Engineering

**20.3** A student shall earn an additional 18 to 20 credits for the award of a minor degree.

**20.4** A student shall be awarded a minor degree only when he / she completes the requirements for the award of major degree stipulated in the respective programme.

**21.0 POWER TO MODIFY**

Notwithstanding all that has been stated above, the Academic Council has the right to modify the above regulations from time to time.

# Three Week Orientation Programme – Mandatory Non-Credit Course

## 15 days of Industrial training during the summer vacation of second year.

The credit will be awarded in the 5<sup>th</sup> Semester.

### 15 days of Industrial training during the summer vacation of third year.

The credit will be awarded in the 7<sup>th</sup> Semester.

\$ Not a Mandatory Course - The student will take up this course during the Summer Holidays of III year as a comprehension of Soft Skills courses offered from semester III to VI. Upon successful completion, the course will be mentioned in grade sheet of VII semester.

**SEMESTER I**

<b>PHD 1181</b>	<b>APPLIED PHYSICS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4</b>		<b>3</b>	<b>0</b>	<b>2</b>	<b>4</b>

**COURSE OBJECTIVES:**

**COB1:** To make the students in understanding the importance of mechanics and properties of matter.

**COB2:** To classify the different types of crystal structures and study their defects.

**COB3:** To correlate the quantum mechanics principles and its impact in its application.

**COB4:** To introduce the basics of oscillations, optics and lasers.

**COB5:** To analyze the acoustics of buildings and applications of ultrasonics

**MODULE I                      MECHANICS AND PROPERTIES OF MATTER                      9**

Moment of inertia (M.I.) - Radius of gyration - Theorems of M .I - M.I of circular disc, solid cylinder , hollow cylinder , solid sphere and hollow sphere - Elasticity – Stress-strain diagram – Factors affecting elasticity – Poisson's ratio - Twisting couple on a wire – Shaft – Torsion pendulum – Bending moment - Depression on a cantilever – Young's modulus by cantilever – Uniform and non-uniform bending – I Shape Girders-Viscosity.

**MODULE II                      CRYSTAL PHYSICS                      9**

Miller Indices-Interplanar distance-closely packed crystal structures and Diamond structures –Reciprocal Lattice -Defects in crystals: voids – Line defects - Edge and screw dislocations - Surface Defects - Crystal Growth Techniques - Bridgman method – Czochralski method (qualitative)- Polymorphism and allotropy in crystals.

**MODULE III                      QUANTUM MECHANICS                      9**

Black body radiation – Planck's theory of radiation – Deduction of Wien's displacement law and Rayleigh – Jean's law from Planck's theory — Dual nature of matter – de-Broglie wavelength - Physical significance of wave function – Schrodinger wave equation – Time independent and time dependent wave equation – Particle in one dimensional box – Quantum computing.

**MODULE IV OSCILLATIONS, OPTICS AND LASERS 9**

Simple harmonic motion - resonance - waves on a string - standing waves - traveling waves - Energy transfer of a wave - Anti-reflection coating - Air Wedge – Michelson's Interferometer – Determination of wavelength of light and thickness of thin transparent sheet-Characteristics of Laser – Spontaneous and Stimulated Emissions – Einstein's Coefficients - Population inversion – Pumping Mechanism – Laser Action – Types of Laser: Nd:YAG laser –CO<sub>2</sub> laser and semiconductor laser - Applications : Laser Materials Processing - Holography.

**MODULE V ACOUSTICS & ULTRASONICS 9**

Basic requirement for the acoustically good halls - Reverberation and time of reverberation – Sabine's formula for reverberation time - Absorption coefficient and its measurement - Factors affecting the architectural acoustics and their remedy-Sound absorbing materials - Introduction to Ultrasonics - Properties - Production methods – Magnetostriction Oscillator method- Piezoelectric Oscillator method – Detection of Ultrasonics –Thermal method – Piezoelectric method – Kundt's tube method – Applications of Ultrasonics – Acoustic Grating – SONAR – Depth of sea – Velocity of blood flow - Ultrasonic Flaw detector.

**PRACTICALS**

List of Experiments

1. Determination of rigidity modulus of the given wire using Torsional pendulum.
2. Determination of young's modulus of the beam by uniform / non-uniform bending method.
3. Determination of young's modulus of the beam by cantilever method.
4. Determination of coefficient of viscosity of low viscous liquid by Poiseuille's flow.
5. Determination of coefficient of viscosity of high viscous liquid by Stoke's method.
6. To determine the frequency of an electrically maintained tuning fork using a vibration generator. (Melde's experiment)
7. Determination of thickness of a thin wire / sheet using Air Wedge method.
8. Determination of wavelength of laser light using semiconductor laser diffraction.
9. Determination of angle of divergence of a laser beam using

semiconductor diode laser and He-Ne laser.

10. Determination of particle size of lycopodium powder using semiconductor laser.
11. Determination of velocity of sound in solids using Kundt's tube method.
12. Determination of velocity of ultrasonic waves in the liquid using ultrasonic interferometer.

**L – 45; P – 30; Total Hours – 75**

**TEXT BOOKS:**

6. Markert J.T., Ohanian. H. and Ohanian, M., Physics for Engineers and Scientists, W.W. Norton & Co., 2007.

**COURSE OUTCOMES:**

- CO1:** grasp the importance of mechanics and the principles of elastic behaviour of materials & apply them to analyze the various substances based on elasticity.
- CO2:** get acquainted with the topics concerning types, defects in crystal structures, methods of preparation and apply the same to categorize different crystal systems in real time
- CO3:** comprehend the importance & principles of quantum mechanics and utilize ideas to understand working of modern devices and its variants.
- CO4:** know the basics of oscillations, optics and lasers and their applications.

**CO5:** assimilate the ideas of acoustical requirements of buildings, understand principles of ultrasonics and add values to their usefulness in acoustical design of halls and their applications.

**Board of Studies (BoS) :**

BOS of Physics was held on 21.6.21

**Academic Council:**

17<sup>th</sup> AC held on 15.07.2021

SDG 4: Ensuring inclusive and equitable quality education for all persons and promote lifelong learning opportunities.

Statement: The modules and topics mentioned in this course are designed to ensure all inclusive and thorough education with equity to all persons and promote learning opportunities at all times.

<b>CHD1181</b>	<b>ENGINEERING MATERIALS AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>APPLICATIONS</b>	<b>3</b>	<b>0</b>	<b>2</b>	<b>4</b>

**COURSE OBJECTIVES:** To make the students conversant with

**COB1:**preparation, properties and applications of various polymers and composites

**COB2:** synthesis, properties and applications of nanomaterials

**COB3:** the basic concepts and different types of catalysts involved in catalytic processes.

**COB4:** basic principles and its applications of certain spectroscopic techniques towards characterization of chemical compounds and concepts of photochemical processes involved in photochemical reactions.

**COB5:** different types of sensors and its applications.

**MODULE I POLYMER AND COMPOSITES 9**

Introduction – classification: source, heat, composition and structure- glass transition temperature – synthesis, properties and applications of polycarbonate, polyurethane, teflon, ABS, kevlar, bakelite, epoxy resin, acrylic polymers (PAN) - biopolymers : importance and applications of biodegradable polymers (PLA, PHBV).

Composites- Introduction - properties and applications: fibre-reinforced plastics (glass, carbon and aramid), ceramic matrix composites (CMC) -- bio-composites.

**MODULE II NANOCHEMISTRY 9**

Introduction – classification based on dimension with examples – properties of nanomaterials (surface to volume ratio and size quantisation effect) - synthesis of nanomaterials (Top-down and Bottom-up)– role of capping & reducing agents - CVD (CNT), laser ablation (Ag, Ag<sub>2</sub>O), electrodeposition (semiconductor materials), precipitation (Ag, Au), thermolysis: solvothermal (CuO, CeO<sub>2</sub>) and hydrothermal (TiO<sub>2</sub>, ZnO, carbon dots), microwave method (metal oxide), bio-nanomaterials - biogenic method (synthesis of Ag, Au by plants extracts, bacteria, fungi)

**MODULE III CATALYSIS 9**

Types of catalysis – Criteria for catalysts - catalysis by transition metal ions and their complexes- solid catalyst - metal oxides and zeolites - shape selective catalysts- mechanism of catalytic action- CO oxidation, NO<sub>x</sub> and

SO<sub>x</sub> reduction – Enzyme catalysis-Mechanism of enzyme action-electrocatalysis -green catalyst.

#### **MODULE IV PHOTOCHEMISTRY AND SPECTROSCOPY 9**

Laws of photochemistry – Quantum yield – Jablonski diagram - photophysical processes - photosensitisation – Quenching– chemiluminescence – bioluminescence

Atomic and molecular spectrum – absorption and emission spectrum - Beer Lambert's law – problems and applications – principles and applications: colorimetry, UV -vis spectroscopy (Chromophore- auxochrome, red and blue shift), atomic absorption spectroscopy, IR spectroscopy (finger print region, functional group interpretation)

#### **MODULE V SENSORS 9**

Sensors – types: bio and toxic chemicals sensors- principle, working and applications of Electrochemical sensors: MEMS and NEMS, - Biosensors- construction, working and classification, Advantages - Biochips - touch sensor (oxi and gluco meter) - Advanced sensors: Smoke and gas sensors, humidity sensors, temperature sensor and alcohol sensor.

#### **PRACTICALS**

List of Experiments

1. Preparation of polymers – phenol-HCHO, urea-HCHO, polylactic acid, epoxy resin
2. Determination of molecular weight and degree of polymerization using Oswald's viscometer.
3. Synthesis of nano-ZnO and CuO by precipitation
4. Demonstration of Laser ablation techniques for nanomaterials.
5. Electrochemical synthesis of graphene oxide
6. One-pot synthesis using green catalyst.
7. Green synthesis: Photocatalytic reactions, solvent - free organic reaction - Aldol; green oxidation, green reduction.
8. Diels - Alder reaction in eucalyptus oil (green process).
9. Spectrophotometer iron estimation.(Beer Lambert's law) determination of Fe<sup>3+</sup>
10. FT-IR spectral characterisation (functional group interpretation)

**L – 45; P – 30; Total Hours– 75**

**TEXT BOOKS:**

1. Jain P.C and Renuka Jain, Physical Chemistry for Engineers, Dhanpat Rai and Sons, New Delhi. 2016.
2. G.A. Ozin and A.C. Arsenault, "Nanochemistry: A Chemical Approach to Nanomaterials", RSC Publishing, Thomas Graham House, Cambridge, 2012.
3. B. Viswanathan, S. Sivasanker and A.V. Ramaswamy (Editors), Catalysis: Principles and Applications, Narosa Publishing House, 2002.
4. Gadi Rothenberg, Catalysis: Concepts and Green Applications, WILEY-VCH
5. Nicholas J. Turro, V. Ramamurthy and Juan C. Scaiano, Principles of molecular photochemistry: An introduction, University Science Books, Sausalito, CA, 2009.
6. John Vetelino, Aravind Reghu, Introduction to Sensors By - 2017.

**REFERENCES:**

1. Jhon S. Wilson, Sensor Technology Handbook, Elsevier 2005.

**COURSE OUTCOMES:**

The students will be able to

**CO1:** enumerate and compare the preparation, properties and applications of various types of polymers and composites.

**CO2:** synthesize different type of nanomaterials on a commercial scale based on its size and applications.

**CO3:** apply the concepts of spectroscopic techniques towards spectral interpretation for identification of compounds and explain various photochemical processes in photochemical reactions.

**CO4:** Impart types, characteristics and applications of different types of catalyst.

**CO5:** categorize the sensors and its applications to real time situation.

**Board of Studies (BoS) :**

11<sup>th</sup>BoS of Chemistry held on 17.06.2021

**Academic Council:**

17<sup>th</sup> AC held on 15.07.2021

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO 10	PO 11	PO 12	PSO1	PSO2	PSO3

SDG 9: To support scientific & technology development and innovation of materials and electronic devices

Introduction of basics on various materials and electronic devices towards innovation on new technology.

<b>MAD 1181</b>	<b>ALGEBRA AND DIFFERENTIAL</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4</b>	<b>CALCULUS</b>	<b>3</b>	<b>1</b>	<b>0</b>	<b>4</b>

**COURSE OBJECTIVES:**

**COB1:** To introduce matrix algebra techniques for engineers to apply in practical problems

**COB2:**To find the roots of polynomial equations using different techniques

**COB3:**To demonstrate the concepts of limits, continuity and application of differential calculus.

**COB4:** To familiarize the students with the functions of several variables

**COB5:** To develop the use of differential equations necessary for engineering applications

**MODULE I                  MATRICES    9+3**

Characteristic Equation- Eigenvalues and Eigenvectors of a real matrix – Properties of Eigenvalues and Eigenvectors – Cayley-Hamilton Theorem (without proof) – Orthogonal matrices – orthogonal transformations of a symmetric matrix to diagonal form – Reduction of quadratic form to canonical form by orthogonal transformation

**MODULE II                  THEORY OF EQUATIONS    9+3**

Introduction - Surds and irrational roots – simple problems – Equations whose roots are in A.P,G.P and in H.P – Relations between the roots and coefficients – symmetric functions – Formation of equations – Decreasing and Increasing the roots – transformation of equation – Reciprocal equations

**MODULE III                  DIFFERENTIAL CALCULUS    9+3**

Limits of functions - one sided limits – Continuity - Curvature – Cartesian and polar coordinates – center and radius of curvature – Circle of curvature – Involute and evolute – Envelopes

**MODULE IV                  DIFFERENTIAL CALCULUS OF SEVERAL    9+3  
VARIABLES**

Laws of limits –Functions of two variables – partial derivatives – total differential – Implicit Functions – Jacobian - Taylor's series expansion – Optima of two variables – Lagrange's multiplier method

**MODULE V            ORDINARY DIFFERENTIAL EQUATIONS            9+3**

Linear equations of second order with constant and variable coefficients –  
Simultaneous first order linear equations with constant coefficients –  
homogeneous equations of Euler's type – method of undetermined  
coefficients- method of variation of parameters

**L – 45 ; T - 15; Total Hours – 60**

**TEXT BOOKS:**

1. Ramana, B.V, "Higher Engineering Mathematics" Tata McGraw Hill Publishing Co. New Delhi, 2010.
2. Grewal B.S., "Higher Engineering Mathematics" 44th edition, Khanna Publishers, New Delhi, 2017.
3. Kreyszig, E., "Advanced Engineering Mathematics", 10th edition, John Wiley and Sons (Asia) Pvt Ltd., Singapore, 2011

5. James Stewart , " Calculus" 7th edition, Brooks/Cole Cengagelearning, UK

**COURSE OUTCOMES:**

At the end of the course students will be able to

**CO1:**use the matrix algebra methods for finding eigenvalues, eigenvectors and diagonalization

**CO2:** solve equations using the relations between roots and coefficients

**CO3:** apply differential calculus in various engineering problems

**CO4:** use differential calculus on several variable functions

**CO5:**solve various types of differential equations that arise in many applications

**Board of Studies (BoS) :**

12<sup>th</sup> BOS of Mathematics & AS held on  
23.06.2021

**Academic Council:**

17<sup>th</sup> AC held on 15.07.2021

SDG 4 : Ensure inclusive and equitable quality education and promote lifelong opportunities for all

Learning of various mathematical techniques like matrices and calculus will lead to knowledge of applications in Engineering problems

<b>GED 1101</b>	<b>ENGINEERING GRAPHICS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>2</b>	<b>0</b>	<b>2</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To introduce the basic concepts of engineering drawing, and familiarize with conic sections, special curves and orthographic projection of points and straight lines

**COB2:** To get practical exposure on projection of planes and solids

**COB3:** To be familiar with sectioning of solids, and development of surfaces

**COB4:** To conversant with 3D isometric projection, and perspective projection of simple solids

**COB5:** To introduce computerized drafting using CADD for drawing the orthographic views of simple solids

**MODULE I      BASICS,      ENGINEERING      CURVES      AND      L: 7**  
**ORTHOGRAPHIC PROJECTION OF POINTS AND      P: 7**  
**STRAIGHT LINES**

Drawing instruments, dimensioning, BIS conventions, types of lines, simple geometric constructions.

Conic sections: ellipse, parabola, hyperbola. Special curves: cycloid, epicycloid, hypocycloid and involutes.

Orthographic projection – first angle, second angle, third angle and fourth angle projections. Orthographic projection of points in all quadrants. Projection of straight lines in first quadrant – true length and true inclinations – traces of straight line.

**MODULE II      PROJECTION OF PLANES AND SOLIDS      L: 7**  
**P: 7**

Projection of plane lamina in first quadrant and its traces

Projection of solids in first quadrant: Axis inclined to one reference plane only- prism, pyramid, cone, and cylinder – change of position method

**MODULE III      SECTION OF SOLIDS AND DEVELOPMENT OF      L:5**  
**SURFACES      P:5**

Section of solids: prism, pyramid, cone and cylinder– sectional view – true shape of section- cutting simple position solids - plane inclined to one reference plane only.

Development of surface of truncated solids: prism, pyramid, cone and cylinder – frustum of cone, pyramid and simple sheet metal parts.

**MODULE IV THREE DIMENSIONAL PROJECTIONS****L:4****P: 4**

Isometric projection: Isometric scale – isometric axes- Isometric projection and view of prism, pyramid, cylinder, cone and frustums.

Perspective projection: station point – vanishing point – Perspective projection and views of prism, pyramid by Visual ray method.

**MODULE V ORTHOGRAPHIC PROJECTION USING CADD****L:7****P:7**

Introduction to CADD - Basic commands for sketching - Editing sketches - creating texts and tables - Basic dimensioning and editing dimensions - Sketching orthographic views of simple solids and machine parts as per first angle projection - Plotting drawings.

**L – 30; P – 30; Total Hours – 60****TEXT BOOKS:**

<https://www.youtube.com/user/BSAUNIV/videos>

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** identify the specifications and standards of technical drawing and draw conic sections, special curves and orthographic projection of points and straight lines

**CO2:** apply the concept of orthographic projection to draw the orthographic views of plane figures and simple solids

**CO3:** draw the sections of solids and development of solid surfaces

**CO4:** apply the concept of isometric and perspective projection to draw the 3-D views of simple solids

**CO5:** draw the orthographic views of simple objects using drafting software

**Board of Studies (BoS):**

18<sup>th</sup>BoS of MECH held on 21.06.2021

**Academic Council:**

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The various industrial standards of technical drawing and the application of orthographic projections to draw simple solids helps to innovate a new design for sustainable industrialization

<b>GED 1102</b>	<b>ENGINEERING DESIGN</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:9</b>		<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:** To learn the basic concepts of design in engineering

**COB2:** To study the basic design thinking principles in problem solving

**COB3:** To encourage the students to develop a prototype using design concepts

**COB4:** To introduce the role of innovation in engineering

**MODULE I INTRODUCTION TO DESIGN 08**

Introduction to Engineering design – Design thinking – Problem identification - Design of Product, Process, System and Software – Case studies on Product, Process, Systems and Software design.

**MODULE II DESIGN THINKING PROCESS 08**

Empathy – Ideate - Need analysis - Voice of customers - product specification - concept generation - Bench marking - Quality function deployment - Concept evaluation - Case studies

**MODULE III PROTOTYPE DESIGN 07**

Product form and function – High level design – Design detailing - Sketch models – Prototypes - 3D printing - Case studies.

**MODULE IV INNOVATION 07**

Creativity and innovation – Role of innovation in Engineering – incremental changes and systemic changes; scientific approach to driving innovation – Intellectual property rights - case studies on innovative products.

**L – 30; Total Hours – 30**

**TEXT BOOKS:**

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The holistic understanding of basic knowledge in Engineering design and its process in the development of prototypes results in satisfying industrial challenges.

<b>GED 1103</b>	<b>MANUFACTURING PRACTICES</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>LABORATORY</b>	<b>0</b>	<b>0</b>	<b>2</b>	<b>1</b>

### **COURSE OBJECTIVES:**

**COB1:** To learn the basics of pipe connections used in household and industrial systems

**COB2:** To educate the usage of welding equipment's and machining methods

**COB3:** To impart knowledge on sand mould preparation for simple components

**COB4:** To explore various tools, instruments and methods used in electrical wiring

**COB5:** To impart knowledge on Design, assembly and testing of electronic circuits

### **PRACTICALS**

List of Experiments:

#### **CIVIL ENGINEERING PRACTICE:**

1. Study of plumbing in general household and industrial systems: Basic pipe connections – Mixed pipe material connection – Pipe connections with different joining components.
2. Making a small window frame with Lap and Mortise & Tenon Joints by sawing planing and cutting.
3. Introduction to power tools

#### **MECHANICAL ENGINEERING PRACTICE**

1. Fabrication of a small Table frame with Butt, Lap and Fillet Joints using Arc Welding - Gas cutting (Demo)
2. Machining of a component using simple turning and drilling practices.
3. Foundry operations such as sand mold preparation for simple component.
4. Plastic Component Manufacturing (Demo on Injection / Blow moulding)

#### **ELECTRICAL ENGINEERING PRACTICE:**

1. Comparison of incandescent, fluorescent, CFL and LED lamps.
2. Domestic, staircase and go down wiring.
3. Measurement of earth resistance.
4. Study of protection devices (small relay, fuse, MCB, HRC, MCCB,

ECCB).

5. Familiarization of household electrical gadgets (Iron Box, Wet Grinder).
6. Study of inverter fed UPS/Emergency lamp

#### **ELECTRONICS ENGINEERING PRACTICE:**

1. Identifications and symbolic representation of active and passive electronic components
2. Soldering and tracing of electronic circuits and checking its continuity
3. Design and testing of electronic circuits using active and passive electronic components

**P – 30; Total Hours – 30**

#### **TEXT BOOK:**

1. S.Gowri and T.Jeyapooan, "Engineering Practices Lab Manual – Civil, Mechanical, Electrical, Electronics included", Vikas Publishing, 5<sup>th</sup> Edition, 2019.

#### **REFERENCES:**

1. SubhransuSekhar Dash & K.Vijayakumar, "Electrical Engineering Practice Lab Manual", Vijay Nicole Imprints Private Ltd., First Edition, 2013.
2. Raghbir Singh Khandpur, "Printed Circuit Boards: Design, Fabrication, and Assembly", Tata McGraw-Hill Education, 2005.

#### **COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** demonstrate Plumbing requirements of domestic buildings.

**CO2:** use welding equipment's to join the structures and to carry out machining operations

**CO3:** perform the task of making sand mould for simple components

**CO4:** execute simple electrical wiring and comprehend the construction and working of household appliances.

**CO5:** assemble and test simple electronic circuits used in day-to-day life

#### **Board of Studies (BoS):**

18<sup>th</sup>BoS of MECH held on 21.06.2021

#### **Academic Council:**

17<sup>th</sup> AC held on 15.07.2021

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2

**Note:** L- Low Correlation    M -Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The holistic understanding of welding, moulding, machining, wiring and electronic circuit increases the access of small-scale industrial and other enterprises in developing countries.

<b>GED 1104</b>	<b>PROGRAMMING FOR PROBLEM</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 8</b>	<b>SOLVING</b>	<b>1</b>	<b>0</b>	<b>2</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:** To explore the hardware and software components of the computer

**COB2:** To learn the structured and procedural programming concepts using C.

**COB3:** To study the constructs of decision making in branching and iteration statements

**COB4:** To learn Functions for effective reusability and readability of the code.

**COB5:** To understand pointer and file operation concepts.

**MODULE I INTRODUCTION TO C PROGRAMMING 05**

Introduction to components of a computer system: disks, primary and secondary memory, processor, operating system, system software, compilers, creating, compiling and executing a program, Introduction to Algorithms: steps to solve logical and numerical problems. Representation of Algorithm, Flowchart/Pseudo code with examples, Program design and structured programming - Structure of C - C Tokens – Data Types – Declaration of Variables and Storage class – Operators – Expressions - Type Conversion.

**MODULE II DECISION MAKING AND ARRAY 05**

Decision Making and Branching: Simple if Statements, The ifelse statements, Nesting of if, else statements, else...if Ladder, switch Statements, goto Statements, Looping: while, do...while, for Statements, Array: One-Dimensional, Two-Dimensional and Multi-Dimensional operations.

**MODULE III USER-DEFINED FUNCTIONS AND FILE OPERATIONS 05**

Definition of Functions - Function Types – Nesting of Functions – Recursion – Structures and Unions – Pointers - File handing operations.

**PRACTICALS****LIST OF PROGRAMS IN C:**

1. Computer organization –Hardware in a typical computer Identification – Booting error messages and what it means
2. Structure of a basic program - Hello world program
3. Data types and Type conversions
4. Input / Output: Formatted functions – Unformatted functions – Library functions

5. Properties of operators – Priority of operators – Arithmetic relational logical and bitwise operators
6. Conditional Statements: If – if else- nested if else- goto- switch case – nested switch case
7. Iteration Statements: for loops – nested for loops – while loop – do-while loop – break and continue statement
8. I/O operations of one- and two-dimensional arrays
9. Bubble Sort and Linear Search using arrays.
10. Functions and its types, Recursion Function
11. Pointers File Operations

**L – 15; P – 30; Total Hours – 45**

**TEXT BOOKS:**

1. Richard L. Stegman, “Focus on Fundamentals of Programming with C”, Ninth Edition, ISBN -170077395X, 9781700773951, 2019.
2. E.Balagurusamy, “Programming in ANSI C”, McGraw Hill Education, Eighth Edition, ISBN-13: 978-93-5316-513-0, ISBN-10: 93-5316-513-X, 2019.

**REFERENCES:**

3. Paul J. Deitel, Deitel & Associates, “C How to Program”, Pearson Education, 7th Edition, ISBN-13: 978-0132990448, 2012.

**COURSE OUTCOMES:**

Students who complete this course will be able to

**CO1:** identify the hardware components and describe the software components of computer.

**CO2:** bring out the importance of structural and procedural programming

**CO3:** write C coding using conditional and iteration statements

**CO4:** develop programs using Functions, Pointers and Files

**CO5:** implement program to build a real time application.

**Board of Studies (BoS) :**

18<sup>th</sup> BoS of CSE held on  
26.07.2021

**Academic Council:**

17<sup>th</sup> AC held on 15.07.2021

SDG 8: Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

Statement: The students can have productive employment and decent work by learning this computer fundamentals and programming course.

**SEMESTER II**

<b>END 1281</b>	<b>ENGLISH FOR ENGINEERS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:**To train students to use appropriate vocabulary in academic and technical contexts

**COB2:**To facilitate students to speak effectively while exchanging ideas and making presentations

**COB3:**To develop students' listening skill for comprehending and analysing information

**COB4:**To develop their reading skill through sub skills like skimming, scanning and critical reading of a text

**COB5:**To sharpen their academic writing skills

**COB6:**To expose them to the correct usage of language and help them to apply that knowledge appropriately

**MODULE I HUMAN RESOURCES 10**

L: Listening to short texts – short formal & informal conversations.

S: Introducing one self – exchanging personal info.

R: Process of reading purposes, Reading comprehension, improving comprehension skills, Reading activities – short comprehension passages, practice in skimming & scanning.

W: Scientific & Technical Writing, Editing skills, Activities – completing sentences, developing hints - Paragraph Writing

Voc. development: Prefixes, Suffixes

Lang. development: Articles, Countable and Uncountable nouns, Present tense, Wh– Questions, Yes or No questions.

**MODULE II TRANSPORT 10**

L: Listening to long scientific talks

S: Sharing personal information – greeting, leave taking.

R: Comprehension passages with multiple choice questions / Wh–questions/ openended questions - Reading longer technical texts & completing exercises based on them.

W: Use of reference words & discourse markers on a text, jumbled sentences, describing a process – flow chart, use of sequence words.

Voc. development: Guessing meanings of words in context, vocabulary used in formal letters, e-mails & reports.

Lang. development: Preposition of Time, Place & Date, Past tense, Conjunctions, Impersonal passive voice, Question tags, Numerical Adjectives.

**MODULE III ENERGY 9**

L: Listening to talk on the topic & completing tasks.

S: Asking about routine actions & expressing opinions.

R: Locating Specific Information

W: Letter seeking permission for Industrial Visit / symposium – Letter of invitation

Voc. development: Sequence words, misspelt words.

Lang. development: Adverbs, Degrees of comparison, Future tense, Homophones

**MODULE IV OUR LIVING ENVIRONMENT 8**

L: Listening to scientific texts & making notes – Effective ways of making notes.

S: Speaking about one's friend.

R: Reading texts & magazines for detailed comprehension. (Students can be asked to read any book of their choice to encourage reading habit)

W: Argumentative writing.

Voc. Development: Synonyms, antonyms, phrasal verbs.

Lang. development: If clauses, Subject - Verb Agreement

**MODULE V TECHNOLOGY 8**

L: Listening to talks (General & Scientific).

S: Short group conversations.

R: Reading and understanding technical articles, Short narratives & articles from Newspaper including conversations.

W: Short essays, Dialogue writing.

Voc. Development: Idioms & Phrases.

Lang. development: Modal verbs.

**L - 45; Total Hours - 45**

**TEXT BOOKS:**

**COURSE OUTCOMES:**

**CO1:**Read articles of a general kind in magazines and newspapers

**CO2:**Participate effectively in conversations, introduce themselves and their friends and express opinions in English

**CO3:**Comprehend conversations and short talks delivered in English

**CO4:**Write short essays of a general kind and letters and emails in English

**CO5:** Express through speaking and writing using appropriate vocabulary and grammar

**Board of Studies (BoS) :**

13<sup>th</sup>BoS of Department of English held on 17.6.2021

**Academic Council:**

17<sup>th</sup> AC held on 15.07.2021

SDG No. 4 : Give Quality Education to all the Engineers

Statement: In future, substantially increase the number of youth and adults who have relevant skills, including technical and vocational skills, for employment, decent jobs and entrepreneurship.

<b>MAD 1283</b>	<b>PARTIAL DIFFERENTIAL</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4</b>	<b>EQUATIONS AND TRANSFORMS</b>	<b>3</b>	<b>1</b>	<b>0</b>	<b>4</b>

**COURSE OBJECTIVES:**

**COB1:** To formulate and solve partial differential equation of first, second and higher orders

**COB2:** To introduce basics and engineering applications of Fourier series

**COB3:** To develop Fourier transform techniques

**COB4:** To introduce techniques and engineering applications of Laplace Transforms

**COB5:** To acquaint with Z -Transform techniques for discrete time systems

**MODULE I PARTIAL DIFFERENTIAL EQUATIONS 9+3**

Formation of partial differential equations by elimination of arbitrary constants and arbitrary functions – Solution of standard types of first order partial differential equations – Lagrange's linear equation – Linear partial differential equations of second and higher order with constant coefficients

**MODULE II FOURIER SERIES 9+3**

Fourier Series and Dirichlet's conditions - General Fourier series – Even and Odd functions - Half range Fourier series - Parseval's identity - Harmonic Analysis

**MODULE III FOURIER TRANSFORMS 9+3**

Fourier integral theorem (without proof) - Fourier transform pair - Fourier Inverse Transform – Properties - Convolution theorem - Parseval's identity

**MODULE IV LAPLACE TRANSFORM 9+3**

Introduction to Laplace transform - Existence of Laplace Transform - Properties of Laplace Transforms - Initial & Final Value Theorems - Inverse Laplace Transform - Convolution Theorem – Circuits to signal square wave: Integral equations with unrepeated complex factors – Damped forced vibrations: repeated complex factors – Resonance - Solution of differential equations

**MODULE V Z – TRANSFORM 9+3**

Introduction and Definition of Z-transform - Properties of Z- Transform - Convolution Theorem of Z-Transform - Inverse Z-transform - Convolution

Theorem of Inverse Z-Transform - Formation of difference equations - Solving Difference Equations using Z-Transform

**L – 45; T - 15; Total Hours – 60**

**TEXT BOOKS:**

1. Kreyszig .E., “Advanced Engineering Mathematics“, 10<sup>th</sup> edition, John Wiley and Sons (Asia) Pvt Ltd., Singapore, 2011.
2. Grewal B.S., “Higher Engineering Mathematics“, 44<sup>th</sup> edition, Khanna Publishers, New Delhi, 2017.
3. Ramana, B.V, “Higher Engineering Mathematics” Tata Mc Graw Hill Publishing Co. New Delhi, 2010.

**REFERENCES:**

1. Veerarajan.T., “Engineering Mathematics“, 5<sup>th</sup> edition, Tata Mc Graw Hill Publishing Co. New Delhi, 2012.

3. Dennis G. Zill, Warren S. Wright, “Advanced Engineering Mathematics“, 4<sup>th</sup> edition, Jones and Bartlett publishers, Sudbury, 2011.
4. Alan Jeffrey, “Advanced Engineering Mathematics“, Academic Press, USA, 2002.

**COURSE OUTCOMES:**

At the end of the course students will be able to

**CO1:**form and solve the partial differential equations

**CO2:**derive a Fourier series of a given periodic function by evaluating Fourier coefficients

**CO3:**apply integral expressions for the forward and inverse Fourier transform to a range of non-periodic waveforms

**CO4:**solve ordinary differential equations using Laplace transforms

**CO5:** solve difference equations using Z-transform

**Board of Studies (BoS) :**

12<sup>th</sup> BOS of Mathematics & AS held on  
23.06.2021

**Academic Council:**

17<sup>th</sup> AC held on 15.07.2021

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2	PSO 3

**Note:** L - Low Correlation    M - Medium Correlation    H - High Correlation

SDG 4 : Ensure inclusive and equitable quality education and promote lifelong opportunities for all

Learning of various mathematical techniques like Partial differential equations and transform techniques will help to solve complicated engineering problems

<b>GED 1201</b>	<b>ENGINEERING MECHANICS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>3</b>	<b>1</b>	<b>0</b>	<b>4</b>

**COURSE OBJECTIVES:**

**COB1:**To impart knowledge about the basic laws of mechanics, resolution of forces, equilibrium of particles in 2D and 3D force systems.

**COB2:** To learn about supports, reactions and equilibrium of rigid bodies

**COB3:**To educate surface properties such as centroid and moment of inertia

**COB4:**To impart knowledge on friction and its applications

**COB5:**To study the laws of motion, impulse, momentum and elastic bodies

**MODULE I VECTOR APPROACH AND EQUILIBRIUM OF PARTICLE L: 11 T: 3**

Introduction - Vectors – Vectorial representation of forces and moments – Vector Algebra and its Physical relevance in Mechanics – Laws of Mechanics – Parallelogram and triangular Law of forces- Coplanar Forces Principle of transmissibility, Resolution and Composition of forces- Forces in plane and space - Lame's theorem - Equilibrium of a particle in 2D plane - Equilibrium of a particle in 3D space - Equivalent systems of forces – Single equivalent force

**MODULE II EQUILIBRIUM OF RIGID BODY L: 7 T: 3**

Free body diagram – Types of supports and their reactions – requirements of stable equilibrium – Moments and Couples – Moment of a force about a point and about an axis –Vectorial representation of moments and couples – Scalar components of a moment –Varignon's theorem - Equilibrium of Rigid bodies in two dimensions –Examples

**MODULE III PROPERTIES OF SURFACES L:10 T:3**

Determination of Areas – First moment of area and the Centroid of sections – Rectangle, circle, triangle from integration – T section, I section, Angle section, Hollow section using standard formula – second and product moments of plane area – Physical relevance - Standard sections: Rectangle,

triangle, circle- composite sections, Hollow section using standard formula – Parallel axis theorem and perpendicular axis theorem – Polar moment of inertia

**MODULE IV FRICTION****L:9****T:3**

Introduction to friction- types of friction- Laws of Coloumb friction- Frictional force – simple contact friction –Block friction– Rolling resistance –ladder friction and wedge friction

**MODULE V LAWS OF MOTION****L:8****T:3**

Review of laws of motion – Newton's second law – D'Alembert's principle and its applications in plane motion; Work Energy Equation of particles– Impulse and Momentum – Impact of elastic bodies.

**L – 45; T – 15; Total Hours – 60****TEXT BOOKS:**

3. R.S. Khurmi., "A Text Book of Engineering Mechanics", S. Chand Publishing, 22<sup>nd</sup> Edition, 2018.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** resolve composite forces, apply concept of equilibrium to particles and solve problems

**CO2:** apply the concept of equilibrium to rigid bodies and solve problems

**CO3:** determine the properties of surfaces

**CO4:** analyse and evaluate the frictional forces between the bodies

**CO5:** apply the laws of motion in solving dynamics problems

**Board of Studies (BoS):**

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of force systems and its components leads to construction of robust engineering systems.

<b>GED 1202</b>	<b>BASIC ELECTRICAL AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 3, 5, 8, 12</b>	<b>ELECTRONICS ENGINEERING</b>	<b>3</b>	<b>0</b>	<b>2</b>	<b>4</b>

**COURSE OBJECTIVES:**

**COB1:**To make the students understand the basic calculations and measurements in DC circuits.

**COB2:**To provide the basic knowledge on AC circuit calculations and measurements.

**COB3:**To familiarize with working and characteristics of different DC and AC machines.

**COB4:**To impart knowledge on basic semiconductor devices and their applications.

**COB5:**To introduce the students to fundamentals of digital electronics.

**MODULE I DC CIRCUITS & MEASUREMENTS 12**

The concept of voltage and current-Electric circuit elements: R, L, C – Independent and dependent sources - Ohm's law- Kirchhoff's law- series and parallel resistive circuits – Voltage and current division – Star-delta transformation - Mesh and nodal analysis of resistive circuits – simple problems - Measurement of voltage, current and power in DC circuits.

**MODULE II AC CIRCUITS & MEASUREMENTS 17**

Sinusoidal voltage - RMS, average, peak value, peak factor and form factor - single phase RL, RC and RLC circuits – phasor representation - complex power – power factor - simple problems - Resonance in RLC circuits – 3 phase balanced circuit calculations– star and delta connections - Principles of measurement of AC voltage, current, power and energy - Measurement of three phase power.

**MODULE III ELECTRICAL MACHINES 18**

Construction, principle of operation, basic equations, characteristics and applications of DC generators, DC motors, single phase transformers and three phase induction motors. Working principle of BLDC Motor and its applications in home appliances. (Qualitative treatment only).

**MODULE IV SEMICONDUCTOR DEVICES AND APPLICATIONS 14**

Introduction to semiconductors - Characteristics of PN Junction Diode –

Zener Diode and its characteristics – SCR and its characteristics — Bipolar Junction Transistor and its characteristics – JFET & MOSFET – their characteristics.

Applications: Half wave and full wave rectifiers - Voltage Regulation – Regulator ICs.

## **MODULE V INTRODUCTION TO DIGITAL CIRCUITS 14**

Logic gates- Boolean algebra theorems– K Map-Introduction to combinational circuits– Flip-Flops – Registers– A/D and D/A Conversion – Data acquisition systems

### **PRACTICALS**

List of Experiments

1. Verification of KCL and KVL (ii) Measurement of voltage, current and power in DC circuits.
2. (i) Resonance of RLC series circuit  
(ii) Measurement of voltage, current, power and power factor in single phase & three phase AC circuits.
3. (i) Magnetization characteristics of DC generator  
(ii) Characteristics of DC shunt motor, single phase transformer and three phase induction motor.
4. Fabrication of a low voltage regulated power supply.
5. Implementation of half and full adders.

**L – 45; P – 30; Total Hours– 75**

8. Thomas L. Floyd, "Digital Fundamentals", 10th Edition Pearson Education Inc., New Delhi, 2008.

**COURSE OUTCOMES:**

At the end of this course, the student will be able to:

**CO1:**perform the basic calculations in DC circuits and measure the various quantities associated with DC circuits.

**CO2:** measure and compute the rms current and voltage, power, power factor and energy in AC circuits.

**CO3:** choose appropriate motor for specific applications based on the motor characteristics.

**CO4:** fabricate a regulated power supply for low voltage applications and build static switches using BJT and SCR.

**CO5:** build simple digital circuits like half adder and full adder.

**Board of Studies (BoS) :**

SDG 3 :Good health and well being.

Statement :Understanding of the fundamentals of electrical and electronics systems can help in designing systems to promote good health and well being.

SDG 5: Gender equality

Statement: Acquiring the interdisciplinary knowledge help overcome the gender barriers in work place.

SDG 8: Decent work and economic

Statement: The learners of this course can get decent work and earn financial benefits and they can work in interdisciplinary areas.

SDG 12: Responsible consumption and production.

Statement: Use of right and energy efficient electric and electronic components and devices results is reasonable consumption and production.

<b>MED 1211</b>	<b>ENGINEERING MATERIALS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To study the classification of materials and selection of materials.

**COB2:** To learn about ferrous materials and their applications.

**COB3:** To impart the knowledge about various non-ferrous materials.

**COB4:** To educate different types of polymer materials and their applications.

**COB5:** To learn about different ceramic, glasses and carbon materials.

**MODULE I CLASSIFICATION OF MATERIALS AND MATERIAL SELECTION L:7**

Engineering materials and their classification: Metals/ Ceramics/Polymers/Glasses, Composites - Material Properties: Mechanical, Physical, Chemical, Electrical, Thermal, Dielectric, Semi-conducting properties of materials, and Degradation of materials - Structure-Property-Processing relationship, Selection of materials for different engineering applications.

**MODULE II FERROUS MATERIALS AND THEIR APPLICATIONS L:10**

Wrought iron - Types of steel and its applications: Carbon steels (low, medium, high), Alloy steel (manganese, silicon, nickel, titanium, copper, chromium, and aluminum), Stainless steel (austenitic, ferritic, martensitic), Tool steel (tungsten, molybdenum, cobalt and vanadium), Special steels - Cast iron types, properties and applications: Grey cast iron, White cast iron, Malleable cast iron, Nodular cast iron, Chilled cast iron, Alloy cast iron.

**MODULE III NON-FERROUS MATERIALS AND THEIR APPLICATIONS L:10**

Properties and applications: Copper and its alloys - Aluminium and its alloys - Lead and its alloys - Zinc and its alloys - Tin and its alloys - Titanium and its alloys - Nickel and its alloys - Magnesium and its alloys.

**MODULE IV POLYMER MATERIALS L:9**

Properties and applications of thermoplastic materials: Polyethylene or Polythene (HDPE, LDPE), Polyvinylchloride (PVC), Polycarbonate (PC),

Polypropylene(PP), Teflon or Polytetrafluoroethylene (PTFE), Polystyrene (PS), Acrylics (Polymethyl Methacrylate PMMA), ABS (Acrylonitril Butadiene Styrene), Silicones, Polyvinylidene Chloride, Polyamides (PA), Polybutylene terephthalate (PBT), Polyether ether ketone (PEEK), Polyphenylene sulfide (PPS) - Properties and applications of thermoset materials: Polyester resin, Polyurethanes, Bakelite, Urea-formaldehyde, Epoxy resin, Polyimides, Furan - Properties and applications of rubber materials - Natural rubber and Synthetic rubber

#### **MODULE V GLASS, CERAMIC AND CARBON MATERIALS L:9**

Properties and applications of glasses: Float glass, Shatterproof glass, Laminated glass, Chromatic glass, Tinted glass, Toughened glass, Glass blocks - Properties and applications of ceramic materials: Clay products, Cements, Oxides: Alumina, Beryllia, Ceria, Zirconia. Non-oxides: Carbide, Boride, Nitride, Silicide, Properties and applications of Carbon, Graphite, Graphene and Diamond.

**L – 45; Total Hours – 45**

### COURSE OUTCOMES:

After completion of the course, students should be able to

**CO1:**select the suitable materials based on their properties

**CO2:**explain the different types of ferrous materials and its applications

**CO3:**compare the properties of different non-ferrous materials

**CO4:**recognize the different types of polymer materials and its applications

**CO5:**choose ceramic materials, glasses and carbon materials for specific Applications

### Board of Studies (BoS) :

18<sup>th</sup>BoS of MECH held on 21.06.2021

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The holistic understanding of engineering materials and components leads to construction of resilient infrastructure and sustainable industrialization.

<b>MED 1212</b>	<b>DESIGN APPRECIATION</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>LABORATORY</b>	<b>0</b>	<b>0</b>	<b>2</b>	<b>1</b>

**COURSE OBJECTIVES:**

**COB1:**To learn the use of standard components such as fasteners, gears, bearings, valves and tools

**COB2:**To get trained in preparing teardown plan and dismantle products

**COB3:**To realize the use of various materials and mechanisms involved in engineering products

**COB4:**To impart knowledge in building engineering products.

**COB5:**To kindle students creativity, ideation and team working skills

**PRACTICALS**

List of Experiments:

**STUDY EXERCISE:**

1. Study of Standard Components (Threaded fasteners, gears, bearings, valves, tools, cutting tools, Belt / chain drives, etc).
2. Study of Automobile Components (Front axle, Rear axle, Differential, Transmission system and Braking system).

**TEAR DOWN EXERCISE:**

Dismantle and assemble the following engineering products to identify the components and its functions.

3. Gear pump, vane pump, axial piston pump and radial piston pump.
4. Reciprocating pump, centrifugal pump and submersible pump.
5. Reciprocating compressor / Blower / Rotary compressor.
6. Work and tool holding devices.
7. Internal combustion engine, gearbox and carburetor.
8. Mechanical components of electronic devices (Motors and generators, CDD, HDD, Printer, CPU and Monitor).

**TOY DESIGN PROJECT:**

Group of students will design simple toys, or products that perform functions like move / respond / shake / jump / flip-flop, etc, when pulled or pushed or turned on. They can work with different materials and mechanisms to create a moving toy.

**P – 30; Total Hours –30****TEXT BOOKS:**

1. Todd McLellan, "Things Come Apart:A Teardown Manual for Modern Living", Thames & Hudson Ltd, 2013.
2. Design Appreciation lab Manual of BSARCIIST.

**REFERENCES:**

3. Kevin Otto, Kristin wood, Product Design, Pearson Publishers, 2013.
4. Chris Van, "Toy Design", Thames& Hudson Ltd, 2009.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:**explain the use of standard components such as fasteners, gears, bearings, valves and tools

**CO2:**dismantle products by preparing teardown plan

**CO3:**identify the materials, design features and mechanisms in engineering systems

**CO4:**develop simple products that perform a function

**CO5:**demonstrate creativity, ideation and team working skills

**Board of Studies (BoS):**

18<sup>th</sup>BoS of MECH held on 21.06.2021

**Academic Council:**

17<sup>th</sup> AC held on 15.07.2021

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of various mechanisms and materials involved in the design of mechanical products shall be used to provide innovative and sustainable solutions for the industry.

<b>GED 1206</b>	<b>ENVIRONMENTAL SCIENCES</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: All</b>		<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

To make the student conversant with the

**COB1:** various natural resources, availability, utilisation and its current scenario.

**COB2:** diverse ecosystems and its function, importance of biodiversity, its values, threats and conservation.

**COB3:** types of pollutants and its impacts on the environment and the effects of natural disasters.

**COB4:** impacts of human population, human health, diseases and immunisation for a sustainable lifestyle.

**MODULE I NATURAL RESOURCES 8**

Natural Resources: Renewable and non-renewable resources: Natural resources and associated problems - (a) Land resources: Land degradation soil erosion and desertification - (b) Forest resources: Use and over-exploitation, deforestation (c) Water resources: Use and over-utilisation of surface and ground water, conflicts over water, dams: benefits and problems, effects on forest and tribal people - (d) Mineral resources: Use and exploitation, environmental effects of extracting and using mineral resources, mining (e) Food resources: World food problems, changes caused by agriculture and overgrazing, effects of modern agriculture (f) Energy resources: Growing energy needs, renewable and nonrenewable energy sources, use of alternate energy sources.

**MODULE II ECOSYSTEMS AND BIODIVERSITY 8**

Concept of an ecosystem - Food chains, food webs, Energy flow in the ecosystem - ecological pyramids - Ecological succession - Characteristic features, structure and function of (a) Terrestrial Ecosystems: Forest ecosystem, Grassland ecosystem, Desert ecosystem (b) Aquatic fresh water ecosystems: Ponds and lakes, rivers and streams (c) Aquatic salt water ecosystems: oceans and estuaries

Biodiversity and its conservation - Types: genetic, species and ecosystem diversity - Values of biodiversity - India as a mega-diversity nation - Invasive, endangered, endemic and extinct species - Hot spots of biodiversity and Red Data book - Threats to biodiversity - Conservation of biodiversity: In-situ and Ex-situ conservation of biodiversity.

**MODULE III ENVIRONMENTAL POLLUTION AND DISASTER MANAGEMENT 8**

Sources, cause, effects and control measures of: (a) Air pollution (b) Water pollution (c) Soil pollution (d) Marine pollution (e) Noise pollution (f) Thermal pollution (g) Nuclear pollution (h) ill-effects of fireworks and upkeep of clean environment, types of fire and fire extinguishers- Solid waste Management: types, collection, processing and disposal of urban waste, industrial waste, e-waste and biomedical wastes - Disaster management: flood, drought, cyclone, landslide, avalanche, volcanic eruptions, earthquake and tsunami.

**MODULE IV HUMAN POPULATION, HEALTH AND SOCIAL ISSUES 6**

Human Population - Population growth, Population explosion, population pyramid among nations - Family Welfare Programme - Human Rights - Value Education - Environment and human health: air-borne, water borne, infectious diseases, contagious diseases and immunisation (all types of vaccines from birth), risks due to chemicals in food and water, endocrine disrupting chemicals, cancer and environment - Sustainable development - Resettlement and rehabilitation of people - Environment Legislative laws- Women and Child Welfare, Public awareness.

**Case studies related to current situation.**

**L – 30; Total Hours – 30**

**COURSE OUTCOMES:**

The student will be able to

**CO1:** analyse the current scenario of various natural resources and their depletion and suggest remedies to curb the exploitation.

**CO2:** identify food chains and web and its function in the environment, assess the impacts on the biodiversity and propose solutions to conserve it.

**CO3:** analyse the types and impacts of pollutants in the environment and propose suitable methods to alleviate the pollutants and the natural disasters.

**CO4:** assess on the impact of human population and the health related issues and immunisation practices and sustainable developments for a healthy life

**Board of Studies (BoS) :**

11<sup>th</sup> BoS of Chem held on  
17.06.2021

**Academic Council:**

SDG All: No Poverty, Zero Hunger, Good Health and Well-Being, Quality Education, Gender Equality, Clean Water and Sanitation, Affordable & Clean Energy, Decent Work and Economic Growth, Industry, Innovation & Infrastructure, Reduced Inequalities, Sustainable Cities and Communities, Responsible Consumption and Production, Climate Action, Life Below Water, Life on Land, Peace, Justice and Strong Institutions, Partnerships for the Goals.

Statement: This course discuss about the environment, all the natural resources available, sharing of resources, effective utilisation, effects of over utilisation, health and environmental issues pertained to that, global warming and related issues, climates, disasters, impact assessments, population, human rights, societal welfare, laws to conserve the environment and sustainability.

**SEMESTER III**

<b>MED 2101</b>	<b>SOLID MECHANICS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:9</b>		<b>2</b>	<b>0</b>	<b>2</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:**To gain knowledge about stresses and strains of solids

**COB2:**To study about shear force and bending moment of the beams

**COB3:**To familiarize with deflection of beams and thin cylinders

**COB4:**To acquire knowledge about torsion of shafts and springs

<b>MODULE I</b>	<b>STRESSES AND STRAINS OF SOLIDS</b>	<b>L:9</b>
		<b>P:12</b>

Rigid and Deformable bodies – Strength, Stiffness and Stability – Stresses : Tensile, Compressive and Shear – Deformation of simple and compound bars under axial load – Thermal stress – Elastic constants – Strain energy and unit strain energy – Strain energy in uniaxial loads - Biaxial stresses at a point – Stresses on inclined plane – Principal planes and stresses – Mohr’s circle for biaxial stresses – Maximum shear stress.

<b>MODULE II</b>	<b>SHEAR FORCE, BENDING MOMENT OF BEAMS</b>	<b>L:8</b>
		<b>P:6</b>

Types of beams: Supports and Loads – Shear force and Bending Moment in beams: Cantilever, Simply supported and Overhanging beams – Stresses in beams – Theory of simple bending – Stress variation along the length and in the beam section.

<b>MODULE III</b>	<b>DEFLECTION OF BEAMS AND THIN CYLINDERS</b>	<b>L:7</b>
		<b>P:6</b>

Beam deflection – Evaluation of beam deflection and slope - Double integration method- Macaulay’s method-Thin cylindrical and spherical shells – Deformation in thin cylindrical and spherical shells.

<b>MODULE IV</b>	<b>TORSION OF SHAFTS AND SPRINGS</b>	<b>L:6</b>
		<b>P:6</b>

Analysis of torsion in circular bars – Shear stress distribution – Bars of solid and hollow circular section – Twist and torsion stiffness – Composite Shaft— Strength of shaft of varying sections-Close-coiled helical springs – Deflection of helical coil springs under axial loads – Design of helical coil springs – stresses in helical coil springs under torsion loads.

**PRACTICALS**

## List of Experiments

1. Stress - Strain evaluation for mild steel
2. Double shear test on Mild steel
3. Double shear test on Aluminum rod.
4. Determination of Strain energy
5. Deflection test on cantilever beam
6. Deflection test on simply supported beam
7. Torsion test on mild steel rod
8. Compression test on helical springs
9. Buckling test on column
10. Biaxial stresses on thin cylinder

**L – 30; P – 30; TOTAL HOURS – 60**

**TEXT BOOKS:**

1. Bansal, R.K, "A text book of strength of material", Laxmi Publication (P) Ltd., 2018.
2. Ramamrutham S & Narayanan R, "Strength of materials", Dhanpat Rai Publication, 2020.

**REFERENCES:**

CO4	H	H	L	M							M		H	M

**Note:** L - Low Correlation    M - Medium Correlation    H - High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of solid mechanics influences the structural integrity within manufacturing industry which is reflected in the production of technically complex components.

<b>MED 2102</b>	<b>ENGINEERING THERMODYNAMICS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:9</b>		<b>2</b>	<b>1</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To study the fundamentals and laws of thermodynamics

**COB2:** To familiarize the concept of entropy and availability

**COB3:** To learn the properties of pure substances and principle of steam power cycles

**COB4:** To gain knowledge on gas mixtures and thermodynamic relations

**COB5:** To study the properties of moist air and psychrometric processes

**MODULE I FIRST LAW OF THERMODYNAMICS L:6  
T:3**

Basic concepts - Thermodynamic systems and control volume - Property, state, path and process - quasi-static process, work, modes of work - Zeroth law of thermodynamics – First law of thermodynamics - Concepts of internal energy, Specific heat capacities, Enthalpy - Energy balance for closed and open systems - First law applied to steady flow devices.

**MODULE II SECOND LAW, ENTROPY AND AVAILABILITY L:7  
T:3**

Second law of thermodynamics – Kelvin's and Clausius' statements -Thermal energy reservoirs - Reversibility and irreversibility - Carnot cycle -Reversed Carnot cycle -Efficiency and COP - Thermodynamic temperature scale- Clausius inequality-Concept of entropy -Entropy of ideal gas and principle of increase of entropy – Carnot theorem -Absolute entropy and availability- Concept of Exergy analysis – Exergy efficiency - Application of Exergy to thermal systems

**MODULE III PROPERTIES OF PURE SUBSTANCES AND  
STEAM POWER CYCLES L:6  
T:3**

Properties of pure substances - Thermodynamic properties of pure substances in solid, liquid and vapour phases -Phase rule, P-V, P-T, T-V, T-S, H-S diagrams - PVT surfaces- Thermodynamic properties of steam - Calculations of work done and heat transfer in non-flow and flow processes - Rankine cycle -Reheat and regenerative cycles – Simple problems - Exergy analysis of vapour power cycles.

**MODULE IV GAS MIXTURES AND THERMODYNAMIC RELATIONS L:6 T:3**

Gas mixtures - Properties of ideal and real gases - Equation of state - Vander Waal's equation of state - Compressibility factor and compressibility chart - Dalton's law of partial pressure, Amagut law - T-ds equations - Maxwell's relations - Clausius Clapeyron equations - Joule – Thomson coefficient

**MODULE V PSYCHROMETRY L:5 T:3**

Psychrometry and psychrometric chart - Property calculations of air vapour mixtures - Psychrometric processes: Sensible and Latent heat exchange processes, Humidification and dehumidification, Adiabatic mixing, Evaporative cooling – Problems –Moisture control techniques - Application of Refrigeration systems

**L – 30; T – 15; TOTAL HOURS – 45**

**TEXT BOOK:**

1. Nag. P.K., “Engineering Thermodynamics”, 5<sup>th</sup> Edition, Tata McGraw-Hill, 2013.

4. Chattopadhyay P “Engineering Thermodynamics”, Oxford University Press, 2015.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** apply the fundamentals of thermodynamics to quantify energy transfer.

**CO2:** explain the second law of thermodynamics applied to heat and refrigerators.

**CO3:** analyse the properties of pure substances and explain the principles of steam power cycles

**CO4:** explain the properties of gas mixtures and thermodynamic relations

**CO5:** demonstrate various Psychrometric processes and their relations

**Board of Studies (BoS):**19<sup>th</sup> BOS held on 21.12.2021**Academic Council:**18<sup>th</sup> AC held on 24.02.2022

CO 5	H	M											M	M

**Note:** L - Low Correlation    M - Medium Correlation    H - High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of thermodynamic principles enables to design and develop a sustainable thermal system.

<b>MED 2103</b>	<b>THEORY OF MACHINES</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:9</b>		<b>3</b>	<b>1</b>	<b>0</b>	<b>4</b>

**COURSE OBJECTIVES:**

**COB1:**To gain knowledge about the basics of mechanisms

**COB2:** To learn about the velocity and acceleration in mechanisms

**COB3:**To acquire knowledge on different types of transmission mechanisms

**COB4:**To gain knowledge on balancing and vibrations in machines

**COB5:**To study about the various controlling mechanisms

<b>MODULE I</b>	<b>FUNDAMENTALS OF MECHANISMS</b>	<b>L:10</b>
		<b>T:2</b>

Introduction - Terminologies associated with theory of machines:Links, pairs, mechanisms, inversion, structure and machines - Different mechanisms and its inversions: Four bar chain mechanism,slider crank mechanism, double slider crank mechanism- Indexing mechanisms – Straight line Mechanisms - Design of Mechanisms – Mobility - Grubler's criterion - Grashoff's law-Mechanical Advantage-Transmission angle.

<b>MODULE II</b>	<b>VELOCITY AND ACCELERATION IN MECHANISMS</b>	<b>L:7</b>
		<b>T:3</b>

Displacement and velocity analysis in mechanisms - Graphical Method – Velocity polygons - Approach to solve velocity and acceleration related to mechanisms using relative velocity method for single slider crank mechanism and four bar chain mechanism - Klein's construction for single slider cranks mechanism - Coriolis component of acceleration-Force analysis-static and dynamic analysis

<b>MODULE III</b>	<b>TRANSMISSION MECHANISMS</b>	<b>L:9</b>
		<b>T:3</b>

Cams and Followers - Types of cams - Types of followers -Displacement, Velocity and Acceleration time curve for cam profiles- Follower motions: uniform velocity, SHM, Uniform acceleration and retardation and Cycloidal motion.

Gears - Spur gear terminology and definitions - Fundamental Law of toothed gearing and involute gearing - Interference and undercutting – Gear Trains – Epicyclic gear trains

**MODULE IV      BALANCING AND VIBRATIONS****L:11****T:4**

Balancing - Concepts and types of balancing - Effects of unbalanced masses - Balancing of revolving masses in same and different planes - Analytical and graphical method - Balancing of reciprocating masses – Variation in tractive force - Hammer blow - Balancing of locomotives- V-Engines.

Vibrations –Undamped free vibrations –Natural frequency of single degree of freedom system - Transverse vibration with point load and UDL-Dunkerley's method - Critical speed of the shaft - Damping factor and Logarithmic Decrement in free vibration - Forced vibrations - Steady state amplitude - Vibration isolation and transmissibility ratio -Problems–Torsional vibrations- Single and two rotor systems.

**MODULE V      CONTROL MECHANISM****L:8****T:3**

Governors - Types : Watt Governor, Porter governor, Proell Governor– Characteristics of governor - Applications

Flywheel - Turning moment diagram – Concept – Use of flywheel for different machines-Fluctuations of energy- Co-efficient of fluctuation of speed and energy – Gyroscopes – Introduction and applications- Problems.

**L – 45; T – 15; TOTAL HOURS – 60****TEXT BOOKS:**

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of different components and forces acting on various mechanisms lead to construction of robust engineering systems.

<b>MED 2104</b>	<b>BASIC MANUFACTURING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:9</b>	<b>PROCESSES</b>	<b>2</b>	<b>0</b>	<b>2</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:**To study the principles of various casting processes and gating system.

**COB2:**To familiarize the various types of metal joining processes

**COB3:** To acquire knowledge on different metal forming operations.

**COB4:** To gain knowledge on the principles of metal cutting processes

**MODULE I      CASTING PROCESSES      L:7  
P:8**

Casting: Basic principles of metal casting - Patterns and allowances - moulding sand properties and testing -Core making -Types of furnaces – Steps involved in sand casting - Fettling - Defects and Inspection of castings - Casting Design: Gating system, Mould filling velocity and time, Determination of solidification time, Riser design and placement - Principle of special casting processes: Shell, Lost wax process, Centrifugal casting, Pressure die casting and Stir casting.

**MODULE II      METAL JOINING PROCESSES      L:7  
P:8**

Principle of welding, soldering, Brazing and adhesive bonding -Gas welding - Principle - Equipment - Flame characteristics- Welding symbols - Metallurgical aspects of welding – Arc welding power sources – Flux covering -Different types of electrodes and their applications - Processes -Resistance welding: Principle, Spot, Seam, Butt – Special welding processes -Electron beam welding - Friction stir welding- Under water welding -Welding Inspection – Defects, Causes & Remedies.

**MODULE III      METAL FORMING PROCESSES      L:10  
P:6**

Classification of Forming Processes– Hot and cold working- Forging operations – Rolling- Types of Rolling mills - Rolling operations -Extrusion - Rod, wire and tube drawing - Mannesmann process of seamless pipe manufacturing -Deep drawing - Principle and Types - Powder Metallurgy: Principle and applications-Sheet metal forming process: Shearing and blanking, bending, drawing, spinning, stretch forming - Formability studies - Forming limit diagram - Defects- Explosive forming - Hydro forming.

**MODULE IV METAL REMOVAL PROCESSES****L:6****P:8**

Machining processes: Turning, Drilling, Reaming, Boring and Milling processes - Tool geometry- Mechanics of orthogonal and oblique cutting - Mechanism of chip formation- Forces in Metal cutting – Tool life – Simple problems - Types of chips - Cutting tool materials- Cutting tool reconditioning- Cutting fluids -Unconventional Machining processes -Types and applications.

**PRACTICALS****LIST OF EXPERIMENTS**

1. Hands on Exercise on wooden Pattern Making
2. Development of simple parts using sand casting techniques
3. Manual Arc welding: Butt joints, Tee and lap joints
4. TIG/MIG welding: Butt joints, Tee and lap joints
5. Detection of welding defects
6. To prepare bolt head using forging
7. To make metal components using Powder metallurgy technique
8. To prepare a sheet metal product (Tray and Funnel).
9. Characterization of Chips based on materials and machining processes
10. To make simple components using different lathe operations.

**L – 30; P-30; TOTAL HOURS – 60****TEXT BOOKS:**

1. Serope Kalpakjian, Steven R. Schmid, “Manufacturing Engineering and Technology”, Pearson Education Sixth Edition, Inc.2018.

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The holistic understanding of basic manufacturing processes enhances the proportion of small-scale industries which will improve the resilient infrastructure and sustainable industrialization.

<b>MED 2105</b>	<b>MACHINE DRAWING LABORATORY</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:9</b>		<b>0</b>	<b>0</b>	<b>2</b>	<b>1</b>

**COURSE OBJECTIVES:**

**COB1:**To familiarize with the codes and specifications of BIS, limits, fits and tolerances

**COB2:**To learn about drawing of orthographic and isometric views of various machine components using conventional drafting instruments

**COB3:**To acquire knowledge on drafting of machine components and assembly using AutoCAD

**PRACTICALS**

List of Experiments:

**STUDY EXERCISE:**

- Study of drawing standards, limits, fits and tolerances.

**MANUAL DRAFTING EXERCISE:**

Draft the following engineering products using orthographic and isometric projection standards.

1. Machine components such as brackets, jigs and fixtures.
2. Machine block and Shaft support.
3. Sliding block and Bearing bracket.
4. Assembly drawing of Cotter joint with socket and spigot ends.
5. Assembly drawing of Screw Jack.

**DRAFTING EXERCISE USING AUTOCAD:**

Draft the following engineering products using orthographic and isometric projection standards.

1. Machine components like brackets, jigs and fixtures.
2. Machine block and Shaft support.
3. Sliding block and Bearing bracket.
4. Flange connector and centering bearing.
5. Assembly drawing of Cotter joint with socket and spigot ends.
6. Assembly drawing of Screw Jack.

**PROJECT:**

Perform reverse engineering and draw the orthographic views of real time products with exact dimensions using AUTOCAD software.

**P - 30; TOTAL HOURS – 30**

**TEXT BOOKS:**

3. David L., Goetsch Williams Chaulk John A., Nelson, "Technical Drawing" (Drafting and Design), Savee Informatics, 2008.

#### COURSE OUTCOMES:

After completion of the course, students should be able to

**CO1:**implement the codes and specifications of BIS in drafting process.

**CO2:**draw the orthographic and isometric views of machine components using conventional method.

**CO3:**draft the assembly drawing of any system / Machine component.

**CO4:**design and draft using AutoCAD software.

**CO5:**demonstrate reverse engineering of machine components

#### Board of Studies (BoS):

19<sup>th</sup>BoS of MECH held on 21.12.2021

#### Academic Council:

18<sup>th</sup> AC held on 24.02.2022

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

Understanding of drafting and designing of mechanical components shall be used to provide innovative and sustainable solutions for the industry.

<b>MED 2106</b>	<b>MECHANICS LABORATORY</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:9</b>		<b>0</b>	<b>0</b>	<b>2</b>	<b>1</b>

**COURSE OBJECTIVES:**

**COB1:**To learn about the properties of solids

**COB2:**To study the dynamic control system such as governor and gyroscope

**COB3:**To acquire knowledge on balancing of dynamic system

**COB4:**To familiarize the dynamics of cam and its profile

**COB5:**To gain knowledge on the basics of vibration

**PRACTICALS**

List of Experiments:

1. Governors - Determination of sensitivity, effort, for watt, porter and proell governors.
2. Cam - Study of jump phenomenon and drawing profile of the cam.
3. Motorised Gyroscope-Verification of law's -Determination of gyroscopic couple.
4. Whirling of shaft-Determination of critical speed of shaft
5. Balancing of reciprocating masses.
6. Balancing of rotating masses.
7. Determination of Moment of inertia by oscillation method for connecting rod and flywheel.
8. Vibrating spring mass system -Determination of damping co-efficient of single degree of freedom system.
9. Determination of torsional frequencies for compound pendulum and flywheel –system with lumped Moment of inertia
10. Transverse vibration – Determination of natural frequency of undamped and damped vibration of beam.

**P - 30; Total Hours – 30**

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:**calculate the geometric properties of components.

**CO2:**analyse the dynamic control system.

**CO3:**determine the unbalanced forces in machinery

**CO4:**construct the profile of different cams.

**CO5:** analyse the vibrations in the mechanical system

**Board of Studies (BoS):**19<sup>th</sup>BoS of MECH held on 21.12.2021**Academic Council:**18<sup>th</sup> AC held on 24.02.2022

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of various mechanisms and their characteristics shall be used to provide innovative and sustainable solutions for the industry.

<b>GED 2101</b>	<b>ESSENTIAL SKILLS AND APTITUDE</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 17</b>	<b>FOR ENGINEERS</b>	<b>0</b>	<b>0</b>	<b>2</b>	<b>1</b>

**COURSE OBJECTIVES:**

**COB1:**To enable them to make effective business presentations

**COB2:**To train them to participate in group discussions

**COB3:**To enhance the problem-solving skills

**COB4:**To train students in solving analytical problems

**MODULE I      ORAL DISCOURSE      07**

Importance of oral communication-verbal and non-verbal communication, Presentation Strategies- one minute presentation (using Audacity/vocaro) - Effective listening skills, listening for specific information

**MODULE II      VERBAL COMMUNICATION      08**

Understanding negotiation, persuasion & marketing skills - Listening to short conversations & monologues - Group Discussion techniques - Role plays - Interview techniques

**MODULE III      BASIC NUMERACY      08**

Simplification and Approximation – Competitive Examination Shortcut Techniques - Number Systems - Simple and Compound Interest-Progression

**MODULE IV      ANALYTICAL COMPETENCY      07**

Blood Relations – Clocks and Calendars – Coding and Decoding – Analytical Reasoning(Linear Arrangement, Circular Arrangement, Cross Variable Relationship and Linear Relationship)– Directions .

**L – 30; TOTAL HOURS- 30**

SDG 17: Strengthen the means of implementation and revitalize the global partnership for sustainable development.

Statement: This course ensures capacity building and skills development requisite for implementing global partnership.

**SEMESTER IV**

<b>MED 2211</b>	<b>THERMAL ENGINEERING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>2</b>	<b>1</b>	<b>2</b>	<b>4</b>

**COURSE OBJECTIVES:**

**COB1:** To learn the working principle of internal combustion engines and its sub systems

**COB2:** To study gas power cycles and performance of IC engines

**COB3:** To gain knowledge on working and performance of steam nozzles and turbines

**COB4:** To familiarize about various types of compressors and their performance

**COB5:** To acquire knowledge on refrigeration and air conditioning systems

<b>MODULE I</b>	<b>I.C. ENGINES</b>	<b>L:9</b>
		<b>P:6</b>

Classification of IC engine: Components and functions, Two stroke and Four stroke engines, working principle – Actual and theoretical valve timing diagrams- Port timing diagrams and PV diagrams-Comparison – Two stroke and four stroke engines: Petrol and Diesel engines – Fuel supply systems and ignition systems – Lubrication and cooling systems – Introduction to Hybrid IC Engines.

<b>MODULE II</b>	<b>AIR STANDARD CYCLES AND IC ENGINE PERFORMANCE</b>	<b>L:9</b>
		<b>P:6</b>

Air cycles: Otto, Diesel, Dual and Brayton cycles – Calculation of mean effective pressure and air standard efficiency – Actual and theoretical PV diagram of two stroke and four stroke engines – Performance test on IC engine and Heat balance calculation – Knocking and Detonation – Exhaust gas analysis – Current trends in IC engines (BS VI)

<b>MODULE III</b>	<b>STEAM NOZZLES AND TURBINES</b>	<b>L:9</b>
		<b>P:6</b>

Flow of steam through nozzles: Shapes of nozzles, Effect of friction, Critical pressure ratio, Super saturated flow – Impulse and reaction principles: Compounding -Velocity diagrams for single and multistage turbines – Speed regulations - Governors –Introduction to Advanced Ultra Super critical (AUSC) power plants.

**MODULE IV      AIR COMPRESSORS      L:9  
P:6**

Air Compressor: Classification and working principle, Work of compression with and without clearance, Volumetric efficiency, Isothermal efficiency and Isentropic efficiency – Multistage air compressor and inter cooling - Working of multistage air compressor - Problems in single and two stage air compressors – Various types of rotary compressors (Descriptive treatment only).

**MODULE V      REFRIGERATION AND AIR CONDITIONING      L:9  
SYSTEMS      P:6**

Vapour compression refrigeration cycle: Super heating, Sub cooling, Performance calculations – Working principle of vapour absorption system- Ammonia-water – Psychrometry-Psychometric chart -Cooling load calculation – Air conditioning Systems - Summer and winter air conditioning systems – Requirements for comfort and industrial air-conditioning – Star Rating in R & AC systems.

**PRACTICALS****LIST OF EXPERIMENTS:**

1. (a) Experimental study on valve timing diagram in 4-stroke engine cut model.  
(b) Experimental study on port timing diagram in 2-stroke engine cut model.
2. Experiment on Fuel properties a) Viscosity b) Fire and Flash point  
c) Calorific Value
3. Performance test on constant speed 4-stroke diesel engine.
4. Heat balance test on 4-stroke twin cylinder diesel engine.
5. IC engine performance and heat balance evaluation using PC interface.
6. Motoring test on 4-stroke diesel engine with electrical loading.
7. Retardation test on 4-stroke diesel engine with mechanical loading.
8. Study on the composition of Exhaust gas of an IC engine using Orsat Apparatus under various loads.
9. Performance test on high pressure two stage reciprocating air compressor.
10. Experiment on air conditioning unit.
11. Experiment on vapour compression refrigeration unit.
12. Experiment on vapour absorption refrigeration unit.

**L – 30; T – 15; P-30; TOTAL HOURS – 75**

**TEXT BOOKS:**

1. Rajput, R.K, "Thermal Engineering", 9<sup>th</sup> Edition, Laxmi Publications Pvt Ltd., 2019.

**REFERENCES:**

6. Frank Kreith, "Hand Book of thermal Engineering", CRC press, 2013.
7. Manohar Prasad, "Refrigeration and Air-conditioning" Revised 2<sup>nd</sup> edition, new age international, 2009.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** describe the construction and working of IC engines and sub systems

**CO2:** determine the thermal efficiency of gas power cycles and IC engines

**CO3:** analyze the performance of steam nozzles and turbines

**CO4:** explain and evaluate the performance of air compressors

**CO5:** describe the refrigeration and air conditioning systems and perform cooling load calculations.

**Board of Studies (BoS):**

19<sup>th</sup> BOS held on 21.12.2021

**Academic Council:**

18<sup>th</sup> AC held on 24.02.2022

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

**Note:** L - Low Correlation    M - Medium Correlation    H - High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation

The knowledge of thermal engineering enables to design and develop thermal power equipment.

<b>MED 2212</b>	<b>FLUID MECHANICS AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:9</b>	<b>MACHINERY</b>	<b>2</b>	<b>1</b>	<b>2</b>	<b>4</b>

**COURSE OBJECTIVES:**

**COB1:** To learn the fundamental concepts and properties of fluids

**COB2:** To study the kinematics and dynamics of fluid flow and their measurements

**COB3:** To familiarize with fluid flow equations for incompressible fluid

**COB4:** To acquire knowledge on boundary layer concepts and dimensional analysis

**COB5:** To gain knowledge on hydraulic turbines and pumps

<b>MODULE I</b>	<b>FUNDAMENTALS OF FLUID MECHANICS</b>	<b>L:9</b>
		<b>P:6</b>

Fluid Properties – Definition -Distinction between solid and fluid – Units and Dimensions – Properties of fluid: Density and its measurements, specific weight, specific volume, specific gravity, temperature, viscosity, compressibility, vapour pressure, capillary and surface tension – Fluid statics: concept of fluid static pressure, absolute and gauge pressure – Pressure measurements by manometer pressure gauges.

<b>MODULE II</b>	<b>FLUID KINEMATICS AND FLUID DYNAMICS</b>	<b>L:9</b>
		<b>P:6</b>

Fluid Kinematics - Flow visualization – Lines of flow – Types of flow– Velocity field and acceleration – Continuity equation (1D and 3D forms) – Equation of stream line: Stream function, Velocity potential function, Circulation, Flow net – Fluid dynamics: Equation of motion, Euler's equation along streamline, Bernoulli's equation – Applications: Venturimeter, Orifice meter, Pitot tube.

<b>MODULE III</b>	<b>INCOMPRESSIBLE FLUID FLOW</b>	<b>L:9</b>
		<b>P:6</b>

Viscous flow – Navier's Stoke equation (statement only) : Shear stress, pressure gradient relationship – Laminar flow between parallel plates – Laminar flow through circular tubes (Hagen poiseulle's law) – Hydraulic and energy gradient – Flow through pipes - Darcy's Weisback's equation – Pipe roughness - friction factor – Moody's diagram - minor losses – Flow through pipes in series and in parallel power transmission – Case studies in pressure loss calculations.

**MODULE IV            BOUNDARY LAYER & DIMENSIONAL ANALYSIS            L:9  
P:6**

Boundary Layer theory - Boundary layer separation – Drags and lifts coefficients – Buckingham's  $\pi$  Theorem – Applications - Similarity laws and models – Introduction to Computational Fluid Dynamics (CFD).

**MODULE V            HYDRAULIC MACHINES            L:9  
P:6**

Hydraulic Turbines: Definition and classification – Exchange of energy – Euler's equation for turbo machines - Impulse and Reaction turbines: Working principles and construction of velocity vector diagrams, performance curve for turbines.

Hydraulic Pumps: Definition and classifications – Centrifugal pump: classifications and velocity triangles, specific speed, efficiency and performance curves – Reciprocating Pump: Classification, working principle, indicator diagram, Air vessels – Criteria for selection of pumps.

**PRACTICALS****LIST OF EXPERIMENTS:**

1. Comparison of coefficient of discharge of given orifice meter and Venturi meter.
2. Calibration of Rotameter.
3. Determination of various losses for the given set of pipes.
4. Performance study of centrifugal pumps / Submersible pumps.
5. Determination of maximum efficiency for the given reciprocating pump.
6. Characteristic curves for Gear pump / Vane pump.
7. Determination of maximum power at constant speed / constant load for an impulse turbine.
8. Performance characteristic of reaction turbine.
9. Impact of jet on flat and curved vanes.
10. Performance test on a jet pump.
11. Flow visualization: Laminar and Turbulent flows.

**L – 45; P-30; TOTAL HOURS – 75**

**TEXT BOOKS:**

1. Bansal. R.K "Fluid Mechanics and hydraulics Machines", Revised 9<sup>th</sup> edition , Laxmi Publications (P) Ltd, New Delhi, 2015.

CO5	M	M		M									M	M

**Note:** L - Low Correlation    M - Medium Correlation    H - High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of fundamentals of fluid mechanics provides foundation for design and development of hydraulics and fluid machinery.

<b>MED2213</b>	<b>DESIGN OF MACHINE ELEMENTS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:9</b>		<b>3</b>	<b>1</b>	<b>0</b>	<b>4</b>

**COURSE OBJECTIVES:**

- COB1:**To learn steady and variable stresses in a machine element  
**COB2:**To gain knowledge on design of shafts, keys and couplings  
**COB3:**To familiarize on design of springs  
**COB4:**To study the design process of bolted, riveted and welded joints  
**COB5:**To acquire knowledge on design of bearings

**MODULE I    STEADY AND VARIABLE LOADING** **L:10**  
**T:3**

Machine design: Definition, Design process, Machine element design, Standards and codes in design - Design for static loading: Modes of failure, Factor of safety, Eccentric loading, Theories of failure- Design for variable loading: Stress concentration, Fatigue failure, Endurance limit - Design equations: Soderberg, Goodman and Gerber equations - Combined stresses - Curved beams- Crane hook – C Frame

**MODULE II    SHAFTS, KEYS AND COUPLINGS** **L:8**  
**T:3**

Design of shafts: Forces on shafts due to gears, belts and chains - Design for strength and rigidity – Lateral stiffness -Torsional rigidity - Critical speed - Design of keys – Design of Couplings: Rigid, flange and muff couplings.

**MODULE III    SPRINGS** **L:9**  
**T:3**

Helical springs -Stresses and deflection in helical springs for variable loading - Concentric springs - Design of leaf springs - Stress and deflection equation – Nipping -Springs in automobile suspension system.

**MODULE IV    RIVETED, BOLTED AND WELDED JOINTS** **L:9**  
**T:3**

Riveted joints: Design, Modes of failure, Strength and efficiency – Axial loading and Eccentric loading - Lozenge joints - Bolted joints - Design of eccentrically loaded bolted joints - Welded joints: Types, Design of welded joints for different types of loading, Unsymmetrical sections.

**MODULE V BEARINGS****L:9****T:3**

Rolling contact bearings: Types, Method of assembly, Load ratings, Bearing failure, Preloading - Design of deep groove ball bearings and roller bearings - Bearing mounting for machine tool spindles and axles of automobiles - Sliding contact bearings - Theory of lubrication -Hydrodynamic bearings - Sommerfeld number - Design of hydrodynamic bearings.

**L – 45; T – 15; TOTAL HOURS – 60**

**Note:** L - Low Correlation    M - Medium Correlation    H - High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The holistic understanding of different machine elements and their design aspects lead to a path for providing innovative solutions to the complex engineering problems.

<b>MED 2214</b>	<b>MATERIALS ENGINEERING AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:9</b>	<b>TECHNOLOGY</b>	<b>2</b>	<b>0</b>	<b>2</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To learn different microstructures and phase diagrams

**COB2:** To study about various heat treatment processes

**COB3:** To gain knowledge on different mechanical testing methods

**COB4:** To familiarize with various strengthening mechanisms and acquire knowledge about fracture and its prevention

<b>MODULE I</b>	<b>MICROSTRUCTURAL CHARACTERISATION</b>	<b>L:6</b>
	<b>&amp;PHASE DIAGRAMS</b>	<b>P:9</b>

Introduction to microstructures - Optical microscopes –Types -Working principle - Metallographic preparation techniques - ASTM grain size standards - Grain size estimation - Basics of electron microscopy -Solid solutions - Gibbs phase rule- Lever rule- Unary and binary eutectic phase diagram- Examples and applications of phase diagrams - Iron- Iron carbide phase diagram - Phase transformations: Basic concepts, Isothermal and Continuous cooling transformation diagrams.

<b>MODULE II</b>	<b>HEAT TREATMENT</b>	<b>L:6</b>
		<b>P:6</b>

Heat treatment processes – Purpose – Procedures – Applications of various heat treatment processes- Hardness vs hardenability - Jominy end quench test -Full annealing- Process annealing -Stress relief annealing- spheroidising annealing - Isothermal annealing- Normalizing - Hardening- Tempering- quenching medium - Different types and their relative merits-Case hardening : pack carburizing, cyaniding, nitriding , induction hardening and flame hardening.

<b>MODULE III</b>	<b>MECHANICAL TESTING OF MATERIALS</b>	<b>L:6</b>
		<b>P:12</b>

Scope and significance of parameters in the test and standards -Tensile testing - Effect of strain rate and temperature on flow properties – Compressive testing -Torsion Test -Mechanical properties in torsion - Torsional stresses for large plastic deformation - Hardness Test - Hardness testing system - Concept of micro hardness - Major hardness testing systems: Brinell, Rockwell and Vickers - Special hardness tests: Shore and Mohs -Fatigue Tests - Stress cycles and SN curve statistical nature of fatigue - Fatigue testing machines and equipment's - Impact test - DBTT - Creep

curve and its analysis - Stress rupture test- Presentation of engineering creep data - Equipment test set up in creep testing.

**MODULE IV STRENGTHENING MECHANISMS AND THEORY OF FRACTURE L:12 P:3**

Basic concepts - Dislocations and plastic deformations - Solid solution strengthening - Strengthening by grain size reduction -Precipitation hardening - Particle and fiber dispersion strengthening -Strain hardening - Recovery, Recrystallisation and grain growth - Fundamentals - Mechanism of plastic deformation: Slip and Twinning - Types of fracture - Ductile fracture - Mechanism and prevention - Brittle fracture- Principles of fracture mechanics - Griffith's theory on fracture- Stress intensity factor and Fracture toughness - Creep and Fatigue fracture - Factors affecting fracture –Prevention.

**PRACTICALS**

**LIST OF EXPERIMENTS:**

1. Specimen preparation for microstructural examination- cutting, grinding, polishing, etching.
2. Identification of microstructures of ferrous and Non-ferrous materials.
3. Heat treatment: Annealing, normalizing, hardening and tempering of steel- Hardness and its microstructure.
4. Identification of microstructure of welded (HAZ) and cast component.
5. Hardenability test -Jominy End quench test.
6. Compression test.
7. Deflection test
8. Impact test.
9. Double Shear test
10. Fatigue test

**L – 30; P - 30; TOTAL HOURS – 60**

**Note:** L - Low Correlation    M - Medium Correlation    H - High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

Holistic understanding of microstructure of metals, strengthening mechanism and testing protocol enhances the performance and life of the components.

<b>MED 2215</b>	<b>MACHINE TOOLS AND METROLOGY</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:9</b>		<b>3</b>	<b>0</b>	<b>2</b>	<b>4</b>

**COURSE OBJECTIVES:**

**COB1:**To gain knowledge on centre and CNC lathes

**COB2:** To familiarise with special machine tools

**COB3:**To learn the basics of measurement system, devices and calibration

**COB4:**To study various comparators and form measurement techniques

**COB5:**To learn various industrial mechanical parameter measurements

**MODULE I CENTRE AND CNC LATHES L:6  
P:6**

Centre lathe - Constructional features - Cutting tool geometry - Basic operations - Taper turning methods - Machining time calculation - Capstan and turret lathes - CNC turning centre - Constructional features – Turret - Linear motion guide ways - Ball screw - Axes feed drive arrangement - Hydraulic chuck – ATC - Feedback devices - Linear encoder - Rotary encoder.

**MODULE II SPECIAL MACHINE TOOLS L:12  
P:6**

Reciprocating machine tools : Shaper, Planer and Slotter- Milling- Types of milling machines - Horizontal and Vertical – Drilling - Column and radial drilling machines - Abrasive processes - Grinding wheel designation and selection - Types of grinding processes - Cylindrical grinding - Surface grinding - Centreless grinding – Honing – Lapping - Gear cutting – Forming – Generation – Hobbing - Broaching machine - Types – Broaching operation.

**MODULE III BASICS OF MEASUREMENT SYSTEM, DEVICES AND CALIBRATION L:9  
P:9**

Definition of metrology – Accuracy - Precision and sensitivity - Three stages of generalized measurement system - Mechanical loading - Factors considered in selection of instruments - Commonly used terms – Uncertainty – Traceability - Error analysis and classification - Sources of error - Linear and Angular Measurements – Verniers and micrometers – Sine bar and sine centre -Tool makers microscope -Principle of interferometry - Michelson interferometer - Laser interferometer - Principles of calibration - Calibration of

measuring instruments - Slip gauges - Dial indicator - Surface plates.

**MODULE IV      COMPARATORS AND FORM MEASUREMENT      L:9**

**P:9**

Comparators – Mechanical – Electrical - Optical and pneumatic - Tool makers microscope - Limit gauge – Types - Design of plug gauge - Taylor's principle - Components of surface texture – Roughness – Lay – Waviness - Ra and Rz - Surface roughness meter - ISO metric thread - Measurement of major, minor and effective diameters - Gear terminology - Spur gear measurement - Base pitch measurement – Constant chord method - Roundness measurement – CMM : Construction and types.

**MODULE V      INDUSTRIAL MEASUREMENTS      L:9**

Position sensors – Potentiometer – LVDT - Proximity sensors – Types - Vibration sensors - Seismic instrument - Torque sensors - Strain gauges - Temperature sensors - Resistance temperature detector – Thermistor – Thermocouples – Thermopiles - Optical pyrometer - Pressure sensor - Elastic transducers - Pressure cell - Bulk modulus pressure gauge - Low pressure measurement - Flow measurement – Orifice and venturi meter - Turbine type meter - Hotwire anemometer - Magnetic flow meter.

**PRACTICALS**

List of Experiments

**Machining:**

1. Step turning and drilling by Capstan lathe
2. Machining of bush and shaft as per dimensions
3. Machining the double start V thread
4. Spur gear milling
5. Machining a keyway using slotting machine
6. Grinding a rectangular mild steel block using surface grinder.

**Measurement:**

1. Calibration and Error analysis of measuring instruments
2. Angular measurement using sine bar, sine center and standard balls and rollers
3. Tool geometry measurement using toolmaker's microscope
4. Gear roll testing (i) Tooth to tooth composite error (ii) Tooth thickness measurement using gear tooth vernier caliper.
5. Measurement of effective diameter of external parallel screw threads using floating carriage micrometer
6. Study of Coordinate Measuring Machine (CMM) and surface

roughness measurement

**L – 45; P – 30; TOTAL HOURS – 75**

5. Venkateshan S P, "Mechanical Measurements", John Wiley & Sons, 2015.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** demonstrate the production of components using Centre and CNC lathes

**CO2:** explain the manufacturing of components using special machine tools

**CO3:** explain the basics of measurement system, devices and calibration.

**CO4:** elucidate the use of various comparators and form measurement techniques

**CO5:** describe different industrial mechanical parameter measurements.

**Board of Studies (BoS):**

19<sup>th</sup> BOS held on 21.12.2021

**Academic Council:**

18<sup>th</sup> AC held on 24.02.2022

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

CO5	L			L									M	H

**Note:** L - Low Correlation    M - Medium Correlation    H - High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of various machine tools and measurement science enhance the industrial technologies and promote sustainable industrialisation.

<b>GED 2201</b>	<b>WORKPLACE SKILLS AND APTITUDE</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 8</b>	<b>FOR ENGINEERS</b>	<b>0</b>	<b>0</b>	<b>2</b>	<b>1</b>

**COURSE OBJECTIVES:**

**COB1:**To expose them to reading for specific purposes, especially in professional contexts

**COB2:**To expose them to the process of different kinds of formal writing

**COB3:**To prepare the students to be successful in their career

**COB4:**To familiarize various problem-solving techniques in aptitude and puzzles.

**MODULE I EXTENSIVE READING & WRITING 07**

Reading for comprehension - inferring and note-making – Process of writing- paragraph development - elements of business writing: Email, memos.

**MODULE II INTENSIVE READING & WRITING 08**

Intensive reading and reviewing - Interpretation of charts, graphs - Résumé - Letter of enquiry, thanksgiving letters.

**MODULE III QUANTITATIVE APTITUDE 08**

Percentage - Ratio and Proportion - Profit and Loss – Averages, Allegations and Mixtures.

**MODULE IV LOGICAL COMPETENCY 07**

Syllogism – Blood Relations- Number, Alpha and Alpha numeric series - Puzzles – Cubes and Dice - Odd One Out-Coding and Decoding

**L – 30; TOTAL HOURS - 30**

SDG 8:Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all.

Statement:Demonstrating, Drafting and applying various techniques for sustainable growth to employment.

<b>GED 2202</b>	<b>INDIAN CONSTITUTION AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 16</b>	<b>HUMAN RIGHTS</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>0</b>

**COURSE OBJECTIVES:**

**COB1:** To explicate the emergence and evolution of Indian Constitution.

**COB2:** To have an insight into the philosophy of fundamental rights and duties, and Directive Principles.

**COB3:** To differentiate the structure of executive, legislature and judiciary.

**COB4:** To understand human rights and its implication - local and international and redressal mechanism.

**MODULE I INTRODUCTION AND BASIC INFORMATION ABOUT INDIAN CONSTITUTION 8**

Meaning of the constitution law and constitutionalism - Historical Background of the Constituent Assembly - Government of India Act of 1935 and Indian Independence Act of 1947 - The Constituent Assembly of India - Enforcement of the Constitution - Indian Constitution and its Salient Features - The Preamble of the Constitution. Citizenship.

**MODULE II FUNDAMENTAL RIGHTS, DUTIES AND DIRECTIVE PRINCIPLES 7**

Fundamental Rights and its Restriction and limitations in different complex situations - Directive Principles of State Policy (DPSP) & its present relevance in our society with examples- Fundamental Duties and its Scope and significance in nation building - Right to Information Act 2005.

**MODULE III GOVERNANCE IN INDIA 8**

The Union Executive – the President and the Vice-President – The Council of Ministers and the Prime Minister – Powers and functions. The Union legislature – The Parliament – The Lok Sabha and the Rajya Sabha, Composition, powers and functions – Government of the State - The Governor – the Council of Ministers and the Chief Minister – Powers and Functions-Elections-Electoral Process and Election Commission of India - Indian judicial system.

**MODULE IV HUMAN RIGHTS AND INDIAN CONSTITUTION 7**

Human rights – meaning and significance - Covenant on civil and political rights - Covenant on Economic, Social and Cultural rights - UN mechanism and agencies - The Protection of Human Rights Act, 1993 – watch on human

rights and enforcement - Roles of National Human Rights Commission of India - Special Constitutional Provisions for SC & ST, OBC - Special Provision for Women, Children & Backward Classes.

**L – 30; TOTAL HOURS –30**

**TEXT BOOKS:**

1. B.K. Sharma, Introduction to the Constitution of India, 6th ed., PHI Learning Private Limited, New Delhi 2011
2. Durga Das Basu “Introduction to the Constitution on India”, (Students Edition.) Prentice –Hall EEE, 19th / 20th Edn. 2008
3. M.P. Jain, Indian Constitutional Law, 7th ed., LexisNexis, Gurgaon. 2014.

4. Sharma Brij Kishore “Introduction to the Indian Constitution”, 8th Edition, PHI Learning Pvt. Ltd. 2015
5. Latest Publications of NHRC - Indian Institute of Human Rights, New Delhi.

**COURSE OUTCOMES:** At the end of the course, the students will be able to

**CO1:** describe the emergence and evolution of Indian Constitution.

**CO2:** realize the status and importance of fundamental rights, fundamental duties and directive principles of state policy and relation among them by understanding the articulation of its basic values under the Constitution of India.

**CO3:** compare the various structure of Indian government.

**CO4:** recognize the human rights, cultural, social and political rights and its relationship with Indian constitution. .

**Board of Studies (BoS) :**

4<sup>th</sup>BoS of SSSH held on 28.06.2021

**Academic Council:**

17<sup>th</sup> AC held on 15.07.2021

**Note:** L - Low Correlation    M - Medium Correlation    H - High Correlation

SDG 16: Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels

Application of human, legal and political rights leading to empowerment in real-life situations for protection of fundamental freedoms and freedom from violence, abuse, trafficking and exploitation are at the core of human rights.

**SEMESTER V**

<b>MSD 3181</b>	<b>FUNDAMENTALS OF</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: All 1-17.</b>	<b>ENTREPRENEURSHIP</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To understand the fit between individual and their entrepreneurial ambitions.

**COB2:** To identify the customers and find a problem worth solving.

**COB3:** To create a business model for solving the problems of customer, forming solution and present the Business Model Canvas

**COB4:** To develop a solution for customers' problem and analyze the problem solution fit & product market fit.

**COB5:** To build and demonstrate a Minimum Viable Product (MVP) for startup

**MODULE I                      PROBLEM                      IDENTIFICATION                      AND                      9**  
**OPPORTUNITY DISCOVERY**

Entrepreneurial Thinking, Business Opportunities, Problem Identification, Design Thinking, Potential solutions, Presentation of the problem- Case Study

**MODULE II                      CUSTOMER , SOLUTION AND BUSINESS                      10**  
**MODEL**

Customers and Markets, Identification of Customer Segment, Niche Segment, Customers Jobs, Pain and Gain, Early Adopters, Value Proposition Canvas-Case Study, Basics of Business Model-Lean Canvas-Case Study.

**MODULE III                      VALIDATION AND FINANCIALS                      10**

Blue Ocean Strategy, Solution Demo, Problem – Solution Fit, Minimum Viable Product- Product Market Fit, Prototype – Case Study. Cost, Revenues, Pricing, Profitability Checks, Bootstrapping, Initial Financing and Pitching.

**MODULE IV                      GO TO MARKET                      8**

Positioning and Branding, Golden Circle model: Sinek's theory value proposition, Branding Elements, Market Penetration Strategy, Collaboration Tools and Techniques, Channels – Case Study

**MODULE V                      MANAGING GROWTH AND FUNDING                      8**

Sales Planning, Customer Acquisition Strategy, Selling Skills, Identifying Funding Sources, Mapping Start-Up Cycle to Funding Options, Funding Plan, , Creating business valuation

**L -45; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. Entrepreneurship Rajeev Roy oxford, 2012.
2. <https://web.nen.wfglobal.org/en/home> - Wadhvani Foundation
3. W. Chan Kim , Renée A. Mauborgne, “Blue Ocean Strategy: How to Create Uncontested Market Space and Make the Competition Irrelevant”, Harvard Business Press, 2015.

4. Running Lean: Iterate From Plan A To a Plan That Works, Ash Maurya, "O'Reilly Media, Inc.", 28-Feb-2012.

**COURSE OUTCOMES:**

On completion of the course, students will be able to

**CO1:** Build an entrepreneurial mindset and reach out the customer to identify the problem using design thinking process

**CO2:** Craft solution to the problem through value proposition canvas and develop a business model using lean canvas

**CO3:** Provide product solution demo and deliver a minimum viable product

**CO4:** Work as a team and create brand strategy marketing for product/service

**CO5:**Prepare, make an outstanding sale pitch for startup

<b>MED 3101</b>	<b>HEAT AND MASS TRANSFER</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:9</b>		<b>2</b>	<b>1</b>	<b>2</b>	<b>4</b>

**COURSE OBJECTIVES:**

**COB1:** To familiarize about heat conduction in steady and transient states

**COB2:** To gain knowledge on free and forced convective heat transfer

**COB3:** To learn boiling heat transfers and design of heat exchangers.

**COB4:** To study thermal radiation from solids and gases.

**COB5:** To learn the basic concepts of mass transfer

<b>MODULE I</b>	<b>CONDUCTION</b>	<b>L:10</b>
		<b>P:8</b>

Basic concepts - Mechanism of heat transfer : Conduction, Convection and radiation - General differential equation of heat conduction – Fourier's law of conduction - Cartesian and cylindrical coordinates - One dimensional steady state heat conduction - Conduction through plane wall, cylinders and spherical systems - Composite systems - Critical radius of insulation- Conduction with internal heat generation - Extended surfaces - Unsteady heat conduction - Lumped heat capacity analysis – Semi-infinite and infinite solids - Use of Heisler's chart.

<b>MODULE II</b>	<b>CONVECTION</b>	<b>L:9</b>
		<b>P:8</b>

Basic concepts - Convective heat transfer coefficients - Boundary layer concept - Types of convection - Forced convection - Dimensional analysis - External flow - Flow over plates, cylinders and spheres - Internal flow - Laminar and turbulent flow - Flow over bank of tubes – Non circular tubes - Free convection - Dimensional analysis - Flow over vertical, horizontal and inclined plates, cylinders and spheres - Combined free and forced convection.

<b>MODULE III</b>	<b>PHASE CHANGE HEAT TRANSFER AND HEAT EXCHANGERS</b>	<b>L:10</b>
		<b>P:7</b>

Nusselt's theory of condensation- Pool boiling and flow boiling - Correlations in boiling and condensation - Types of heat Exchangers - Heat exchanger analysis – Logarithmic Mean Temperature Difference (LMTD) and Effectiveness – Number of Transfer Units (NTU) methods - Overall heat transfer coefficient - Fouling factors – Pressure drop and pumping power –

Design of compact heat exchangers. Heat transfer enhancement techniques in heat exchangers

**MODULE IV RADIATION****L:9****P:7**

Basic concepts - Laws of radiation: Stefan Boltzmann's law and Kirchoff's law - Black body radiation - Grey body radiation - Reradiating surfaces- Shape factor algebra - Electrical analogy - Radiation shields – Radiation from gas.

**MODULE V MASS TRANSFER****L:7**

Basic concepts - Diffusion mass transfer - Fick's law of diffusion - Steady state molecular diffusion - Convective mass transfer - Momentum, heat and mass transfer analogy - Convective mass transfer correlations - Applications of mass transfer

**L – 30; T – 15; P- 30 TOTAL HOURS – 75****PRACTICALS**

List of Experiments:

1. Thermal conductivity measurement of pipe insulation using lagged pipe apparatus.
2. Heat transfer through composite wall.
3. Thermal conductivity measurement using guarded plate apparatus.
4. Determination of heat transfer coefficient under natural convection from a vertical cylinder.
5. Determination of heat transfer coefficient under forced convection from a tube.
6. Heat transfer from pin-fin (natural & forced convection modes)
7. Determination of Stefan – Boltzmann constant.
8. Determination of emissivity of a grey surface.
9. Heat transfer studies on pool boiling.
10. Effectiveness of Parallel / counter flow heat exchanger.
11. Drop and Film-wise condensation study
12. Transient heat conduction study

**TEXT BOOKS:**

5. Suhas V Patankar, "Numerical Heat transfer and fluid flow", CRC Press, 2017.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Solve heat conduction problems in steady and transient states

**CO2:** Apply principle of convection and their relation to fluid dynamics

**CO3:** Analyse boiling heat transfers and design the heat exchangers

**CO4:** Demonstrate thermal radiation from solids and gases.

**CO5:** Explain the basic concepts of mass transfer

**Board of Studies (BoS):**

19<sup>th</sup> BOS held on 21.12.2021

**Academic Council:**

19<sup>th</sup> AC held on 29 .09.2022

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

CO4	M	M											M	M
CO5	M	M												

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of heat transfer principle enables to design and develop heat transfer equipment in engineering industries.

<b>MED 3102</b>	<b>MECHATRONICS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:9</b>		<b>3</b>	<b>0</b>	<b>2</b>	<b>4</b>

**COURSE OBJECTIVES:**

The objective of the course is

**COB1:** To study the basic concepts of mechatronics and various types of sensors

**COB2:** To acquire knowledge on different actuators and their applications

**COB3:** To learn about the programmable logic controllers

**COB4:** To gain knowledge on different system models and controllers

**COB5:** To be conversant with mechatronic design and its applications

<b>MODULE I</b>	<b>INTRODUCTION</b>	<b>L:9</b>
		<b>P:4</b>

Introduction to Mechatronics – Systems - Concepts of Mechatronics approach – Sequential controllers - Need for Mechatronics- Emerging area of Mechatronics - Introduction to Sensors & Transducers – Performance Terminology- Types: Sensors for motion, position measurement, force, torque, tactile, temperature sensors, hall-effect sensors - Selection of sensors - Signal Conditioning - Analogue to Digital Converter - Digital to Analogue Converter.

<b>MODULE II</b>	<b>ACTUATORS</b>	<b>L:9</b>
		<b>P:10</b>

Basics of Pneumatic and Hydraulic Systems - Control Valves - Actuators - Mechanical Actuation Systems – Electrical Actuation Systems – Mechanical Switches - Solid State Switches – Solenoids - Construction and working principle of DC and AC Motors –Speed control of AC and DC drives - Stepper Motors - Switching circuitries for stepper motor - Servo motor

<b>MODULE III</b>	<b>PROGRAMMABLE LOGIC CONTROLLER</b>	<b>L:9</b>
		<b>P:10</b>

Programmable Logic Controllers – Basic Structure - Input / Output Processing – Programming – Mnemonics – Timers - Internal relays and counters - Shift Registers - Master and Jump Controls - Data Handling - Analog Input / Output - Selection of a PLC.

**MODULE IV SYSTEM MODELLING AND CONTROL****L:9**

System Models - Building blocks of Mechanical, Electrical, Fluid and Thermal Systems - Modelling of spring, mass & damper systems - Rotational – Translational Systems - Electromechanical Systems - Dynamic response of systems - Closed-Loop Controllers - Control Modes: Two–Step mode, Proportional Mode, Derivative Mode, Integral Mode, PID —Adaptive Control - Fault findings

**MODULE V MECHATRONICS DESIGN & CASE STUDIES****L:9****P:6**

Mechatronics Design process - Stages - Traditional and Mechatronics design concepts - Introduction to data acquisition and control systems - Virtual instrumentation - Interfacing of various sensors and actuators with PC - Case studies: Robotics and automation in manufacturing and process industries, Mechatronics control in automotive, prosthetics and artificial limbs, agriculture and energy systems and Automatic car park barrier.

**PRACTICALS**

List of Experiments:

1. DC motor control using microcontrollers
2. Stepper motor control using microcontrollers
3. Line following robot.
4. Design of circuits with logic sequence using Electro pneumatic trainer kits
6. Simulation of hydraulic and pneumatic circuits using software
7. Timing operations using PLC
8. Counting operations using PLC
9. Modelling and analysis of basic mechanical, electrical, hydraulic and pneumatic systems using LabVIEW
10. Characterization of sensors like strain, LVDT, thermocouple, etc,
11. Interfacing DAC for Control application using LabVIEW

**L – 45; P-30; TOTAL HOURS – 75****TEXT BOOKS:**

1. Bolton. W, "Mechatronics", Pearson Higher Education, 7<sup>th</sup>edition, 2019.

5. Nitaigour Premchand Mahalik, Mechatronics Principles, Concepts and Applications, McGraw Hill Education, 2015.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Explain the basic concepts of mechatronics and use of sensors

**CO2:** Elucidate and select actuators for different applications

**CO3:** Describe and program the programmable logic controllers.

**CO4:** Explain and analyse the system model and controller for a given application

**CO5:** Design mechatronic systems for different applications

**Board of Studies (BoS):**

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

Learning mechatronic support technology development, research and innovation leading to automation in industries and value addition in commodities.

<b>MED 3103</b>	<b>AUTOMATION IN MANUFACTURING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:9</b>		<b>2</b>	<b>0</b>	<b>2</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To gain knowledge about designing and fabrication of automated systems.

**COB2:** To study about microprocessor, and drives in automation

**COB3:** To familiarise about robots and mechanisms of automated manufacturing systems

**COB4:** To acquire knowledge on hydraulic, pneumatic and CNC systems

**MODULE I INTRODUCTION, DESIGN AND FABRICATION OF AUTOMATED SYSTEM L:7**

Importance of automation in the manufacturing industry - Use of mechatronics system requirement - Design of an automated system - Degree of Freedom-Building blocks of an automated system - Working principle and examples - Fabrication or selection of various components of an automated system - Specifications of various elements - Use of design data books and catalogues.

**MODULE II MICROPROCESSOR, AND DRIVES IN AUTOMATION L:6**

Microprocessor Technology - Signal conditioning and data acquisition - Use of microprocessor or micro controllers – Configurations and working – Drives - Electrical drives – Types - Selection criteria - Construction and operating principle.

**MODULE III INDUSTRIAL ROBOTICS AND MECHANISMS OF AUTOMATED MANUFACTURING SYSTEMS L:8**

Anatomy of a robot and robot end effectors - Classification of robots based on physical configuration – Transducers and sensors - Tactile sensors - Proximity and range sensors - Velocity sensors - Robot programming methods - Concepts of forward and inverse kinematics – Mechanisms - Ball screws - Linear motion bearings – Cams - Systems controlled by camshafts - Electronic cams - Indexing mechanisms - Tool magazines and transfer systems.

**MODULE IV    HYDRAULIC, PNEUMATIC AND CNC SYSTEMS    L:9;  
P:30**

Hydraulic systems - Hydraulic power pack – Pumps – Valves - Designing of hydraulic circuits - Pneumatic systems – Configurations – Compressors- Valves - Distribution and conditioning - CNC technology - Basic elements of CNC lathe and machining centres - Interpolators - Part programming.

**PRACTICALS**

List of Experiments

**CNC Lathe:**

1. Part programming for Linear and Circular interpolation.
2. Part programming using standard canned cycles for Turning.

**CNC Mill:**

1. Part programming for Linear, Circular interpolation and Contour motions.
2. Part programming involving canned cycles for Drilling, Peck drilling and boring.
3. Modelling and Simulation in CAD/CAM software:
4. Tool path generation and Mould design from 3D models using CAD/CAM software.
5. Post processing for standard CNC Controllers like FANUC, Sinumerik etc.
6. Generate NC codes and interface with CNC machine to realize the product.

**L – 30; P – 30; TOTAL HOURS – 60**

**TEXT BOOKS:**

**Note:**L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The holistic understanding of the robots and their mechanism, along with the CNC systems can upgrade the technological capabilities of Industries by providing automation.

<b>MED 3104</b>	<b>PRODUCT MODELLING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:9</b>	<b>LABORATORY</b>	<b>0</b>	<b>0</b>	<b>2</b>	<b>1</b>

**COURSE OBJECTIVES:**

**COB1:** To be conversant with the CAD software's for creating standard 3D models of the given component

**COB2:** To train in creating 3D models and their assemblies

**COB3:** To gain knowledge in parametric modeling of standard fasteners

**COB4:** To acquire knowledge on reverse engineering procedure

**PRACTICALS**

List of Experiments:

**Practicing the CAD software**

1. Create 3D models of standard machine components by reading 3D isometric views.
2. Create 3D models of standard machine components by reading 2D orthographic views of Brackets, V Blocks, and Stop Block.

**Practicing the assembly drawing creation**

Create part model, assembly, exploded view, sectional views and detail drawings of

1. **Joints:** Cotter joints, knuckle joints, Hook's joint.
2. **Shaft Couplings:** rigid, flexible.
3. **Bearings:** Journal, footstep, thrust or collar bearing, Plummer block.
4. **Engine parts:** Stuffing box, connecting rod.
5. **Machine tool components:** Drill jig, tool post, machine vice, screw jack.
6. **Valves:** Safety valve, relief valve, non-return valve.

**Parametric modelling**

Create the parametric models of standard screw threads, and threaded fasteners.

**Reverse engineering**

Creating production drawing of real-life components adopting reverse engineering procedure

**P-30: TOTAL HOURS –30**

**TEXT BOOKS:**

1. N. D. Bhatt and V.M. Panchal, "Machine Drawing", 48<sup>th</sup> Edition, Charotar Publishers, 2013

- Gopalakrishna K.R., "Machine Drawing", 22<sup>nd</sup> Edition, Bangalore, 2013.

**REFERENCES:**

- William P. Spence, "Engineering Graphics", Printice - Hall Inc, Engle Wood Cliff, 1987.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Create CAD 3D models from standard CAD packages

**CO2:** Assemble the 3D models of standard mechanical components

**CO3:** Create parametric model of fasteners

**CO4:** Develop production drawing by reverse engineering of real-life components

**Board of Studies (BoS):**

19<sup>th</sup>BoS of MECH held on  
21.12.2021

**Academic Council:**

19<sup>th</sup> AC held on 29 .09.2022

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of various modelling methods involved in the design of mechanical components shall be used to provide innovative and sustainable solutions for the industry.

<b>GED 3101</b>	<b>COMMUNICATION SKILLS FOR CAREER</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4</b>	<b>SUCCESS</b>	<b>0</b>	<b>0</b>	<b>2</b>	<b>1</b>

**COURSE OBJECTIVES:**

**COB1:** To develop students' proficiency in English at CEFR B2 level (Business Vantage)

**COB2:** To develop students' receptive skills (Listening and Reading) in a wide range of situations

**COB3:** To develop students' productive skills (Speaking and Writing) in a wide range of situations

**COB4:** To expose students to the nuances of the English language, grammar and usage.

**MODULE I BRIEF EXCHANGES OF COMMUNICATION 08**

Listening to telephonic conversations - gap filling exercises- short conversations – Promoting a product-Reading short passages and answering matching tasks- Writing short notes and messages. - Framing questions

**MODULE II WORKPLACE COMMUNICATION 07**

Listening to monologues - gap filling exercises - Mini presentations- role play- Reading longer texts – gap filling- Writing memo , emails and Fax - Writing reports on conferences, seminars

**MODULE III INTERPERSONAL COMMUNICATION 08**

Listening to conversations – Collaborative discussion using prompts - Reading comprehension-multiple choice-texts - Writing enquiry letters & replies to customers

**MODULE IV NEGOTIATING AND PERSUADING 07**

Listening to interviews - Group Discussions - Multiple choice and gap filling-writing work reports- cause and effect - Complaint letter and sales letter

**P-30: TOTAL HOURS - 30****REFERENCES:**

**SDG 4:** Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all.

This course helps the students to enhance their communication skills, critical thinking, problem solving, conflict resolution, team building and public speaking. This course also helps them to achieve success in their professional and personal life.

<b>MED 3105</b>	<b>INTERNSHIP I</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:08</b>		<b>0</b>	<b>0</b>	<b>0</b>	<b>1</b>

Students must undergo 15 days of Industrial training in the industries relevant to Mechanical Engineering during the summer vacation of second year

SDG 8: Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

By undergoing industrial training/Internship, interns gain valuable work or research experience and time management which are key for success to job, entrepreneurship, to sustain per capita economic growth in accordance with national circumstances.

**SEMESTER VI**

<b>MED 3211</b>	<b>FINITE ELEMENT ANALYSIS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:9</b>		<b>3</b>	<b>0</b>	<b>2</b>	<b>4</b>

**COURSE OBJECTIVES:**

**COB1:** To study the basic concepts of mathematical modeling of engineering problems

**COB2:** To learn the principles of discretization and finite element formulation

**COB3:** To acquire knowledge on application of FEA in bars, beams and thermal fins in 1D

**COB4:** To gain knowledge on 2D approximation techniques and solve 2D structural and thermal problems

**COB5:** To familiarize about isoparametric formulation and numerical integration

**MODULE I      INTRODUCTION TO FINITE ELEMENT ANALYSIS      L:8  
P:6**

Basic Concept and terminologies - Comparison with FDM and FVM - Advantages and disadvantages - History of development - Applications – Application to the continuum – Discretization– Governing equations for continuum – Variational methods – Weighted residual method – Ritz variation method.

**MODULE II      BASICS OF FINITE ELEMENT FORMULATION      L:10  
P:6**

Finite Element Analysis of 1D structural and thermal Problems : Element type, Spring element, two noded line element, lower order and higher order element – Types of discretization – Displacement function - Shape function - Ritz weak formulation - Element equations - Assembly - Boundary conditions - Solution of equations – Post processing - Convergence criteria -Examples from solid mechanics and heat transfer in composite wall and fins.

**MODULE III      ONE DIMENSIONAL ANALYSIS      L:9  
P:6**

Structural analysis of bars with uniform and varying cross sections – Beams - Truss–Different support/boundary conditions - Load conditions - Thermal analysis of 1D fins - Thermal insulating walls with different conduction/convection boundary conditions and thermal loads.

**MODULE IV TWO DIMENSIONAL STRUCTURAL ANALYSIS L:9  
P:6**

Theory of elasticity – Plane stress, Plane strain and axisymmetric concepts – CST –LST – Shape function – Strain displacement matrix – Constitutive matrix – Stiffness matrix – Assembly – Solutions – Examples: Finite element formulation of plate, beam, dam, pipe, pressure vessels problems.

**MODULE V ISOPARAMETRIC FORMULATION AND NUMERICAL INTEGRATION L:9  
P:6**

Natural co-ordinate systems –Lagrangian interpolation polynomials– Serendipity formulation–Isoparametric elements formulation – Rectangular elements –Numerical integration – Simple problems using Gauss quadrature technique.

**PRACTICALS**

List of Experiments:

1. Study of basics of FEA software
2. Analysis of uniform and stepped bar using different boundary conditions.
3. Analysis of Cooling fins using 1D elements with the conduction and convection boundary conditions.
4. Analysis of planar and spatial truss
5. Analysis of 1D and 2D beams with different loading conditions – point, distributed load, bending moment
6. Analysis of thin plate with circular/elliptical hole (Plane stress)
7. Analysis of pressure vessels, tunnels with internal pressures (Plane strain)
8. Analysis of thick cylinders with measureable length (Axisymmetric problems)
9. Analysis of 2D and 3D complex problems with quadrilateral and brick elements respectively
10. Modal Analysis of Beams and extraction of natural frequencies and mode shapes
11. Buckling analysis of orthotropic materials
12. Harmonic analysis of 1D and 2D structures

**L – 45; P–30; TOTAL HOURS – 75**

**TEXT BOOKS:**

5. Krishnamoorthy C.S – “Finite Element Analysis: Theory and Programming”, Tata McGraw Hill Publishing Company .Ltd, 2<sup>nd</sup> Edition, 2017.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Formulate mathematical modeling of engineering problems

**CO2:** Discretize the given complex geometry into FE model

**CO3:** Solve various 1D structural and thermal problems using FEA

**CO4:** Solve 2D structural and thermal problems using FEA

**CO5:** Explain isoparametric formulation and numerical integration

**Board of Studies (BoS):**

19<sup>th</sup>BoS of MECH held on 21.12.2021

**Academic Council:**

19<sup>th</sup> AC held on 29 .09.2022

**Note:**L– Low Correlation    M –Medium Correlation    H –High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The deeper understanding of the analysis of Mechanical systems using finite element method leads to provide sustainable and robust solutions for the engineering problems.

<b>MED 3212</b>	<b>ADDITIVE MANUFACTURING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:9</b>		<b>2</b>	<b>0</b>	<b>2</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To study the Various AM processes and applications

**COB2:** To Learn modelling concepts

**COB3:** To gain knowledge about liquid based system

**COB4:** To familiarize about solid and powder based system

**MODULE I INTRODUCTION L:5**

Overview - Rapid Prototyping - Rapid Tooling - Need of additive manufacturing- Classification- Role of additive manufacturing in Industry 4.0 - Characteristics of AM- Product accuracy and surface quality - Speed and Various parameters (strength, homogeneity and isotropy) - Economic analysis- Materials used for additive manufacturing technology – Applications.

**MODULE II MODELING TECHNIQUES L:5  
P:15**

Basic concepts - CAD Model Preparation - Digitization Techniques-Data Processing- Model Slicing – Tool path generation- Part orientation and support generation – Software additive manufacturing - Model reconstruction.

**MODULE III LIQUID BASED SYSTEM L:5  
P:0**

Stereo lithography (SLA): Equipment, Working Principle, Photopolymers, Photo polymerization, Process and its variables, advantages and applications – Solid ground curing (SGC): Process, working principle, applications, advantages and disadvantages – Material Jetting (MJ): Types, Process, Working principle, Applications, Advantages and Disadvantages.

**MODULE IV SOLID BASED SYSTEM L:15  
P:15**

Fused Deposition Modeling (FDM) : Equipment, Principle, Process and its variables, advantages and applications – Laminated Object Manufacturing (LOM) : Equipment, Principle, Process and its variables, advantages and applications - Selective Laser Sintering (SLS) : Equipment, Principle, Process and its variables, advantages and applications – Selective Laser Melting (SLM) :Three Dimensional Printing - Equipment, Principle, Process and its

variables, advantages and applications – Electron Beam Melting : Equipment, Principle, Process and its variables, advantages and applications – Binder Jetting : Equipment, Principle, Process and its variables, advantages and applications - WAAM (Wire Arc Additive Manufacturing) - Equipment, Principle, Process and its variables, advantages and applications.

## **PRACTICALS**

### **LIST OF EXPERIMENTS:**

1. Design a simple part using CAD software and understand the digitization techniques.
2. Design a simple part using AM software and understand the Part orientation and support structure generation
3. Simulate the designed part using AM software and understand the parameters of AM and tool path generation
4. Practice with reverse scanning software and understand its requirements
5. Demonstration of simple component fabrication using FDM technique in real time.

**L – 30; P-30; TOTAL HOURS – 60**

### **TEXT BOOKS:**

1. Chua C.K., Leong K.F. and LIM C.S “Rapid prototyping: Principles an Applications”, World Scientific publications, 3<sup>rd</sup>Ed., 2010.

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

Holistic understanding of additive manufacturing fundamentals enhances the industries and other enterprises for future readiness

<b>MED 3213</b>	<b>SIMULATION LABORATORY</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:9</b>		<b>0</b>	<b>0</b>	<b>2</b>	<b>1</b>

**COURSE OBJECTIVES:**

**COB1:** To learn the basics of Matlab environment

**COB2:** To study the response in vibratory systems with and without damping.

**COB3:** To acquire knowledge on controlling the vibration behaviour

**COB4:** To familiarize with multibody modelling and simulation of hydraulic systems

**PRACTICALS****List of Experiments:****Basics of Matlab software**

1. Matrix, Matrix Operators, Accessing Parts of a Matrix.
2. Syntax and Semantics, Plotting 1D, 2D & 3D.
3. Exercise on creating function, Syntax and Scripts.

**Modelling and simulation of Vibration System**

4. Simulation of simple pendulum.
5. Single degree of freedom spring-mass system with free and forced vibration.
6. Two degree of freedom spring-mass system with free and forced vibration.
7. Controlling the response of vibration system using PID controller.

**Multibody simulation**

8. Simulation of Four bar mechanism.
9. Simulations of Slider crank mechanism.

**Simulation of Hydraulic systems**

10. Simulation of Hydraulic system with Single-Acting Cylinder.
11. Simulation of Hydraulic system with Double-Acting Cylinder.

**TEXT BOOKS:**

1. SS Rao, "Mechanical Vibrations, An Introduction", Pearson, 6<sup>th</sup> Edition, 2018.

SDG No. 4 : Give Quality Education to all the Engineers

Statement: In future, substantially increase the number of youth and adults who have relevant skills, including technical and vocational skills, for employment, decent jobs and entrepreneurship.

**SEMESTER VII**

<b>MED 4101</b>	<b>AUTOMOBILE ENGINEERING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:9</b>		<b>2</b>	<b>0</b>	<b>2</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To study the vehicle structures, steering geometry and wheel alignment.

**COB2:** To obtain knowledge on the suspension and braking system.

**COB3:** To familiarize the working of vehicle power train system

**COB4:** To learn about automotive electrical and electronic systems.

<b>MODULE I</b>	<b>CHASSIS SYSTEM</b>	<b>L:8</b>
		<b>P:8</b>

Types of automobiles - Vehicle construction - Chassis – Frame and body - Vehicle aerodynamics - Steering geometry and types of steering gearbox - Manual steering - Power steering - Wheel alignments parameters - Wheels and tires

<b>MODULE II</b>	<b>SUSPENSION AND BRAKING SYSTEMS</b>	<b>L:7</b>
		<b>P:7</b>

Suspension system – Components of suspension system – Dependent and independent suspension system – Air suspensions systems - Braking systems – Components of braking system - Types and constructions – Diagonal braking systems - Antilock Braking Systems (ABS)

<b>MODULE III</b>	<b>POWER TRAIN SYSTEM</b>	<b>L:8</b>
		<b>P:8</b>

Classification of internal combustion engines - Engine components - Fuel injection systems - Engine emission control systems - Cooling and lubrication systems in engine – Ignition system - Clutch: Working principle and Types - Gearbox (manual and automatic) - Fluid flywheel – Torque convertors - Propeller shaft – Differential.

<b>MODULE IV</b>	<b>AUTOMOTIVE ELECTRICAL AND ELECTRONICS</b>	<b>L:7</b>
		<b>P:7</b>

Battery - Charging system - Starter motor & drives - Lighting circuits - Safety systems: Active safety & passive safety, Seat belts, airbag - Adaptive Cruise Control (ACC) - Variable Valve Timing (VVT) - Electronic Brake-force Distribution (EBD) – Electronic Stability Program (ESP) - Traction Control

System (TCS) - Electric & Hybrid vehicles.

### **PRACTICALS**

List of Experiments:

1. Dismantle & Assembly of petrol engine.
2. Dismantle & Assembly of diesel engine.
3. Study of oil filter, fuel filter, fuel injection system, MPFI
4. Study of ignition system components – coil, magneto and electronic ignition systems.
5. Study of engine cooling system components
6. Study of engine lubrication system components
7. Dismantle & Assembly of Differential
8. Dismantle & Assembly of gear box
9. Dismantle & Assembly of Clutch assembly
10. Dismantle & Assembly of brake systems

**L – 30; P-30; TOTAL HOURS – 60**

### **TEXT BOOKS:**

1. Kirpal Singh, “Automobile Engineering”, Standard Publishers, Vol-I & II, 14<sup>th</sup> Edition, 2018.
2. William B. Ribbens, “Understanding Automotive Electronics”, 7<sup>th</sup> Edition, Elsevier Publishing, 2013.

### **REFERENCES:**

CO4	M					L	L		M				H	L

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of automotive principles leads to design of automotive component and its sub systems ensuring safety, reliability and efficiency

<b>MED 4102</b>	<b>INTERNSHIP II</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:08</b>		<b>0</b>	<b>0</b>	<b>2</b>	<b>1</b>

Students must undergo 15 days of Industrial training in the industries relevant to Mechanical Engineering during the summer vacation of third year

SDG 8: Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all.

By undergoing industrial training/Internship, interns gain valuable work or research experience and time management which are key for success to job, entrepreneurship, to sustain per capita economic growth in accordance with national circumstances.

**SEMESTER VIII**

<b>MED 4211</b>	<b>PROJECT WORK</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:08</b>		<b>0</b>	<b>0</b>	<b>18</b>	<b>9</b>

**COURSE OBJECTIVES:**

**COB1:** To encourage students to apply the knowledge and skills gained through various courses.

**COB2:** To create a platform for students to demonstrate their practical competence.

Students should do a project which involves themselves with innovative ideas of design, analysis, fabrication and new development. The project work identified in collaboration with industry should be preferred. Frequently, progress in the project work is evaluated by conducting reviews. At end semester students should appear for their project viva-voce and submit the report based on the data obtained by the way of experiments conducted in the laboratory/industry.

SDG 8: Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all.

The project work allows students to expand their creative abilities by building a new system from scratch, develop their communication skills there by improving the employability and entrepreneurship skills and encourage the formation and growth of micro, small and medium-sized enterprises.

**LIST OF PROFESSIONAL ELECTIVE COURSES  
DESIGN STREAM**

<b>MEDX 01</b>	<b>ADVANCED STRENGTH OF MATERIALS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:**To study the stress strain relations and torsion of non-circular sections

**COB2:**To learn about shear centre of various sections

**COB3:**To gain knowledge on unsymmetrical bending

**COB4:**To familiarize the stresses in flat plates, rotary sections and contacts

**COB5:**To acquire knowledge about various theories of plasticity

**MODULE I      STRESS - STRAIN RELATIONS AND TORSION      L:10  
OF NON-CIRCULAR SECTIONS**

Elastic and Inelastic response of a solid - Transformation of stress, strain, principal stresses and strains - General equations of elasticity in Cartesian, differential equations of equilibrium- Compatibility- Boundary conditions - Representation of three-dimensional stress of a tension -Generalized hook's law – St. Venant's principle- Plane stress-Airy's stress function.

**MODULE II      SHEAR CENTRE      L:7**

Shear Centre – Location of shear centre for various sections: thin wall beam cross section, channel section, box beams, beams formed from stringers and thin webs, shear flows-Plastic bending

**MODULE II      UNSYMMETRICAL BENDING      L:8**

Flexible Members – Circumference and radial stresses-Deflections-Curved beam with restrained ends - Closed ring subjected to concentrated load and uniform load - Chain links and crane hooks.

**MODULE IV      STRESSES DUE TO ROTARY SECTIONS AND      L:12  
CONTACTS**

Stresses in circular and rectangular plates due to various types of loading and end conditions, buckling of plates - Radial and tangential stresses in solid disc and ring of uniform thickness and varying thickness allowable speeds - Contact Stresses – Methods of computing contact stress -

Deflection of bodies in point and line contact applications.

### MODULE V THEORY OF PLASTICITY

L:8

Theory of plastic deformation – Yield criteria – Tresca and Von-mises-Distortion energy – Stress-Strain relation – Mohr's circle representation of a state of stress.

L – 45; TOTAL HOURS – 45

#### TEXT BOOKS:

3. Boresi A.P., Schmidt R.J., "Advanced Mechanics of Materials", JohnWiley and Sons, Sixth edition, 2009.
4. Timoshenko and Goodier, "Theory of Elasticity", McGraw Hill, 2017.

#### REFERENCES:

4. Seely and Smith, "Advanced Mechanics of Materials", John WileyInternationalEdn, 1963.
5. Wang, "Applied Elasticity", McGraw Hill, 1963.
6. Robert D. Cook, Warren C. Young, "Advanced Mechanics ofMaterials", Mcmillan pub. Co., 1998.

#### COURSE OUTCOMES:

After completion of the course, students should be able to

**CO1:** Explain the stress strain relations and torsion of non-circular sections

**CO2:** Determine shear centre of various sections

**CO3:** Describeunsymmetrical bending phenomenon in various sections

**CO4:** Evaluate stresses in flat plates, rotary sections and contacts

**CO5:** Apply various theories of plasticity for stress analysis

#### Board of Studies (BoS):

20<sup>th</sup> BOS held on 08.08.2022

#### Academic Council:

19<sup>th</sup> AC held on 29 .09.2022

CO5	H	M		L	L							L	H	M

**Note:** L- Low Correlation M - Medium Correlation H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of stress strain relations and various theories related to strength of materials leads to construction of robust engineering systems.

<b>MEDX 02</b>	<b>DESIGN OF HYDRAULICS AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:9</b>	<b>PNEUMATICS</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

The objective of the course is

**COB1:** To learn the working principles of fluid power systems and hydraulic pumps

**COB2:** To study functioning of hydraulic actuators and control valves

**COB3:** To gain knowledge on the hydraulic circuits and systems

**COB4:** To acquire knowledge on working of pneumatics and electro pneumatic systems

**COB5:** To familiarize the design, development and troubleshooting of fluid power systems

**MODULE I FLUID POWER PRINCIPLES AND HYDRAULIC PUMPS L:9**

Introduction to Fluid power – Advantages and Applications – Fluid power systems – Types of fluids - Properties of fluids and selection – Basics of Hydraulics – Pascal’s Law – Principles of flow - Friction loss – Work, Power and Torque- Problems –Pumps:Pumping Theory, Pump Classification, Construction, Working, Design, Advantages, Disadvantages, Performance - Selection criteria of pumps – Fixed and Variable displacement pumps – Problems

**MODULE II HYDRAULIC ACTUATORS AND CONTROL COMPONENTS L:9**

Hydraulic Actuators: Cylinders – Types and construction, Application, Hydraulic cushioning – Rotary actuators-Hydraulic motors - Control Valves: Direction Control, Flow control and pressure control valves, Construction and Operation – Servo and Proportional Valves - Accessories: Reservoirs, Pressure Switches, Accumulators, Intensifiers, Filters –Fluid Power ANSI Symbols – Problems

**MODULE III HYDRAULIC CIRCUITS AND SYSTEMS L:9**

Industrial hydraulic circuits: Regenerative, Pump Unloading, Double Pump, Air-over oil, Sequence, Reciprocation, Synchronization, Fail-Safe, Speed Control, Accumulator and Pressure Intensifier circuits -

Hydrostatic transmission –Mechanical Hydraulic Servo systems

**MODULE IV PNEUMATIC AND ELECTRO PNEUMATIC SYSTEMS L:9**

Properties of air – Perfect Gas Law – Compressors – Filters, Regulator, Lubricator – Muffler- Air control Valves, Quick Exhaust Valves- Pneumatic actuators- Design of Pneumatic circuit –Cascade method – Electro Pneumatic System – Elements – Ladder diagram – Introduction to fluidics and Pneumatic logic circuits

**MODULE V DESIGN, DEVELOPMENT AND TROUBLE SHOOTING OF FLUID POWER SYSTEMS L:9**

Hydraulic and Pneumatic systems: Installation, Selection, Maintenance, Trouble Shooting and Remedies - Conditioning of hydraulic fluids - Design of hydraulic circuits for Drilling, Planning, Shaping, Surface grinding, Press and Forklift applications - Design of Pneumatic circuits for metal working, handling, clamping counter and timer circuits. – Low cost Automation – Hydraulic and Pneumatic power packs.

**L – 45; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. Anthony Esposito, “Fluid Power with Applications”, Pearson Education, Seventh Edition, 2019.
2. Andrew Parr, “Hydraulics and Pneumatics A Technician’s and Engineer’s Guide”, Third Edition, Elsevier, 2011.

2. Majumdar, S.R., “Oil Hydraulics Systems – Principles and Maintenance”, Tata McGraw Hill, 2017.
3. Srinivasan.R., “Hydraulic and Pneumatic Controls”, Vijay Nicole Imprints, 2008.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** demonstrate the working principle of fluid power systems and

hydraulic pumps

**CO2:** describe the working of hydraulic actuators and valves

**CO3:** explain the various components of the hydraulic circuits

**CO4:** articulate the working of pneumatic systems and appreciate the role of electrical devices in fluid power

**CO5:** perform the design, development and troubleshooting of fluid power systems

**Board of Studies (BoS):**

19<sup>th</sup>BoS of MECH held on 21.12.2021

**Academic Council:**

18<sup>th</sup> AC held on 24.02.2022

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

CO5	H	L					L	L	M	L	H	H	L	H

**Note:** L - Low Correlation    M - Medium Correlation    H - High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

Holistic understanding of fluid power fundamentals helps various sectors of industries in automation of processes

equation - types of sound fields - Measures of sound: Sound pressure, sound intensity and sound power - Combining sources: dB arithmetic, Standing wave, Beating, Impedance - Measuring microphones - Sound level meter-Time and frequency weighting- Sound spectra – Octave band analysis- Order analysis and waterfall plot- Various types of acoustic testing chambers -Two- microphone probe for measuring.

## **MODULE V VIBRATION AND NOISE CONTROL L:8 TECHNIQUES**

Methods of Vibration Control - Vibration isolation - Vibration absorber - Design of a Vibration Absorbers -Unconstrained and constrained layer damping treatment - Active Vibration Control - Methods of Noise Control- Automotive noises – Internal and External noise sources in vehicles - Sound package solution to reduce the interior noise: acoustic isolation, acoustic absorption and damping material solutions - Exterior noise sources in vehicles such as air intake systems and exhaust systems - Tyre noise-NVH in Electric Vehicles Sources - Solutions to reduce NVH.

**L – 45; TOTAL HOURS – 45**

### **TEXT BOOKS:**

1. William Thomson. “Theory of Vibration with Applications”, 5<sup>th</sup> edition, CRC Press, 2018.
2. Singiresu S Rao. “Mechanical Vibrations”, 6<sup>th</sup> edition, Pearson Education, 2017.
3. L.G. Lasithan, “Mechanical Vibrations and Industrial Noise Control”, PHI Learning Pvt. Ltd., 2014
4. Dr.Sadhu Singh, “Mechanical Vibrations and Noise Control”, Khanna Publisher, 2006.

### **REFERENCES:**

2. V.Ramamurti, “Mechanical Vibration Practice and Noise Control”, Alpha Science International, 2012.
3. M. Harrison, Vehicle Refinement: Controlling Noise and Vibration in Road Vehicles, Elsevier Butterworth-Heinemann, 2004.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** explain the fundamental concepts of NVH

**CO2:** model the simple vibrating systems

**CO3:** apply various vibration measurement techniques

**CO4:** analyse the sources of noise and propose appropriate measurement techniques.

**CO5:** select vibration and noise controlling techniques for a given condition.

**Board of Studies (BoS):**

19<sup>th</sup> BOS held on 21.12.2021

**Academic Council:**

18<sup>th</sup> AC held on 24.02.2022

CO5	H	H	H		H		H		L				H	H

**Note:** L - Low Correlation    M - Medium Correlation    H - High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

Understanding the components of Noise and Vibration leads to construction of fault free and sustainable engineering systems.

<b>MEDX 04</b>	<b>DESIGN OF JIGS, FIXTURES AND PRESS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>TOOLS</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To study about the elements of jigs and fixtures

**COB2:** To familiarize with clamps and tolerance

**COB3:** To learn the procedures for the design of different types of jigs

**COB4:** To gain knowledge about the procedures for the design of different types of fixtures.

**COB5:** To study about press working terminology and die design.

**MODULE I INTRODUCTION TO JIGS AND FIXTURES L:8**

Objectives of tool design –Production devices - Inspection devices – Types of Jigs - Types of Fixtures - Function and advantages of Jigs and fixtures – Basic elements – Principles of location – Locating methods and devices – Redundant Location –Materials used for jigs and fixtures.

**MODULE II CLAMPS AND TOLERANCE L:9**

Introduction - Types of clamps – Mechanical actuation - Pneumatic and hydraulic actuation – Analysis of clamping force – Tolerance and error analysis.

**MODULE III JIGS L:10**

Types of Jigs: Post, Turnover, Channel, latch, box, pot, angular post jigs – Indexing jigs – Drill bushes – Design and development of jigs for given components.

**MODULE IV FIXTURES L:10**

General principles of milling: Lathe, boring, broaching and grinding fixtures – Assembly, Inspection and Welding fixtures – Modular fixturing systems – Quick change fixtures – Design and development of Fixtures for given component.

**MODULE V DESIGN OF DIES AND PRESS WORKING L:8**

Press working terminology – Presses and press accessories – Computation of capacities and tonnage requirements – Elements of progressive, Combination and compound dies – Die block - Die shoe - Bolster plate -

Punch plate- Punch holder-Guide pins and bushes – Strippers – Knockouts-Stops –Pilots-Selection of standard die sets – Design and development of progressive and compound dies for Blanking and piercing operations - Bending dies - Development of bending dies - Forming and drawing dies - Development of drawing dies.

**L – 45; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. Donaldson, C., "Tool Design", Tata Mc-Graw Hill, 2006.
2. Edward G Hoffman, "Jigs & Fixture Design", Thomson – Delmar Learning, Singapore 2004.

**REFERENCES:**

1. Design Data: Data Book of Engineers by PSG College - KalaikathirAchchagam - Coimbatore, 2020.
2. Joshi, P.H., "Jigs & Fixtures", Second Edition, Tata McGraw-Hill Publishing Company Limited, New Delhi 2004.
3. Hiram E Grant, "Jigs and Fixture" Tata McGraw-Hill, New Delhi, 2003.
4. "Fundamentals of Tool Design", CEEE Edition, ASTME, 1983.
5. Kempster, "Jigs & Fixtures Design", The English Language Book Society", 1978.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Explain about the elements of jigs and fixtures

**CO2:** Use suitable clamps and tolerance

**CO3:** Design different types of jigs

**CO4:** Design different types of fixtures

**CO5:** Describe press working terminology and design different types of dies.

**Board of Studies (BoS):**

20<sup>th</sup> BOS held on 08.08.2022

**Academic Council:**

19<sup>th</sup> AC held on 29 .09.2022

CO5	M	L	M							L	M	L	M	M

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of the design concepts in jigs, fixtures and press tools leads to enhance the overall manufacturing efficiency of industries.

project management – PERT/CPM network components – Precedence relationships – Critical Path Method – Forward pass method – Backward pass method – Project Time – Cost Trade-off– Resource Allocation – resource leveling and Resource smoothing

#### **MODULE V      ARTIFICIAL INTELLIGENCE TECHNIQUES                      L:9**

Definition of Artificial Intelligence - Application and methods - Neural Computing – Artificial Neural Network- Feed forward back propagation, concept of hidden layer – Learning from big data – Data processing – Prediction- Genetic Algorithms – Introduction - Fuzzy Logic – Rule based learning

**L – 45; TOTAL HOURS – 45**

#### **TEXT BOOKS:**

1. J K Sharma, Operations Research- Theory and Applications, Trinity Press, Edition 6,2015.

#### **REFERENCES:**

- 1 Montgomery, Douglas C. Introduction to Statistical Quality Control, Sixth Edition. John Wiley and Sons, Inc. Edition 8, 2019. (ISBN: 978 -1-119-39930-8)

- 3 Stephen Lucci, Danny Kopec," Artificial Intelligence in the 21<sup>st</sup> Century", Mercury Learning and Information, Edition 2,2015.

#### **COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Describe various techniques for problem solving

**CO2:** Apply statistical techniques for a specific problem

**CO3:** Identify suitable optimization technique for problem solving

**CO4:** Explain about PERT /CPM

**CO5:** Identify the suitable AI based technique to the problem

#### **Board of Studies (BoS):**

20<sup>th</sup> BOS held on 08.08.2022

CO5	H	M		L	L				L			L	M	M

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of various problem solving techniques supports domestic technology development, research and innovation in developing countries

<b>MEDX 06</b>	<b>PRODUCT DESIGN AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>MANUFACTURING</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:**To study the need and importance of new product development

**COB2:** To learn the product design process.

**COB3:**To acquire knowledge on detail designing and value engineering techniques.

**COB4:** To gain knowledge on product manufacturing and its costing.

**COB5:**To familiarize the importance of quality and sustainable manufacturing process.

**MODULE I INTRODUCTION TO PRODUCT DESIGN L:8**

Product design needs and evolution - Creativity and Innovation: Patents, Role of innovation in product design - Product life cycle - Product design morphology - Problem Identification - Market opportunity - Plan for products.

**MODULE II PRODUCT DESIGN PROCESS L:10**

Identifying customer needs - Product specification – Benchmarking - Quality Function Deployment (QFD) - Concept Generation – Concept Selection and Testing.

**MODULE III DETAIL DESIGNING L:8**

Value Engineering: Elements of Value Engineering, Value Engineering tools - Architecture design - Industrial Design - Methods and types of prototyping -Laboratory demonstration on 3D printing.

**MODULE IV PRODUCT MANUFACTURING AND COSTING L:10**

Materials and Manufacturing Process selection - Design for Manufacturing and Assembly (DFMA) - Design for Maintenance - Plant Layout design - Process simulation – Product Costing: Elements of product cost, Estimation and reduction of manufacturing cost, Life Cycle Costing.

**MODULE V QUALITY AND SUSTAINABLE L:9  
MANUFACTURING PROCESS**

Design for Environment - Design for Quality Control - Life Cycle Impact

Assessment - Reverse Engineering – Outsourcing - Mass customization - Managing Competitiveness - Computer Integrated Manufacturing.

**L – 45; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. Karl T. Ulrich, Steven D. Eppinger, “Product Design and Development “,McGraw-Hill Education, 5<sup>th</sup> Edition, 2017.

5. Magrab, E.B., Gupta, S.K., McCluskey, F.P. and Sandborn, P., Integrated product and process design and development: The product realization process, CRC Press, 2009.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Explain the importance of new products and plan for product design.

**CO2:** Execute quality function deployment to generate selection and test concepts.

**CO3:** Perform detailed design using value engineering techniques.

**CO4:** Apply the concept of design for manufacture and costing principles.

**CO5:** Implement quality and sustainability in manufacturing process.

**Board of Studies (BoS):**

20<sup>th</sup> BOS held on 08.08.2022

**Academic Council:**

19<sup>th</sup> AC held on 29 .09.2022

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The knowledge of new product design through creativity and innovation techniques leads to manufacturing of quality and sustainable product for the benefit of the society and foster industrialization.

<b>MEDX 07</b>	<b>DESIGN OF TRANSMISSION SYSTEMS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

*Use of PSG Design data book is permitted for semester end exam*

#### **COURSE OBJECTIVES:**

**COB1:**To learn the design principles of flexible drives

**COB2:**To gain knowledge on the design aspects of spur and helical gears

**COB3:**To acquire knowledge on design of bevel and worm gears

**COB4:**To study the design of gear box and speed reducers

**COB5:**To familiarize the design of clutches and brakes

#### **MODULE I FLEXIBLE DRIVES L:9**

Belt drives: Design using basic equations, design of flat and V-belt drives based on manufacturer's data, timing belt - Chain drives: Chordal action, drive failures, design of chain drive, silent chain - Design of wire rope and pulley.

#### **MODULE II SPUR AND HELICAL GEARS L:9**

Review of gear fundamentals: Types of gears, Interference and Undercutting, Gear force analysis - Spur gears: Failures in gears, beam strength, comparison of tooth shapes, design of spur gears including non-metallic gears - Helical gear: Virtual number of teeth, design of helical gears.

#### **MODULE III BEVEL AND WORM GEARS L:10**

Overview of bevel gear design- Straight bevel gear: Tooth terminology, tooth forces and stresses, equivalent number of teeth estimating the dimensions of pair of straight bevel gears.

Worm gears: Materials, modes of failure and design stresses, efficiency, and thermal considerations - Design of worm gears.

#### **MODULE IV GEAR BOXES L:8**

Progression – Standard step ratio – Ray diagram - Kinematic layout – Design of Sliding mesh gear box- Constant mesh gearbox – Design of multi speed gear box - Speed reducers: Design of single stage speed reducer, gear tooth forces, shaft design and bearing selection.

**MODULE V CLUTCHES AND BRAKES****L:9**

Clutches: Role of clutches, positive and gradually engaged clutches, design of single plate and multiple plate clutches - Brakes: Role of brakes, types of brakes, self-energizing and de-energizing brakes, thermal considerations, design of single shoe and double shoe brakes, design of disc brakes, design of internally expanding shoe brakes-Overview of band brakes and anti-lock braking system.

**L – 45; TOTAL HOURS – 45****TEXT BOOKS:**

1. Bandari V.B, "Design of Machine Elements", 4<sup>th</sup> Edition, Tata McGraw Hill Publishers Co. Ltd, New Delhi, 2017.
2. Robert L Norton, "Machine Design - An Integrated Approach", 2<sup>nd</sup> Edition, Pearson Education, 2013.

CO5	H	H	M									L	H	H

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The holistic understanding of design of different transmission systems leads to innovative solutions for complex engineering problems

<b>MEDX 08</b>	<b>MECHANICS OF COMPOSITE</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>MATERIALS</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To familiarise the various nomenclature of composites

**COB2:** To study the different manufacturing process of the composites

**COB3:** To learn the fundamentals of lamina constitutive equations

**COB4:** To acquire knowledge on strength of composite laminate

**COB5:** To study the thermal behaviour of layered composites

**MODULE I INTRODUCTION TO COMPOSITE MATERIALS L:7**

Definition – Matrix materials, polymers, metals, ceramics– Reinforcements: particles, whiskers, inorganic fibers, metal filaments– Ceramic fibers–Fiber fabrication– Natural composite wood, Jute –Merits and demerits of composites over monolithic materials - Mechanical properties and applications of composites, Particulate–Reinforced composite Materials, Dispersion–Strengthened composite, Fiber– Reinforced composites, rule of mixtures–Characteristics of fiber reinforced composites -Manufacturing fiber and composites.

**MODULE II MANUFACTURING OF COMPOSITES L:10**

Manufacturing of Polymer Matrix Composites (PMCs): Hand lay–up, spray technique, filament winding, pultrusion, Resin Transfer Moulding (RTM), bag moulding, injection moulding– Sandwich Mould Composites (SMC) – Manufacturing of Metal Matrix Composites (MMCs): Solid state, liquid state, vapour state processing, manufacturing of Ceramic Matrix Composites (CMCs) – Hot pressing– Reaction bonding process– Infiltration technique– Direct oxidation– Interfaces

**MODULE III LAMINA CONSTITUTIVE EQUATIONS L:11**

Lamina constitutive equations -Lamina assumptions – Macroscopic viewpoint - Generalized Hooke's Law -Reduction to homogeneous orthotropic lamina – Isotropic limit case, Orthotropic Stiffness matrix, Definition of stress and moment resultants - Strain displacement relations - Basic assumptions of laminated anisotropic plates - Laminate constitutive equations –Laminate structural Moduli - Evaluation of Lamina Properties from Laminate Tests

**MODULE IV LAMINA STRENGTH ANALYSIS AND L:9  
ANALYSIS OF LAMINATED FLAT PLATES**

Introduction – Maximum stress and strain criteria - Von-mises yield criterion for isotropic materials - Generalized Hill's Criterion for anisotropic materials - Tsai-Hill's failure criterion for composites - Tensor Polynomial (Tsai-Wu) failure criterion - Prediction of laminate failure equilibrium equations of motion

**MODULE V THERMAL ANALYSIS OF COMPOSITES L:8**

Assumption of constant Co-efficient of Thermal Expansion (C.T.E.) – Modification of Hooke's Law - Modification of laminate constitutive equations: Unidirectional, off-axis, Symmetric Balanced Laminates

**L – 45; TOTAL HOURS – 45**

**TEXT BOOKS:**

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Explain the ingredients and its importance in composites

**CO2:** Describe the manufacturing process of the composites

**CO3:** Analyse the fiber reinforced lamina with different boundary conditions

**CO4:** Design laminate with different orientation of plies for required load and supports

**CO5:** Analyse the thermo– mechanical behaviours of laminates

**Board of Studies (BoS):**

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The clear understanding of the mechanics of materials will lay a path for innovation of newer materials.

<b>MEDX 09</b>	<b>DESIGN OF MATERIAL HANDLING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>EQUIPMENT</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

*Use of PSG Design data book is permitted for semester end exam*

**COURSE OBJECTIVES:**

**COB1:** To study the principles of various material handling process and its applications

**COB2:** To learn the design of various elements and attachments of Hoists

**COB3:** To familiarize various drives of hoisting gears

**COB4:** To gain knowledge on the design of conveyors for different applications

**COB5:** To acquire knowledge on various elements of elevator

**MODULE I INTRODUCTION TO MATERIALS HANDLING EQUIPMENT L:7**

Introduction - Types of material handling equipment – Applications: aerospace, automotive, chemical, e-commerce, material processing and manufacturing industries – Principles of material handling– Planning: standardization, work, ergonomics, and automation systems.

**MODULE II DESIGN OF HOISTS L:11**

Design of hoisting elements: Hemp and wire ropes – Welded and roller chains – Design of ropes, pulleys, pulley systems, sprockets and drums – Load handling attachments – Design of forged hooks and eye hooks – Crane grabs – Lifting magnets – Grabbing attachments – Design of arresting gear – Brakes: shoe, band and cone types.

**MODULE III DRIVES OF HOISTING GEAR L:10**

Hand and power drives – Traveling gear – Rail traveling mechanism – Cantilever and monorail cranes – Slewing, jib and luffing gear – Cogwheel drive – Selecting the motor ratings.

**MODULE IV CONVEYORS L:9**

Types – Description – Design and applications: Belt conveyors, apron conveyors and escalators, Pneumatic conveyors, Screw conveyors and vibratory conveyors.

**MODULE V ELEVATORS****L:8**

Bucket elevators: design – Loading and bucket arrangements – Cage elevators: shaft way, guides, counter weights – Hoisting machine– Safety devices – Design of fork lift trucks.

**L – 45; TOTAL HOURS – 45****TEXT BOOKS:**

1. Rudenko, N., Materials handling equipment, ELNvee Publishers, 1970.

**REFERENCES:**

1. Siddhartha Ray., Introduction to Materials Handling, New Age International Publishers, 2008.
2. Raymond A. Kulwiec., Materials Handling Handbook, Wiley India, 2<sup>nd</sup> Edition, 2009.
3. Alexandrov, M., Materials Handling Equipments, MIR Publishers, 1981.
4. Spivakovsy, A.O. and Dyachkov, V.K., Conveying Machines, Volumes I and II, MIR Publishers, 1985.
5. Lingaiah. K. and Narayana Iyengar, "Machine Design Data Hand Book", Vol. 1 & 2, Suma Publishers, Bangalore, 1983.
6. Boltzharol, A., Materials Handling Handbook, The Ronald Press Company, 1958.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Select suitable material handling equipment for a specific application

**CO2:** Design various elements and attachments of hoists

**CO3:** Design the components of hoisting drives

**CO4:** Design the components of various conveyor systems

**CO5:** Design the elevator system and its components

**Board of Studies (BoS):**

20<sup>th</sup> BOS held on 08.08.2022

**Academic Council:**

19<sup>th</sup> AC held on 29 .09.2022

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	H	M	L								M	L	H	M

CO5	H	M	L									L	H	M

**Note:**L– Low Correlation    M – Medium Correlation    H –High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of material handling systems and its components supports domestic technology development, research and innovation in developing countries

**MEDX 10****TRIBOLOGY****L T P C****SDG: 9****3 0 0 3****COURSE OBJECTIVES:****COB1:** To learn the basics of friction.**COB2:** To study the various types of wear.**COB3:** To familiarize with tribology and its measurements.**COB4:** To gain knowledge about the different types of lubricants and lubrication.**COB5:** To study the various applications of tribology.**MODULE I FRICTION****L:8**

Introduction- Laws of friction- Types of friction- Causes of friction- Area of contact- Friction measurement standards- Theories of friction: Adhesion, Abrasive and Junction Growth -Laws of Rolling Friction-Friction Instability- Causes of Friction.

**MODULE II WEAR****L:10**

Theories of wear- Wear Mechanisms: Adhesive Wear, Abrasive Wear, Corrosive Wear and Fretting Wear - Wear Analysis - Techniques to improve wear resistance- Various factors affecting wear- Measurement of wear- Wear between solids and liquids.

**MODULE III TRIBOLOGY****L:10**

Importance of Tribology in Design- Tribology in Industry- Economic Considerations- Measurement of friction: Tribometer, Brake pad testing- Parameters- Different testing methods.

**MODULE IV LUBRICATION****L:9**

Types and properties of lubricants- Importance of lubrication- Standard Grades of lubricants- Lubricants additives - Selection of lubricants - Recycling of lubricants-Boundary lubrication-Mixed lubrication- Full Fluid Film lubrication- Hydrostatic lubrication – Hydrodynamic – Elasto-hydrodynamic lubrication-Viscosity and its measurements.

**MODULE V TRIBOLOGICAL APPLICATIONS****L:8**

Application of tribological study on Bearings: Journal bearings, Roller bearings, Needle bearings and Ball bearings-Gears: Spur gear, Helical gear and Herring bone gears –Clutches: Single plate, Multi plate and Cone clutches- Brakes: Drum and Disc –Bio Joints: Ball and Socket Joints and Hinge Joints.

**L – 45; TOTAL HOURS – 45****TEXT BOOKS:**

1. Bharat Bhushan, Introduction to Tribology, Second Edition, John Wiley & Sons, Ltd, 2013.
2. 2. Prasanta Sahoo, Engineering Tribology, PHI Learning Private Ltd, New Delhi, 2011.

**REFERENCES:**

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

Understanding the effects of friction, wear and its measurements leads to minimize the damage of the industrial components and increase its lifespan.

<b>MEDX 11</b>	<b>DESIGN OF ELECTRIC VEHICLE</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>COMPONENTS</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To study about the basics of electric vehicles

**COB2:** To learn the motor torque calculations for electric vehicle

**COB3:** To familiarize with the electric vehicle architecture

**COB4:** To acquire knowledge on different electric drives and controllers used in the electric vehicles

**COB5:** To learn about electric vehicle control units and charging station

**MODULE I INTRODUCTION TO ELECTRIC VEHICLE L:10**

History - Components of Electric Vehicle - Comparison with Internal combustion Engine: Technology, Benefits and Challenges - Electric Vehicle (EV) classification and their electrification levels - EV Terminology

**MODULE II MOTOR TORQUE CALCULATIONS FOR ELECTRIC VEHICLE L:7**

Calculation of Rolling Resistance, grade resistance and acceleration force - Finding the total tractive effort, torque required on the drive wheel

**MODULE III ELECTRIC VEHICLE ARCHITECTURE L:10**

Types of electric vehicle and components - Electrical protection and system requirement - Battery electric vehicle (BEV) - Hybrid electric vehicle (HEV) - Plug-in hybrid vehicle (PHEV) - Fuel cell electric vehicle (FCEV) - Electrification Level of EV - Comparison of fuel versus electric and solar power - Solar power operated electric vehicles - Photovoltaic solar based EV design.

**MODULE IV ELECTRIC DRIVES AND CONTROLLERS L:9**

Types of motors - Selection and sizing of motor - RPM and torque calculation of motor - Motor controllers - Component sizing - Physical locations - Mechanical and electrical connections of motor.

**MODULE V CONTROL UNIT AND ELECTRIC VEHICLES CHARGING STATION L:9**

Function of control unit - Development Process – Software - Hardware - Data Management – GUI (Graphical User Interface)/HMI (Human Machine Interface) -Types of charging station - Selection and sizing of charging

station - Components of charging station - Line diagram of charging station

**L – 45; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. C. Mi, M. A. Masrur and D. W. Gao, “Hybrid Electric Vehicles: Principles and Applications with Practical Perspectives”, John Wiley & Sons, 2017.
2. S. Onori, L. Serrao and G. Rizzoni, “Hybrid Electric Vehicles: Energy Management Strategies”, Springer, 2015.

**REFERENCES:**

3. James Larminie, John Lowry, “Electric Vehicle Technology”, Wiley publications.
4. Rajendran, G., Vaithilingam, C. A., Misron, N., Naidu, K., & Ahmed, M. R. A comprehensive review on system architecture and international standards for electric vehicle charging stations. Journal of Energy Storage, 42, 2021.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** To explain the basics, benefits and challenges of electric vehicles

**CO2:** To perform motor torque calculations for electric vehicle

**CO3:** To describe the different types of electric vehicle architecture design

**CO4:** To analyze the different electric drive and controllers used in an electric vehicle

**CO5:** To explain the control units and electric vehicles charging station

**Board of Studies (BoS):**

20<sup>th</sup> BOS held on 08.08.2022

**Academic Council:**

19<sup>th</sup> AC held on 29 .09.2022

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of fundamentals of the electric vehicles enables to design and develop an eco-friendly automobiles.

<b>MEDX 12</b>	<b>SHIPMENT PACKAGING DESIGN AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>DEVELOPMENT</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To study various elements of shipment packaging

**COB2:** To learn about the product fragility and related strategies

**COB3:** To familiarize the design aspects of cushioning and packaging box

**COB4:** To gain knowledge on testing of shipment packaging.

**COB5:** To acquire knowledge on the recent trends in shipment packaging

**MODULE I      ELEMENTS OF SHIPMENT PACKAGING      L:7**

Introduction to Shipment packaging – Types: Cushioning elements, Carton box - Unconventional packaging methods - An Overview of Containers and Warehouses.

**MODULE II      PRODUCT FRAGILITY AND PACKAGING SPECIFICATIONS      L:8**

Introduction to Product fragility - Experiments to identify the product fragility - Packaging strategies related to fragility – Packaging Specifications.

**MODULE III      DESIGN AND DEVELOPMENT OF CUSHIONING AND PACKAGING BOX ELEMENTS      L:12**

Cushioning elements and its specifications - Plastic wraps types and definitions - Carton box elements and specifications – Design Calculations - Pallets types and definitions - Cushioning specification calculator - Carton box specification calculator - Optimized final packaging solution calculator - Manufacturing methods in detail.

**MODULE IV      COMPONENT AND PRODUCT TESTING OF SHIPMENT PACKAGING      L:10**

Part level testing requirements - Introduction to different standards related to shipment packaging - International standards ISTA 3A and ASTM D4728 - Drop testing -Vibration testing -Shock testing.

## MODULE V RECENT TRENDS IN SHIPMENT AND PACKAGING

L:8

Recent trends in shipment packaging - Automation - Case study on Amazon packaging - Problem statement: Design & Optimize packaging for any of the e-retailer.

L – 45; TOTAL HOURS – 45

### TEXT BOOKS:

3. S.Natarajan, M.Govindarajan, B. Kumar, “Fundamentals of Packaging Technology”, Prentice Hall India Learning Private Limited, 2<sup>nd</sup> Edition, 2014.
4. Anne Emblem and Henry Emblem, “Packaging Technology”, Woodhead Publishing, 2012.

### REFERENCES:

1. KarliVerghese, Helen Lewis, Leanne Fitzpatrick “Packaging for Sustainability” Springer, London, 2012.
2. Eiri, “Hand Book of Packaging Technology”, Engineers India Research Institute, 2008.

### COURSE OUTCOMES:

After completion of the course, students should be able to

**CO1:** Explain the elements of shipment packaging

**CO2:** Apply packaging strategies related to fragility.

**CO3:** Design the cushioning and packaging box

**CO4:** Select the suitable testing methods for shipment packaging

**CO5:** Describe the recent trends in shipment packaging

### Board of Studies (BoS):

20<sup>th</sup> BOS held on 08.08.2022

### Academic Council:

19<sup>th</sup> AC held on 29 .09.2022

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

CO5	H	L					L					M	H	M

**Note:** L- Low Correlation      M -Medium Correlation      H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The packaging technology helps to optimize the manufacturing and processing methods for packaging materials in terms of environmental, economic and social aspects.

<b>MEDX 13</b>	<b>DESIGN OF PRESSURE VESSELS AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>PIPING ENGINEERING</b>	<b>2</b>	<b>0</b>	<b>2</b>	<b>3</b>

*Use of ASME PRESSURE VESSEL and PIPING CODES are permitted for semester end exam.*

**COURSE OBJECTIVES:**

**COB1:** To learn the fundamentals in pipe and pressure vessel design

**COB2:** To gain knowledge on the stresses in pressure vessel and piping

**COB3:** To familiarize with pressure vessel and piping

**COB4:** To acquire knowledge on dynamic behaviour of pipe structures

<b>MODULE I</b>	<b>INTRODUCTION</b>	<b>L:7</b>
		<b>P:7</b>

Rationale behind development of codes and standards -Highlights of national and international codes -Theoretical background of pressure vessel and piping design as per ASME codes and RCC-MR codes - Engineering aspects in pressure vessel design: Failure criteria, material selection, geometrical considerations and weld inspection.

<b>MODULE II</b>	<b>STRESSES IN PRESSURE VESSEL AND PIPING</b>	<b>L:7</b>
		<b>P:7</b>

General theory of membrane stresses in vessel under internal pressure and its application to shells: Cylindrical, conical and spherical and end closures, stress concentration, thermal stresses, pressure vessel fatigue, stresses in pipes.

<b>MODULE III</b>	<b>DESIGN OF PRESSURE VESSEL AND PIPING</b>	<b>L:8</b>
		<b>P:8</b>

Pressure vessel and piping design considering excessive elastic deformation, plastic instability, buckling, ratcheting, rupture and creep - High temperature design - Problems and case studies.

<b>MODULE IV</b>	<b>DYNAMIC ANALYSIS OF PIPE STRUCTURES</b>	<b>L:8</b>
		<b>P:8</b>

Wind and Seismic analysis - Damping - Lumped Mass - Steady state vibration and harmonic analysis.

**PRACTICALS**

## List of Experiments

1. Exposure to Element Basic data, Additional data using PV Elite
2. 2D and 3D modelling using PV Elite
3. Stress analysis using PV Elite
4. Preparing Isometric drawing of Pipelines and supports using CEASER II
5. Editing model, Modeling Trunnion or Dummy Support in Caesar II
6. Modeling of Horizontal Vessel for Stress Analysis
7. Wind and Seismic Analysis in Caesar II
8. Flange Leakage Analysis using Pressure Equivalent, NC, and ASME Sec VIII method
9. Slug and Surge Flow Analysis
10. WRC 537 and WRC 297 in Caesar II

**L – 30; P-30; TOTAL HOURS – 60**

**TEXT BOOKS:**

1. John F. Harvey, "Theory and Design of Pressure Vessels", 1<sup>st</sup> Edition, CBS Publishers, New Delhi, 2001.
2. Peter Smith, "The Fundamentals of Piping Design", 1<sup>st</sup> Edition, Gulf Publishing Company, USA, 2007

**REFERENCES:**

1. ASME - BPVC, "Pressure Vessel and Boiler code", ASME, USA, 2019.
2. Henry H Bednar, "Pressure Vessel Design Handbook", 2<sup>nd</sup> Edition, Krieger Publishing Company, USA, 1990.
3. ASME - BPVC, "Pressure Vessel and Boiler code" ,ASME, USA, 2019.

CO4	M	M	H		L			L				M	H	M

**Note:**L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The design of pressure vessel and piping ensures the safe storage of enormous energy stored inside of pressure vessels with gases and volatile liquids.

<b>MEDX 14</b>	<b>GEOMETRIC MODELLING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:** To gain knowledge on the basics of computer graphics.

**COB2:** To familiarise the mathematics of curve representations.

**COB3:** To learn the surface and solid modelling techniques.

**COB4:** To study the applications of geometric models.

**MODULE I INTRODUCTION TO COMPUTER GRAPHICS L:8**

Role of Geometric Models in product development – Interactive computer graphics: Raster scan graphics, Line Drawing Algorithm - 2D and 3D transformation - Viewing transformation - Modeling schemes: Wire frame, surface, solid modeling.

**MODULE II CURVE REPRESENTATION L:8**

Implicit, explicit and parametric representation of curves - Continuity conditions - Spline representation: Cubic, Bézier and B-Spline curves - Curve manipulations - NURBS.

**MODULE III SURFACE AND SOLID MODELLING L:8**

Surfaces: Implicit and explicit function of surfaces, Surface Representation - Analytic and synthetic surfaces - Coons surface patch - Solid Modelling: Solid Representation, Topology, Entities, Set operations, Half Spaces - Boundary representation - Constructive Solid Geometry - Sweep representation.

**MODULE IV MODELLING FEATURES AND DATA EXCHANGE L:6**

Parametric Modelling: Relations, constraints - Assembly Modelling - Overview of Product Data Exchange: Need for Translators, IGES, STEP and DXF standards - Collaborative Design.

**L – 30; TOTAL HOURS – 30**

**TEXT BOOKS:**

1. Ibrahim Zeid, "Mastering CAD / CAM" McGraw-Hill Education, 2006.
2. P.N. Rao, "CAD / CAM Principles and Applications", 3<sup>rd</sup> Edition, McGraw Hill Education, 2017.

**REFERENCES:**

CO4	H	M	M		H					L		L	H	M

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The expertise in geometric modelling shall be utilized to visualize, analyse and present innovative design solution that leads to the development of sustainable product and resilient infrastructure by the industry.

<b>MEDX 15</b>	<b>RELIABILITY ENGINEERING</b>	<b>L T P C</b>
<b>SDG: 9</b>		<b>2 0 0 2</b>

**COURSE OBJECTIVES:**

**COB1:** To learn the reliability concepts

**COB2:** To study the role of probability in engineering problems

**COB3:** To acquire skills on maintenance of a system

**COB4:** To be conversant with the repairable systems

**MODULE I BASICSOFPROBABILITYANDRELIABILITY L:12**

Probability concepts -Elements of probability and binomial distribution – Role of distribution curves in probability and reliability - Definitions of reliability, availability, and serviceability-Failure data analysis: Mean time to failure and Mean time between failure, Failure distribution, Constant failure rate model, Time dependent failure rate model- Bathtub curve and Hazard Model: Constant Hazard and linearly Increasing Hazard- System reliability: Series configuration, parallel configuration and mixed configurations.

**MODULE II PROGRESS IN RELIABILITY AND FAULT TREE ANALYSIS L:8**

Improvements of components – Redundancy: Element redundancy, unit redundancy, Standby redundancy, Partially redundant system - Reliability cost trade off- - Fault tree construction –System state analysis - Determination of reliability from fault tree analysis.

**MODULE III MAINTAINABILITY/AVAILABILITY L:5**

Maintainability approach – Strategic maintenance and outsourcing – Preventive maintenance - Availability aspect - System down time - Availability types: Inherent Availability, Achieved availability and operational availability- Reliability and Maintainability trade off.

**MODULE IV REPAIRABLE SYSTEMS L:5**

Instantaneous repair rate - Mean time to repair – Logical and sequential fault location – Equipment records – Role of computers in job orders and maintenance.

**L – 30; TOTAL HOURS – 30**

**TEXT BOOKS:**

1. Charles E. Ebeling, An introduction to reliability and maintainability

engineering, Tata McGraw Hill, 2009.

2. Dhillon, Engineering maintainability, PHI, 2008.

#### REFERENCES:

1. L. S. Srinath, Reliability engineering, Affiliated east west (Pvt) ltd.

#### COURSE OUTCOMES:

After completion of the course, students should be able to

**CO1:** Deal the problems through reliability concepts

**CO2:** Apply the probability statistics to a problem to determine the solution

**CO3:** Incorporate the maintenance skills at appropriate places.

**CO4:** Explain the repairable systems

#### Board of Studies (BoS):

20<sup>th</sup> BOS held on 08.08.2022

#### Academic Council:

19<sup>th</sup> AC held on 29 .09.2022

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

CO4	M	L		M					L			L	M	L

**Note:** L- Low Correlation      M -Medium Correlation      H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The holistic understanding of reliability engineering helps to prevent certain failure modes and reduce the likelihood and frequency of failures.

<b>MEDX 16</b>	<b>MICRO ELECTRO MECHANICAL</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>SYSTEMS (MEMS)</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB 1:** To learn the basic concepts of micro sensors and actuators used in MEMS.

**COB 2:** To acquire knowledge about circuit and system design in MEMS.

**COB 3:** To familiarize with MEMS materials and its fabrication techniques.

**COB 4:** To be conversant about advanced MEMS for sensing and actuation purposes.

**MODULE I MICRO SENSORS AND MICRO ACTUATORS L:8**

Introduction to MEMS – Miniaturization - Typical products – Micro sensors - Micro accelerometers - Micro actuators -Micro fluidics - Biochemical micro system - Static bending of thin plates - Configurations of accelerometers – Thermo mechanics - Fracture mechanics - Thin film mechanics.

Pressure sensors - Thermal sensors - Electrostatics: basic theory, Gap and finger pull up, Electro static actuators, Comb generators, Inchworms, Electromagnetic actuators, Bistable actuators, Micro motors.

**MODULE II CIRCUIT AND SYSTEM DESIGN L:6**

System types- Basic modelling elements in system - Feedback systems - Noise, Modelling of MEMS systems - CAD for MEMS - Capacitive accelerometers.

**MODULE III MEMS MATERIALS AND FABRICATION TECHNOLOGIES L:8**

MEMS materials - Substrates and wafers - Micro system fabrication: Photolithography, Etching techniques, CVD process, Oxidation, Diffusion - Micro machining process: Bulk micro machining, Surface micro machining, and LIGA process.

**MODULE IV ADVANCED MEMS FOR SENSING AND ACTUATION L:8**

Electromechanical effects: Piezo resistance, Piezoelectricity, Shape memory alloy-Thermal effects: Temperature coefficient of resistance, Thermo-electricity, Thermocouples – Micro fluidics - Squeeze film damping - Surface tension and bubbles -Devices: Pumps, valves, mixers -Integrated

fluidic systems - BioMEMS.

**L – 30; TOTAL HOURS – 30**

**TEXT BOOKS:**

1. Stephen Santeria, " Microsystems Design", Kluwer publishers, 2000.

**REFERENCES:**

1. NadimMaluf, " An introduction to Micro electro mechanical system design", Artech House, 2000.

CO2	M	L	L						L			L	M	M
CO3	M	L			M				L		L	L	M	M
CO4	M	L			H				L			H	L	M

**Note:** L- Low Correlation    M -Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The use of Micro-electromechanical systems (MEMS) considerably increases the tiny integrated devices or systems that combine mechanical and electrical components, which fosters the industrialization.

<b>MEDX 17</b>	<b>INSTRUMENTATION AND CONTROL</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:**To learn the basics of measurement systems

**COB2:**To acquire knowledge on force, torque and speed measurements

**COB3:**To familiarize the temperature, pressure and flow measurement techniques

**COB4:** To study the control system components and to provide knowledge of advanced control theory.

**MODULE I INTRODUCTION TO MEASUREMENT SYSTEMS L:6**

Units -General instrumentation system - Static characteristics: Sensitivity, accuracy, precision, and calibration - Dynamics characteristics: Speed of response and Response time, Measuring Lag, Fidelity, Dynamic errors.

**MODULE II MEASUREMENT OF FORCE, TORQUE AND SPEED L:8**

Force measurement: Electric balance, Hydraulic and Pneumatic load cells, strain gauge-Magneto elastic and Piezoelectric load cells -Different methods of Torque measurement: Strain gauge, Relative angular twist - Speed measurement - Capacitive tacho- Drag cup type, D.C and A.C tacho-Generators - Stroboscope

**MODULE III MEASUREMENT OF TEMPERATURE, PRESSURE AND FLOW L:7**

Temperature measurement: Thermistors, RTD, Thermocouple and semiconductors - Pressure measurement: pressure gauge, manometers, bellows, diaphragm, and differential pressure transmitter - Flow measurement: venturi-tubes, rotameters and anemometers.

**MODULE IV SIGNALS AND CONTROL SYSTEMS L:9**

Data acquisition systems - Basic signal conditioning - Basic elements in control systems: Open and closed loop systems - Design and effect of P, PI, PD and PID feedback controllers - Stability analysis of system: Root locus, Routh Hurwitz criterion - Concept of state variables – State models for linear systems

**L – 30; TOTAL HOURS – 30**

**TEXT BOOKS:**

1. W. Bolton, Instrumentation and Control Systems, Newnes-Elsevier publication, 2<sup>nd</sup> edition, 2015.
2. M. Gopal, 'Control Systems, Principles and Design', 4<sup>th</sup> Edition, Tata McGraw Hill, New Delhi, 2012.

**REFERENCES:**

1. Ernest O. Doebelin, Measurement Systems: Application and Design, 5th Edition, TataMcGraw- Hill, 2012.

3. Patranabis D, Instrumentation and Control, PHI Learning Pvt. Ltd, 2011.
4. D.S Kumar, Mechanical Measurements & Control Engineering, Metropolitan Book Co. (P) Ltd, 2015.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Describe the basics of measurement systems

**CO2:** Use various instruments for force, torque and speed measurement

**CO3:** Demonstrate the method of temperature, pressure and flow measurements

**CO4:** Explain the methods of acquiring signals from various sensors and apply control theory

**Board of Studies (BoS):**

20<sup>th</sup> BOS held on 08.08.2022

**Academic Council:**

19<sup>th</sup> AC held on 29 .09.2022

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of industrial instruments and control theory leads to automation in industries.

<b>MEDX 18</b>	<b>ADVANCED SYSTEM SIMULATION</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>(1D MODELING)</b>				
		<b>1</b>	<b>0</b>	<b>0</b>	<b>1</b>

**COURSE OBJECTIVES:**

**COB1:** To familiarize different types of system and system modelling

**COB2:** To learn simulation of various mechanical systems

**MODULE I INTRODUCTION TO SYSTEMS AND SYSTEM MODELLING L:8**

System definition – System boundary – System components and their interactions - System environment – Classification of systems: linear and non-linear systems, lumped and distributed parameter systems, continuous and discrete systems, deterministic and stochastic systems - Analysis of systems - Synthesis of systems, principle of superposition  
Need for system modeling - Fundamental axiom - Component postulate - model evaluation - Mathematical modeling of mechanical systems – Spring, mass, dashpot – Transfer function - State space approach.

**MODULE II SYSTEM SIMULATION L:7**

Simulation: Meaning, types and methods - Simulation of spring-mass-damper systems: Single and multi-degree of freedom, solving differential equation using Laplace transform, Solving the state space equations- Stability criterion through the state transition matrix –Simulation of robotic arm.

**L – 15; TOTAL HOURS – 15**

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

Holistic understanding of system modelling principle and simulations leads to design innovation.

<b>MEDX 19</b>		<b>L T P C</b>
<b>SDG: 9</b>	<b>PRODUCT DESIGN USING VALUE ENGINEERING</b>	<b>1 0 0 1</b>

**COURSE OBJECTIVES:**

**COB1:** To learn the concepts of product design and development

**COB2:** To acquire knowledge about value engineering approach

**MODULE I PRODUCT DESIGN AND DEVELOPMENT L:8**

Introduction to product design and development- Design and development of products - Types of design and redesigns - Engineering designs - Duration and cost of product development - The challenges of Product development.

**MODULE II VALUE ENGINEERING L:7**

Value Engineering (VE) History - Concept and definitions - Value Engineering function - Approach of function - Evaluation of function - Determining function - Classifying function - Evaluation of costs -Value engineering vs Cost cutting - VE applications in product design and success stories.

**L – 15; TOTAL HOURS – 15**

**TEXT BOOKS:**

1. Product Design, by Kevin Otto, Kristin wood, Pearson Education Inc., 2001.
2. Product design and development, by K.T. Ulrich and S.D. Eppinger, Tata McGraw Hill., 2004.
3. Techniques of Value Analysis and Engineering: 3<sup>rd</sup> Edition eBook: Miles, Lawrence D., 2015.

CO1	M	L	L				M					L	H	M
CO2	L	L	L			L	L				L	L	M	M

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The knowledge of Product design with Value Engineering concept upgrades the technological capabilities of industrial sectors and encourages innovation in releasing new customer centric products.

**THERMAL STREAM**

<b>MEDX 31</b>	<b>REFRIGERATION AND AIR</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>CONDITIONING</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To study the principles of refrigeration system

**COB2:** To acquire knowledge on various components of air conditioning

**COB3:** To learn the principles of psychrometry

**COB4:** To acquire knowledge on cooling and heating loads

**COB5:** To gain knowledge on components of refrigeration and various control equipment

**MODULE I REFRIGERATION SYSTEMS L:9**

Review of thermodynamic principles of refrigeration – Concept of air craft refrigeration system – Vapour compression refrigeration system – Use of PH charts – Cascade system – Coefficient of performance (COP) comparison- Vapour absorption system – Ammonia - water and Lithium Bromide - Water systems – Steam jet refrigeration system.

**MODULE II REFRIGERANTS AND COMPONENT SELECTION L:9**

Refrigerants – Properties – Selection of refrigerants - Alternate refrigerants – Basic principle, working, construction and types: Reciprocating and rotary compressors, condensers, evaporators, expansion device – Cooling towers – Testing and charging of refrigeration units - Balancing of system components – Application to refrigeration systems – Ice plant – Food storage plants – Milk chilling plants – Refrigerated cargo ships.

**MODULE III PSYCHROMETRY L:9**

Importance of psychrometric properties - Psychrometric chart - Psychrometric processes: Sensible cooling and heating, Humidification and dehumidification, Cooling and dehumidification, Heating and humidification, Cooling and humidification (evaporative cooling), Adiabatic mixing, Spray washers and cooling towers - Combined heat and mass transfer processes - Coil bypass factor and Apparatus Dew Point (ADP) - Psychrometric calculations for simple air-conditioning system and return air systems with bypass factor - RSHF, GSHF and ESH  
Thermal comfort - Heat transfer from human body by sensible and latent

heat transfer- Metabolic heat generation - Effect of clothing and definition of effective temperatures - ASHRAE comfort chart - Inside and Outside design conditions - Summer air conditioning systems - Winter air conditioning systems - All year air conditioning systems

**MODULE IV COOLING LOAD CALCULATION L:9**

Types of load – Design of space cooling load – Heat transmission through building – Solar radiation – Infiltration – Indoor Air Quality (IAQ) – Internal heat sources (sensible and latent heat) – Outside air and fresh air load – Estimation of total load – Domestic and industrial systems – Central air conditioning systems – Heating load calculations

**MODULE V AIR CONDITIONING SYSTEM DESIGN AND CONTROLS L:9**

Air conditioning equipment – All air systems: Air cleaning and filters, humidifiers, dehumidifiers, air washers - Unitary systems: Window air conditioners – Fan and duct systems - Elementary treatment of duct design – Air distribution system – Types of control action - Controllers – Temperature, pressure and humidity sensors, actuators – Thermal insulation of air conditioning system – Applications: Car, industry, stores and public buildings.

**L – 45; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. Manohar Prasad, Refrigeration and air conditioning. New Age International, 2011.
2. Arora, C. P., Refrigeration and air conditioning. Tata McGraw-Hill Education, 2021.
3. Roy.J.Dosaat, Principles of Refrigeration, Pearson Education, 2001.

**REFERENCES:**

1. Stoecker N.F. and Jones, Refrigeration and Air conditioning, 2e Tata McGraw Hill, 2014.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Explain the principle of refrigeration

**CO2:** Describe the various components of air conditioning

**CO3:** Explain the principles of psychrometry

**CO4:** Perform cooling and heating loads

**CO5:** Elucidate the control equipment used in refrigeration system

**Board of Studies (BoS):**

20<sup>th</sup> BOS held on 08.08.2022

**Academic Council:**

19<sup>th</sup> AC held on 29 .09.2022

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

CO4	M	M		M								L	M	M
CO5	M	M	L		M	M	H					L	M	M

**Note:** L– Low Correlation    M – Medium Correlation    H –High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of refrigeration principles enables to utilize their technical skills, design and operate refrigerating equipment's safe and eco-friendly.

<b>MEDX 32</b>	<b>ADVANCED I.C. ENGINES</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To learn various fuel supply systems used in I.C. engine

**COB2:** To gain knowledge on combustion process in I.C. engine

**COB3:** To study various components of I.C. engine and its sub systems

**COB4:** To acquire knowledge on automobile emissions and control measures

**COB5:** To familiarize on recent advancements in I.C. engine

**MODULE I FUEL SUPPLY SYSTEM FOR IC ENGINE L:9**

Carburetion: Theory of carburetion, mixture requirements for components in S.I Engines, simple carburetor, tuning of carburetor – Requirements of ignition system: Types of ignition system, Direct and indirect, mono point, multipoint injection – Types of nozzles.

**MODULE II COMBUSTION IN I.C. ENGINES L:9**

Combustion phenomena S.I Engine: Normal and abnormal combustion, factors affecting combustion in S.I. engines, Combustion chamber for S.I engines, octane rating of fuels, knocking in S.I and C.I Engine – Combustion phenomena C.I Engine: Normal and abnormal combustion, factor affecting combustion in C.I. Engines, Combustion chamber for C.I engines – Cetane rating.

**MODULE III ENGINE SYSTEM AND COMPONENTS L:9**

Ignition system – Lubrication system – Engine starting system – Engine cooling system – Governing system – Testing of IC engines.

**MODULE IV AIR POLLUTION FROM IC ENGINE AND ITS REMEDIES L:9**

Pollutants: Sources, formation of carbon monoxide, unburnt hydrocarbon, NO<sub>x</sub>, smoke and particulate matter – Method of controlling Emissions: Catalytic converters and particulate traps – Engine modifications to reduce emissions, EGR, SCR, Method of measurement – Emissions norms.

**MODULE V ALTERNATIVE FUELS & RECENT TRENDS L:9**

Alternate fuels: Alcohol, Hydrogen, Compressed Natural Gas, LPG, Bio

Diesel, properties, Suitability – Merits and Demerits – HCCI engines – Comparison of Electric vehicle and IC engine – Challenges in Retrofit of IC engine.

**L – 45; TOTAL HOURS – 45**

**TEXT BOOK:**

1. V. Ganesan, Internal Combustion Engines, 4<sup>th</sup> Edition, Tata McGraw Hill Publishing Co. Ltd. 2017. Advanced Vehicle Technology, Heinz Heisler, Elsevier Ltd, (Second Edition)

**REFERENCES:**

7. Heywood, J.B., Internal Combustion Engine Fundamentals, Tata McGraw-Hill, 9<sup>th</sup> edition, 2017.
8. K.K. Ramalingam, Internal Combustion Engines Fundamentals, Scitech Publications (India) Pvt Ltd, 2018.

10. Willard w. Pulkrabek, Internal Combustion Engines, Pearson Education, 2<sup>nd</sup> edition, 2003

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Analyse and compare different fuel supply system of an I.C. Engine

**CO2:** Explain the stages of combustion and factors involved in it

**CO3:** Describe the various sub systems of I.C engine

**CO4:** Explain automobile emissions and their control measures.

**CO5:** Elucidate the recent trends and developments in I.C. engine.

**Board of Studies (BoS):**

20<sup>th</sup> BOS held on 08.08.2022

**Academic Council:**

19<sup>th</sup> AC held on 29 .09.2022

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of fundamentals and recent trends in IC engines enables to contribute in the development automobile industries

<b>MEDX 33</b>	<b>NUCLEAR ENGINEERING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:7&amp;9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

- COB1:** To study the basics of nuclear physics.
- COB2:** To learn about nuclear reactions and reaction materials.
- COB3:** To gain knowledge on various nuclear reactors and fuel reprocessing
- COB4:** To familiarize about the separation of reactor products.
- COB5:** To acquire knowledge on safe disposal of nuclear waste

**MODULE I NUCLEAR PHYSICS L:8**

Nuclear model of an atom-Equivalence of mass and energy-binding-Radioactive Decay: Modes, Energetics, and Trends-Half life-Neutron interactions-Cross sections.

**MODULE II NUCLEAR REACTIONS AND REACTION MATERIALS L:8**

Mechanism of nuclear fission and fusion- Radio activity- Chain reactions-Critical mass and composition-Nuclear fuel cycles and its characteristics-Uranium production and purification-Zirconium, thorium, beryllium.

**MODULE III NUCLEAR REACTOR AND NUCLEAR FUEL REPROCESSING L:12**

Nuclear reactors: Types of fast breeding reactors, design and construction of fast breeding reactors- Heat transfer techniques in nuclear reactors- Reactor shielding- Fusion reactors- Reprocessing -Nuclear fuel cycles - Spent fuel characteristics - Role of solvent extraction in reprocessing - Solvent extraction equipment.

**MODULE IV SEPARATION OF REACTOR PRODUCTS L:8**

Separation processes - Fuel element dissolution - Precipitation process- Ion exchange - Redox – Purex – ThenoylTrifluoro Acetone (TTA) - Chelation - U235 - Hexone - Tributyl phosphate (TBP) and thorax Processes - Oxidative slugging and electro refining - Isotopes – Principles of Isotope separation.

**MODULE V SAFETY AND DISPOSAL L:9**

Safety and disposal - Nuclear plant safety-Safety systems-Changes and

consequences of accident-Criteria for safety-Nuclear waste-Types of waste and its disposal-Food irradiation and safety- Radiation hazards and their prevention-Weapons proliferation- Case study

**L – 45; TOTAL HOURS – 45**

**TEXT BOOK:**

1. Brent J. Lewis, E,NihanOnder and Andrew A. Prudil, “Fundamentals of nuclear Engineering”, John Wiley, 2017.

**REFERENCES:**

1. Collier J.G., and Hewitt G.F, “Introduction to Nuclear power”, Hemisphere publishing, New York, 2000.

4. 4. S. Glasstone and A. Sesonske, “Nuclear Reactor Engineering: Reactor Systems Engineering”, Vol. 2, Ed. 4, Chapman and Hall, New York, 2013.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** describe the basic concepts of nuclear physics

**CO2:** explain about nuclear reactions and materials

**CO3:** elucidate nuclear reactors and reprocessing techniques of nuclear fuel

**CO4:** discuss about separation of nuclear products

**CO5:** recognise various methods of nuclear waste disposal

**Board of Studies (BoS):**

19<sup>th</sup> BOS held on 21.12.2021

**Academic Council:**

18<sup>th</sup> AC held on 24.02.2022

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

CO2	L	M	M	L			L						L	L
CO3	M	M	M	M	L					M			L	L
CO4	M	M	L	M		L							M	L
CO5	M	L	L	L			L	M					L	M

**Note:** L - Low Correlation    M - Medium Correlation    H - High Correlation

SDG7: Provide Affordable and Clean Energy.

SDG9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of nuclear engineering supports the design and fabrication of components that ensures safety, enhances efficiency and sustainability of nuclear power plants.

**MEDX 34          GAS DYNAMICS AND JET PROPULSION          L T P C****SDG: 9****3 0 0 3****COURSE OBJECTIVES:**

**COB1:**To learn fundamentals of compressible flow and variation of flow properties in variable area duct

**COB2:**To study the variation of flow properties in constant area duct

**COB3:**To familiarize with shock waves and its effect on flow properties

**COB4:**To acquire knowledge on elements of jet engines

**COB5:**To gain knowledge on space vehicles and their applications

**MODULE I          FUNDAMENTALS OF COMPRESSIBLE FLOW          L:12**  
**AND FLOW THROUGH VARIABLE AREA**  
**DUCTS**

Energy and momentum equations for compressible fluid flows - Reference velocities – Stagnation state – Velocity of sound – Critical states – Mach number –Critical Mach number – Types of waves - Mach cone and Mach angle – Effect of Mach number on compressibility – Isentropic flow through variable area ducts - Comparison of isentropic and adiabatic processes - T–s and H–s diagrams for nozzle and diffuser flows – Mach number variation – Impulse function and Area ratio as a function of Mach number.

**MODULE II          FLOW THROUGH CONSTANT AREA DUCT          L:10**

Fluid flow with friction (Fanno flow)– Fanno curve - Variation of flow properties - Variation of Mach number with duct length - Isothermal flow with friction – Fluid flow with heat transfer (Rayleigh flow) - Rayleigh curve - Variation of flow properties - Maximum heat transfer – Application of Fanno flow and Rayleigh flow.

**MODULE III          NORMAL SHOCK WAVES          L:8**

Governing equations – Variation of flow parameters: Static pressure, static temperature, density, stagnation pressure and entropy across the normal shock –Prandtl – Meyer equation – Impossibility of shock in subsonic flows – Application of shock wave in variable and constant area ducts - Flow with oblique shock (elementary treatment only).

**MODULE IV          JET PROPULSION          L:8**

Aircraft propulsion thrust - Modes of propulsion - Operation of Ramjet

engine and turbo Ramjet engine - Scramjet engines - Thermodynamics of jet engines– Thrust equation for a turbojet and turbofan Engine - T–s diagram of a turbojet Engine - Performance calculations –Turbojet and turbofan engines

## **MODULE V SPACE VEHICLES**

**L:7**

Rocket propulsion – Types of rocket engines – Constructional details and working principle – Thrust equation – Effective jet velocity - Specific impulse – Rocket engine performance - Solid and liquid propellants - Comparison of different propulsion systems - Space vehicle applications.

**L – 45; TOTAL HOURS – 45**

### **TEXT BOOKS:**

1. Yahya, S. M. "Fundamentals of Compressible Flow with Aircraft and Rocket Propulsion" New Age International Publisher, New Delhi, 2018.
2. Oosthuizen, Patrick H., and William E. Carscallen. "Introduction to compressible fluid flow". CRC press, 2013.

### **REFERENCES:**

CO5	M	M	M	L	L							L	M	M

**Note:** L– Low Correlation    M – Medium Correlation    H –High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of fundamentals of gas dynamics leads to design and development of energy conversion devices employing compressible fluids.

<b>MEDX 35</b>	<b>ENERGY CONVERSION SYSTEMS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To gain knowledge on power generation from thermal power plant.

**COB2:** To learn about nuclear, hydro and gas turbine power plants and methods to improve efficiency

**COB3:** To acquire knowledge on renewable energy sources and its utilization

**COB4:** To familiarize about Diesel, Magneto Hydro Dynamic(MHD) and Waste heat recovery plants

**COB5:** To learn about energy economics and environmental pollution.

**MODULE I COAL BASED THERMALPOWERPLANTS L:9**

High pressure, Super critical and ultra-super critical boilers - Coal and ash handling - Burning-stoker firing – Burners - Fluidized bed combustion -Dust collection: Scrubbers, ESP- Boiler calculations –Layout of thermal plant–Components.

**MODULE II NUCLEAR, HYDRO AND GAS TURBINE POWER PLANTS L:9**

Development of nuclear plant in India, nuclear energy -Fission chain reaction –Reactor components -Types of reactors and plants- Waste disposal and safety -Hydel plant -Layout and system components – Hydraulic turbines –Types of hydel plants –Safety- Gas turbines - Working - Types - Methods to improve power output and efficiency - Layout with inter-cooling, reheating and regeneration.

**MODULE III RENEWABLE ENERGY BASED POWER PLANTS L:9**

Power from wind-Wind turbine working and types –Solar thermal power plants: solar concentrators for low , medium and high power generation, solar PV power plants -Stand alone and Grid connected - Power from wave, tidal and geothermal sources - Ocean thermal energy conversion system-Energy from biomass.

**MODULE IV DIESEL, MHD ANDWASTEHEAT RECOVERY POWER PLANTS L:9**

Diesel engine power plant layout – Components - Various operating

systems – Merits and demerits- Applications – MHD power plants – Working principle -Types: open cycle and closed cycle systems - Seeded inert gas system - Liquid metal system - Merits and demerits - Future prospects - Energy from wastes - Waste heat recovery: waste heat recovery technologies, importance and types of cogeneration and combined cycle power plants.

**MODULE V ENERGY ECONOMICS AND ENVIRONMENTAL POLLUTION L:9**

Facts in environmental and energy economics - Models and practices - Cost of energy generation – Load curves– Economics of load sharing - Comparison of economics of various power plants - Environmental degradation- Emissions from fossil-based power plants and their implications – Remedial measures.

**L – 45; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. Arora S.C and Domkundwar S, “A course in Power Plant Engineering”,Dhanpatrai, 2016.

**REFERENCES:**

1. EI-WakilM.M, “Power Plant Technology”, McGraw-Hill, 2017.

**COURSE OBJECTIVES:**

**COB1:** To learn the basic concepts of fluid dynamics

**COB2:** To acquire knowledge on Finite element and difference methods applicable to fluid flow and heat transfer

**COB3:** To gain knowledge on modeling of fluid flow and heat transfer using FVM

**COB4:** To familiarize with turbulence modelling in fluid flow

**COB5:** To study the different grid generation techniques

**MODULE I EQUATIONS OF FLUID DYNAMICS L:7**

Basic concepts : Eulerian and Lagrangian methods of describing fluid flow motion, acceleration and deformation of fluid particle, vorticity - Laws governing fluid motion, continuity, Navier – Stokes and energy equations - Boundary layer equation - Euler equations - Potential flow equations - Bernoulli's equation and vorticity transport equation - Initial and boundary conditions - Classification of equation of motions : Hyperbolic, parabolic, elliptic.

**MODULE II FINITE ELEMENT AND DIFFERENCE METHOD L:12**

FEM: Introduction, Weighted residual and variational formulations, Interpolation in one-dimensional and two-dimensional cases, Application of FEM to 1D and 2D problems in fluid flow and heat transfer - FDM: Basic aspects of finite difference equations, Consistency, explicit and implicit methods, errors and stability analysis - Stability of elliptic and hyperbolic equations - Fundamentals of fluid flow modelling: Conservative property, upwind scheme, transporting property, higher order upwinding - Finite difference applications in heat transfer : Conduction, convection.

**MODULE III FINITE VOLUME METHOD L:10**

Introduction - Application of FVM in diffusion and convection problems - NS equations – Staggered grid - Collocated grid - SIMPLE algorithm - Solution of discretised equations using TDMA - Finite volume methods for unsteady problems – Explicit schemes, implicit schemes.

**MODULE IV TURBULENCE MODELS L:8**

Turbulent flows - Boundary layer theory - Introduction to turbulent flows and

Reynolds average Navier-Stokes equations (RANS) - Turbulent modeling: k-epsilon, k-omega, k-omega SST models based on RANS, LES and DES calculation for internal and external flows.

## **MODULE V GRID GENERATION**

**L:8**

Basic concepts of grid generation – Structured grids - algebraic grid generation - Differential equations-based grid generation - General coordinate transformation – Conformal mapping methods - Unstructured grids: Grid refinement, Adaptive grids, Moving grids – Algorithms - CAD interfaces to grid generation.

**L – 45; TOTAL HOURS – 45**

### **COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Explain the basic concepts of fluid dynamics

**CO2:** Analyze fluid flow and heat transfer problems with Finite element and difference methods

**CO3:** Solve flow and heat transfer problems using FVM

**CO4:** Analyze problems which involves turbulence in fluid flow

**CO5:** Generate grid with stability and convergence

**Board of Studies (BoS):**20<sup>th</sup> BOS held on 08.08.2022**Academic Council:**19<sup>th</sup> AC held on 29 .09.2022

CO5	M	L		M	M	L				L		L	H	H

**Note:** L - Low Correlation      M - Medium Correlation      H - High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

CFD as a nascent technology in the digital era, provides a virtual digital environment for simulating, analyzing and predicting flow behaviour thereby inspiring sustainable rapid design and development of new flow handling solutions for industry.

<b>MEDX 37</b>	<b>RENEWABLE SOURCES OF ENERGY</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 7</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To acquire knowledge on energy resources and harnessing of energy from solar

**COB2:** To learn about harnessing energy from wind and geothermal energy sources

**COB3:** To gain knowledge on harnessing energy from ocean, tides and hydro power plants

**COB4:** To study about harnessing energy from bio mass, municipal and industrial wastes

**COB5:** To familiarize with direct energy conversion system

**MODULE I ENERGY RESOURCES AND SOLAR ENERGY L:12**

Primary energy sources - World energy resources - Indian energy scenario - Energy cycle of the earth-Principles of solar energy collection - Solar radiation: measurements , instruments , data and estimation – Types of collectors - Characteristics and design principles of different types of collectors - Performance of collectors - Testing of collectors - Solar thermal applications - Water and air heaters - Performance and applications - Simple calculations - Solar cooling - Solar drying - Solar ponds- Solar tower concept.

**MODULE II WIND AND GEOTHERMAL ENERGY L:8**

Wind potential in India - Energy from the wind - General theory of wind mills -Types of windmills - Design aspects of horizontal axis wind mills - Applications - Potential Sites - Potential impacts of harnessing wind energy - Estimation of geothermal power - Nature of geothermal sites - Hot-dry rocks – Resources- Magma resources - Systems for energy generation - Applications of geothermal energy- Environmental issues.

**MODULE III OCEAN, TIDAL AND HYDRO ENERGY L:8**

Basic theory of OTEC (Ocean Thermal Energy Conversion) - Potential and application of technologies - Energy from tides and waves - Working principle of tidal plants - Classification of small hydro power stations - Mini and micro hydel projects - Turbines and generators for small scale hydro plants - Advantages and limitations- Potential impacts of harnessing ocean, tidal and hydro energies.

**MODULE IV BIO ENERGY****L:9**

Energy from bio mass and bio gas plants - Types - Design principle of biogas plants - Applications- Energy from wastes - Waste collection - Reduction and transfer- Waste burning power plants - Utilization of industrial and municipal wastes - Potential impacts of harnessing bio energy.

**MODULE V OTHER RENEWABLE ENERGY SOURCES****L:8**

Direct energy conversion (description, principle of working and basic design aspects only) – Magneto hydrodynamic systems (MHD) – Thermoelectric generators – Thermionic generators- Fuel cells – Solar cells - Types - Emf generated - Power output – losses - efficiency and applications - Hydrogen conversion and storage systems.

**L – 45; TOTAL HOURS – 45****TEXT BOOKS:**

1. Kanoglu, M., Çengel, Y. A., and Cimbala, J. M. (2020). Fundamentals and applications of renewable energy. McGraw-Hill Education.
2. Bhatia, S. C., and Gupta, R. K. (2019). Textbook of renewable energy. Wood head Publishing India Pvt. Limited.

**REFERENCES:**

1. Sukhatme, S. P., and Nayak, J. K. Solar energy. McGraw-Hill Education, 2017.

4. Garg H. P. Solar energy: fundamentals and applications. Tata McGraw-Hill Education, 2000.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Explain the significance of energy resources and harnessing energy from solar

**CO2:** Elucidate about harnessing energy from wind and geothermal energy sources.

**CO3:** Describe harnessing energy from ocean, tidal and hydro power plants

**CO4:** Explain the power generation using biomass, municipal and industrial

wastes

**CO5:** Describe the direct energy conversion systems

**Board of Studies (BoS):**

20<sup>th</sup> BOS held on 08.08.2022

**Academic Council:**

19<sup>th</sup> AC held on 29 .09.2022

SDG 7: Affordable and Clean Energy.

Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of renewable energy sources and their utilization leads to clean energy and contribution of industrial growth and economic development of country.

<b>MEDX 38</b>	<b>SOLAR ENGINEERING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:**To learn about basics of solar radiation, its measurement and data estimation

**COB2:**To acquire knowledge on performance characteristics of non-concentrating collectors

**COB3:**To study the performance characteristics of concentrating collectors

**COB4:**To learn the principle and application of photo voltaic cells

**COB5:**To familiarize on application and economics of solar energy

**MODULE I SOLAR RADIATION AND MEASUREMENT L:9**

The Solar energy option- An overview of thermal applications - Solar Radiation analysis – Solar constant - Electromagnetic energy spectrum - Determination of sun angles, solar time, solar angles, sunset, sunrise and day length - Solar radiation: Measurements and data estimation.

**MODULE II NON- CONCENTRATING COLLECTORS L:9**

Physical principle and general characteristics of non-concentrating (flat plate) collectors –Performance and thermal analysis of liquid flat plate collector –Coatings and selection of materials - Effect of dust and shade - High temperature non concentrating collectors - Solar stills - Design and performance studies on solar dryers and water heaters.

**MODULE III CONCENTRATING COLLECTORS L:10**

Type of concentrating collectors: line focusing, point focusing and tower collectors, Compound Parabolic Collectors (CPC), Evacuated Tube Collectors (ETC) -Thermal performance of concentrating collectors -Solar thermal power generation – Solar energy storage types: Solar ponds, sensible heat storage, latent heat storage and thermochemical storage systems

**MODULE IV SOLAR CELLS L:9**

Fundamentals of Photovoltaic (PV) cells – PV principle - Materials for solar cells - Design and fabrication of PV cells - PV modules and arrays – Performance analysis of PV cells: Efficiency, effect of temperature intensity and spectrum - Comparative discussion on different state of the art solar conversion technologies and future directions - Design and performance

analysis of standalone and grid connected PV systems

**MODULE V APPLICATIONS AND ECONOMIC ANALYSIS L:9**

Applications of non-concentrating and concentrating collectors: Solar heating, solar cooling, heat pump, solar distillation, solar cooking, solar pumping and solar thermal power generation.

Cost analysis and payback calculations for different types of solar collectors and PV panels (standalone & grid connected) – Installation and operating costs – Environmental and safety issues – Protection systems and performance monitoring.

**L – 45; TOTAL HOURS – 45**

**TEXT BOOKS:**

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation

The knowledge on solar engineering enables the design of components for solar energy conversion for small, medium and large scale power plants

<b>MEDX 39</b>	<b>DESIGN OF HEAT TRANSFER</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>EQUIPMENTS</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To familiarize on the basics of heat transfer equipment

**COB2:** To learn the design of double pipe and shell and tube heat exchangers

**COB3:** To acquire knowledge on design of compact heat exchanger

**COB4:** To study the performance of condenser and evaporator

**COB5:** To gain knowledge on performance of cooling tower

**MODULE I INTRODUCTION TO HEAT EXCHANGER AND HEAT PIPES L:8**

Introduction - Applications of heat exchangers - Classifications of heat exchangers - Fouling in heat exchangers - Design and simulation of heat exchangers - Heat pipes: Structures, applications, basic relations, performance characteristics, effects of working fluid and operating temperature, wick material selection and pore size

**MODULE II DOUBLEPIPE, SHELLANDTUBEHEATEXCHANGERS L:10**

Thermal and hydraulic design: Inner pipe, annulus - Hairpin heat exchangers: Base inner tube, finned inner multi tubes, parallel and series arrangements, pressure drop and constructional features – Shell and tube heat exchanger: Basic components, types and geometry, design procedure, preliminary estimation of size, pressure drop and heat transfer calculations on shell and tube sides – Calculation methods: Kenn, Bell Delaware method.

**MODULE III COMPACTANDPHASE CHANGEHEATEXCHANEGRS L:9**

Compact heat exchangers - Types: finned plate and tube heat exchangers, micro scale heat exchangers, direct contact heat exchangers - Constructional features - heat transfer and pressure drop calculation - Performance analysis - Phase change heat exchangers: Constructional features, flow arrangement, heat exchanger network, heat transfer and pressure drop calculation –Performance analysis and comparison with other type of heat exchangers.

**MODULE IV      CONDENSERS AND EVAPORATORS      L:10**

Shell and tube condenser- Horizontal and vertical types- Temperature distribution and heat flow in a condenser - Pressure drop in a condenser - Extended surfaces - Design and operational consideration - Plate heat condenser - Air cooled and direct contact types - Condensers for refrigeration - Evaporative condenser.

Temperature distribution and heat flow in an evaporator - Evaporator for refrigeration and air conditioning- Chillers - Air coolers - Thermal analysis - Shah, Kandhar, Gungor and Winterton correlations.

**MODULE V      COOLING TOWERS      L:8**

Cooling tower - Types - Basic relation- Heat balance and heat transfer characteristics - Effects of packing, geometry, spray design - Selection of pumps and fans – Testing – Maintenance - Environmental effects - Wind loads - Typical Installations.

**L – 45; TOTAL HOURS – 45**

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of design principles can be applied in the areas of design of heat transfer systems in power plants and process industries.

<b>MEDX 40</b>	<b>ELECTRIC AND HYBRID VEHICLES</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 7</b>		<b>2</b>	<b>0</b>	<b>2</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To study the basics of electric and hybrid electric vehicles and their architecture

**COB2:** To learn the fundamentals of electric drives for electric vehicles and hybrid electric vehicles

**COB3:** To familiarize with different energy storage techniques suitable for hybrid electric vehicles

**COB4:** To gain knowledge on energy management strategies

<b>MODULE I</b>	<b>INTRODUCTION TO ELECTRIC AND HYBRID VEHICLES</b>	<b>L:7</b>
		<b>P:7</b>

History of hybrid and electric vehicles - Vehicle power source characterization - Transmission characterization- Traction motor characteristics - Concept of hybrid electric drive trains-Architecture of hybrid electric drive trains - Social and environmental importance of hybrid and electric vehicles.

<b>MODULE II</b>	<b>ELECTRIC AND HYBRID ELECTRIC DRIVE TRAINS</b>	<b>L:9</b>
		<b>P:8</b>

Basic concept of electric traction - Introduction to various electric drive - Trains - Power flow control in electric drive-train topologies - Electric propulsion unit - Introduction to electric components used in hybrid and electric vehicles- Configuration and control: Direct current (DC) motor drives, induction motor drives, permanent magnet motor drives, switch reluctance motor drives.

Basic concept of hybrid traction - Introduction to various hybrid drive train topologies- Power flow control in hybrid drive train topologies.

<b>MODULE III</b>	<b>ENERGY STORAGE</b>	<b>L:7</b>
		<b>P:8</b>

Introduction to energy storage requirements in hybrid and electric vehicles- Battery based energy storage and its analysis - Energy efficiency in Lead-Acid Batteries - Nickel based batteries- Lithium based batteries- Fuel cell-based energy storage and its analysis- Super capacitor-based energy storage and its analysis- Hybridization of different energy storage devices- Selection of energy storage technology.

**MODULE IV ENERGY MANAGEMENT STRATEGIES****L:7****P:7**

Introduction to energy management strategies used in hybrid and electric vehicles - Classification of different energy management strategies - Comparison of different energy management strategies - Implementation issues of energy management strategies.

**L – 30; P – 30; TOTAL HOURS – 60****PRACTICALS****List of Experiments:**

1. Dismantling, Assembling and Study of Electric Scooter
2. Demonstration of Wiring layout of Electric Vehicle
3. VI Characteristics of SCR (Silicon Controlled Rectifier), IGBT (Insulated Gate Bipolar Transistor) and MOSFET (Metal-Oxide-Semiconductor Field-Effect Transistor)
4. MOSFET based Step-up and Step-down Chopper
5. Speed Control of BLDC (Brushless Direct Current) Motor
6. Speed control of induction Motor
7. Study of CAN (Controller Area Network) Bus protocol for Electric Vehicles

## SDG 7: Clean Energy

The understanding of fundamentals of electric and hybrid vehicles enable to develop an eco-friendly automobile.

<b>MEDX 41</b>	<b>ENERGY CONSERVATION AND</b>	<b>L T P C</b>
<b>SDG: 9</b>	<b>MANAGEMENT</b>	<b>2 0 0 2</b>

**COURSE OBJECTIVES:**

**COB1:** To study the concept and fundamentals of energy conservation

**COB2:** To learn about the energy conservation opportunities in thermal energy system.

**COB3:** To gain knowledge on energy conservation opportunities in residential and industrial sectors.

**COB4:** To familiarise on energy economics and management

**MODULE I ENERGY CONSERVATION CONCEPTS AND L:6  
FUNDAMENTALS**

Concept of energy conservation – Need for energy conservation in domestic, transportation, agricultural and industrial sectors – Lighting and HVAC systems – Simple case studies.

**MODULE II THERMAL ENERGY CONSERVATION L:7**

Thermal energy conservation -Combustion systems and processes – Combustion efficiency – Boiler efficiency – Steam turbine and distribution systems - Energy conservation in turbines – Necessity for maintenance of correct pressure, temperature and quality of steam – Condensate recovery – Recovery of flash steam – Air and gas removal – Thermal insulation.

**MODULE III ENERGY CONSERVATION IN RESIDENTIAL AND L:9  
INDUSTRIAL SECTORS**

Indian energy current scenario, Energy conservation opportunities in Industries: Energy savings in compressed air systems, energy savings in refrigeration & air conditioning systems, emergency DG sets, illumination and electrical motors – Energy efficient fans and motors - Energy conservation in resident, commercial and transport sectors: Residential house, office, educational institutions and commercial shops – Energy efficient lighting - Movement sensors - Tiny switches - Ventilation – Sustainable construction - Fuel economy : Additives, preventive and periodic maintenance.

**MODULE IV ENERGY ECONOMICS AND MANAGEMENT L:8**

Energy economics - Environmental energy economics-Supply and demand in energy market-Energy derivatives- Energy markets-Energy forecasting-

Risk analysis and securities of supply - Energy policy - Concept of energy management – Energy auditing: definition, necessity and types - Understanding energy costs – Bench marking – Energy performance – Matching energy usage to requirement – Maximizing system efficiencies – Optimizing the input energy requirements.

**L – 30; TOTAL HOURS – 30**

**TEXT BOOKS:**

1. Archie, W Culp, “Principles of Energy Conservation”, McGraw Hill, 2003.
2. D Patrick and S W Fardo, “Energy Management and Conservation”, PHI,1992.

**REFERENCES:**

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of energy conservation and management techniques enables to adopt energy conservation measures in residential and industrial sectors leading to sustainable development.

<b>MEDX 42</b>	<b>AUTOMOTIVE POLLUTION AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9,13</b>	<b>CONTROL</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:**To acquire knowledge on emissions and standards

**COB2:** To gain knowledge on emissions from SI and CI Engines

**COB3:**To familiarize on pollution control techniques for SI and CI engines.

**COB4:**To learn automotive emission measuring techniques.

**MODULE I EMISSIONS AND STANDARDS L:7**

Sources of air pollution - Vehicle population assessment in metropolitan cities and contribution to pollution - Effects on human health and environment - Global warming - Types of emission - Transient operational effects on pollution - Emission standards – BS6 - Driving cycles: USA, Japan, Euro and India - Sources of noise and its reduction in automobiles.

**MODULE II EMISSION FORMATION IN SI AND CI ENGINES L:8**

Pollutant formation in SI & CI engines - Mechanism of NO<sub>x</sub>, HC and CO formation in four stroke SI and CI engines - Effects of design and operating variables on emission formation - Smoke and particulate emissions in CI engines.

**MODULE III CONTROL OF EMISSIONS FROM SI AND CI ENGINES L:8**

Exhaust gas recirculation - Selective catalytic reduction - Thermal reactors - Secondary air injection - Water injection - After treatment: Catalytic converters, charcoal canister, positive crank case ventilation system, Diesel particulate filter - NO<sub>x</sub> versus smoke –Trade off - Fuel modifications.

**MODULE IV EMISSION MEASUREMENTS L:7**

Methods of measurements – Carbon monoxide and carbon dioxide measurement by Non-Dispersive Infrared (NDIR) - Flame Ionization Detector (FID) for HC measurement – NO<sub>x</sub> measurement by Chemiluminescent detector – Smoke measurement –Types - Soot measurement – Constant volume sampling procedure – Gas chromatography - Sound level meters

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

SDG 13: Climate Action

The understanding of pollution control techniques enables to develop systems which reduces the greenhouse gas emissions and provide sustainable environment.

<b>MEDX 45</b>	<b>DESIGN OF COMPACT AND MICRO HEAT EXCHANGERS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>1</b>	<b>0</b>	<b>0</b>	<b>1</b>

**COURSE OBJECTIVES:**

**COB1:** To gain knowledge on design of compact heat exchangers

**COB2:** To learn design and applications of micro heat exchangers.

**MODULE I COMPACT HEAT EXCHANGERS L:8**

Compact heat exchangers -Types – Plate heat exchangers – Finned tube heat exchanger – Printed circuit heat exchanger – Spiral heat exchanger – Constructional features - Flow arrangement - Applications – Thermal design - Heat transfer and pressure drop calculations.

**MODULE II MICRO HEAT EXCHANGERS L:7**

Micro heat exchangers – Types- heat transfer and fluid flow through narrow conduits - Design considerations for heat transfer enhancement – Micro heat exchanger for electronics cooling, gas turbines and air conditioning applications.

**L – 15; TOTAL HOURS – 15**

**TEXT BOOKS:**

1. R. K. Shah, Dusan P. Sekulic Fundamentals of Heat Exchanger Design, John Wiley & Sons, 2006.
2. Hesse greaves J E Compact heat exchangers- Selection, Design and operation, Pergamon Press, Oxford, UK, 2008.

**REFERENCES:**

1. Jovan Mitrovic Heat Exchangers- Basics Design Applications, Intech open Ltd. UK, 2012.
2. Heat Exchanger Design Handbook by Kuppan Thulukkanam, Taylor & Francis, 2000.
3. Heat Exchangers: Selection, Rating, and Thermal Design, Third Edition by SadikKakac, Hongtan Liu, CRC-Press, 2004.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Design compact heat exchangers

**CO2:** Design and explain the applications of micro heat exchanger

**Board of Studies (BoS):**20<sup>th</sup> BOS held on 08.08.2022**Academic Council:**19<sup>th</sup> AC held on 29 .09.2022

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	L		M	L	M		L					L	H	M
CO2	L		M	L	M		L					L	H	M

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of heat exchanger principles enables to design and develop heat transfer devices for micro scale cooling applications.

<b>MEDX 43</b>	<b>COMBUSTION OF FUELS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:9</b>		<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:** To learn about the types and characteristics of solid fuels

**COB2:** To study about the types and characteristics of liquid fuels

**COB3:** To acquire knowledge on the various types and properties of gaseous fuels

**COB4:** To familiarize with the thermodynamics associated with combustion and kinetics fuels.

**MODULE I SOLID FUELS L:8**

Fuels :Introduction, Types and Characteristics of Fuels – Production - Present scenario and consumption pattern of fuels -Determination of properties of fuels- Solid fuel types - Coal family - Properties - Calorific value - Coal tar distillation - Coal liquefaction- Bulk and apparent density - Storage - Washability - Coking and Caking Coals - Renewable solid fuels - Biomass - Wood waste -Agro fuels – Manufactured solid fuels

**MODULE II LIQUID FUELS L:7**

Liquid fuel types - Sources - Petroleum fractions - Classification –Refining – Atmospheric and vacuum refining - Refinery equipment's - Properties of liquid fuels: Calorific value, specific gravity, flash and fire point, Octane number, Cetane number - Alcohols - Tar sand oil

**MODULE III GASEOUS FUELS L:7**

Classification - Composition and properties - Estimation of calorific value – Gas calorimeter- Rich and lean gas - Wobbe Index - Natural gas - Dry and wet natural gas - Stripped NG - Foul and sweet NG - LPG - LNG - CNG – Methane- Producer gas - Gasifiers - Water gas - Town gas - Coal gasification -Gasification efficiency - Non - thermal route - Biogas - Digesters – Reactions- Viability - Economics.

**MODULE IV COMBUSTION THERMODYNAMICS & KINETICS L:8**

Stoichiometry - Mass Basis and volume basis - Excess air calculation - Fuel and flue gas - Compositions - Calculations - Rapid methods – Combustion processes – Stationary flame - Surface or flameless combustion -Submerged combustion - Pulsating and slow combustion - Explosive combustion.

Premixed flame – Burning velocity measurement methods - Ignition and Ignition Energy - Spontaneous combustion - Flame propagation – Environment and combustion - Chemical and atmosphere emission from combustion- Emission control techniques

**L – 30; TOTAL HOURS – 30**

### TEXT BOOKS

1. Sharma SP, Mohan Chander, “Fuels and Combustion”, Tata Mcgraw Hill, 1987.

### REFERENCES:

1. Bhatt, “Vora Stoichiometry”, 2<sup>nd</sup> Edition, Tata Mcgraw Hill, 2004.
2. Samir Sarkar, Orient Black Swan, “Fuels and Combustion”, 3<sup>rd</sup> Edition, 2009.
3. Civil Davies, “Calculations in Furnace Technology, Pergamon Press”, Oxford, 1970.

### COURSE OUTCOMES:

After completion of the course, students should be able to

**CO1:** explain the types and characteristics of solid fuels

**CO2:** describe the types and characteristics of liquid fuels

**CO3:** elucidate the various types and properties of gaseous fuels

**CO4:** apply and analyse the thermodynamics and kinetics of combustion

### Board of Studies (BoS):

19<sup>th</sup> BOS held on 21.12.2021

### Academic Council:

18<sup>th</sup> AC held on 24.02.2022

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

CO4	M	L	L	M									H	M

**Note:**L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of fundamentals of combustion enables to adopt control measures for emission and to enhance the combustion efficiency of fuels

<b>MEDX 44</b>	<b>ALTERNATE FUELS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:7&amp;9</b>		<b>1</b>	<b>0</b>	<b>0</b>	<b>1</b>

**COURSE OBJECTIVES:**

**COB1:** To study the different kinds of alternative fuels and their emission characteristics

**COB2:** To gain the knowledge on properties of alternate fuel

**MODULE I INTRODUCTION TO ALTERNATE FUELS L:8**

Introduction to alternative fuels – Need for alternative fuels – Availability of different alternative fuels- Need of alcohol as fuel - Production methods of alcohols- Properties of alcohols as fuels - Methods of using alcohols in CI and SI engines - Emission characteristics - Di-Methyl Ether (DME) - Di-Ethyl Ether (DEE) performance analysis.

**MODULE II PROPERTIES OF ALTERNATE FUELS L:7**

Bio diesel - Oxidation stability - Performance in Engines - Properties of bio-fuels and their importance in the context of IC Engines –Various vegetable oils and their important properties - Different methods of using vegetable oil in engines :Blending, preheating, trans-esterification and emulsification of Vegetable oils – Performance in engines.

**L – 15; TOTAL HOURS – 15**

**TEXT BOOKS:**

1. Thipse S. S., “Alternative Fuels”, Jaico Publishing House, 2010.

**REFERENCES:**

1. AyhanDemirbas, “Biodiesel A Realistic Fuel Alternative for Diesel Engines”, Springer,Verlag London Limited, 2008.
3. Gerhard Knothe, Jon Van Gerpen, Jargon Krahl, “The Biodiesel Handbook”, AOCS Press Champaign, Illinois, 2005.
4. Richard L Bechtold P.E., “Alternative Fuels Guide book”, Society of Automotive Engineers, 1997. ISBN 0-76-80-0052-1.
5. 4. Devaradjane G, Kumaresan M., “Automobile Engineering”, AMK Publishers, 2013.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** describe the various types of alternate fuels and their emission characteristics

**CO2:** explain the various properties of alternate fuel.

**Board of Studies (BoS):**

19<sup>th</sup> BOS held on 21.12.2021

**Academic Council:**

18<sup>th</sup> AC held on 24.02.2022

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	L	L	M	L	L	L					L			L
CO2	M	M	M	M	L	L	M						L	

**Note:** L - Low Correlation    M - Medium Correlation    H - High Correlation

SDG7: provide Affordable and Clean Energy.

SDG9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The knowledge on alternate fuel leads to harness energy from alternate fuel sources, which reduces the need for fossil fuels there by providing eco-friendly environment.

**MANUFACTURING STREAM**

<b>MEDX 51</b>	<b>PROCESS PLANNING AND COST</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG 9</b>	<b>ESTIMATION</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:**To learn the fundamental concepts of process planning

**COB2:**To gain knowledge on various process planning activities

**COB3:**To familiarize with estimation and costing

**COB4:**To acquire knowledge on cost estimation in forming, casting and fabrication process.

**COB5:**To be conversant with the time and cost estimation in manufacturing units

**MODULE I INTRODUCTION TO PROCESS PLANNING L:8**

Introduction- Aims and objectives of Process planning – Steps involved in manual process planning-Types of production - Job type, Batch type and Continuous - Drawing interpretation - Material evaluation – Steps in process selection - Production equipment and tooling selection.

**MODULE II PROCESS PLANNING ACTIVITIES L:8**

Product Analysis - Production aspects: Standardization, Simplification, Marketing aspects - Economical aspects - Break-even analysis- Bill of Materials- Computer aided process planning: Retrieval, generative - Selection of process analysis - Method study and Time study basic procedures.

**MODULE III ESTIMATION AND COSTING L:10**

Importance and aims of cost estimation –Functions of estimation –Costing- Difference between costing and estimation -Importance of realistic estimates- Estimation procedure- -Material cost- Determination of material cost - Labour cost - Expenses- Cost of Product (Ladder of cost) - Illustrative examples - Analysis of overhead expenses - Factory expenses - Administrative expenses- Selling and distributing expenses- Allocation of overhead expenses - Depreciation- Physical and functional causes of depreciation- Method of Depreciation.

**MODULE IV COST ESTIMATION IN FORMING, CASTING AND WELDING SHOP L:10**

Product cost Estimation - Estimation in forging shop-Losses in forging-

Forging cost- Illustrative examples - Estimation in foundry shop- Estimation of pattern and casting cost- Illustrative examples - Estimation in welding shop- Gas cutting- Electric welding- Illustrative examples

### **MODULE V ESTIMATION OF MACHINE TIME AND COST L:9**

Estimation of machining time for machining operations involved in the lathe, drilling, milling and grinding – Estimation of machining cost.

**L – 45; TOTAL HOURS – 45**

#### **TEXT BOOKS:**

1. Sinha B.P, “Mechanical Estimating and Costing”, Tata-McGraw Hill publishing co, 1995.
2. Peter scalon, “Process planning, Design/Manufacture Interface”, Elsevier science technology Books, Dec 2002.

#### **REFERENCES:**

1. Nanusa Singh, “System approach to Computer Integrated Design and Manufacturing” John Wiley & Sons, Inc., 1996.
2. G.B.S. Narang and V. Kumar, “Production and costing “, Khanna Publishers, 2001.

#### **COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Explain about the concept of process planning

**CO2:** Describe the process planning activities.

**CO3:** Calculate various cost components with proper estimation.

**CO4:** Determine the cost for different manufacturing units.

**CO5:** Evaluate the machining time and cost for metal cutting operations

#### **Board of Studies (BoS):**

20<sup>th</sup> BOS held on 08.08.2022

#### **Academic Council:**

19<sup>th</sup> AC held on 29 .09.2022

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	L			M						L		L	H	M

CO4	L	M		M	M					L		L	M	M
CO5	L	M		L	L					L		L	L	M

**Note:** L- Low Correlation M - Medium Correlation H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The knowledge of various process planning and cost estimation techniques will cut down the processing cost of the manufacturing sector.

<b>MEDX 52</b>	<b>PRODUCTION PLANNING AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG 9</b>	<b>CONTROL</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To learn the basics of production planning

**COB2:** To gain knowledge about forecasting techniques

**COB3:** To acquire knowledge on inventory management

**COB4:** To familiarize with production scheduling and routing

**COB5:** To be conversant with dispatching

**MODULE I INTRODUCTION TO PRODUCTION PLANNING L:8**

Production planning and control: Definition, Objectives, functions and control elements - Types of production- Organization of production planning and control – Internal organization department.

**MODULE II FORECASTING L:8**

Importance of forecasting – Types of forecasting - General principles of forecasting techniques - Qualitative methods and quantitative methods.

**MODULE III INVENTORY MANAGEMENT L:9**

Functions of inventory- Relevant inventory cost- ABC analysis- VED Analysis- EOQ model – Inventory control systems – P and Q Systems - Introduction to MRP and ERP - LOB (Line of Balance) - JIT inventory - Japanese concepts.

**MODULE IV PRODUCTION SCHEDULING AND ROUTING L:10**

Definition – Routing procedure- Route sheets – Bill of material - Factors affecting routing procedure - Schedule – Difference with loading - Scheduling polices– Techniques - Standard scheduling methods: Job shop, flow shop - Line balancing- Aggregate planning- Methods for aggregate planning- Chase planning -Expediting - Control aspects.

**MODULE V DISPATCHING L:10**

Introduction - Activities of dispatcher- Dispatching procedure - Follow up – Reasons for the existence of functions – Types of follow up - Applications of computer in production planning and control.

**L – 45; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. S.K. Mukhopadhyay, "Production Planning and control: Text and cases", Prentice-Hall of India Pvt. Ltd, 3<sup>rd</sup> Revised edition, 2015.
2. Jain. K.C. & Aggarwal. L.N., "Production Planning Control and Industrial Management", Khanna Publishers, 1990.

**REFERENCES:**

1. MartandTelsang, "Industrial Engineering and Production Management", First edition, S.Chand and Company, 2000.
2. Stephen N. Chapman, "The Fundamentals of Production Planning and Control", Pearson, 2005.
3. Samuel Eilon, "Elements of Production Planning and Control", 1st Edition, Universal Publishing Corp., 1999.
4. Baffa & Rakesh Sarin, "Modern Production / Operations Management", 8<sup>th</sup> Edition, John Wiley & Sons, 2002.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Explain the fundamentals of production planning.

**CO2:** Describe the forecasting techniques

**CO3:** Elucidate different inventory control techniques

**CO4:** Determine the production scheduling and routing

**CO5:** Describe the dispatching procedures

**Board of Studies (BoS):**

20<sup>th</sup> BOS held on 08.08.2022

**Academic Council:**

19<sup>th</sup> AC held on 29 .09.2022

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	H		M							L		L	H	M
CO2	M		M		H					L	M	L	H	M

CO4	M	M								L		L	M	M
CO5	M	M							L	L		L	M	M

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The knowledge of production planning and control helps inventory management and optimizes the resources and production process.

<b>MEDX 53</b>	<b>STATISTICS AND QUALITY CONTROL</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To gain knowledge on the basics of quality control.

**COB2:** To familiarize with the Statistical process control.

**COB3:** To learn about the Control Charts for Variables and attributes

**COB4:** To acquire knowledge on the concept of sampling methods.

**COB5:** To be conversant with the six sigma and quality management concepts.

**MODULE I INTRODUCTION TO QUALITY CONTROL L:8**

Concepts of quality– Quality characteristics– Quality standards– Quality cost– Concept of quality control– Quality assurance –Inspection planning – Manufacturing planning for quality – Planning for process control–Tools of Quality.

**MODULE II STATISTICAL PROCESS CONTROL L:8**

Introduction to Statistics –Concept of variation – Variable and attribute data –Population and sample – Frequency distribution – Normal curves – Binomial distribution–Concept of process capability –Measures of process capability –Potential process capability –Actual process capability –Process capability analysis –Case studies.

**MODULE III CONTROL CHARTS FOR VARIABLES AND ATTRIBUTES L:12**

Control Charts for X and R : Statistical basis, Development and use, Estimating process capability, Interpretation, The effect of non-normality on the chart, Operating characteristics (OC) function, Average run length – Control Charts for X and S – Control Chart for Individual Measurements – Control Chart for Fraction Nonconforming – Control Charts for Nonconformities or Defects- Choices between Attribute and Variable control charts–Moving average control chart - Cumulative sum control chart(CUSUM) – Exponentially weighted moving average control chart (EWMA).

**MODULE IV ACCEPTANCE SAMPLING L:9**

Introduction – Sampling methods – OC curve– Producer and consumer risk – Quality indices – Average outgoing quality limit – Steps in the design of

acceptance plan – Sampling plans – Average total inspection curve – Dodge Romig sampling plans – Acceptance sampling plan by variables.

### **MODULE V SIX SIGMA AND QUALITY MANAGEMENT L:8**

Concept of six sigma – Methods of six sigma – DMAIC methodology – DFSS methodology – Six sigma control chart – Case studies – Reliability – Quality control and reliability–Taguchi loss function – Failure Mode Effective Analysis (FMEA) and Failure Mode effects and criticality Analysis (FMECA) – Quality circles –Quality systems – Quality Audit.

**L – 45; TOTAL HOURS – 45**

#### **TEXT BOOKS:**

1. Douglas C Montgomery, Introduction to Statistical Quality Control, John Wiley, Eighth Edition, 2019.

#### **REFERENCES:**

1. M.Mahajan,“Statistical quality control” Dhanpatrai and co pvt Ltd., 2016.
2. Dale H. Besterfield, C. B. Michna, G. H. Besterfield, M. B. Sacre,Hemant U., Rashmi U. Total Quality Management, Fifth Edition, Pearson Education, 2018.

#### **COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Explain the concepts of quality control.

**CO2:** Describe the concepts of statistical process control.

**CO3:** Analyze the process using variable and attribute control charts.

**CO4:** Select suitable acceptance sampling techniques.

**CO5:** Elucidate six sigma and quality management concepts to improve quality in an organisation.

#### **Board of Studies (BoS):**

20<sup>th</sup> BOS held on 08.08.2022

#### **Academic Council:**

19<sup>th</sup> AC held on 29 .09.2022

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	H									L		L	H	M
CO2	M			L	M					L		L	M	M
CO3	M	H		M	M					L		L	H	M
CO4	M	M		M	M					L		L	M	M
CO5	M			M	M					L	H	L	M	M

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure– promote inclusive and sustainable industrialization and foster innovation.

The understanding of statistical quality control and its components leads to assure quality processes and products which supports economic development.

<b>MEDX 54</b>	<b>PROJECT MANAGEMENT</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 17</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To learn the fundamentals of project management.

**COB2:** To familiarize with sources of risk and risk analysis.

**COB3:** To gain knowledge on project planning and implementation.

**COB4:** To be conversant with various project tools and communication methods.

**COB5:** To acquire knowledge on project procurement and resource management techniques.

**MODULE I INTRODUCTION TO PROJECT MANAGMENT L:9**

Introduction to Project and Project Management - Project Management as a Career- Project Management Skill Sets - The project life cycle - Project initiation - Project evaluation methods and techniques - Project selection criteria - Project profile.

**MODULE II PROJECT RISK ANALYSIS L:9**

Sources of risk: Project specific, Competitive, Industry specific, Market and international risk – Perspectives of risk – Risk analysis: Sensitivity analysis, scenario analysis, breakeven analysis, simulation analysis, decision tree analysis – Managing/mitigating risk – Project selection under risk.

**MODULE III PROJECT PLANNING AND IMPLEMENTATION L:9**

Project planning – Importance – Functions - Areas of planning - Project objectives and policies - Steps in planning process – Work breakdown structure (WBS) – Capital requirements - Budgeting and cost estimation - Feasibility analysis - Creation of project plan – Project implementation - Pre-requisites - Forms of project organization.

**MODULE IV PROJECT TOOLS AND PROJECT COMMUNICATION L:9**

Triple constraints of project: Quality, cost, and schedule - Quality planning - Quality assurance and quality control - Process control - Cost of quality - Seven tools of quality control - Project time management - Duration estimation method - Project communication management - Formal vs. Informal communications: written, verbal and non-verbal communications.

**MODULE V PROJECT PROCUREMENT AND RESOURCE MANAGEMENT TECHNIQUES L:9**

Introduction to Project Procure Management - Soliciting RFQ/RFP Contract - Project scheduling - Network construction – Estimation of project completion time – Identification of critical path - PERT & CPM – Crashing of project network - Complexity of project scheduling with limited resources - Resource: allocation, levelling and smoothing.

**L – 45; TOTAL HOURS – 45**

**TEXTBOOKS:**

1. Projects: Planning, Analysis, Financing, Implementation and Review, Prasanna Chandra, Tata McGraw-Hill Publishing Company Ltd., New Delhi, 2004.
2. Jack. R. Meredith, Samuel. J. Mantel & Scott. M. Shafer, Project Management in Practice, Fifth Edition, Bangalore: Wiley, 2015.

CO5	L			M	M			M		M	M	L	M	L

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The holistic understanding of project management gives various strategies to improve productivity by optimally utilizing projects resources.

<b>MEDX 55</b>	<b>ADVANCED MACHINING PROCESSES</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To gain knowledge on the basics of advanced machining processes

**COB2:** To familiarize with various advanced machining processes

**COB3:** To acquire knowledge on advanced abrasive machining processes

**COB4:** To be conversant with the advanced electric machining processes

**COB5:** To learn about advanced chemical machining processes

**MODULE I INTRODUCTION L:12**

Advanced machining theory and practices - Mechanisms of chip formation - Shear angle relations and theoretical determination of cutting forces in orthogonal cutting - Analysis of turning, drilling, and milling operations - Mechanics of grinding – Dynamometry - Thermal aspects of machining - Tool wear - Economics of machining - Processing of polymers, ceramics, and composites.

**MODULE II ADVANCED MACHINING PROCESSES L:9**

Working principle and applications of processes: Water jet machining (WJM), Laser beam machining (LBM), Plasma arc machining (PAM), Electron Beam Machining (EBM).

**MODULE III ADVANCED ABRASIVE MACHINING PROCESSES L:8**

Abrasive flow finishing (AFF) - Abrasive jet machining (AJM) - Abrasive water jet machining (AWJM)- Magnetorheological finishing (MRF) - Magnetorheological abrasive flow finishing (MRAFF) - Modelling and analysis.

**MODULE IV ADVANCED ELECTRIC MACHINING PROCESSES L:8**

Principle, applications, process parameters, and Modelling: Electric discharge machining (EDM), Electric Discharge Grinding (EDG), Electric Discharge Diamond Grinding (EDDG), and Wire Electric Discharge Machining (WEDM).

## MODULE V ADVANCED CHEMICAL MACHINING PROCESSES

L:8

Principle, applications, process parameters, and Modelling: Electrochemical machining (ECM), Electrochemical Grinding (ECG), Electro stream Drilling (ESD), Shaped Tube Electrolytic Machining (STEM), Chemical machining (ChM).

L – 45; TOTAL HOURS – 45

### TEXT BOOKS:

1. Pandey P.S. and Shah N. "Modern Manufacturing Processes ", 1980.
2. Battacharya, " Theory of metal cutting ", NCB Agency, 1984.
3. HMT Manual, "Non-traditional machining methods ", 1975.

### REFERENCES:

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The knowledge on advanced machining processes helps industries towards innovation by ease in manufacturing complex parts.

<b>MEDX 56</b>	<b>SURFACE MOUNTING TECHNOLOGY</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To learn the concepts of SMT and PCB fabrication.

**COB2:** To acquire knowledge on Surface mount components and substrates for surface mounting.

**COB3:** To familiarize with the adhesive and solder paste used in SMT applications.

**COB4:** To gain knowledge in various component placement techniques and soldering of surface mounted components.

**COB5:** To be conversant with the inspection, testing, repair, and rework of SMT assemblies.

**MODULE I INTRODUCTION TO SURFACE MOUNT L:9  
TECHNOLOGY (SMT) AND PCB  
MANUFACTURING**

Introduction – Types – Benefits about surface mounting technology - SMT Equipment requirement - Technical issues in Surface Mounting - Trends in Surface Mounting – Future scope -Wafer preparation by various methods - Printed Circuit Boards- Types: Single sided, Double sided, Multi-Layer and Flexible printed circuit board.

**MODULE II SURFACE MOUNT COMPONENTS AND L:9  
SUBSTRATES FOR SURFACE MOUNTING**

Surface Mount component characteristics – Passive and Active surface mount components - Ball grid arrays - Chip scale packaging - Major issues in components – Introduction to substrates - Glass transition temperature - Selection of substrate material – Ceramic - Glass Epoxy substrates - Plating processes - Solder mask selection.

**MODULE III ADHESIVE & SOLDER PASTE AND ITS L:8  
APPLICATIONS**

Ideal adhesive for surface mounting - General classification - Conductive adhesives for surface mounting - Adhesive application methods - Curing of adhesives - Solder paste properties - Solder paste printing - Equipment and process –Defects - Printing for different types of components.

**MODULE IV COMPONENT PLACEMENT AND SOLDERING L:10  
OF SURFACE MOUNTED COMPONENTS**

Manual & Automated placement of parts - Selection criteria for placement equipment - Selection of feeders for placement equipment - Introduction to soldering - Wave soldering- Types of Wave soldering in inert environment – Single step soldering of mixed assemblies and double-sided SMT assemblies – Vapour phase soldering – Various types of reflow soldering.

**MODULE V INSPECTION, TESTING, REPAIRS, AND L:9  
REWORKABILITY OF SOLDER JOINTS IN SMT**

Inspection techniques - Equipment and principle – X-Ray, Defects and Corrective action –Testing process: Stencil printing process, Component placement process, Reflow soldering process, Under fill and Encapsulation process, Electrical testing of PCB assemblies.

Quality Control - Defects related to materials and process - Solder joint quality requirements - Solder joint inspection - Repair equipment and processes - Assembly testing - ISO 9000 Quality standards and certification.

**L – 45; TOTAL HOURS – 45**

1997.(ISBN 0-07-026694-8)

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Explain the concepts of SMT and PCB fabrications.

**CO2:** Elucidate various Surface mount components and substrates for SMT.

**CO3:** Describe the use of adhesives and solder paste for SMT components.

**CO4:** Illustrate the method of placing the components and soldering of surface mounted components.

**CO5:** Illuminate about the inspection, testing, and repair of the SMT assemblies.

**Board of Studies (BoS):**20<sup>th</sup> BOS held on 08.08.2022**Academic Council:**19<sup>th</sup> AC held on 29 .09.2022

**Note:** L- Low Correlation    M -Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding and usage of surface mounting technology for the manufacture of miniature printed circuit boards significantly increase access to information and communications technology.

<b>MEDX 57</b>	<b>OPERATION RESEARCH TECHNIQUES</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To gain knowledge on linear programming problems (LPP)

**COB2:** To learn the concepts of transportation and assignment problems

**COB3:** To familiarize with sequencing and network analysis techniques

**COB4:** To acquire knowledge on inventory, queuing and replacement models

**COB5:** To be conversant with non-linear optimization techniques

**MODULE I LINEAR PROGRAMMING PROBLEMS L:9**

Scope and phases of Operations research (OR) –Advantages and applications of OR – Formulation of the problem -Types: Simplex method, Graphical method, Big M method, and Two phase Method.

**MODULE II TRANSPORTATION AND ASSIGNMENT PROBLEMS L:9**

Transportation Problems: Initial basic feasible solution by North west corner method, Least cost method, and Vogel's approximation method- Optimum solution by MODI method –Degeneracy and Non degeneracy type.

Assignment Problems: Minimization and maximization types of problems by Hungarian method.

**MODULE III SEQUENCING AND NETWORK ANALYSIS L:9**

Sequencing - Objectives – Types: N Jobs to be processed on two machines, N Jobs to be processed on three machines, N jobs M machines.

Network Analysis - Network diagram – Fulkerson's rule - Difference between PERT and CPM – Determination of project duration -Critical path duration and slack time.

**MODULE IV INVENTORY MODELS, QUEUING AND REPLACEMENT MODEL L:9**

Types of inventory cost- Economic order quantity (EOQ) – Deterministic method - Queuing model -Single channel - Replacement of items that deteriorate with time – Money value changing with time – Money value not changing with time- Individual and group replacement policy.

**MODULE V NON LINEAR OPTIMIZATION TECHNIQUES L:9**

Overview of Genetic algorithms, Simulated Annealing and neural network based optimization- Basic concepts of Fuzzy sets- Introduction to Multi Attribute Decision Making (MADM).

**L – 45; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. HamdyA.Taha, “Operations Research an introduction”, 8<sup>th</sup> edition, Pearson publisher, 2016.
2. Dr. D.S. Hira and PremkumarGupta,“Operations Research”, S. Chand Publisher, 2014.

3. Singiresu S. Rao, “Engineering optimization – Theory and practices”, John Wiley and Sons, 3<sup>rd</sup> Edition, 2009.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Apply LPP techniques for solving Engineering problems

**CO2:** Analyze problems in transportation and assignment models

**CO3:** Describe the concept of sequences and network analysis techniques

**CO4:** Explain the concepts of Inventory, Queuing and Replacement problems

**CO5:** Analyze problems in non-linear optimization techniques

**Board of Studies (BoS):**

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The knowledge of Operations research helps us to formulate industrial problems into mathematical models that can be solved.

<b>MEDX 58</b>	<b>TOTAL PRODUCTIVE MAINTENANCE</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To learn the fundamentals of TPM.

**COB2:** To gain knowledge on various types of maintenance.

**COB3:** To acquire knowledge on the pillars of TPM.

**COB4:** To be conversant with the implementation of TPM.

**COB5:** To familiarize with the future of TPM.

**MODULE I TPM OVERVIEW L:9**

Origin and development of Total Productive Maintenance (TPM) – Objectives and functions– TQM vs TPM– Benefits– Four phase approach to PM– TPM and Lean - Six sigma – Tero Technology –Maintenance costs – Maintenance organization.

**MODULE II TYPES OF MAINTENANCE L:9**

Types of Maintenance involved with TPM: Breakdown, Preventive, Predictive, Corrective - Maintenance Prevention – Six big losses – Overall Equipment Effectiveness (OEE) –Planned versus Total Maintenance – Maintainability – Reliability – Five Zero concept – Reliability Centred Maintenance (RCM).

**MODULE III TPM PILLARS L:9**

Housekeeping 5S –Autonomous Maintenance – Kobetsu Kaizen –Planned Maintenance – Quality Maintenance – Training – Office TPM – Safety, Health, and Environment – Common Targets for Lean, Six Sigma, and TPM– HoshinKanri– Equipment Failure Mode Effective Analysis (FMEA).

**MODULE IV TPM IMPLEMENTATION L:9**

Stages of TPM: Preparation, Implementation, Institutionalisation – Twelve steps of TPM development – Small group activities – Structures to Keep TPM – Performance Indicators for TPM – Condition Monitoring Techniques.

**MODULE V FUTURE OF TPM AND CASE STUDIES L:9**

Computerized Maintenance Management System – Overall Factory Efficiency (OFE) – Automation in TPM Implementation – Visual Factory – TPM Concepts in Design and Development Life Cycle – TPM in Service and Healthcare – TPM in Industry 4.0 – Case Studies.

**L – 45; TOTAL HOURS – 45**

**TEXT BOOKS:**

6. Seiichi Nakajima, "Total Productive Maintenance", Productivity Press, 11<sup>th</sup> edition, 1988.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Explain the concepts of TPM used in Industry

**CO2:** Elucidate various types and maintenance.

**CO3:** Describe the pillars of TPM in an industry.

**CO4:** Illustrate the steps involved in implementing the TPM for effective utilization of the machinery.

**CO5:** Apply the futuristic concepts of TPM for the manufacturing and service industries.

**Board of Studies (BoS):**

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of total productive maintenance and its components leads to infrastructure upgradation and retrofit industries to make them sustainable with increased efficiency.

<b>MEDX 59</b>	<b>AGILE MANUFACTURING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To learn the concepts of Agile Manufacturing.

**COB2:** To acquire knowledge on the frame work of Agile Manufacturing and its drivers.

**COB3:** To be conversant with computer control of Agile Manufacturing.

**COB4:** To familiarize with advanced concepts of Agile Manufacturing.

**COB5:** To gain knowledge in Agile supply chain management.

**MODULE I INTRODUCTION L:9**

Definition – Business need – Lean, Flexible, and Agile Manufacturing – Basic elements – Enablers.

**MODULE II AGILE MANUFACTURING BASICS L:9**

Core Concepts – Framework – Conceptual model of Agile Manufacturing– Drivers – Management –Technology – Manufacturing Strategy – Competitive strategy.

**MODULE III COMPUTER CONTROL OF AGILE MANUFACTURING L:8**

Cellular manufacturing – Concepts - Examples – CAPP for Agile Manufacturing – Aggregate capacity planning- Production line design / redesign in Agile manufacturing.

**MODULE IV ADVANCED CONCEPTS L:10**

A strategic approach to develop Agile Manufacturing – Product development strategies for Agility – Information technology/systems and multimedia in agile manufacturing – Managing people in Agile organizations – Measurement of agility.

**MODULE V SUPPLY CHAIN MANAGEMENT IN AGILE MANUFACTURING L:9**

Agile supply chain management – Engineering the Agile supply chain - Enterprise integration and management in Agile organizations – Case studies on Agile Manufacturing.

**L – 45; TOTAL HOURS – 45****TEXT BOOKS:**

1. Gunasekaran A, Agile Manufacturing, 21<sup>st</sup> Strategy Competitiveness Strategy”, Elsevier Publications, 2001.

CO5	L		L								M	L	H	H

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure– promote inclusive and sustainable industrialization and foster innovation.

The understanding of agile manufacturing and its components promotes inclusive and sustainable industrialization and hence significant raise in the employment and gross domestic product.

<b>MEDX 60</b>	<b>COMPOSITE MATERIALS FOR</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>MANUFACTURE</b>	<b>2</b>	<b>0</b>	<b>2</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To study various fiber and matrix materials used in composites.

**COB2:** To learn various PMC manufacturing processes

**COB3:** To gain knowledge on processing of MMC.

**COB4:** To familiarize the basics of CMC and its fabrication.

<b>MODULE I</b>	<b>INTRODUCTION</b>	<b>L:9</b>
		<b>P:10</b>

Fundamentals of composites: Properties, Applications - Reinforcement types: Fiber, Particulate and whisker - Forms of fiber reinforcement: continuous, chopped, mat, prepreg - Properties and processing of synthetic fibers, Natural fibers, particles - Introduction to Matrix materials - Wettability - Interfacial bonding - Rule of mixture - Volume fraction.

<b>MODULE II</b>	<b>POLYMER MATRIX COMPOSITES (PMC)</b>	<b>L:8</b>
		<b>P:10</b>

Characteristics of polymer matrix resins - PMC fabrication processes: Hand layup, spray processes, Compression moulding, Resin transfer moulding, Pultrusion, Filament winding, Injection moulding, Autoclave Molding - Manufacturing Defects -Voids –Non-destructive testing of composites.

<b>MODULE III</b>	<b>METAL MATRIX COMPOSITES (MMC)</b>	<b>L:7</b>
		<b>P:6</b>

Characteristics of metal matrix materials - Reinforcement materials for MMC -Alloy vs. MMCs - Applications - Processing of MMC - Solid state: Sinter forging, spray forming, diffusion bonding -Liquid state processing: Stir casting, Squeeze Casting, Pressure infiltration, deposition and in-situ fabrication.

<b>MODULE IV</b>	<b>CERAMIC MATRIX COMPOSITES (CMC)</b>	<b>L:6</b>
		<b>P:4</b>

Characteristics of ceramic matrix materials -Reinforcement materials for CMC - Properties of CMC - Applications - Processing of CMC: Hot pressing, liquid infiltration technique, in-situ chemical reaction techniques – CVD – CVI - Solgel process.

**PRACTICALS****LIST OF EXPERIMENTS:**

13. Processing of Natural fibers
14. Preparation of particles
15. Volume fraction of flat plates fabricated by compression molding
16. Fabrication of curved shapes using hand lay-up technique
17. Filament winding of pipes
18. Injection Molding
19. Stir casting of MMC
20. Sintering of MMC
21. Liquid infiltration of CMC

**L – 30; P-30; TOTAL HOURS – 60**

**TEXT BOOKS:**

1. Krishnan K Chawla, “Composite materials: Science and Engineering”, Springer, 2006.
2. Mallick P.K., Fiber-Reinforced Composites: Materials, Manufacturing, and Design, CRC Press, 2007.

4. John Wanberg, Composite Materials Fabrication Handbook, Wolfgang Publications, 2009.
5. Sharma S.C., “Composite Materials”, Narosa Publications, 2000.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Select suitable fiber and matrix materials for composites.

**CO2:** Describe various PMC manufacturing processes.

**CO3:** Explain various fabrication processes for metal matrix composites.

**CO4:** Demonstrate various processing of ceramic matrix composites.

**Board of Studies (BoS):**

20<sup>th</sup> BOS held on 08.08.2022

**Academic Council:**

19<sup>th</sup> AC held on 29 .09.2022

**Note:** L- Low Correlation      M -Medium Correlation      H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

Holistic understanding of composite materials and its manufacturing methods leads to sustainable fabrication of industrial products.

<b>MEDX61</b>	<b>ADVANCED WELDING PROCESSES</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:9</b>		<b>2</b>	<b>0</b>	<b>2</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:**To study the fundamental concepts of welding processes

**COB2:**To acquire knowledge on advanced joining techniques

**COB3:**To learn about various friction related and non-metal welding

**COB4:**To familiarize with weld characteristics and inspection methods

**MODULE I INTRODUCTION** **L:8**  
**P:15**

Overview of basic & advanced welding processes and their classifications - Types of weld joints - Edge preparation – Etching of weldments – Weld bead geometry and Nomenclature - Heat sources: Gaussian distribution of heat flux – Power density - Arc and Current characteristics – Voltage - Types of welding manipulators and their applications.

**MODULE II ADVANCED WELDING TECHNIQUES I** **L:6**

Plasma Arc welding - Laser beam welding -Electron beam welding - Ultrasonic welding - Magnetic Arc welding - Explosive welding - Principle and working – Applications.

**MODULE III ADVANCED WELDING TECHNIQUES II** **L:6**

Friction welding- Friction stir welding - Linear friction welding process - Welding of non-metals - Principle and working – Applications.

**MODULE IV WELD CHARACTERISTICS & INSPECTION METHODS** **L:10**  
**P:15**

Weldability – Groove and fillet welds - Weld design: Requirements, Essential factors, Variables, Effective weld length, Effective area, Partial and complete joint penetration, Effective throat, minimum and maximum fillet weld size – Fracture and fatigue of weld joints – Welding symbols – NDT Techniques: Visual penetrant test, Liquid penetrant test, Magnetic particle test, Radiographic testing, Ultrasonic inspection, Eddy current and Acoustic inspection methods.

**PRACTICALS****LIST OF EXPERIMENTS:**

1. Butt joint fabrication – TIG welding process
2. T- joint fabrication – TIG welding process
3. Butt joint fabrication – MIG welding process
4. T- joint fabrication – MIG welding process
5. Butt joint fabrication – MMAW welding process
6. T- joint fabrication – MMAW welding process
7. Lap joint fabrication – MMAW welding process
8. Detection of weld defects – Liquid penetrant, Eddy current & Ultrasonic testing.
9. Weld cladding process (Demo)

**L – 30; P – 30; TOTAL HOURS – 60**

**TEXT BOOKS:**

1. Khanna O. P, “A text book on welding technology”, Dhanpat Rai and sons, New Delhi, 2013.
2. Parmar R S, “Welding process and technology”, Khanna publishers, 3<sup>rd</sup> Edition, 2003.

**REFERENCES:**

1. Kou S, “Welding metallurgy”, John Wiley publication, New York, 2003.
2. John Norrish, “Advanced welding processes”, Woodhead publishing, 2006.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** explain the fundamental concepts of different welding processes

**CO2:** describe the advanced joining techniques

**CO3:** elucidate various friction related and non-metal welding process

**CO4:** analyze and apply weld characteristics and various inspection techniques

**Board of Studies (BoS):**

19<sup>th</sup> BOS held on 21.12.2021

**Academic Council:**

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The holistic understanding of modern and sophisticated welding technology helps in achieving sustainable production.

<b>MEDX62</b>	<b>ADVANCED CASTING AND FORMING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:9</b>	<b>PROCESS</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To familiarize about special casting processes

**COB2:** To learn about automation and other aspects of advanced casting

**COB3:** To gain knowledge on high velocity forming

**COB4:** To study about high speed extrusion, blanking and bar cropping

**COB5:** To acquire knowledge on advanced forming techniques

**MODULE I SPECIAL CASTING PROCESSES L:9**

Expendable pattern casting -Plaster mould casting-Ceramic mould casting – Vacuum casting-Permanent mould casting-Slush casting-Squeeze casting- Application: Casting for ferrous and non-ferrous alloys.

**MODULE II ADVANCED ASPECTS IN CASTING PROCESS L:9**

Mechanization and automation in casting- Use of robot – Near net shape casting – Pollution control - Energy and waste Management - Casting defects - Inspection, diagnosis and rectification - Economics of casting.

**MODULE III HIGH VELOCITY FORMING L:9**

High velocity forging machine-Energy distribution and velocity variation- Pressure distribution during flattening- Dynapak High-speed forming machine -Petro forge high-speed forming machine – Effects of high speed on metal deformation – Factors affecting high velocity forming process – Applications

**MODULE IV HIGH SPEED EXTRUSION, BLANKING AND BAR CROPPING L:9**

Types of high-speed extrusion system- Tool materials- Flow of metal-Theories of high-speed extrusion- High speed blanking and Bar cropping - Two pillar die set - Effects of high speed on blanked components – Effect of high speed on load and energy.

**MODULE V ADVANCED FORMING TECHNIQUES L:9**

Explosive forming: Methods, Types of explosives, Pressure time curve, Energy Transfer medium, Spring back phenomenon – Forming process

variables – Applications - Electro Magnetic forming(EMF): EMF machine , Production of parts, Characteristics and Applications – Super plastic forming process: Construction and working Principle, Super plasticity materials, Process and Applications.

**L – 45; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. SeropeKalpakjian and Steven R, “Manufacturing Engineering and Technology”, 7<sup>th</sup> Edition,Pearson Publisher, 2018.

**Note:** L - Low Correlation    M - Medium Correlation    H - High Correlation

SDG 9: Build resilient infrastructure, Promote inclusive and sustainable industrialization and foster innovation

The understanding of advanced casting and forming processes enables to manufacture complicated high-quality parts which creates value for the industries and inclusive path to economic growth.

<b>MEDX 63</b>	<b>INDUSTRIAL ENGINEERING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG 9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To learn the basics of Industrial engineering to improve productivity

**COB2:** To acquire knowledge on method design and ergonomics

**COB3:** To familiarize with work measurement concepts and techniques

**COB4:** To gain knowledge of facility planning and plant layouts.

**COB5:** To be conversant with engineering economics concepts on demand and forecast

**MODULE I INTRODUCTION TO INDUSTRIAL ENGINEERING L:9**

Definition, History and Development of Industrial Engineering - Industrial Engineering approach - Objectives of Industrial Engineering - Functions of Industrial Engineer - Tools and techniques of industrial engineering - Contribution of F.W.Taylor, Gilberth, Gantt and Maynard to the field of Industrial Engineering - Productivity: Definition, factors of productivity, productivity cycle, total productivity, labor Productivity, measurement of productivity, improvement techniques of productivity- Japanese techniques responsible for higher productivity.

**MODULE II METHOD DESIGN AND ERGONOMICS L:9**

Objectives of work-study - Scope of method study - Steps involved in method study- Selection of job for method study -Recording techniques - Micro and memo motion study- Development and selection of new method - Principles of motion economy- Installation of the proposed method - Ergonomics related to workplace design.

**MODULE III WORK MEASUREMENT L:9**

Time Study: Objectives, Use of stopwatch procedure in making time study - Time study forms - Performance rating - Allowances and its types - Calculation of standard time - Work Sampling: Definition, Confidence level, Sample Size, Determination of Standard time using work sampling, Other

application of work sampling - Synthetic and Standard data method for standard time measurement : Pre-determined Motion Time standards (PMTS), Methods Time measurement (MTM), Maynard operation sequence technique (MOST).

#### **MODULE IV FACILITY PLANNING**

**L:9**

Facility location - Important factors affecting location decision- Cost and non cost factors- Location theories- Basic layouts- Layout planning and designing for job, batch, mass production layout - Hybrid layouts- Computerized layout planning - Systematic layout planning procedure - Computerized relative allocation facility techniques (CRAFT) and Automated layout design planning (ALDEF) - Design of operation line-Line balancing - Material handling systems - Principle - Types of material handling equipment.

#### **MODULE V ENGINEERING ECONOMICS**

**L:9**

Economics: Definition, Scope, basic terms, Classification-Importance of Economics in Engineering. Demand- Law of Demand – Demand curve- Factors affecting demand- Demand Elasticity-Estimation of Demand Elasticity- Methods of Demand Forecasting- Trend, Projection, Correlation and Regression Methods – Problems in Demand Forecasting - Break Even Point- Applications of BEP - Problems- Limitations.

**L – 45; TOTAL HOURS – 45**

#### **TEXT BOOKS:**

1. MartandTelsang, Industrial Engineering and Production Management, S.Chand& Company Ltd. S. Chand & Co., 1998.
2. Khanna. O.P., Industrial Engineering – Khanna Publishers, 2018.

#### **REFERENCES:**

1. P K.C Jain, L.N.Aggarwal production planning control and Industrial management, Khanna publishers, 2015.
2. Prasad L.M, "Principles of Management". Sultan Chand & Sons, 2005.

#### **COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Explore the overall aspects of Industrial engineering to improve productivity

**CO2:** Illustrate the method design and ergonomic concept.

**CO3:** Describe different work measurement techniques.

**CO4:** Explain the concepts facility planning and plant layout

**CO5:** Elucidate about engineering economics and correlate demand with forecast.

**Board of Studies (BoS):**

20<sup>th</sup> BOS held on 08.08.2022

**Academic Council:**

19<sup>th</sup> AC held on 29 .09.2022

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 9: Promote inclusive and sustainable industrialization and foster innovation.

The knowledge of Industrial Engineering helps to increase the productivity by eliminating waste and non-value added activities and the effective utilization of resources.

<b>MEDX 64</b>	<b>GREEN MANUFACTURING DESIGN AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 13</b>	<b>PRACTICES</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To learn the basics of Green Manufacturing

**COB2:** To gain knowledge about Environmental life cycle assessment.

**COB3:** To familiarize with design for environment

**COB4:** To acquire knowledge on green factory through green unit processes.

**COB5:** To be conversant with the value engineering green plan

**MODULE I INTRODUCTION TO GREEN MANUFACTURING L:8**

Need for Green Manufacturing - Definition of green – Is green sustainable – Green Manufacturing: Motivations, Barriers, Strategies, Five principles - Environmental impact of Manufacturing.

**MODULE II ENVIRONMENTAL LIFE CYCLE ASSESSMENT L:9**

Metrics for Green Manufacturing: Financial, Ecology, Society – Life cycle Assessment Methodologies - Economy level: One way economy, Resource efficient economy, closed loop economy - Impact Assessment - Risk Assessment – Economic input output Life cycle assessment (EIO-LCA) – Types: Process based and economy based.

**MODULE III DESIGN FOR ENVIRONMENT L:10**

Importance of Design for environment (DFE): Customer demand, Government pressure, ISO requirements – Environmental factors – Scope of Environmental impact – Global issues, Regional and local issues – Waste Management – Sources of waste – Level of design for Environment: Design for Manufacturability, disassembly, Energy and Efficiency, Zero toxicity, Recycling, Remanufacturing, Compostability, Energy recovery – Implementation of DFE process.

**MODULE IV GREEN FACTORY THROUGH GREEN UNIT PROCESSES L:9**

Roadmap to create a green factory – Green unit manufacturing process – Machining for greenness – Case study with green drilling – Process optimization – Artificial Bee colony (ABC) algorithm – Green factory simulation

**MODULE V VALUE ENGINEERING GREEN PLAN****L:9**

Introduction – Value – Types of value - Value Engineering – Need for value engineering – Cost cutting vs Value engineering – Value engineering green plan – methodology.

**L – 45; TOTAL HOURS – 45****TEXT BOOKS:**

1. Cairncross and Francis – Costing the earth – Harvard Business School Press – 2009.
2. Dornfield David, Green Manufacturing, Springer, 2012.

**REFERENCES:**

1. Gradel.T.E. and B.R. Allenby – Industrial Ecology – Prentice Hall – 2010.
2. Hans Berns, World Commission on Environment and Development (WCED), Our Common Future, Oxford University Press, 2005.
3. Davim.J.Pauls, Green Manufacturing Processes and Systems, Springer, 2013.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Explain the fundamentals of green manufacturing.

**CO2:** Describe the environmental life cycle assessment methods

**CO3:** Elucidate about the design for environment

**CO4:** Illustrate about green factory through green unit processes

**CO5:** Describe the value engineering green plan

**Board of Studies (BoS):**

20<sup>th</sup> BOS held on 08.08.2022

**Academic Council:**

19<sup>th</sup> AC held on 29 .09.2022

SDG 13: Build resilient Infrastructure, promote green manufacturing design and practices to improve climate action.

The holistic understanding of green manufacturing gives various strategies necessary to promote the ecology focus to improve climate action.

<b>MEDX 65</b>	<b>RUBBER PRODUCT MANUFACTURING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:9</b>	<b>TECHNOLOGY</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To learn about the rubber compound mixing and processing

**COB2:** To impart the knowledge of latex product manufacturing

**COB3:** To acquaint with the belt manufacturing technology

**COB4:** To be conversant with the cable and hose manufacturing process

**COB5:** To gain knowledge on footwear and sport goods manufacturing processes

**MODULE I      COMPOUND MIXING AND PROCESSING      L:9**

Mixing machinery for rubber: Two-roll mills, internal batch mixers, continuous mixers - Processing: Calendaring, extrusion – Molding: Compression molding, transfer molding, injection molding.

**MODULE II      LATEX PRODUCT MANUFACTURING      L:9**

Latex compounding ingredients - Preparation of aqueous dispersions and emulsions - Dispersion of water insoluble solids - Dipping and casting - Types of dipping processes - Glove production - Batch dipping process - Continuous dipping process - Defects and remedies - Latex casting - Latex casting using plaster and metal mould - Latex foam rubber - Dunlop process - Talalay process - Testing of latex foam - Latex rubber thread - Latex adhesives.

**MODULE III      BELT MANUFACTURING TECHNOLOGY      L:9**

Conveyor belt: Raw materials, belt construction, different grades of belts with their properties and applications, belt selection, manufacturing, vulcanization.

V-Belt – Raw materials – Processing of various components: Rubber, cord, canvas – Method of processing of various v-belts.

**MODULE IV      HOSE AND CABLE MANUFACTURING      L:9**

Hose manufacturing - High Pressure Hydraulic Hose - Wire Braid Hoses - Spiral Hoses, -Automotive Hose - Coolant Hoses - Power Steering Hoses - Fuel Hoses - Industrial Hose - Air, Water, and Welding Hose - Steam Hose - Cable Technology - Constructional Elements of Polymer-Insulated Cables - Polymeric Materials for Cable Insulation- Compound Design -

Manufacturing Techniques – Extrusion - Curing Processes - Special purpose cables.

**MODULE V FOOT WEAR & SPORTS GOODS L:9**  
**MANUFACTURING**

Types of foot wear – Build up shoes – All rubber shoes – DVP shoes – Dip shoes – Plastic foot wear manufacturing by slush molding – Injection molded PVC shoes - Injection molding of sole and heel units – Expanded micro cellular soling – Methods of manufacturing microcellular soling – Trouble shooting - Golf ball and tennis ball manufacturing.

**L –45; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. Richard F. Grossman, "The Mixing of Rubber", Chapman & Hall, 1997.
2. Rani Joseph, "Practical Guide to Latex Technology", SmithersRapra Technology Ltd, 2013.
3. A.K. Bhowmick, M.M. Hall and H.A. Benaney, "Rubber Products Manufacturing Technology", Marcel Dekker Inc, New York, 1994.

**REFERENCES:**

1. Blow. C.M. and Hepburn C, "Rubber Technology and Manufacture", Butterworths, 1982.
2. C.W. Evans, "Hose Technology", Elsevier Applied Science Publishers, 1979.

**COURSE OUTCOMES:**

At the end of the course, the students will be able to

**CO1:** Explain rubber compound mixing and processing

**CO2:** Describe latex product manufacturing

**CO3:** Demonstrate the belt manufacturing process

**CO4:** Elucidate cable and hose manufacturing methods

**CO5:** Discuss the footwear and sport goods manufacturing processes

**Board of Studies (BoS):**

20<sup>th</sup> BOS held on 08.08.2022

**Academic Council:**

19<sup>th</sup> AC held on 29 .09.2022

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The knowledge on rubber product manufacturing and technology leads to increased efficiency and productivity with sustainable natural rubber practices.

<b>MEDX 66</b>	<b>TYRE MANUFACTURE AND TESTING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To introduce the concept of tyre compounding

**COB2:** To acquaint with the tyre components and structure

**COB3:** To focus on tyre cord reinforcements

**COB4:** To be conversant with the tyre and tube manufacturing

**COB5:** To gain knowledge on tyre testing and evaluation procedures

**MODULE I TYRE COMPOUNDING L:9**

Introduction to tyre technology – Tyre compound and fundamental properties – Compound development – Raw materials for compounding – Designing the compound matrix for the reinforced composite.

**MODULE II TYRE COMPONENTS AND STRUCTURE L:9**

Construction – Basic tyre design-Tyre Components and their functions - Tyre Nomenclature and Structural Dimensions - Classification of tyres based on applications and its requirements - Tubeless Tyre: Function, Construction, Materials and advantages.

**MODULE III TYRE CORD REINFORCEMENTS L:9**

Tyre cords – Physical Properties of tyre-cords – Types: Rayon, Nylon, Polyester, Fibre glass, Aramid, Steel Wire - Cord Processing – Heat Treatment - Adhesive treatment - Bonding systems - Rubber to Cord Mechanism - Tyre Cord Construction -Evaluation of adhesive systems.

**MODULE IV TYRE AND TUBE MANUFACTURING L:9**

Tyre manufacturing – Tyre building – Green tyre – Curing methods – Post curing inflation – Finishing - Tyre mould design - Different types - Their feature and operation of tyre building machines - Bead winding machine - wire/glass processing machines - Bias cutters - Curing presses - Retreading – Criteria – Methods of retreading.

Tubes: Principles of tube design – Manufacturing of tubes: Extrusion, curing, tube testing.

**MODULE V TYRE TESTING AND FIELD EVALUATION****L:9**

Tyre Testing – Destructive and Non-destructive Testing of Tyres - Plunger Tests (Breaking energy) - Pulley wheel test - Field Tract Testing – Braking – Acceleration – Mileage - Regulations – BIS standards for tyres, tubes and flaps, tyre Labelling.

**L –45; TOTAL HOURS – 45****TEXT BOOKS:**

1. A.K. Bhowmick, M.M. Hall and H.A. Benaney, "Rubber Products Manufacturing Technology", Marcel Dekker Inc, New York, 1994.
2. Tyre Technology, Tom French, Adam Hilger, 1989.
3. Tyre Technology, F J Kovac, The Goodyear Tyre & Rubber Company, 1973.

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The knowledge of tyre manufacture and testing leads to various product applications which contribute to the sustainability journey of the global natural economy.

<b>MEDX 67</b>	<b>PLANT LAYOUT AND MATERIAL</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>HANDLING</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:**To learn about product and process layouts

**COB2:**To gain knowledge on different layout requirements

**COB3:**To familiarize with various material handling equipment

**COB4:**To be conversant with the heavy-duty material handling equipment

**MODULE I PRODUCT AND PROCESS LAYOUTS L:7**

Selection of plant locations: Territorial parameters, considerations of land, water, electricity, location for waste treatment and disposal- Safe layout: Process industries, engineering industry, construction sites, pharmaceuticals, pesticides, fertilizers, nuclear power stations, thermal power stations, metal powders manufacturing and machine works, Equipment layout, safety system, fire hydrant locations, fire service rooms -Equipment required for operation of the plant – Capacity -Service and flexibility -Space requirements - Man power requirements

**MODULE II LAYOUT REQUIREMENTS L:8**

Principles of good ventilation –Purpose -Physiological and comfort level types -Local and exhaust ventilation -Hood and duct design -Air conditioning - Ventilation standards -Applications –Lighting -Types, advantages of good illumination, glare and its effect, lighting requirements for various works, standards- Housekeeping -Principles of 5S – Layout planning procedure – Improvisation of existing layout

**MODULE III MATERIAL HANDLING EQUIPMENT L:7**

Ropes :Fiber rope, types, lubrication, overloading, rope fitting, inspection and replacement – Slings: Types, method of attachment, rated capacities, alloy chain slings, hooks and attachment, inspection - Hoisting apparatus: Cranes, types, design and construction, guards and limit devices, – Conveyors-Precautions-Types -Applications.

**MODULE IV HEAVY DUTY MATERIAL HANDLING EQUIPMENT L:8**

Powered industrial trucks: Requirements, operating principles, operators selection and training and performance test, inspection and maintenance, electric trucks, gasoline operated trucks, LPG trucks – Power elevators -

Types of drives, hoist way and machine room emergency procedure, requirements for the handicapped – Escalator-Safety devices and brakes - Moving walks – Man lifts-Construction -Brakes -Inspection

**L – 30; TOTAL HOURS –30**

**TEXT BOOKS:**

1. Spivakosky, “Conveyors and related Equipment”, Vol.I and II Peace Pub. Moscow, 1982.
2. S. C. sharma, Plant layout and material handling, Khanna Publishers, Edition 3, 2000.

**REFERENCES:**

1. APPLE M. JAMES “Plant layout and material handling”, 3<sup>rd</sup> edition, John Wiley and sons,1987.
2. Reymond, A.Kulwice, “Material Handling Hand Book - II”, John Wiley and Sons, New York, 1985.
3. Safety and good housekeeping”, N.P.C. New Delhi, 1985.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Describe various product and process layouts

**CO2:** Explain different layout requirements

**CO3:** Discuss various material handling equipment

**CO4:** Elucidate the heavy duty material handling equipment.

**Board of Studies (BoS):**

20<sup>th</sup> BOS held on 08.08.2022

**Academic Council:**

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of material handling systems and its components supports domestic technology development, research and innovation in developing countries

<b>MEDX 68</b>	<b>PRODUCTION MANAGEMENT</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:** To learn the basics of production management

**COB2:** To familiarize with product design and its analysis

**COB3:** To gain knowledge about planning and investment decisions

**COB4:** To be conversant with the modern concepts in production management

**MODULE I BASICS OF PRODUCTION MANAGEMENT L:7**

Functional Subsystems of Organizations-Systems Concept of Production-Productivity-Strategic Management-Gross Domestic Product (GDP) and Its Impact-World Class Manufacturing

**MODULE II PRODUCT DESIGN AND ANALYSIS L:8**

Product Design and Analysis-New Product Development - Concepts-Process Planning and Design-Process Design-Value Analysis/Value Engineering – Standardization – Simplification-Ergonomic Considerations in Product design-Concurrent Engineering

**MODULE III PLANNING AND INVESTMENT DECISIONS L:7**

Capacity Planning- Determination of Plant Capacity - Capacity Planning Strategies - Equipment Selection - Investment Decisions - Interest Formulas - Bases for Comparison of Alternatives

**MODULE IV MODERN CONCEPTS L:8**

Modern concepts: Management by Objectives (MBO), Management by Exception (MBE), Strategic Management - Planning for Future direction - SWOT Analysis - Information technology in management - Decisions support system - Business Process Re-engineering (BPR) - Enterprises Resource Planning (ERP) - Supply Chain Management (SCM) - Activity Based Management (ABM)-Just-in-Time

**L - 30; TOTAL HOURS – 30**

**TEXT BOOKS:**

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

Understanding the concept of production management helps in sustainable development in manufacturing industries.

<b>MEDX 69</b>	<b>INTERNET OF THINGS FOR</b>	<b>L T P C</b>
<b>SDG: 9</b>	<b>MANUFACTURING</b>	<b>2 0 0 2</b>

**COURSE OBJECTIVES:**

**COB1:** To learn the importance of IOT and IIOT

**COB2:** To study various storage management techniques

**COB3:** To gain knowledge on IOT analytics and applications

**COB4:** To study the applications of IOT in manufacturing industries.

**MODULE I INTERNET OF THINGS L:7**

The Internet of Things: An overview - IOT Vs. IIOT- Components of IIOT: Sensors, Interface, Networks, People & Process, Hype cycle - IOT Market, Trends & future, Real life examples, Key terms – IOT Platform, Interfaces, API, clouds, Data Management Analytics, Mining & Manipulation - Role of IIOT in Manufacturing Processes - Use of IIOT in plant maintenance practices.

**MODULE II AUTOMATIC STORAGE MANAGEMENT L:8**

Techniques for Writing Embedded Code: Memory Management, Performance and Battery Life, Libraries and debugging - Automatic Storage Management in a Cloud World – Introduction to Cloud, Relational Databases in the Cloud, Automatic Storage Management in the Cloud - Smart Connected System Design - Case Study.

**MODULE III IOT ANALYTICS AND ITS SMART APPLICATION L:7**

IOT Analytics: Role of Analytics in IOT, Data visualization Techniques - Online Predictive Modelling - Monitoring and Intelligent Control of Machining/Manufacturing and Logistics/Supply Chain Processes - Smart Energy Management of manufacturing processes and facilities.

**MODULE IV APPLICATIONS IN MANUFACTURING L:8**

Applications of IoT: Multilingual interactions Robotics and Autonomous Vehicles Sensing and data processing-Simultaneous mapping and localization-Levels of autonomy- Smart factories - Future research challenges

**L –30; TOTAL HOURS – 30**

**TEXT BOOKS:**

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of IOT, IIOT and their major applications helps the manufacturing industries to improve its productivity.

<b>MEDX 70</b>	<b>DIGITAL MANUFACTURING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>1</b>	<b>0</b>	<b>0</b>	<b>1</b>

**COURSE OBJECTIVES:**

**COB1:**To study about principles of digital manufacturing process and geometric modelling used for different materials

**COB2:**To gain knowledge about algorithmic design for digital manufacturing and future development

**MODULE I OVERVIEW OF DIGITAL MANUFACTURING PROCESS L:9**

Digitalization of manufacturing process – The ten disruptive principles of digital manufacturing processes – Basic concept and Connotation of digital manufacturing science – Research method of digital manufacturing science – Digital Twins and Applications - Digital Process Twins in Manufacturing - Digital Transformation Concepts and Technologies- Empirical and data driven models.

**MODULE II ALGORITHMIC DESIGN FOR DIGITAL MANUFACTURING AND FUTURE DEVELOPMENT L:6**

Parametric models – Vibrational Geometry – Generative models – Topology optimization - Precision of digital manufacturing – Extreme of digital manufacturing - Environmental protection of digital manufacturing - Safety, Liability and intellectual property – Environmental impact – On-demand fabrication models and mass customization -IIOT.

**L – 15; TOTAL HOURS – 15**

**TEXT BOOKS:**

1. Zhou, Xie, S.Chen,D, “Fundamentals of Digital Manufacturing Science”, Springer Publications, 2012.
2. Ian Gibson, David W Rosen, & Brent Stucker, “Additive Manufacturing Technologies “, Springer Publication, 2014.

**REFERENCES:**

CO2	L								M		M		M	L

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The digitalization of manufacturing process provides solutions to key industrial problems.

<b>MEDX 71</b>	<b>GEOMETRIC DIMENSIONING AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>TOLERANCING</b>	<b>1</b>	<b>0</b>	<b>0</b>	<b>1</b>

**COURSE OBJECTIVES:**

**COB1:** To study the basic principles of geometric dimensioning and tolerancing

**COB2:** To acquire knowledge on geometric characteristics

**MODULE I    BASICS OF GEOMETRIC DIMENSIONING AND    L:7**  
**TOLERANCING**

Principles of dimensional and form measurements - Standards - Measurement errors - Uncertainty in measurements - Examples of linear and angular measurements –Definitions and importance of dimensioning and tolerancing – Datum reference frame – Feature control frame - Maximum material condition (MMC) - Least material condition (LMC) – General Rules – Datum System.

**MODULE II    PRINCIPLES    OF    MEASUREMENT    FOR    L:8**  
**GEOMETRIC CHARACTERISTICS**

Geometric characteristic symbols and meanings – Profile of a surface – Profile of a Line – Form tolerances- Location tolerances – Run out tolerances – Orientation tolerances –True position theory – Dimensional and tolerance schemes – Case studies.

**L – 15; TOTAL HOURS – 15**

**TEXT BOOKS**

1. Krulikowski. A, “Fundamentals of Geometric Dimensioning and Tolerancing”, Delmar Cengage Learning, International edition, 2012.

**REFERENCES:**

1. Oliver R Wade, “Tolerance Control in Design and Manufacturing”, Industrial Press Inc., New York, 2008.
2. Geometric Dimensioning and Tolerancing: Applications and Techniques for use in Design, Manufacturing and Inspection, James D. Meadows CRC Press, First edition, 1995.
3. Rao Ming, Harry Peck, “Designing for Manufacture”, Pitman Publications, London, 1983.
4. Spotts. M.F, “Dimensioning and Tolerance for Quality Production”, Prentice Hall Inc., New Jersey, 1983.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Explain the basic principles for geometric dimensioning and tolerancing

**CO2:** Apply different types of tolerances for a given component

**Board of Studies (BoS):**

20<sup>th</sup> BOS held on 08.08.2022

**Academic Council:**

19<sup>th</sup> AC held on 29 .09.2022

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of the principles of measurement of geometric characteristics leads to manufacture of parts with close dimensional tolerances.

<b>MEDX 72</b>	<b>TOOL AND DIE DESIGN</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>1</b>	<b>0</b>	<b>0</b>	<b>1</b>

**COURSE OBJECTIVES:**

**COB1:** To gain the knowledge on the design of various cutting tools

**COB2:** To study the design of various dies

**MODULE I DESIGN OF CUTTING TOOLS L:7**

Introduction to tool design – Requirements of a tool designer - General tool design procedure – Single Point Cutting Tools: Classification, Nomenclature, geometry, design of single point tools for lathes, shapers, and planers – Chip breakers and their design – Multipoint Cutting Tools: Classification and specification, nomenclature – Design of drills, milling cutters, broaches, and taps – Design of form tools: Flat and circular form tools.

**MODULE II DESIGN OF DIES L:8**

Types of Dies: Single cavity, multi-cavity dies, combination dies, unit dies – Advantages and disadvantages – Wire drawing, Extrusion, Forging and Rolling – Design of dies for sheet metal – Blanking and piercing, Bending and Deep-drawing – Die casting alloys – Finishing – Trimming - Powder metallurgy die design.

**L – 15; TOTAL HOURS – 15**

**TEXT BOOKS**

1. Donaldson, C., "Tool Design", Tata Mc-Graw Hill, 2006.

**REFERENCES:**

1. Grant, H.E., "Jigs and Fixtures, Tata Mc-Graw Hill, 2006
2. Joshi, P.H., "Jigs and Fixtures, Tata Mc-Graw Hill, 2003.
3. Kempster, M.H.A., "Principles of Jig and Tool Design", English University Press Ltd., 1968.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Design various cutting tools

**CO2:** Design various dies

**Board of Studies (BoS):**

20<sup>th</sup> BOS held on 08.08.2022

**Academic Council:**

19<sup>th</sup> AC held on 29 .09.2022

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

CO2	L		H		M						M		M	H

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of tool and die design leads to the innovative production of various tools and dies.

## MATERIALS STREAM

<b>MEDX 76</b>	<b>AEROSPACE MATERIALS</b>	<b>L T P C</b>
<b>SDG: 9</b>		<b>3 0 0 3</b>

### COURSE OBJECTIVES:

**COB1:** To familiarize with the selection of aerospace materials.

**COB2:** To learn about aluminum and its alloys.

**COB3:** To study about titanium and its alloys.

**COB4:** To gain knowledge on high temperature materials.

**COB5:** To acquire knowledge about applications of polymers and composites.

### **MODULE I SELECTION OF MATERIALS L:9**

Introduction – Classification of aircraft materials: Ferrous materials, Nonferrous materials and alloys, Ceramic materials, Composites of polymer, metal and ceramic.

### **MODULE II ALUMINIUM AND ITS ALLOYS L:9**

Introduction – Aluminium alloys – Alloy designation and tempering - Al-Cu alloys - Al-Li alloys - Al-Mg alloys - Nano crystalline aluminium alloys - Properties and its applications- Principles of age hardening.

### **MODULE III TITANIUM AND ITS ALLOYS L:9**

Introduction – Titanium alloys – Alloy designation and tempering -  $\alpha$ - $\beta$  titanium alloys - Structural titanium alloys – Super plasticity – Intermetallics - Properties and its applications.

### **MODULE IV HIGH TEMPERATURE MATERIALS L:9**

Introduction – Classification – Production processes– Nickel alloys - Tantalum alloys - Tungsten alloys - Zirconium alloys - Niobium alloys - Properties and its applications.

### **MODULE V POLYMERS AND COMPOSITES L:9**

Introduction – Polymers – Classification of engineering and high-performance polymers : Polyetheretherketone (PEEK), Polytetrafluoroethylene (PTFE), Polyamide(PA), Polyimides (*PI*) - Composites: Fibre-reinforced composites (Natural and Synthetic), Bio-Composites.

**L – 45; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. Adrian P. Mouritz, "Introduction to aerospace materials" Woodhead Publishing Limited, 1<sup>st</sup> Edition, 2012.
2. K. K. Chawla, Composite Materials, Springer, USA, 2<sup>nd</sup> edition, 2010.
3. V. C. H. Cahn, Material Science and Technology, Wiley WCH, West Germany, 3<sup>rd</sup> edition, 2007.

3. Reed, R. C., The Superalloys: Fundamentals and Applications, Cambridge Univ. Press, 3<sup>rd</sup> Edition, 2006.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Explain the basic concepts of different types of aerospace materials and their uses.

**CO2:** Elaborate the classification, structure, properties and applications of various aluminium alloys.

**CO3:** Elucidate about titanium materials.

**CO4:** Describe the classification, structure, properties and applications of various high temperature alloys.

**CO5:** Illustrate the properties and uses of various polymer composite materials.

**Board of Studies (BoS):**

20<sup>th</sup> BOS held on 08.08.2022

**Academic Council:**

19<sup>th</sup> AC held on 29 .09.2022

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of various aerospace materials leads to development of robust engineering systems.

<b>MEDX 77</b>	<b>THIN FILMS, COATINGS AND</b>	<b>L T P C</b>
<b>SDG: 9</b>	<b>APPLICATIONS</b>	<b>3 0 0 3</b>

**COURSE OBJECTIVES:**

**COB1:** To gain knowledge on various surface coating techniques.

**COB2:** To learn about the preparation of thin films.

**COB3:** To familiarize the characterization techniques of thin films.

**COB4:** To acquire knowledge on properties of thin films.

**COB5:** To study the various applications of thin films.

**MODULE I BASICS OF THIN FILMS AND COATINGS L:9**

Introduction - Classification of coating techniques – Thin films – Thick film - Methods and working principles: Galvanizing, Electrochemical coatings, Electro-depositions, Electroless depositions, Vapour deposition, Conversion Coatings, Thermal Spraying, Plasma electrolytic oxidation.

**MODULE II FABRICATION OF THIN FILMS AND COATINGS L:12**

Gas phase fabrication methods: Magnetron sputtering, Pulsed laser deposition, Atomic layer deposition and Vapour deposition - Liquid phase fabrication methods: Electro spray deposition, Electrochemical deposition and Sol-gel method – Process parameters of Coating Techniques: Anodizing, Galvanizing, Electrochemical Coatings, Conversion Coatings, Thermal Spraying and Powder Coating.

**MODULE III CHARACTERIZATION TECHNIQUES L:9**

Scanning Electron Microscopes (SEM) - Transmission Electron Microscopes (TEM) -Auger Electron spectroscope- X-ray spectrometers- Electron Microprobe -Electron spectrometers- Atomic Force Microscope (AFM)-Nano indentation.

**MODULE IV PROPERTIES OF THIN FILMS AND COATINGS L:8**

Thin films: Microstructure and morphology, Mechanical properties, Chemical properties, Electrical properties, Optical properties, Electronic properties and Magnetic properties – Coatings: Mechanical properties, Chemical properties, Wear and corrosion properties, Microstructure and morphology and Surface roughness.

**MODULE V APPLICATIONS OF THIN FILMS AND COATINGS L:7**

Applications of thin film- Reflection and anti-reflection coatings - Interference filters - Thin film solar cells – Electrophotography - Thin film resistors- Strain gauges and Gas sensors- Super conducting thin films – Architectural and constructional applications.

**L – 45; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. Goswami, Thin Film Fundamentals, New Age international (P) Ltd. Publishers, New Delhi, 2006.
2. Sarfraz Ahmed, Vinayak S. Dakre, Tribology and Characterization of Surface Coatings, John Wiley & Sons, Singapore Pte. Ltd, 2022.

3. Donald L Smith, Thin-Film Deposition: Principles and Practice, McGraw-Hill Professional Pub, 2005.
- 4.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Explain the various surface coating techniques.

**CO2:** Describe the preparation of thin films.

**CO3:** Illustrate the characterization techniques of thin Films.

**CO4:** Elucidate the properties of thin films.

**CO5:** Identify the suitable thin film coating process for different applications.

**Board of Studies (BoS):**

20<sup>th</sup> BOS held on 08.08.2022

**Academic Council:**

19<sup>th</sup> AC held on 29 .09.2022

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of thin film coating processes and its fabrication techniques helps to solve challenges in real time engineering materials processing.

<b>MEDX 78</b>	<b>ADVANCED ENGINEERING MATERIALS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To acquire knowledge about ceramic and carbon materials

**COB2:** To study about composite building materials

**COB3:** To gain knowledge about the nuclear materials.

**COB4:** To familiarize with hydrogen storage materials

**COB5:** To gain knowledge about different functional materials

**MODULE I CERAMIC AND CARBON MATERIALS L:9**

Introduction - Crystal chemistry - Structure and bonding in materials- Ceramic powder production: Chemical and physical means-Powder consolidation- Ceramic processing: Cold and hot Isostatic pressing, Sintering- Nano carbon materials - Carbon fiber- Precursors and production, properties-Carbon-carbon composites: Production, Properties and applications.

**MODULE II COMPOSITE BUILDING MATERIALS L:8**

Introduction - Components of cement based matrices: Preparation, Properties - Polymer impregnated concrete (PIC) -Polymer Cement Concrete (PCC)- Cement based smoothing and concrete repair-Macro defect free cements- Reinforcement of cement based composites

**MODULE III NUCLEAR MATERIALS L:10**

Introduction-Structure of nucleus- Radioactivity - Binding energy - Nuclear interaction -Radiation effects on fissile and non-fissile materials - Radiation damage and radiation growth - Types of reactors and classification - Materials for nuclear reactors: Selection of common materials used as fuels- Canning materials - Coolants - Control rods - Reflectors and shielding materials-Physical and Chemical properties.

**MODULE IV HYDROGEN STORAGE MATERIALS L:10**

Introduction - Fabrication of CNT and CNF- Fuel cell materials - Hydrogen storage methods - Metal hydrides - Hydrogen storage capacity - Hydrogen reaction kinetics

**MODULE V FUNCTIONAL MATERIALS L:8**

Introduction-Dielectric, Ferroelectric, Super conductors and Magnetic materials - Smart materials- Piezoelectric, Pyroelectric and Electro-Optic

materials - Shape memory alloys: Ni-Ti, Cu-Zn-Al-Ferromagnetic Shape Memory Alloy- MEMS materials.

**L – 45; TOTAL HOURS – 45**

**TEXT BOOKS**

**Note:** L- Low Correlation      M -Medium Correlation      H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

Understanding of advanced engineering materials is used for developing various components to meet the societal needs.

<b>MEDX 79</b>	<b>FRACTURE OF ENGINEERING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>MATERIALS</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To learn about mechanical testing methods

**COB2:** To gain knowledge about yield and plasticity of engineering materials

**COB3:** To acquire knowledge about different fracture and its mechanisms

**COB4:** To familiarize with various fracture mechanics concepts

**COB5:** To be conversant with analysis of different engineering failures.

**MODULE I MECHANICAL TESTING L:9**

Definitions of Stress and Strain – Stress - Strain curves for uniaxial loading – Analysis: Tensile test curves, Young's Modulus, Compression test curves, Failure by elastic buckling, Resilience and Strain Energy Density - Non-axial Testing - Multiaxial loading - Elastic anisotropy- Stiffness and Compliance matrices- Thermal stresses and thermal shock induced failure - Composite materials: Iso-stress analysis, Iso-strain analysis, Strength of composites.

**MODULE II YIELD AND PLASTICITY L:9**

Dislocations in metals and ceramics – Slip - Yield criteria for metals and ceramics - Post-yield plastic Deformation - Slip in single crystals and textured Materials - Deformation twinning - Plasticity in polymers.

**MODULE III FRACTURE L:9**

Introduction - Theoretical cohesive Strength - Defect population in solids – Stress Concentration factor - Notch strengthening - External variables affecting fracture - Characterizing the fracture process: Fractures of metals, Macroscopic fracture mechanisms, Fractures of polymers, Fractures of glasses and ceramics, Fractures of engineering composites - Microscopic fracture mechanisms

**MODULE IV FRACTURE MECHANICS L:10**

Griffith crack theory - Charpy impact fracture testing - Polymer fracture test methods - Limitations of the transition temperature philosophy - Stress analysis of cracks -Relation between energy rate and stress field

approaches - Crack-tip plastic-zone size estimation - Fracture-mode transition: Plane stress versus plane strain, Plane-strain fracture - Toughness testing of metals and ceramics - Fracture toughness of engineering alloys - Plane-stress fracture-Toughness testing - Toughness determination from crack-opening displacement measurement.

## **MODULE V ANALYSIS OF ENGINEERING FAILURES**

**L:8**

Typical defects - Macroscopic fracture surface examination - Metallographic and fractographic examination: Fracture surface preservation, Fracture surface cleaning, Replica preparation and image interpretation, Component failure analysis data - Case studies: Shotgun barrel failures, Stress corrosion cracking failure of the point pleasant bridge, Failure analysis of 175-mm gun tube, Hydrotest failure of a 660-cm-diameter rocket motor casing, Premature fracture of powder-pressing die, Laboratory analysis of a lavatory failure.

**L - 45; TOTAL HOURS – 45**

### **TEXT BOOKS:**

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

Understanding of different testing and failure modes helps to prevent the damages occurred in components which leads to build resilient Infrastructure.

<b>MEDX 80</b>	<b>DESIGN AND APPLICATIONS OF</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>BIOMATERIALS</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To learn about the basics of biomaterials

**COB2:** To gain knowledge about various metallic biomaterials and its applications

**COB3:** To familiarize with the various ceramic biomaterials and its applications.

**COB4:** To acquire knowledge on polymeric biomaterials and its applications.

**COB5:** To study the composite biomaterials and its applications.

**MODULE I BASICS OF BIOMATERIALS L:9**

Introduction - Definition of biomaterials - Classification of biomaterials : Structure, Physical and Mechanical properties - Chemical bonding - Crystalline and Amorphous: Melting, Solidification, Nucleation.

**MODULE II METALLIC BIOMATERIALS L:9**

Introduction - Definition of materials - Classification of biomaterials: Stainless Steels, CoCrAlloys, Ti Alloys, TiNi Alloys, Dental Metals – Bio-corrosion of metallic implants – Applications.

**MODULE III CERAMIC BIOMATERIALS L:9**

Introduction – Bio- inert Ceramics – Biodegradable Ceramics - Bioactive Ceramics - Deterioration of Ceramics - Bio-ceramic manufacturing processes - Applications.

**MODULE IV POLYMERIC BIOMATERIALS L:9**

Introduction – Basic Structure and Polymerization – Polymers used as Biomaterials –Sterilization – Surface Modifications for Improving Bio-compatibility - Chemo gradient Surfaces for Cell and Protein Interaction - Applications.

**MODULE V COMPOSITE BIO MATERIALS L:9**

Introduction – Structure and properties – Anisotropy of composites – Particulate Composites – Fibrous Composites – Porous Materials – Biocompatibility - Applications.

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of various biomaterials helps to develop artificial body parts for the improvement of human life index.

<b>MEDX 81</b>	<b>POWDER METALLURGY</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To gain knowledge about the basics of powder metallurgy

**COB2:** To learn about powder conditioning and compaction

**COB3:** To familiarize sintering process and its various stages.

**COB4:** To study about various secondary operations used in Powder Metallurgy

**COB5:** To acquire knowledge on various materials for Powder Metallurgy

**MODULE I BASICS OF POWDER METALLURGY L:9**

Introduction– Characteristics and testing of metal powders-Chemical composition and purity-Particle size and its distribution-Apparent density-Tap density- Flow rate –General process parameters in powder metallurgy – Applications.

**MODULE II POWDER CONDITIONING AND COMPACTION L:9**

Synthesis of metal powder: Sol-gel method, Atomization, High energy planetary ball milling method– Blending/mixing process –Compaction - Presses – Tool construction - Various powder compaction Techniques: Cold isostatic pressing, Hot isostatic pressing, Uniaxial pressing and Biaxial pressing technique.

**MODULE III SINTERING L:9**

Sintering process – Sintering furnace - Classification – Sintering atmosphere - Stages of sintering – Mechanisms of sintering – Types of sintering.

**MODULE IV SECONDARY OPERATIONS L:9**

Heat treatment of sintered parts – Surface treatments – Impregnation treatments – Electroplating – Machining of sintered compacts.

**MODULE V MATERIALS FOR POWDER METALLURGY L:9**

Bearing materials - Copper-lead bearings, Oil Impregnated Porous bearings-Dry Lubricated bearings-Polytetrafluoroethylene (PTFE) bearing- Sintered Friction Materials-Dry Clutch-Dry Brake-Aircraft Brakes-Oil clutches and brakes-.Cemented Carbides – Ferrites – Cermets - Electrical contact

materials - Compositions-Properties-Applications.

**L – 45; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. Sydney H Avner, "Introduction to Physical Metallurgy", Tata McGraw Hill Edition, 10<sup>th</sup> Edition, 2017.
2. Randall M. German., "Sintering Theory and Practice", Wiley-VCH Publications, 4<sup>th</sup> Edition, 1996.

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

Holistic understanding of powder metallurgy concepts enhances the industries to develop superior products.

**MEDX 82            FRICTION MATERIALS: FORMULATION    L   T   P   C**  
**SDG: 9                    AND CHARACTERIZATION                    3   0   0   3**

**COURSE OBJECTIVES:**

**COB1:** To learn the fundamentals of friction and wear

**COB2:** To gain knowledge on various types of friction materials used for different applications

**COB3:** To familiarize with the production process of friction materials

**COB4:** To be conversant with various characterizations of friction materials.

**COB5:** To acquire knowledge on various brake systems

**MODULE I            INTRODUCTION TO FRICTION AND WEAR                    L:7**

Introduction – Laws of friction - Types of friction – Wear - Types of wear - mechanism involved in wear of friction material.

**MODULE II            TYPES OF FRICTION MATERIALS AND                    L:9**  
**APPLICATIONS**

Friction Materials -Definition and nature overview of types - Organic Friction Materials – Semi-metallic friction materials - Ceramic Friction Materials - Sintered Friction Materials – Frictionless Magneto Rheological (MR) Fluid Brakes - Applications of friction materials in different sectors.

**MODULE III            PRODUCTION OF FRICTION MATERIALS                    L:9**

Raw Materials - Classification of raw materials - Properties of raw materials – Materials performing multi tasks - Sample formulations – Manufacturing of brake pad – Mixing – Preforming – Backplate treatment – curing and post curing – Scorching - Secondary operations.

**MODULE IV            CHARACTERIZATION OF FRICTION                    L:12**  
**MATERIALS**

Types of Characterizations: Physical, Chemical, Mechanical, Thermal, Tribological and Micro structural characterization as per industrial standards – NVH issues -Environmental concerns –Non exhaust emissions – PM<sub>2.5</sub>, PM<sub>10</sub> - Measurement of particulate matter – Emission reduction methods - Case studies.

**MODULE V BRAKE SYSTEM****L:8**

Basic requirements and functions of braking system - Types of brake system: Hydraulic brake system, compressed air brake system, parking brakes, dual power brake system, regenerative brake system, electronic brake for distribution, anti-skid braking system - Brake efficiency and testing - Weight transfer - Braking ratio – Brake shims.

**L – 45; TOTAL HOURS – 45****TEXT BOOKS:**

1. Sundarkrishna K.L, Friction Material Composites, Materials Perspective, Springer-Verlag Berlin Heidelberg, 2012, First edition.

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The innovation in newer materials and process will help in the development of friction materials with minimum NVH issues and controlled wear emissions.

<b>MEDX 83</b>	<b>RUBBER RECYCLING AND WASTE</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 09</b>	<b>MANAGEMENT</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To gain knowledge on the methods of rubber recovery and grinding it for further use.

**COB2:** To acquire knowledge on devulcanization techniques to recover rubbers

**COB3:** To be conversant with the characterisation techniques for the devulcanized rubbers

**COB4:** To familiarize with the tire recycling methods

**COB5:** To learn about the applications of crumb rubber

**MODULE I RUBBER RECOVERY AND GRINDING L:9**

Sources of Waste Rubbers – Waste Rubber Grinding Routes – Different Grinding Conditions: Ambient Grinding, Cryogenic Grinding, Solution Grinding, Grinding by Ozone Cracking, Elastic Deformation Grinding

**MODULE II DEVULCANIZATION TECHNIQUES L:9**

Generic categories of devulcanization technology - Structure of Sulfur Vulcanized Rubber and the Properties of Sulfur Crosslinks - Devulcanization Processes: Thermal, Mechanical, Mechanochemical, Ultrasonic, Microwave, Microbiological and Miscellaneous Devulcanization Processes.

**MODULE III DEVULCANISED RUBBER CHARACTERISATION TECHNIQUES L:9**

Characterization of devulcanized rubber: Chemical analysis tests, tests to assess the quality, processability, physical properties of vulcanizates of devulcanized rubber – Surface treatment of rubber waste.

**MODULE IV RECYCLING OF TIRE RUBBERS L:9**

Life cycle and reusability of tire rubbers - Tire composition - Tire parts and end-of-life tires –Reason to recycle tire rubbers - Recycling of waste/used tire rubbers - Reusability and application of tire rubbers - Advantages of reclaimed/de-vulcanized rubber - Disadvantages of reclaimed/de-vulcanized rubber.

**MODULE V APPLICATIONS OF RUBBER CRUMB L:9**

Filler for plastics and rubber compounds: Construction products, Bitumen

and Asphalt Products, Gypsum and Screed Products, Roofing Products, Sound and Vibration Insulation Products, Sports and other Recreational Surfaces.

**L –45; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. Martin Forrest, "Recycling and Re-use of Waste Rubber", Smithers Information Ltd., 2014.
2. Carlson, Melody, Kim, Jin Kuk "Rubber Recycling Challenges and Developments", Royal Society of Chemistry, 2019.

**REFERENCES:**

1. Sadhan K. De, AvraamIsayev, KlementinaKhait, "Rubber recycling", Taylor & Francis, CRC Press, 2005.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Describe the methods of rubber recovery and grinding it for further use.

**CO2:** Explain the devulcanization techniques to recover rubbers

**CO3:** Illustrate the characterisation techniques for the devulcanized rubbers

**CO4:** Elucidate the tire recycling methods

**CO5:** Identify the applications of crumb rubber

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The holistic understanding of rubber recycling and waste management helps to achieve the global goals as waste management is a powerful driver of sustainable development.

<b>MEDX 84</b>	<b>POLYMER RHEOLOGY</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To gain knowledge on the viscoelastic behaviour of polymeric materials

**COB2:** To familiarize with various models depicting viscoelastic behaviour

**COB3:** To be conversant with the parameters influencing the viscosity of polymers

**COB4:** To familiarize with the flow properties of polymer melt

**COB5:** To acquire knowledge on measurement of rheological properties and its application to processing.

**MODULE I    VISCOELASTIC BEHAVIOUR OF POLYMERIC                    L:9**  
**MATERIALS**

Introduction to Rheology – Types of mechanical deformation – Elastic materials – Viscous materials – Viscoelasticity – Effect of rate of strain, temperature and time on mechanical behaviour of polymeric materials – Creep – Stress relaxation – Boltzman principle – Time temperature super position principle – WLF equation.

**MODULE II    VARIOUS MODELS DEPICTING VISCOELASTIC                    L:9**  
**BEHAVIOUR**

Mechanical models – Stress strain response of spring and dashpot – Viscoelastic models – Maxwell element – Voight kelvin element – Response to creep and stress relaxation – Four-parameter model – Dynamic mechanical properties – Behavior of Maxwell element and relaxation spectra.

**MODULE III    PARAMETERS INFLUENCING POLYMER                                    L:9**  
**VISCOSITY**

Effect of pressure on viscosity - Effect of temperature - Activation energy- Effect of molecular weight and molecular weight distribution on viscosity - Molecular at dependence of zero shear viscosity - Effect of crosslinking - Crystallinity branching – Copolymerization - Effect of: fillers, fiber filled polymer melts, plasticizers - Shear rate dependence of viscosity.

**MODULE IV    FLOW PROPERTIES OF POLYMER MELT                                    L:9**

Fluid flow – Types of fluid flow – Time dependent fluids - Shear rate

dependent fluids - Newtonian and Non-Newtonian fluids – Laminar flow of Newtonian fluids - Viscosity of polymer melts – Shear thinning and shear thickening – Zero-shear rate viscosity – Laminar flow of Newtonian fluids- Power law – General treatment of isothermal viscous flow in tubes – Entrance and exit effects - Elastic effects in polymer melt flow - Die-swell and melt fracture – Weissenberg effect – Normal stress difference – Elongational viscosity.

**MODULE V MEASUREMENT OF RHEOLOGICAL L:9  
PROPERTIES AND ITS APPLICATIONS TO  
PROCESSING**

Measurements of rheological properties – Capillary rheometers – Melt flow index – Cone and plate viscometer– Torque rheometers – Mooney viscometer – cure meters– Optical methods – Birefringence - Applications of rheology to polymer processing (injection moulding, extrusion and blow moulding).

**L –45; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. Montgomery T. Shaw, "Introduction to Polymer Rheology", Wiley, Kindle Edition, 2012.
2. Vikas Mittal, "High Performance Polymers and Engineering Plastics", Scrivener Publishing LLC, 2011.
3. Chang Dae Han, "Rheology and Processing of Polymeric Materials: Volume 2: Polymer Processing", Oxford University Press, USA, 2007.
4. Tim Osswald and Natalie Rudolph Madison, "Polymer Rheology Fundamentals and Applications", Hanser Publishers, Munich, Cincinatti, USA, 2014.
5. Richard, G. Griskey, "Polymer Process Engineering", Springer Science and Business Media, 2012.
6. J.A Brydson, "Plastics Materials", Butterworth-Heinemann; 8<sup>th</sup> Edition, UK, 2016.

2. Alexander Ya. Malkin, Avraam I. Isayev Rheology, "Concepts, Methods, and Applications", Chem Tech Publishing, 2<sup>nd</sup> Edition, 2012.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Explain the viscoelastic properties of polymer materials

**CO2:** Describe the models depicting viscoelastic behavior of polymer materials

**CO3:** Elucidate the parameters influencing the polymer viscosity

**CO4:** Analyze the flow properties of polymer melts

**CO5:** Illustrate the function of various rheological instruments

**Board of Studies (BoS):**

20<sup>th</sup> BOS held on 08.08.2022

**Academic Council:**

19<sup>th</sup> AC held on 29 .09.2022

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2

CO5	M	L			M							L	M	M

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of polymer rheology helps process industries to optimize the process parameters to get defect free products.

<b>MEDX 85</b>	<b>RUBBER TECHNOLOGY</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To learn the fundamentals of elastomers

**COB2:** To gain knowledge on various compounding and mixing process

**COB3:** To be conversant with the general-purpose elastomers

**COB4:** To familiarize with the special purpose rubbers

**COB5:** To acquire knowledge on the thermoplastic elastomers

**MODULE I FUNDAMENTALS OF ELASTOMERS L:6**

Rubber elasticity – Thermodynamics of rubber – Classification of rubbers – Effect of structure on: T<sub>g</sub>, chemical structure on the performance properties of rubbers, processing properties of elastomers.

**MODULE II COMPOUNDING AND MIXING L:9**

Principles of rubber compounding – Compounding ingredients and their classifications: carbon blacks, non-black fillers, chemistry of vulcanisation (sulphur and non-sulphur), plasticizers, accelerators, activators, cross-linking agents –Special purpose additives– Rubber mixing mechanism– Mixing machinery: Two-roll mill, Internal mixer, extruder.

**MODULE III GENERAL PURPOSE RUBBERS L:9**

Natural rubber: Tapping latex, conversion to dry rubber, properties, grading and specifications, chemical modification – SBR: Preparation, types, properties and applications– BR: Polymerization, properties and applications – IR: Manufacture, properties and applications – poly alkenamers, and polynorbornenes.

**MODULE IV SPECIAL PURPOSE RUBBERS L:12**

Manufacture, properties and application: Butyl rubbers – EPRs– Nitrile rubbers and blends – Polychloroprene – ACM– EVA – CSM– CM– Silicone elastomers– Fluorocarbon rubbers – Polyurethane rubbers – Epichlorohydrin rubbers – Polysulphide rubbers.

**MODULE V THERMOPLASTIC ELASTOMERS L:9**

Definition – Categories of TPEs- Methods of preparation –Styrenic block copolymers – Thermoplastic elastomeric olefins- Thermoplastic vulcanizates – Thermoplastic polyurethanes - Copolyesters - Polyamides.

**L –45; TOTAL HOURS – 45****TEXT BOOKS:**

1. Brendan Rodgers, “Rubber Compounding, Chemistry and Applications”, CRC Press, 2016.
2. John S. Dick, “Rubber Technology: Compounding and Testing for Performance”, Second Edition, Carl HanserVerlag GmbH & Company KG, 2014.

2. James E. Mark, Burak Erman, Frederick R. Eirich, “Science and Technology of Rubber”, Second Edition, Academic Press, 2014.

**COURSE OUTCOMES:** At the end of the course, the students will be able to

**CO1:** Explain the fundamental properties of elastomers

**CO2:** Describe various rubber compounding and mixing process

**CO3:** Select suitable elastomers for commodity applications

**CO4:** Illustrate about the special purpose rubbers

**CO5:** Elucidate thermoplastic elastomers

**Board of Studies (BoS):**

20<sup>th</sup> BOS held on 08.08.2022

**Academic Council:**

19<sup>th</sup> AC held on 29 .09.2022

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of rubber and its processing techniques help the industry sector move towards sustainable development, “from evolution to revolution”.

<b>MEDX 86</b>	<b>CHARACTERIZATION OF MATERIALS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To gain knowledge about various mechanical testing methods

**COB2:** To learn about micro and crystal structure analysis of materials

**COB3:** To study the various microscopic techniques used for image analysis

**COB4:** To acquire knowledge about various chemical analysis techniques

**COB5:** To familiarize with different types of thermal analysis techniques used for the materials

**MODULE I MECHANICAL TESTING L:9**

Hardness: Brinell, Rockwell and Vickers Tests - Tensile Test – Stress - Strain curve - Proof Stress – Compression test - Torsion Test - Impact Test: Charpy and Izod - Drop Weight Tear Test (DWTT) - Fracture Toughness Test - Standards for testing metallic and composite materials.

**MODULE II MICRO AND CRYSTAL STRUCTURE ANALYSIS L:9**

Principles of Optical Microscopy - Specimen Preparation Techniques - Polishing and Etching - Polarization Techniques - Quantitative Metallography - Estimation of grain size - ASTM grain size numbers - Microstructure of Engineering Materials - Elements of Crystallography - X-ray Diffraction - Bragg's law - Techniques of X-ray Crystallography - Debye - Scherer formula - Geiger Diffractometer - Analysis of Diffraction patterns - Inter planer spacing - Identification of Crystal Structure - Elements of Electron Diffraction.

**MODULE III ELECTRON MICROSCOPIC TECHNIQUES L:9**

Interaction of Electron Beam with Materials - Scanning Electron Microscope (SEM): Construction and working, Various Imaging Techniques, Applications - Transmission Electron Microscope (TEM): Specimen Preparation, Imaging Techniques: BF, DF, and SAD - Electron Probe Micro Analysis - Energy Dispersive X-ray micro analysis (EDX): Construction and working, Applications - Atomic Force Microscope (AFM): Construction and working, Applications.

**MODULE IV CHEMICAL ANALYSIS TECHNIQUES****L:9**

X-Ray Spectroscopy: Wavelength Dispersive Spectroscopy - Energy Dispersive Spectroscopy: Basic Principles, Applications - Electron Spectroscopy -Auger Electron Spectroscopy: Basic Principle, Instrumentation and Applications - Secondary Ion Mass Spectroscopy: Basic Principle, Instrumentation and Applications - Fourier Transform Infra-Red Spectroscopy (FTIR):Working Principle and Applications

**MODULE V THERMAL ANALYSIS TECHNIQUES****L:9**

Differential Thermal Analysis (DTA) and Differential Scanning Calorimetry (DSC): Working principle, Experimental Aspects, Measurement of Temperature and Enthalpy Change and Applications - Thermo Gravimetric Analysis (TGA): Instrumentations, Experimental Aspects - Interpretation of Thermogravimetric Curves and Applications - Dynamic Mechanical Analysis (DMA).

**L –45; TOTAL HOURS – 45****TEXT BOOKS:**

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The knowledge on characterization of materials used to identify the structural information of materials to build resilient industrial components.

<b>MEDX 87</b>	<b>SCIENCE AND TECHNOLOGY OF NANO</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:9</b>	<b>MATERIALS</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:** To study the basics of nano-material and its properties

**COB2:** To learn about the production techniques of nano-material

**COB3:** To gain knowledge on the top down techniques for nano materials

**COB4:** To acquire knowledge on characterization and applications of nanomaterials

**MODULE I NANO MATERIAL AND PROPERTIES L:8**

Classification of Nano materials– Size effects-Surface to volume ratio-Surface curvature-Strain confinement – Quantum effects - Kinetics in nanostructured materials- Multilayer thin films and super lattice clusters of metals - Semiconductors and nanocomposites- Properties: Mechanical, Thermal, Electrical, Electronics, Optical and acoustic properties.

**MODULE II PRODUCTION TECHNIQUES I L:8**

Characteristics of Zero, One and Two dimensional nanostructures - Methods of production: Electro deposition-Inert gas condensation-Arc plasma-Laser ablation-Micro emulsion polymerization and Pulsed electrochemical deposition.

**MODULE III PRODUCTION TECHNIQUES II L:6**

High energy ball milling-Photolithography-Optical lithography-Beam lithography-Scanning probe lithography.

**MODULE IV CHARACTERIZATION AND APPLICATIONS L:8**

Electron Microscopy - Scanning Probe Microscopy - Atomic Force Microscopy - Scanning Tunnel Microscopy- Nano Indentation - Applications: Mechanical, Electronics, Biological, Environmental, and Polymer based applications.

**L – 30; TOTAL HOURS – 30**

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The knowledge on nano materials helps to produce various components to meet the societal needs.

<b>MEDX 88</b>	<b>MATERIALS FOR MODERN DEVICE</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>TECHNOLOGY</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:** To study about electric and di-electric materials.

**COB2:** To gain knowledge about the materials used for optical devices

**COB3:** To be conversant with magnetic materials.

**COB4:** To familiarize with semiconductor devices and their materials

**MODULE I ELECTRIC AND DIELECTRIC MATERIALS L:8**

Electrical conduction in metals and alloys: Conductivity, Superconductivity and Thermo electric phenomena – Conducting polymers and metal-organic polygon (MOP) – Dielectric properties – Dielectric constants and Dielectric loss – Capacitor Dielectric materials – Ferro Electric materials – Piezo electric materials – Pyro electric materials - Electronic polarization – Polarization mechanisms

**MODULE II MATERIALS FOR OPTICAL DEVICES L:7**

Optical Properties: Refractive Index, Damping constant, Absorbance, Reflectivity and transmittance – Optical wave guide materials – Optical Modulators and switches – Optical storage devices – Liquid crystal displays – Emissive flat panel displays

**MODULE III MAGNETIC MATERIALS L:8**

Magnetic properties: Magnetization, Flux Density, Magnetic Susceptibility, Magnetic Permeability, and Relative magnetic permeability – Classification of magnetic materials: Di magnetic materials, Paramagnetic materials, Super paramagnetic materials, and Anti Ferro magnetic materials – Hard and Soft Magnetic Materials – Magnetic data storage materials.

**MODULE IV SEMICONDUCTOR DEVICES L:7**

Fundamental of Semiconductors: P-type and N-type semiconductors, P-N junction – Semiconductor materials: Solar Cells, Light emitting diodes, Transistors, Digital Circuits and memory devices

**L – 30; TOTAL HOURS – 30**

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of electric, di-electric, optical, magnetic and semiconductor materials helps to develop the modern devices

<b>MEDX 89</b>	<b>MATERIALS FOR ENERGY</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:9</b>	<b>TECHNOLOGIES</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:**To learn the importance of different energy technologies

**COB2:** To study the materials used in energy generation

**COB3:**To acquire the knowledge on energy storage materials

**COB4:**To familiarise about the energy conversion materials

**MODULE I TECHNOLOGIES FOR ENERGY SYSTEMS L:9**

Energy generation technologies: Wind Energy, Fossil Fuel, Photovoltaics, Biomass, Renewable Energy Source - Energy storage technologies: Batteries, Thermal, Mechanical and Hydrogen storage - Energy Conservation Technologies: Heat Storage Tank (Ice Heat Storage) System, Outside Air Cooling, Large-TemperatureDifference Air Conditioning, Inverter Control, SolarHeating, Geo Thermal Energyand Cogeneration System.

**MODULE II MATERIALS FOR ENERGY GENERATION L:7**

Traditional materials used for energy generation: Lignite, coal, gas, uranium, water - Renewable Energy from Biomass: Introduction, Resources, Heat and Electricity Generation, Liquid biofuels, and Solid biofuels.

**MODULE III MATERIALS FOR ENERGY STORAGE L:7**

Basic principles of energy storage – Carbon-based nanomaterial for energy storage - Polymeric nanomaterials for fuel cell application – Low-cost materials for solar cells - Materials used for hydrogen generation – Materials used for super capacitors.

**MODULE IV MATERIALS FOR ENERGY CONVERSION L:7**

Materials used for photovoltaic and photocatalytic applications – Thermoelectric materials- Dielectric materials- Magnetic Materials- Phase change materials.

**L – 30; TOTAL HOURS -30**

**TEXT BOOKS:**

SDG 9: Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The holistic understanding of materials for energy technologies helps in energy conversion and energy storage in different forms for sustainable industrial growth

<b>MEDX 90</b>	<b>MATERIALS FOR EXTREME</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>ENVIRONMENT</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:** To acquire knowledge on radiation resistant materials

**COB2:** To gain knowledge about spacecraft materials.

**COB3:** To familiarize with materials under thermo-mechanical environment.

**COB4:** To study about the materials under bio-chemical environment.

**MODULE I RADIATION RESISTANT MATERIALS L:8**

Fundamentals of high temperature deformation - Super plasticity - Structural materials at high temperatures - Radiation-resistant materials - Radiation effects of materials for fusion reactors - Radiation properties of metals and structural Materials - Radiation defects and damage – Properties and applications.

**MODULE II SPACECRAFT MATERIALS L:8**

Super alloys for high temperature applications - Cryogenic insulation materials - Atomic oxygen resistant materials - Space suit materials and materials for life support systems - Evaluation of materials for space environment and space worthiness - Behaviour of materials in space - Spacecraft materials - Reusable space vehicles - Carbon-Carbon Composites (CCC)– Properties and applications

**MODULE III MATERIALS UNDER THERMO-MECHANICAL ENVIRONMENT L:7**

Materials under thermo-mechanical extremes: Static and Dynamic behaviour-High pressure phases- Shock to Detonation-Cavitation-Super cooled liquids and glasses-High strain rate deformation - Elastic wave propagation- Shock resistant materials -Armor grade materials – Properties and applications.

**MODULE IV MATERIALS UNDER BIO-CHEMICAL ENVIRONMENT L:7**

Materials under chemical extremes - Interfaces in fuel cell - Protective coating-Novel synthesis - Nanomaterials in bone substitutes and dentistry – Tissue Engineering - Neuroscience - Neuro-electronic Interfaces - Nano robotics - Protein Engineering – Nano sensors in diagnosis - Drug delivery - Cancer therapy and other therapeutic applications.

**L – 30; TOTAL HOURS – 30****TEXT BOOKS**

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The knowledge on materials for extreme environment conditions helps to produce various components to meet the societal needs.

<b>MEDX 91</b>	<b>DYNAMIC BEHAVIOR OF MATERIALS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:** To gain knowledge about the basics of dynamic behaviour of materials

**COB2:** To study about mechanical behaviour of materials.

**COB3:** To familiarize with dynamic deformation of materials

**COB 4:** To learn about experimental techniques for dynamic deformation and applications of dynamic behaviour of materials.

**MODULE I BASICS OF DYNAMIC BEHAVIOR L:8**

Introduction- Dynamic deformation and failure – Introduction to waves – Elastic waves - Types of elastic waves – Reflection, refraction and interaction of waves - Plastic waves and shock waves – Plastic waves of uniaxial stress, uniaxial strain and combined stress - Taylor's experiments - Shock waves - Shock wave induced phase transformation - Explosive-material interaction and detonation

**MODULE II MECHANICAL BEHAVIOUR OF MATERIALS L:8**

Elastic and plastic deformation of metals – Dislocation mechanics – Plastic deformation of metals at high strain rates – Empirical constitutive equations - Relationship between dislocation velocity and applied stress – Physically based constitute equations.

**MODULE III DYNAMIC DEFORMATION L:9**

Plastic deformation in shock waves: Strengthening due to shock wave propagation, Dislocation generation, Point defect generation and deformation twinning - Strain localization/shear bands: Constitutive models, Metallurgical aspects - Dynamic Fracture: Fundamentals of fracture mechanics, Limiting crack speed, Crack branching and dynamic fracture toughness, Spalling and fragmentation - Dynamic deformation of Polymers, ceramics and composites.

**MODULE IV EXPERIMENTAL TECHNIQUES AND APPLICATIONS L:5**

Experimental techniques for dynamic deformation: Intermediate strain rate tests - Split Hopkinson pressure bar - Expanding ring test - Gun systems – Applications – Armor, Explosive welding and forming.

**L – 30; TOTAL HOURS – 30****TEXT BOOKS:**

**COURSE OBJECTIVES:**

**COB1:** To explore the fundamental concepts of the phase diagram.

**COB2 :** To learn about the metallurgical thermodynamics of materials.

**MODULE I PHASE DIAGRAM L:7**

Constitution of alloys – Classification of alloys, Pure metals, Solid solutions – Binary Phase diagram - Physical metallurgy of non-ferrous alloys: Cu-Al, Bronze and Brass - Invariant Reactions – Peritectic, Eutectic - Transformation in solids - Eutectoid, Peritectoid - Ternary Phase diagrams.

**MODULE II METALLURGICAL THERMODYNAMICS L:8**

Thermodynamics – Definition and Importance - First law of thermodynamics - Phase diagram of a single component system - Internal energy, heat capacity, enthalpy - Second law of thermodynamics, entropy, and entropy changes - Free energy and its significance - Free energy change as a function of temperature - Free energy–composition diagrams for binary alloy systems-Determination of liquidus, solidus and solvus lines - Introduction of metallurgical kinetics -Heterogeneous reaction kinetics: gas-solid, solid-liquid, liquid-liquid and solid-solid systems.

**L – 15; TOTAL HOURS – 15**

**TEXT BOOKS:**

1. Avner, Sidney H., "Introduction to Physical Metallurgy", Second Edition, Tata McGraw-hill Education, 2017.
2. David G. Rethwisch, William D. Callister Jr., "Fundamentals of Materials Science and Engineering: An Integrated Approach", Wiley, 4<sup>th</sup> edition, 2011.

**REFERENCES:**

1. David R. Gaskell, "Introduction to the Thermodynamics of Materials", CRC Press, 5<sup>th</sup> edition, 2008.

2. Ghosh, Ahindra, "Textbook of Materials and Metallurgical Thermodynamics", Prentice Hall India Learning Private Limited, 2002.

### COURSE OUTCOMES:

After completion of the course, students should be able to

**CO1:** explain the phase diagram of different materials.

**CO2:** describe the thermodynamics of material systems.

#### Board of Studies (BoS):

19<sup>th</sup> BOS held on 21.12.2021

#### Academic Council:

18<sup>th</sup> AC held on 24.02.2022

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2
CO1	M	M											M	L
CO2	M	M											M	L

**Note:** L - Low Correlation    M - Medium Correlation    H - High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of physical metallurgy of materials helps to utilize the materials for sustainable industry growth and economy

<b>MEDX 93</b>	<b>CORROSION ENGINEERING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>1</b>	<b>0</b>	<b>0</b>	<b>1</b>

**COURSE OBJECTIVES:**

**COB1:** To learn the fundamentals of corrosion.

**COB2:** To gain knowledge about corrosion of engineering materials and its prevention techniques

**MODULE I FUNDAMENTALS OF CORROSION L:7**

Introduction - Definitions of Corrosion - Overall classification of types of corrosion: Galvanic corrosion, crevice corrosion, fitting corrosion erosion corrosion, stress corrosion – Principles and corrosion rate expressions – Polarization techniques to measure corrosion rates.

**MODULE II CORROSION OF MATERIALS AND ITS PREVENTION L:8**

Corrosion of Cast iron, steel, Al, Mg, Ti and its Metallurgical properties influencing corrosion - Non-metallics: Thermosetters, Laminates and Reinforced plastics, Rubbers, Wood, Ceramics, Carbon and Graphite - Methods of corrosion prevention and control – Principles and classification of Cathodic and Anodic protection.

**L – 15; TOTAL HOURS – 15**

**TEXT BOOKS:**

1. Pierre R Roberge, "Corrosion Engineering – Principles and Practice, McGraw - Hill, 2008.

**REFERENCES:**

1. M. G. Fontana, Corrosion Engineering (Third Edition) McGraw-Hill Book Company (NY), 2017.
2. H. H. Uhlig and R. W. Revie, Corrosion and Corrosion Control, Wiley (NY), 2008.
3. Denny A Jones, Principles and Prevention of Corrosion (second edition), Prentice Hall, N. J.,1996.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Explain the fundamentals of corrosion behaviours.

**CO2:** Describe the corrosion of engineering materials and its prevention.

**Board of Studies (BoS):**20<sup>th</sup> BOS held on 08.08.2022**Academic Council:**19<sup>th</sup> AC held on 29 .09.2022

CO2	H			M							L		M	M

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding the mechanism of corrosion and its preventions helps to solve challenges in industrial material handling.

## PHYSICS ELECTIVE

<b>PHDX 01</b>	<b>NON DESTRUCTIVE TESTING OF</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4</b>	<b>MATERIALS</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

### **COURSE OBJECTIVES:**

**COB1:**To understand the importance, principle, concept and inspection methods of various surface NDT methods and develop the skills of interpretation of results effectively.

**COB2:**To study the working and instrumentation of thermography and eddy current testing methods and apply to interpret the results and investigate the possible defects.

**COB3:**To get full exposure about principle, instrumentation and standards of various radiographic NDT methods and improve the skill to identify the defects suitably.

**COB4:**To get deep insight into the principle, types of waves, instrumentation, standards, calibration methods of ultrasonic NDT methods.

**COB5:**To understand the importance, principle, concept and inspection methods of various surface NDT methods and develop the skills of interpretation of results effectively.

### **MODULE I SURFACE NDT METHODS 7**

Liquid Penetrant Inspection – Principles, Types of dye and methods of application, developers, advantages and limitations of various methods, Interpretation of results. Magnetic Particle Inspection- Magnetic particle testing, Basic theory of magnetism, Magnetization methods, Interpretation of field indicators, Particle application, Inspection, Residual magnetism Principles and methods of demagnetization.

### **MODULE II THERMOGRAPHY AND EDDY CURRENT TESTING 7**

Thermography- Principles, Contact and non contact inspection methods, Advantages and limitation – infrared radiation and infrared detectors, Instrumentations and methods, applications. Eddy Current Testing-Generation of eddy currents, Properties of eddy currents, Eddy current sensing elements, Probes, Instrumentation, Applications, advantages, Limitations, Interpretation/Evaluation.

**MODULE III RADIOGRAPHY 8**

Principle, interaction of X-Ray with matter, imaging, film and film less techniques, types and use of filters and screens, geometric factors, Inverse square law, characteristics of films -graininess, density, speed, contrast, characteristic curves. Penetrameters, Exposure charts, Radiographic equivalence. Fluoroscopy- Xero-Radiography, Digital Radiography.

**MODULE IV ULTRASONIC TESTING 8**

Ultrasonic Testing: Basic principles of sound propagation, types of sound waves, Principle of UT, methods of UT, their advantages and limitations, Piezoelectric Material, Various types of transducers/probe, Calibration methods, use of standard blocks, technique for normal beam inspection.

**L – 30; Total Hours–30**

**TEXT BOOKS:**

1. ASM Metals Handbook, Non-Destructive Evaluation and Quality Control, American Society of Metals, Metals Park, Ohio, USA, 200, 2018.
2. Baldev Raj, T. Jayakumar, M. Thavasimuthu Practical Non-Destructive Testing, Narosa Publishing House, 2014.

**REFERENCES:**

1. Ravi Prakash, Non-Destructive Testing Techniques, 1st revised edition, New Age International Publishers, 2010.
2. Paul E Mix, Introduction to Non-destructive testing: a training guide, Wiley, 2nd Edition New Jersey, 2005.
3. Charles, J. Hellier, Handbook of Nondestructive evaluation, McGraw Hill, New York 2001.
4. B.P.C. Rao, Practical Eddy Current Testing, Alpha Science International Limited (2006).

**COURSE OUTCOMES:**

**CO1:** Demonstrate the importance, principle, concept and inspection methods of various surface NDT methods and apply the same to interpret the results effectively.

**CO2:** Comprehend the ideas behind working of thermography and eddy current testing methods and apply them to interpret the results of testing and analyse the defects and problem.

**CO3:** Grasp the fundamental principles, and standards of various radiographic NDT methods and utilise them to identify the defects and defect

location suitably.

**CO4:** Assimilate the ideas concerning the principle, types of waves, instrumentation, standards, calibration methods of ultrasonic NDT methods and identify the areas for their application.

**Board of Studies (BoS) :**

BOS of Physics was held on  
21.6.21

**Academic Council:**

17<sup>th</sup> AC held on 15.07.2021

SDG 4: Ensuring inclusive and equitable quality education for all persons and promote lifelong learning opportunities.

Statement: The modules and topics mentioned in this course are designed to ensure all inclusive and thorough education with equity to all persons and promote learning opportunities at all times.

<b>PHDX 02</b>	<b>MATERIALS SCIENCE FOR</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4</b>	<b>ENGINEERING</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:** To impart knowledge on the fundamentals of materials science and engineering.

**COB2:** To provide a basis for understanding properties and applications of dielectric materials.

**COB3:** To expose the students to different classes of materials, their properties, structures and imperfections

**COB4:** To aid the teaching learning process through relevant illustrations, animations, web content and practical examples

**MODULE I CLASSIFICATION OF MATERIALS 6**

Concept of amorphous, single crystals and polycrystalline materials, crystallinity and its effect on physical properties, metal, ceramic, polymers, classification of polymers, structure and properties, additives for polymer products, effect of environment on materials, composites

**MODULE II PROPERTIES OF MATERIALS 10**

Mechanical Properties: Stress-strain response of metallic, ceramic and polymer materials, yield strength, tensile strength and modulus of elasticity, toughness, plastic deformation, fatigue, creep and fracture- Electronic Properties: Free electron theory, Fermi energy, density of states, band theory of solids, semiconductors, Hall effect, dielectric behaviour, piezo, ferro, pyroelectric materials - Magnetic Properties: Origin of magnetism in metallic and ceramic materials, para-magnetism, diamagnetism, ferro and ferrimagnetism- Thermal Properties: Specific heat, thermal conductivity and thermal expansion, thermoelectricity- Optical Properties: Refractive index, absorption and transmission of electromagnetic radiation in solids, electro-optic and magneto-optic materials.

**MODULE III CRYSTALLOGRAPHIC STRUCTURES AND IMPERFECTIONS 7**

Crystal symmetry, point groups, space groups, indices of planes, close packing in solids, bonding in materials, coordination and radius ratio concepts, point defects, dislocations, grain boundaries, surface energy and equilibrium shapes of crystals.

**MODULE IV THERMODYNAMICS AND KINETICS****7**

Phase rule, phase diagrams, solid solutions, invariant reactions, lever rule, basic heat treatment of metals, solidification and phase transformations, Fick's laws of diffusion, mechanisms of diffusion, temperature dependence of diffusivity.

**L – 30; Total Hours–30****TEXT BOOKS:**

1. Nanotechnology: An introduction to nanostructuring techniques by Michael Köhler and Wolfgang Fritzsche, Wiley-VCH; 2Rev Ed edition, 2007.

5. "Encyclopedia of Polymer Science and Technology" 3<sup>rd</sup> Edition, Vol.1-12, Wiley Interscience , 2003

**COURSE OUTCOMES**

At the end of the course, students will be able to

**CO1:**select suitable material for specific application.

**CO2:** analyse crystallographic structure of metals and their imperfections.

**CO3:** develop metal alloys with varying properties by selecting suitable heat treatment

**CO4:** correlate the various properties of material with their structure.

**Board of Studies (BoS) :**

BOS of Physics was held on 21.6.21

Statement : The modules and topics mentioned in this course are designed to ensure all inclusive and thorough education with equity to all persons and promote learning opportunities at all times.

<b>PHDX 03</b>	<b>BIOMATERIALS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4</b>		<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:**To gain basic knowledge in classification of biomaterials and their properties.

**COB2:**To provide a basis for understanding properties of metallic implant materials.

**COB3:**To enable the students to correlate theoretical principles with practical applications.

**COB4:**To help students understand biocompatibility & toxicological screening of biomaterials

**MODULE I INTRODUCTION TO BIOMATERIALS 8**

Introduction: Definition of biomaterials, requirements & classification of biomaterials, Comparison of properties of some common biomaterials. Effects of physiological fluid on the properties of biomaterials. Surface properties of materials, physical properties of materials, mechanical properties-Materials for biophotonic applications.

**MODULE II IMPLANT MATERIALS 10**

Metallic implants: Stainless steels, co-based alloys, Ti-based alloys, shape memory alloy, nanostructured metallic implants, degradation and corrosion-ceramic implants : bio inert, biodegradable or bioresorbable, bioactive ceramics, nanostructured bio ceramics-Polymer implants: Polymerization, factors influencing the properties of polymers, polymers as biomaterials, biodegradable polymers, Bio polymers: Collagen, Elastin and chitin.

**MODULE III BIOCOMPATIBILITY AND TOXICOLOGICAL SCREENING OF BIOMATERIALS 6**

Definition of biocompatibility, blood compatibility and tissue compatibility. Toxicity tests: acute and chronic toxicity studies (in situ-implantation, tissue culture, haemolysis, thrombogenic potential test, systemic toxicity, intracutaneous irritation test), sensitization, carcinogenicity, mutagenicity and special tests.

**MODULE IV PRACTICAL ASPECTS OF BIOMATERIALS 6**

Preparation of biomaterials - Microscopic study & analysis of different

biomaterials- alginate – material preparation and characterization - Testing of various biomaterials- case studies on industrial and clinical applications of biomaterials.

**L – 30; Total Hours–30**

**TEXT BOOKS:**

1. Myer Kutz, Standard Handbook of Biomedical Engineering and Design, McGraw Hill, 2003
2. Monika Saini, Yashpal Singh, Pooja Arora, Vipin Arora, and KratiJain. Implant biomaterials: A comprehensive review, World Journal of Clinical Cases, 2015.

**REFERENCES:**

4. D F Williams, Materials Science and Technology: Volume 14, Medical and Dental Materials: A comprehensive Treatment Volume, VCH Publishers 1992.

**COURSE OUTCOMES:**

At the end of the course, students will be able to

**CO1:** differentiate common use of biomaterials as metals, ceramics, polymers and apply them to classify its chemical structure, properties and morphology.

**CO2:** comprehend ideas involving general properties of implant materials and apply the same to identify the benefits of implant materials.

**CO3:** attain knowledge about the biocompatibility & toxicological screening of biomaterials and realize its usage in real life.

**CO4:** reflect upon the practical ideas of using biomaterials

**Board of Studies (BoS) :**

Statement : The modules and topics mentioned in this course are designed to ensure all inclusive and thorough education with equity to all persons and promote learning opportunities at all times.

<b>PHDX 04</b>	<b>OPTICAL FIBRE COMMUNICATION</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4</b>		<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:**To facilitate the knowledge about optical fibres and its transmission characteristics.

**COB2:**To make the students to learn about LED and laser diodes.

**COB3:**To make the students understand the various types of optical Receivers and sensors.

**COB4:** To enrich the knowledge on optical amplifiers and networks.

**MODULE I INTRODUCTION TO OPTICAL FIBRES 7**

Optical fibre – Principle and propagation of light in optical fibre – Numerical aperture and acceptance angle – Types of optical fibres – Attenuation – Absorption, Scattering losses, Bending losses and Dispersion in Optical fibres – Fiber Connectors and Couplers.

**MODULE II FIBER OPTICAL SOURCES 7**

Light Emitting Diodes (LED) – power and efficiency - double hetero LED – LED structure - LED characteristics – Semiconductor Lasers diode, Homojunction and Heterojunction laser diodes - Optical processes in semiconductor lasers - applications.

**MODULE III FIBER OPTICAL RECEIVERS AND SENSORS 8**

Photo detectors - photodiodes - phototransistors - noise characteristics - PIN diode Avalanche Photodiode (APD) characteristics - APD design of detector arrays – Charged Couple Device - Solar cells - Materials and design considerations, Thin film solar cells, amorphous silicon solar cells - Fiber optic sensors: Intrinsic and Extrinsic sensors, amplitude, phase, wavelength and polarization modulation.

**MODULE IV OPTICAL AMPLIFIERS AND NETWORKS 8**

Optical amplifiers, Semiconductor optical amplifiers, Erbium-doped fiber amplifiers - Optical Networks: Basic networks, SONET/SDH, WDM Networks, Nonlinear effects on network performance, Performance of WDM + EDFA systems, Solitons, Optical CDMA, Ultrahigh capacity networks.

**L – 30; Total Hours–30**

**TEXT BOOKS:**

1. Gerd Keiser, Optical Fiber Communication, 3rd Edition, McGraw-Hill International, Singapore, 2013.

**REFERENCES:**

Statement: The modules and topics mentioned in this course are designed to ensure all inclusive and thorough education with equity to all persons and promote learning opportunities at all times.

<b>PHDX 05</b>	<b>SEMICONDUCTOR PHYSICS FOR</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4</b>	<b>INFORMATION TECHNOLOGY</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:**To understand the physics of semiconductor devices

**COB2:**To gain knowledge on various methods involved in nanofabrication of semiconductor devices

**COB2:**To study the working principle of optoelectronic devices and various display devices

**COB4:**To get insight to different types of data storage technologies

**MODULE I INTRODUCTION TO SEMICONDUCTOR DEVICES 6**

Semiconductors: N and P type, PN junction diode under forward and reverse bias — Zener diode, Schottky diode – Tunnel diode –bipolar junction transistor (BJT) - metal–oxide–semiconductor field-effect transistor (MOSFET), CMOS-concepts and fabrication.

**MODULE II FABRICATION OF SEMICONDUCTOR DEVICES 6**

Deposition of Semiconductor thin films – molecular beam epitaxy (MBE), chemical vapour deposition (CVD), pulsed laser deposition (PLD), magnetron sputtering, Types of lithography: Photo/ultraviolet /Electron-beam/Focused ion beam, Dip pen nanolithography, Etching process :Dry and Wet etching

**MODULE III OPTOELECTRONIC DEVICES 10**

Light Emitting Diodes (LED) - double hetero LED structure - LED characteristics - White LED – Applications, Semiconductor Lasers, Homojunction and Heterojunction laser diodes - Optical detection – PIN and avalanche photodiodes, Applications: Optical mouse, traffic lights, Luminescence, Cathode Luminescence, Electro Luminescence, Transparent Conductors, Liquid crystal displays – Dynamic scattering and Twisted nematic display, Display Glasses, Organic LEDs display, Charge-coupled devices (CCD), Inorganic Semiconductor TFT Technology, Organic TFT Technology; Flexible Displays, Touch Screen Technology.

**MODULE IV MEMORY STORAGE DEVICES 8**

Introduction to memory storage, Resistive Random Access Memory (ReRAM), Phase Change Memory (PCM); Magnetoresistive Random Access Memory (MRAM)- Gaint Magnetoresistance (GMR), Tunnel Magnetoresistance (TMR),

Ferroelectric Random Access Memory (FeRAM); Comparison and future directions, Hardware circuits, working analysis.

**L – 30; Total Hours–30**

**COURSE OUTCOMES:**

At the end of the course, students will be able to

- CO1:** understand the physics of semiconductor devices and identify its significance towards information technology (IT).
- CO1:** gain insight into various fabrication techniques towards the realization of nano-dimensional semiconductor devices.
- CO2:** attain knowledge on working principles of optoelectronic devices and display technologies and can recognize their importance in commercial applications.
- CO4:** learn the principle of data storage and its application towards futuristic memory technology.

**Board of Studies (BoS) :**

SDG 4: Ensuring inclusive and equitable quality education for all persons and promote lifelong learning opportunities.

Statement : The modules and topics mentioned in this course are designed to ensure all inclusive and thorough education with equity to all persons and promote learning opportunities at all times.

<b>PHDX 06</b>	<b>SENSORS AND ACTUATORS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4</b>		<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:** To understand the basic concept of sensors towards detection of pressure, position, velocity and temperature.

**COB2:** To avail knowledge on sensor which are sensitive to light, magnetic field, and acoustic waves

**COB3:** To study the different types of fabrication techniques towards realization of various sensors.

**COB4:** To get introduced towards MEMS technology and various actuators.

**MODULE I INTRODUCTION TO SENSORS: PRESSURE, POSITION, VELOCITY AND TEMPERATURE 8**

Introduction to sensors – working principles– classification – static and dynamic characteristics, Error Analysis, Pressure sensors – strain gauge, piezoelectric force sensor, vacuum sensors, Position sensor -Proximity sensor, Capacitive, Inductive and displacement sensor, velocity and acceleration sensors, Temperature sensor-thermocouples- thermistors- Thermo-EMF Sensors, metal Junction and metal Semiconductor junction types.

**MODULE II SENSORS : LIGHT, MAGNETIC FIELD AND ACOUSTIC 8**

Photoconductors- Optical Detectors - Photodiodes, Phototransistors, Optical encoder-Charge Coupled Device (CCD), Fabry Perot sensor, Hall effect, magneto resistive, magneto strictive sensors, Acoustic sensors-microphones-resistive, capacitive, piezoelectric, fiber optic, solid state - electret microphone.

**MODULE III SENSORS FABRICATION TECHNIQUES 7**

Fabrication techniques – molecular beam epitaxy (MBE), chemical vapour deposition (CVD), pulsed laser deposition (PLD),magnetron sputtering,Types of lithography:Photo/ultraviolet /Electron-beam/Focused ion beam, Dip pen nanolithography, Etching process :Dry and Wet etching

**MODULE IV MICROSYSTEMS AND ACTUATORS 7**

Microelectro-mechanical systems (MEMS) - RF- MEMS, Micro fabrication and Applications, Classification of transducers: electrostatic, piezoelectric,

thermal, Microsystem design and fabrication. working principles of Actuators. Piezoelectric and Piezoresistive actuators, micropumps and micro actuators with practical applications Solid-state switches, relays Solenoids, D.C. Motors, A.C. Motors, Stepper motors. Shape memory alloy actuators.

**L – 30; Total Hours–30**

**COURSE OUTCOMES:**

At the end of the course, students will be able to

**CO1:** get exposed to various types of sensors and apply the ideas to distinguish between pressure, position, velocity and temperature based sensors

**CO2:** familiarize towards light, magnetic field, and acoustic based sensors and recognize their importance in commercial applications.

**CO3:** gain insight into various fabrication techniques towards the realization of sensors

**CO4:** apply the ideas to conceptualize MEMS technology and different actuators in engineering field

**Board of Studies (BoS) :**

BOS of Physics was held on 21.6.21

**Academic Council:**

17<sup>th</sup> AC held on 15.07.2021

SDG 4 : Ensuring inclusive and equitable quality education for all persons and promote lifelong learning opportunities.

Statement : The modules and topics mentioned in this course are designed to ensure all inclusive and thorough education with equity to all persons and promote learning opportunities at all times.

<b>PHDX 07</b>	<b>FUNDAMENTALS OF</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4</b>	<b>NANOTECHNOLOGY AND ITS</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>
	<b>APPLICATIONS</b>				

### **COURSE OBJECTIVES:**

**COB1:**To introduce the basic concepts of Nanoscience through quantum mechanical theories and solid state physics.

**COB2:**To provide knowledge about the various synthesis methods applicable to different nano materials

**COB3:**To enrich the knowledge of students in various characterisation techniques.

**COB4:**To provide knowledge on applications of polymer based nano materials in various fields.

### **MODULE I BASICS OF NANO SCIENCE 7**

Introduction to Nanoscience & Nanotechnology : Review of classical mechanics – overview Quantum Mechanics. Background to nanoscience and nanotechnology - scientific revolutions - nanosized effects – surface to volume ratio – atomic structure – molecular and atomic size - quantum effects - formation of nano sized particles – energy at the nanoscale.

### **MODULE II SYNTHESIS OF NANOMATERIALS 8**

Nanomaterial Fabrication: Bottom-up vs. top-down - Preparations of Nanomaterials by mechanical and physical methods : – High energy ball milling – melt quenching and annealing – vapour deposition – Pulsed laser deposition – Magnetron sputtering - Microwave plasma evaporation. Chemical Methods of Preparation : Sol-gel method –Electrodeposition – Electrospinning. Arc method for carbon nanotubes – nanofibres and rods – synthesis of Graphene- Handling of nano particles - Health hazards – Precautions.

### **MODULE III CHARACTERIZATION OF NANOMATERIALS 8**

Characterisation of Nanomaterials: XRD – particle size determination - SEM - FESEM - TEM – AFM – Nanoindentor – UV-VIS spectroscopy – FTIR, FT-Raman, Photoluminescence, NMR, ESR - Dielectric characterization – Magnetic characterization

### **MODULE IV APPLICATION OF NANO MATERIALS 7**

Applications of Carbon based nanomaterials (CNT, CNF, Graphene) -

Biosensor (principle, component, types, applications) - agriculture (nano-fertilizers, herbicides, nano-seed science, nano-pesticides) and food Systems (encapsulation of functional foods, nano-packaging) – Nano - electronics, Nano-optics.

**L – 30; Total Hours–30**

**TEXT BOOKS:**

1. Nanotechnology: An introduction to nanostructuring techniques by Michael Köhler and Wolfgang Fritzsche, Wiley-VCH; 2Rev Ed edition, 2007.

**REFERENCES:**

- 4 Nanotechnology Applications in Agriculture – C.R. Chinnamuthu, B.Chandrasekaran and C. Ramasamy – 2008.

**COURSE OUTCOMES:**

At the end of the course, students will be able to

- CO1:** understand basic principles of nanomaterials and apply them to differentiate the significance of nanomaterials compared to bulk materials.
- CO2:** familiarize the various synthesis methods of nanomaterials and compare them with the preparation of materials in bulk form.
- CO3:** get useful ideas about characterization techniques and differentiate different techniques.
- CO4:** understand the various applications of nanomaterials and realize the role of nanomaterials in various fields

**Board of Studies (BoS) :**

**CHEMISTRY ELECTIVE**

<b>CHDX01</b>	<b>CHEMISTRY OF CONSTRUCTION MATERIALS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
		<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**SDG: 9****COURSE OBJECTIVES:**

To impart knowledge on

**COB1:** The chemistry of cement and concrete**COB2:** The properties of steel and mechanism of corrosion**COB3:** The quality of water and its impact on concrete**COB4:** The analytical techniques for concrete research**MODULE I CHEMISTRY OF CEMENT AND CONCRETE 8**

Cement - chemical composition - Bogue's compounds - hydration of cement - hydrated products - influence of hydrated products on properties of cement - types of cement - microstructure of aggregate phase and hydrated cement paste - Interfacial transition zone in concrete : significance and microstructure

**MODULE II CHEMISTRY OF STEEL AND CORROSION 8**

Steel for construction - chemical composition - types of steels - influence of chemical composition on properties. Corrosion of steel - mechanism of corrosion of steel in water and concrete medium - types of corrosion of steel associated to civil engineering. Corrosion prevention and control : coatings & inhibitors - working mechanism. Cathodic protection to steel : Concept - working mechanism - sacrificial anodes

**MODULE III WATER CHEMISTRY FOR CONCRETE 7**

Water quality parameters – pH, solids, hardness, alkalinity, chloride and sulphates in water and their determination- Water quality for building construction – Effect of water impurities on concrete strength and durability- Carbonate and Sulphate attack-Chloride attack –Alkali-Silica reactions in concrete-Case studies

**MODULE IV ANALYTICAL TECHNIQUES FOR CONCRETE RESEARCH 7**

Analytical techniques for cement concrete research - FITR spectroscopy - SEM - XRD - Cyclic voltammetry (CV) - Thermo-gravimetric analysis (TGA) and Differential thermal analysis (DTA) - Advanced chloride and water analysis techniques.

**L – 30; Total Hours– 30**

**TEXT BOOKS:**

SDG 9 : Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation

<b>CHDX 02</b>	<b>CHEMISTRY OF MATERIALS AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>ELECTROCHEMICAL DEVICES</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

### **COURSE OBJECTIVES:**

The students will be conversant with

**COB1:** concepts of corrosion, types and various methods to control corrosion.

**COB2:** the chemicals, chemical reactions, construction and working of different batteries and fuels cells.

**COB3:** the types, properties and manufacture of refractories and abrasives.

**COB4:** types, functions of lubricants and mechanism of lubrication.

### **MODULE I                      CORROSION AND ITS CONTROL                      8**

Types of corrosion - chemical corrosion – electrochemical corrosion – galvanic corrosion – differential aeration corrosion - factors influencing rate of corrosion.

Corrosion control – selection of materials - cathodic protection: sacrificial anode - corrosion inhibitors – paints: constituents & functions – treatment of metal surface for inorganic coatings - metallic coatings: hot dipping: galvanizing and tinning – electroplating — electroless plating.

### **MODULE II                      ELECTROCHEMICAL DEVICES                      8**

Electrochemical cell, electrolytic cell - introduction to batteries – classification – primary: dry alkaline – secondary: lead–acid, nickel–cadmium and lithium batteries, Fuel cells – classification based on temperature and electrolyte - hydrogen–oxygen fuel cell, applications – solar cells: construction and working – dye sensitised solar cells.

### **MODULE III                      REFRACTORIES AND ABRASIVES                      7**

Refractories: Introduction - refractory - classification – based on chemical nature - characteristic and selection of good refractory - properties of refractories: refractoriness - refractoriness under load - thermal spalling - porosity and dimensional stability – general manufacture of refractory – components, properties and uses of: silica, magnesite, zirconia refractories - super refractories - application of refractories.

Abrasives: classification - Moh's scale – properties - natural abrasives: diamond, corundum, emery, garnet, quartz - synthetic abrasives: preparation, properties and uses: carborundum, alundum, boron carbide (norbide),

tungsten carbide, zirconium silicate – grinding wheel – abrasive paper and cloth - Rockwell scale test - Knoop hardness test.

#### **MODULE IV                      LUBRICANTS                      7**

Introduction – functions of lubricant- mechanism of lubrication - classification of lubricant – selection of lubricants - lubricating oils - properties of lubricant: viscosity index - flash point and fire point - cloud point and pour point – oiliness - aniline point - carbon residue - semisolid: grease (sodium, calcium, lithium, aluminium) - solid lubricant: graphite, graphene, molybdenum disulphide – lubricating emulsions - cutting fluids – synthetic and semi-synthetic lubricants.

**L – 30; Total Hours– 30**

#### **TEXT BOOKS:**

5. Theo Mang, Wilfred Dresel “*Lubricants and Lubrication*” Wiley-VCH, 2017

#### **COURSE OUTCOMES:**

The students will be able to

**CO1:** apply specific methods to control corrosion of different materials.

**CO2:** illustrate the construction and working of different types of cells, batteries and fuel cells.

**CO3:** compare the properties and devise a method of manufacture of refractories and abrasives.

**CO4:** analyze and choose the right type of lubrication based on the type of machines.

**Board of Studies (BoS) :**11<sup>th</sup>BoS of Chemistry held on 17.06.2021**Academic Council:**17<sup>th</sup> AC held on 15.07.2021

**Note:** L - Low Correlation    M - Medium Correlation    H - High Correlation

SDG 9: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

<b>CHDX 03</b>	<b>CHEMISTRY AND INSTRUMENTATION</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>FOR ELECTRICAL AND ELECTRONIC APPLICATIONS</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:** Synthesis, properties and applications of electrical and electronic devices.

**COB2:** Classification and types of fuel cells.

**COB3:** Types of sensors and their applications.

**COB4:** Principle, instrumentation and applications of analytical techniques.

**MODULE I ELECTRICAL AND ELECTRONIC DEVICES 7**

Solar Cell- Si solar cell, quantum dot solar cell, LCD : components, liquid crystals and their composition, electrodes – OLEDs: components, synthesis and modification of small molecules, polymers, phosphors - FRP-synthesis, properties and electrical applications - Solders : composition and uses – Capacitors : synthesis and modification of capacitor materials, fabrication.

**MODULE II FUEL CELLS 7**

Difference between batteries and fuel cells - classification of fuel cell (based on temperature and electrolyte) – principle, characteristic features, advantages, disadvantages and applications of polymer electrolyte membrane or proton exchange membrane fuel cell (PEMFC), direct methanol fuel cell (DMFC), alkaline fuel cell (AFC), phosphoric acid fuel cell (PAFC), molten carbonate fuel cell (MCFC), and solid oxide fuel cells (SOFC) microbial fuel cell, - hydrogen storage materials, challenges in using hydrogen as a fuel.

**MODULE III SENSORS 7**

Definition, receptor, transducer, classification of chemical sensors based on operating principle of transducer, Ion-selective electrodes, Conductometric gas sensors (chemoresistors), Electrochemical sensors, Potentiometric MOSFET gas sensor, Touch sensors (oximeter, glucometer), Chemocapacitors, Biochips and microarray.

**MODULE IV ANALYTICAL TECHNIQUES 9**

Voltammetry: cyclic voltammetry, electrogravimetry - principle, instrumentation and applications of: UV-Vis spectrophotometry, Atomic emission spectroscopy- Photoluminescence spectrophotometry, atomic absorption spectrophotometry -- FT-IR spectroscopy, Raman spectroscopy,

TGA-DTA analyzer, TEM.

**L – 30 ; Total Hours – 30**

<b>CHDX 04</b>	<b>FUNCTIONAL MATERIALS AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 11 &amp; 12</b>	<b>APPLICATIONS</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

To make the students conversant with

**COB1:** specific materials for hardware components fabrication, data storage and their related properties

**COB2:** selection of advanced materials for various current applications

**COB3:** materials for the fabrication of sensors

**COB4:** essential characterization techniques and software tools with chemistry background

**MODULE I MATERIALS FOR HARDWARE AND DATA STORAGE 7**

Specific materials for electrical and electronic gadgets-computers, instruments (Semiconductors-N, S doped Silicon, CdX QDs, metal nano and other applications). Networking of networks and connecting devices - materials used in robotic construction (metal alloys, kevlar, biodegradable smart materials). Data storage and magnetic hard disk and devices- pendrive (flash memory-ferro magnetic and super paramagnetic materials, optical discs). Nanomaterials to enhance the lifetime and storage of CD, DVD and BD (Nano incorporated Polycarbonate, Al and lacquer) - Nanomaterials and small molecules for data storage.

**MODULE II ADVANCED MATERIALS AND APPLICATIONS 8**

Materials for 3D printing (Nylon, ABS, PLA, Ti, Au and Ag). Solar panels function monitoring-IOT enabled (crystalline Si, organometallics) – Displays and LCD, LEDs and its types-OLEDs (Group III-V materials). RGB analysis -sensing and TV/system screen (QDs and anthocyanins). Semiconductor chemistry for VLSI processing technology (metalloid staircase, Si, Ge, GaAs)-materials for inkjet printable circuit board (nanocarbon based) - Right material for signal speed and right thermal coefficient of expansion - Remote sensing (photodetectors and radiometers). Solder:-Lead based solder - issues and alternative for lead free solder (Conductive inks).

**MODULE III MATERIALS FOR FABRICATION OF SENSORS 8**

Wireless Sensors – Introduction to sensors (chemo/bio/gas sensors)-

Wearable/touch sensors-Components - selection of materials - Device fabrication and function monitoring - wireless, Smartphone based and IOT enabled-Properties of materials, anti-corrosive, water proof, insulation and lamination. Robotics in surgery, gene coding and molecular modelling. Biochips and DNA microarray chips (fluorescent dyes, glass/nylon).

#### **MODULE IV                    ANALYTICAL TECHNIQUES AND SOFTWARE        7 SOLUTIONS**

Characterization tools – UV-Visible (DRS), FT-IR, SEM, TEM, AFM, TG-DTA and XRD (Principle and applications only). Introduction to softwares-ChemOffice, Image J, Origin - Molecular modelling, comparison of old drug structures with new, drug designing-drug for COVID-19 and drug delivery. Molecular docking (drug interaction in a human body).

**L – 30; Total Hours – 30**

SDG: 11 & 12

Statement : Identification of suitable materials towards the manufacturing of electronic gadgets and data storage systems without much affecting the natural resources and application of the fabricated devices to the sustainable cities and communities.

<b>CHDX 05</b>	<b>CHEMISTRY OF FUELS,</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>COMBUSTION AND LUBRICANTS</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

The students will be conversant with

**COB1:**types, composition and process of manufacture of solid, liquid and gaseous fuels.

**COB2:**determination of calorific value and calculation of GCV and NCV.

**COB3:**types, concepts of corrosion and different methods for control of corrosion.

**COB4:**types, functions of lubricants and mechanism of lubrication.

**MODULE I FUELS 8**

Introduction – classification of fuels – calorific value – characteristics of a good fuel – comparison of solid, liquid and gaseous fuel – solid fuels – coal – ranking of coal – proximate analysis of coal – pulverised coal – metallurgical coke – manufacture of coke (Otto Hoffman) – Liquid fuel – petroleum – refining of petroleum – cracking – fixed bed catalytic cracking - synthetic petrol – Fischer-Tropsch process – biodiesel - Gaseous fuel – CNG – LPG – Biogas – producer gas – water gas

**MODULE II COMBUSTION 8**

Introduction – calorific value - Calorific value: Gross and net calorific value - Bomb Calorimeter - Gas calorimeter - Definition of combustion – theoretical calculation of calorific values (Dulong’s formula) - Gross and net calorific values (problems) - air-fuel ratio - minimum requirement of air for complete combustion of fuels (problems) — Analysis of flue gas - Orsat’s gas analysis method

**MODULE III CHEMISTRY OF CORROSION 7**

Types of corrosion - chemical corrosion – electrochemical corrosion – galvanic corrosion – differential aeration corrosion - factors influencing rate of corrosion.

Corrosion control – selection of materials - cathodic protection: sacrificial anode - corrosion inhibitors – paints: constituents & functions – treatment of metal surface for inorganic coatings - metallic coatings: hot dipping: galvanizing and tinning – electroplating — electroless plating.

**MODULE IV LUBRICANTS****7**

Introduction – functions of lubricant- mechanism of lubrication - classification of lubricant – selection of lubricants - lubricating oils- properties of lubricant: viscosity index - flash point and fire point - cloud point and pour point – oiliness - aniline point - carbon residue - semisolid: grease (sodium, calcium, lithium, aluminium) - solid lubricant: graphite, graphene, molybdenum disulphide – lubricating emulsions - cutting fluids – synthetic and semi-synthetic lubricants.

#### SDG 9: Industry, Innovation & Infrastructure

The holistic understanding of the materials used as fuels and lubricants and devices towards sustainable solutions for the advances in mechanical systems.

<b>CHDX06</b>	<b>INSTRUMENTAL METHODS OF POLYMER ANALYSIS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG4</b>		<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

To impart knowledge on

**COB1:** To impart knowledge on spectroscopic analysis of polymers.

**COB2:** To equip with the knowledge of optical methods and X-ray diffraction methods for understanding the morphology and orientation of molecules

**COB3:** To develop an understanding on separation of various mixtures by different chromatographic techniques.

**COB4:** To understand the chemical elemental structure of polymers by NMR and mass spectroscopic technique.

**MODULE I            ULTRAVIOLET, VISIBLE AND IR SPECTROSCOPY            9**

Principle- Instrumentation-Double beam spectrophotometers – single beam spectrophotometers -sources of radiation – Detectors – I operational procedure – qualitative and quantitative analysis – applications in polymer analysis.

Fourier Transform Infrared Spectroscopy -principle- instrumentation – optical materials – sources- detectors – typical spectrophotometers — calibration and standardization – sample preparation - analysis – interpretation of FTIR spectra-principle of identification and characterization of polymers using IR

**MODULE II            NMR SPECTROSCOPY            7**

Fundamental concepts – chemical shift – spin –spin- coupling. Instrumentation - data acquisition and spectral interpretation. Solid state NMR (magic angle), Applications of NMR and FT NMR in the characterization of polymers

**MODULE III            CHROMATOGRAPHY AND THERMAL ANALYSIS            7**

Thermal analysis: DSC, TG/DTA, TMA, DMA, DETA with examples. gel permeation chromatography (GPC) – High pressure liquid chromatography (HPLC) – Thin layer chromatography (TLC - Gas chromatography (GC) – sample preparation. Chromatographic process and instrumentation – compositional separation and detectors – various types – Analyses. The uses and applications of various chromatographic techniques – pyrolysis gas chromatography.

**MODULE IV            X-RAY DIFFRACTION & NEWTON SCATTERING            7**

Principle & basic concept of absorption of X-rays- monochromatic X-ray sources – X-ray detectors - Instrumentation – Experimental technique -Analysis by X-ray

absorption. Absorption apparatus – X-ray diffraction – Diffraction apparatus.  
Application to polymer analysis.

**L – 30; Total Hours – 30**

### TEXT BOOKS

1. Douglas A. Skoog, F. James Holler, Stanley R. Crouch “Principles of Instrumental Analysis” 7th edition, Publisher Cengage Learning ,2016
2. Donald L. Pavia, Gary M. Lampman, George S. Kriz, James R. Vyvyan, “Introduction to Spectroscopy” 5<sup>th</sup> edition, Publisher Cengage Learning ,2015
3. Yang, Rui “Analytical methods for polymer characterization” CRC Press, 2018.
4. Joseph D. Menczel, R. Bruce Prime “Thermal analysis of polymers: fundamentals and applications” John Wiley, 2019.

### REFERENCES:

8. John M. Chalmers, Robert J. Meier, “Molecular characterization and analysis of polymers” Elsevier, 2008

### COURSE OUTCOMES

**CO1:** Gaining knowledge on principles of various instruments

**CO2:** Understand about various characterization techniques

**CO3:** Interpretation the polymer by different techniques

**Board of Studies (BoS) :**

11<sup>th</sup>BoS of Chemistry held on

**Academic Council:**

17<sup>th</sup> AC held on 15.07.2021

17.06.2021

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO 10	PO11	PO 12	PSO1	PSO2	PSO3

**Note:** L - Low Correlation    M - Medium Correlation    H - High Correlation

SDG 4: Aims at ensuring inclusive and equitable quality education and promote lifelong learning opportunities for all.

This course will provide deep knowledge on analysis of polymers using different instrumental methods.

<b>CHDX 07</b>	<b>MEDICINAL CHEMISTRY</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

To impart knowledge on

**COB1:**The basic factors governing drug design.

**COB2:**The software tools for molecular docking.

**COB3:**The synthetic pathway of antinfective, antineoplastic, cardiovascular and steroidal drugs.

**COB4:**The mode of action and side effects of synthetic drugs.

**MODULE I INTRODUCTION TO DRUG DESIGN 7**

Development of new drugs: Procedure followed in drug design – Literature survey - Search for Active Pharmaceutical Ingredient(s) - Molecular modification – Types of pharmaceutical form / mode of administration, Chemical Characterization of Medicinal Drugs - Molecular docking.

**MODULE II ANTIINFECTIVE DRUGS 8**

Synthesis, mode of action and side effect of Dapsone and Clofazimine (antileprotic) – Isoniazid, Rifampicin, Pyrazinamide and Ethambutol (antitubercular) – Fluconazole and griseofulvin (antifungal) – Chloroquine and Primaquine (antimalarial) - Semisynthetic penicillin, Streptomycin, Ciprofloxacin (Antibiotics) - Nevirapine and Zidovudine (Antiviral)

**MODULE III ANTINEOPLASTIC AND CARDIOVASCULAR DRUGS 8**

Synthesis, mode of action and side effect of Mechlorethamine, Cyclophosphamide, Melphalan, Fluorouracil, 6-Mercaptopurine (Antineoplastic) – Sorbitrate, methylprednisolone, Methyldopa, quinidine (Cardiovascular).

**MODULE IV STEROIDS AND RELATED DRUGS 7**

Synthesis, uses and mode of action - (A) Androgens -testosterone (B) Estrogens and progestational agents – progesterone, (C) Adrenocorticoids – prednisolone, dexamethasone, Remdesivir (D) Glucocorticoids – Cortisol (E)Anabolicsteroids - nandrolone, oxandrolone (F) Neurosteroids – allopregnanolone.

**L – 30; Total Hours–30**

**TEXT BOOKS:**

1. An Introduction to Drug Design, S. N. Pandeya and J. R. Dimmock, New Age International, 1997.
2. Burgers's Medicinal Chemistry and Drug Discovery, Fifth Edition; M. E. Wolff, John Wiley and Sons, 1996.
3. The organic chemistry of drug design and drug action, R. B. Silverman and M. W. Holladay, Academic Press, 3<sup>rd</sup> Edition, 2014.
4. Introduction to medicinal chemistry: How Drugs Act and Why, A. Gringuage, Wiley-VCH, 1996.
5. Wilson and Gisvold's Text Book of Organic Medicinal and Pharmaceutical Chemistry; Eleventh Edition; Lippincott Williams & Wilkins, 2004.

**REFERENCES:**

1. Strategies for Organic Drug Synthesis and Design, D. Lednicer, John Wiley, 2<sup>nd</sup> Edition 2008.

**COURSE OUTCOMES:**

**CO1:** Carry out searches to retrieve information relevant to the development of a new drug.

**CO2:** Describe and justify the role and importance of the various disciplines involved in the different phases of drug discovery and development.

**CO3:** Explain how synthetic methods are used to make early decisions in the drug discovery and development.

**CO4:** Elaborate the mode of action and side effect of the drugs.

**Board of Studies (BoS) :**

11<sup>th</sup>BoS of Chemistry held on 17.06.2021

**Academic Council:**

17<sup>th</sup> AC held on 15.07.2021

**Note:** L - Low Correlation    M - Medium Correlation    H - High Correlation

SDG 9: Industry, Innovation & Infrastructure

Understanding of drugs preparation and usage in sustainable method reduces unwanted side effects and help to environments.

**MATHEMATICS ELECTIVE  
(SEMESTER III)**

<b>MADX01</b>	<b>TRANSFORMS AND PARTIAL</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4</b>	<b>DIFFERENTIAL EQUATIONS</b>	<b>3</b>	<b>1</b>	<b>0</b>	<b>4</b>

**COURSE OBJECTIVES:**

**COB1:** To formulate and solve partial differential equations of first, second and higher orders

**COB2:** To introduce basics and engineering applications of Fourier series

**COB3:** To develop Fourier transform techniques

**COB4:** To introduce analytic solutions of PDEs by using Fourier series

**COB5:** To acquaint with Z -Transform techniques for discrete time systems

**MODULE I PARTIAL DIFFERENTIAL EQUATIONS 9+3**

Formation of partial differential equations by elimination of arbitrary constants and arbitrary functions – Solution of standard types of first order partial differential equations – Lagrange’s linear equation – Linear partial differential equations of second and higher order with constant coefficients.

**MODULE II FOURIER SERIES 9+3**

Fourier Series and Dirichlet’s conditions - General Fourier series – Even and Odd functions - Half range Fourier series - Parseval’s identity - Harmonic Analysis.

**MODULE III FOURIER TRANSFORMS 9+3**

Fourier integral theorem (without proof) - Fourier transform pair - Fourier Inverse Transform – Properties - Convolution theorem - Parseval’s identity.

**MODULE IV APPLICATIONS OF FOURIER SERIES 9+3**

Applications of Fourier series to solution of PDEs having constant coefficients with special reference to Heat & Wave equations, Discrete and point Spectrum and Single pulse.

**MODULE V Z – TRANSFORM 9+3**

Introduction and Definition of Z-transform - Properties of Z- Transform -

Convolution Theorem of Z-Transform - Inverse Z-transform - Convolution Theorem of Inverse Z-Transform - Formation of difference equations - Solving Difference Equations using Z-Transform

**L – 45 ; T - 15; TOTAL HOURS – 60**

**TEXT BOOKS:**

- 1 Kreyszig .E., “Advanced Engineering Mathematics“, 10<sup>th</sup> edition, John Wiley and Sons (Asia) Pvt Ltd., Singapore, 2011.
2. Grewal B.S., “Higher Engineering Mathematics”, 44<sup>th</sup> edition, Khanna Publishers, New Delhi, 2017.
3. Ramana, B.V, “Higher Engineering Mathematics” Tata Mc Graw Hill Publishing Co. New Delhi, 2010.

**REFERENCES:**

1. Veerarajan.T., “Engineering Mathematics“, 5<sup>th</sup> edition, Tata Mc Graw Hill Publishing Co. New Delhi, 2012.
2. Peter V. O'Neil, “Advanced Engineering Mathematics”, 7<sup>th</sup> edition, Cengage Learning, 2011.
3. Dennis G. Zill, Warren S. Wright, “Advanced Engineering Mathematics”, 4<sup>th</sup> edition, Jones and Bartlett publishers, Sudbury, 2011.
4. Alan Jeffrey, “Advanced Engineering Mathematics”, Academic Press, USA, 2002.

**COURSE OUTCOMES:**

At the end of the course students will be able to

**CO1:**form and solve the partial differential equations using different methods

**CO2:**derive a Fourier series of a given periodic function by evaluating Fourier coefficients

**CO3:**apply integral expressions for the forward and inverse Fourier transform to a range of non-periodic waveforms

**CO4:**solve partial differential equations by using Fourier series

**CO5:**solve difference equations using Z-transform

**Board of Studies (BoS) :**

12<sup>th</sup> BOS of Mathematics & AS held on  
23.06.2021

**Academic Council:**

17<sup>th</sup> AC held on 15.07.2021

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2	PSO 3
CO1	M														

CO2	M														
CO3	H														
CO4	M														
CO5	M														

**Note:** L - Low Correlation    M - Medium Correlation    H - High Correlation

SDG 4: Ensure inclusive and equitable quality education and promote lifelong opportunities for all.

Learning of various mathematical techniques like matrices and calculus will lead to knowledge of applications in Computer Science

<b>MADX02</b>	<b>DISCRETE MATHEMATICS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4</b>		<b>3</b>	<b>1</b>	<b>0</b>	<b>4</b>

**COURSE OBJECTIVES:**

**COB1:** To introduce logical and mathematical ability to deal with abstraction

**COB2:** To acquaint with the concepts of predicate calculus.

**COB3:** To introduce the notations and concepts used in set theory

**COB4:** To apply and use the terms function, domain, codomain, range, image, inverse image and composition

**COB5:** To introduce basic concepts from abstract algebra, especially the essential concepts in group theory

**MODULE I PROPOSITIONAL CALCULUS 9+3**

Propositions – Logical connectives – Compound propositions – Conditional and biconditional propositions – Truth tables – Tautologies and contradictions – Contrapositive – Logical equivalences and implications – DeMorgan’s Laws – Normal forms – Principal conjunctive and disjunctive normal forms – Rules of inference – Arguments – Validity of arguments.

**MODULE II PREDICATE CALCULUS 9+3**

Predicates – Statement function – Variables – Free and bound variables – Quantifiers – Universe of discourse – Logical equivalences and implications for quantified statements – Theory of inference – The rules of universal specification and generalization – Validity of arguments.

**MODULE III SET THEORY 9+3**

Basic concepts –Notations-Subset –Algebra of sets –The power set – Ordered pairs and Cartesian product- Relations on sets – Types of relations and their properties – Relational matrix and the graph of a relation – Partitions –Equivalence relations –Partial ordering –Poset – Hasse diagram – Lattices and their properties– Boolean algebra – Homomorphism.

**MODULE IV FUNCTIONS 9+3**

Functions – Classification of functions — Composition of functions – Inverse functions – Binary and n–ary operations – Characteristic function of a set – Hashing functions – Recursive functions – Permutation functions.

**MODULE V ALGEBRAIC SYSTEMS****9+3**

Groups, Cyclic Groups, Subgroups, Cosets, Lagrange's theorem, Normal subgroups – Codes and group codes – Basic notions of error correlation – Error recovery in group codes.

**L –45 ; T-15; TOTAL HOURS – 60****TEXT BOOKS:**

1. Trembly J.P and Manohar R, "Discrete Mathematical Structures with Applications to Computer Science", Tata McGraw-Hill Pub. Co. Ltd, New Delhi, 30<sup>th</sup> Reprint 2011.
2. Kenneth H.Rosen, "Discrete Mathematics and its Applications:", 7<sup>th</sup> Edition, Tata McGraw-Hill Pub. Co. Ltd, New Delhi, Special Indian Edition, 2011.

**REFERENCES:**

3. C.L.Liu, D.P.Mohapatra, "Elements of Discrete Mathematics", 4<sup>th</sup> Edition, Tata McGraw-Hill Pub. Co. Ltd, New Delhi, 2012.

**COURSE OUTCOMES:**

At the end of the course students will be able to

**CO1:**form truth tables and write principal normal forms

**CO2:**write the negation of a quantified statement involving either one or two quantifiers.

**CO3:**prove that a proposed statement involving sets is true, or give a counterexample to show that it is false.

**CO4:**compute the connection between bijective functions and inverses. Be able to find the inverse of an invertible function.

**CO5:**give intrinsic structure of groups both abstract and specific examples illustrating the mathematical concepts involved.

**Board of Studies (BoS) :**

12<sup>th</sup> BOS of Mathematics & AS held on  
23.06.2021

SDG 4 : Ensure inclusive and equitable quality education and promote lifelong opportunities for all.

Learning of various mathematical techniques will lead to knowledge of applications in Communication Engineering

<b>MADX03</b>	<b>PROBABILITY AND STATISTICS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:4</b>		<b>3</b>	<b>1</b>	<b>0</b>	<b>4</b>

**COURSE OBJECTIVES:**

**COB1:** To impart knowledge on the basic concepts of probability

**COB2:** To understand random variables and distribution functions

**COB3:** To acquaint with joint density function and generating functions

**COB4:** To introduce sampling techniques and estimation

**COB5:** To perform hypothesis testing and draw inference

**MODULE I PROBABILITY 9+3**

Sample space, events- axioms of probability and interpretation – Addition, multiplication rules – conditional probability, Independent events - Total probability – Baye’s theorem - Descriptive Statistics.

**MODULE II RANDOM VARIABLE AND DISTRIBUTION FUNCTIONS 9+3**

Discrete random variable –continuous random variable – Expectation - probability distribution - Moment generating function – Binomial, Poisson, Geometric, Uniform (continuous), Exponential and Normal distributions.

**MODULE III TWO DIMENSIONAL RANDOM VARIABLES 9+3**

Joint, marginal, conditional probability distributions –covariance, correlation - transformation of random variables- Generating functions.

**MODULE IV SAMPLING AND ESTIMATION 9+3**

Sampling distributions – basic knowledge on Random , simple random , stratified and cluster samplings – Test of Hypotheses - concepts- Point estimation and Interval estimation.

**MODULE V THEORY OF INFERENCE 9+3**

Large sample tests – test for single and difference on proportions, single mean, difference of means, difference of variances – confidence intervals. Small sample tests – Student’s t test, F test and Chi square test on theory of goodness of fit and analyses of independence of attributes.

**L –45 ; T-15; TOTAL HOURS – 60**

3. Arora and Arora, "Comprehensive Statistical Methods", S. Chand, New Delhi 2007.

**COURSE OUTCOMES:**

At the end of the course students will be able to

**CO1:**do problems on probability, Baye's theorem and descriptive statistics.

**CO2:**evaluate moment generating functions and calculate probabilities using distributions.

**CO3:**calculate probabilities and derive the marginal and conditional distributions of bivariate random variables

**CO4:**classify random samplings and calculate point and interval estimates

**CO5:** make an informed decision, based on the results of inferential procedures

**Board of Studies (BoS) :**

SDG 4 : Ensure inclusive and equitable quality education and promote lifelong opportunities for all

Learning of various statistical methods will lead to knowledge of applications in Electronics and communication Engineering

<b>MADX 04</b>	<b>RANDOM PROCESSES</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4</b>		<b>3</b>	<b>1</b>	<b>0</b>	<b>4</b>

**COURSE OBJECTIVES:**

**COB1:** To acquire knowledge of the theory of probability, Baye's theorem and Tchebechev inequality

**COB2:** To understand random variables and discrete and continuous probability distributions

**COB3:** To demonstrate the techniques of two dimensional random variables and its distributions

**COB4:** To introduce the random process, stationary, Markov process and the study of correlation functions

**COB5:** To study spectral analysis and Weiner-Khinchine theorem

**MODULE I PROBABILITY 9+3**

Sample space, events- axioms of probability and interpretation – Addition, multiplication rules – conditional probability, Independent events - Total probability – Baye's theorem - Tchebychev's inequality.

**MODULE II RANDOM VARIABLES AND PROBABILITY DISTRIBUTIONS 9+3**

Discrete random variable –continuous random variable – Expectation - probability distribution - Moment generating function – Binomial, Poisson, Geometric, Uniform (continuous), Exponential and Normal distributions

**MODULE III TWO DIMENSIONAL RANDOM VARIABLES 9+3**

Joint, marginal, conditional probability distributions - covariance, correlation and regression lines - transformation of random variables.

**MODULE IV RANDOM PROCESSES 9+3**

Classification of Random process - Stationary process - WSS and SSS processes - Poisson process – Markov Chain and transition probabilities- Autocorrelation function and its properties - Cross Correlation function and its properties.

**MODULE V SPECTRAL DENSITY 9+3**

Linear system with random inputs – Ergodicity-Power spectral Density Function - Properties - System in the form of convolution - Unit Impulse Response of the System – Weiner-Khinchine Theorem - Cross Power

## Density Spectrum

**SDG 4:** Ensure inclusive and equitable quality education and promote lifelong opportunities for all.

Learning of various techniques in Random Processes will lead to knowledge required for applying in many projects.

<b>MADX05</b>	<b>NUMERICAL METHODS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4</b>		<b>3</b>	<b>1</b>	<b>0</b>	<b>4</b>

**COURSE OBJECTIVES:**

**COB1:** To familiarize with the methods of solving equations numerically

**COB2:** To introduce interpolation techniques and finite difference concepts

**COB3:** To acquire knowledge on Numerical differentiation and integration

**COB4:** To solve ordinary differential equations numerically

**COB5:** To solve partial differential equations numerically

**MODULE I                    NUMERICAL SOLUTIONS OF EQUATIONS                    9+3**

Bisection method - Regula Falsi method – Secant method - Fixed point iteration method - Newton's Raphson method –Gauss Elimination method - Gauss-Jordon method – Gauss Jacobi method - Gauss-Seidel method.

**MODULE II                    INTERPOLATION                    9+3**

Finite difference operators – Gregory Newton's forward and backward interpolations – Cubic spline interpolation - Lagrange interpolation - Newton's divided difference formula.

**MODULE III                    NUMERICAL                    DIFFERENTIATION                    AND                    9+3**  
**INTEGRATION**

Numerical differentiation using Newton's forward and backward formulae – Numerical integration : Trapezoidal and Simpson's 1/3 and 3/8 rules – Romberg's method – Gaussian Two Point and Three Point Quadrature formulae – Double integrals using Trapezoidal and Simpson's 1/3 rule.

**MODULE IV                    INITIAL VALUE PROBLEMS FOR FIRST                    9+3**  
**ORDER                    ORDINARY                    DIFFERENTIAL**  
**EQUATIONS**

Numerical solutions by Taylor's Series method, Euler's method, Modified Euler's Method - Runge – Kutta Method of fourth order – Milne's and Adam's Bashforth Predictor and Corrector methods.

**MODULE V                    BOUNDARY VALUE PROBLEMS FOR PDE                    9+3**

Finite difference solution of one dimensional heat equation by explicit and implicit methods – One dimensional wave equation and two dimensional Laplace equation

**L – 45 ; T - 15; TOTAL HOURS – 60**

**TEXT BOOKS:**

1. Grewal, B.S., “Numerical methods in Engineering and Science”, 7th edition, Khanna Publishers, New Delhi, 2007.
2. Gerald C.F., P.O.Wheatley, “Applied Numerical Analysis” , Pearson Education, New Delhi, 2002.

3. Sastry.S.S,”Introductory Methods of Numerical Analysis”,Fifth Edition,PHI Learning Private Ltd., New Delhi, 2012.

**COURSE OUTCOMES:** At the end of the course students will be able to

**CO1:** solve algebraic, transcendental and system of equations by numerical methods

**CO2:** apply various interpolation techniques and finite difference concepts

**CO3:** carry out numerical differentiation and integration using different methods whenever regular methods are not applicable

**CO4:** solve first order ODE using single and multi step methods

**CO5:** solve the boundary value problems in PDE by finite differences

**Board of Studies (BoS) :**

(SEMESTER III)**

<b>SSDX 01</b>	<b>ENGINEERING ECONOMICS AND MANAGEMENT</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4, 8, 9,12</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To present the major concepts and techniques of engineering economic analysis that is needed in the decision making process by providing insights to the basic microeconomic concepts of demand, supply and equilibrium.

**COB2:** To generate theoretical knowledge and understanding of macroeconomic aggregates such as national income and inflation and the major challenges associated with the measurement of these aggregates.

**COB3:** To develop analytical and critical thinking skills on money, banking and public finance and use them to judge the appropriateness of economic development and policy options.

**COB 4:** To introduce the basic concepts of management and planning and highlight the contribution of planning to the attainment of organization's objectives.

**COB 5:** To apprise the students about important management concepts and create awareness about the corporate social responsibilities and ethical aspects.

**MODULE I DEMAND AND SUPPLY ANALYSIS 9**

Introduction to Engineering Economics – Engineering efficiency – Economic efficiency - Scope of Engineering Economics, Engineers' contributions to economic growth- Problem solving and decision making - Laws of Demand and Supply - Difference between Microeconomics and Macroeconomics - Equilibrium between Demand and Supply, Elasticity of Demand - Pricing strategies.

**MODULE II NATIONAL INCOME AND INFLATION 8**

Concepts of National Income and measurement – GDP Growth Rate - Importance and difficulties of estimating National Income in India - Aggregate demand and aggregate supply, Macroeconomic equilibrium – Meaning of Inflation, its types causes and preventive measures.

**MODULE III MONEY, BANKING AND PUBLIC FINANCE 10**

Money – Meaning, types, functions, importance - Commercial Banks -

Central Bank - Monetary Policy – meaning, objectives, Methods of Credit Control By RBI, Government Budget – Government revenue and expenditures – Fiscal policy - Its objectives, instruments and limitations - Deficit Financing - The Fiscal Responsibility and Budget Management Act, 2003 (FRBMA) – Economic Reforms in India – LPG Policy.

#### **MODULE IV PRINCIPLES OF MANAGEMENT AND 8 PLANNING**

Nature of management and its process - Importance of Management-Functions and Principles of Management - Nature, Purpose and Kinds of Planning.

#### **MODULE V ENGINEERING MANAGEMENT 10**

Strategic Management-Manager and Environment - Globalization and Technology Intermediation, Corporate Social Responsibility of business - meaning, importance, arguments for and against Corporate Social Responsibility - Business Ethics- Role of Ethics in Engineering Practice-meaning, importance - State intervention in business - Pros and Cons of intervention.

**L – 45 ; Total Hours – 45**

**SDG 4:** Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all.

**SDG 8:** Promote sustained, inclusive and sustainable economic growth, full

and productive employment, and decent work for all.

**SDG 9:** Build resilient infrastructure, promote sustainable industrialization and foster innovation.

**SDG 12:** Ensure sustainable consumption and production patterns.

Inclusive and equitable quality education can make a critical difference to production patterns, consumer understanding of more sustainably produced goods, promote inclusive and sustainable economic growth along with productive employment and decent work for all.

<b>SSDX 02</b>	<b>SOCIOLOGY OF SCIENCE AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 17</b>	<b>TECHNOLOGY</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To recognize and define the basic concepts of society and the ways in which sociologists use these concepts in constructing explanations for individual and group problems.

**COB2:** To illustrate the convergence and divergence of sociology with engineering subjects in terms of the subject matter, nature and scope of the discipline and its approach.

**COB3:** To demonstrate the relationship between science, technology and society.

**COB4:** To understand the issues relating to science, technology and change in India both in the historical and globalization contexts.

**COB5:** To appraise the impact of science and technology on different socio-cultural institutions and processes.

**MODULE I INTRODUCTION 8**

Sociology - Definition, scope and importance, relationship with other social sciences - Major theoretical perspectives: Functionalism, Conflict Theorizing and Interactionism - Elements of social formation - Society, Community, Groups and Association - Institutions, family and kinship, religion, education, politics - Social process - Associative Social Process - Co-operation, Accommodation and Assimilation - Dissociative Social Process - Competition and Conflict.

**MODULE II INDIVIDUAL AND SOCIETY 9**

Culture - characteristics, functions, types, cultural lag and civilization - Socialization – process, stages, agencies and anticipatory socialization - Social Control - characteristics, importance, types and agencies - Social stratification. - Meaning, forms - caste and class.

**MODULE III SCIENCE, TECHNOLOGY AND SOCIETY 9**

Relationship between society and science and vice-versa - Science as a social system - Norms of science - Relationship between science and technology - History of modern science in India – colonial–independence and post-independence science - Science education in contemporary India – primary level to research level - Performance of universities in the development of technology - Interrelationship between industry and

universities.

#### **MODULE IV SCIENCE, TECHNOLOGY AND SOCIAL ISSUES 10**

Technology, media, identity and global society - Conformity and deviance and role of science and technology - Technology and development issue - S&T and sustainable development -Role of science and technology in the creation of environmental crisis - Social inequality, social exclusion and digital divide - Science, technology and ethical issues -Gender and technology.

#### **MODULE V GLOBALIZATION, SCIENCE, TECHNOLOGY 9 AND CHANGE**

Social Change - nature, direction, forms - Technology and rate of social change – Globalization - characteristics, historical and social context- Social consequences of science and technology on civil society - Globalization - Liberalization - Their impact on Indian science and technology - WTO and issues related to intellectual property rights - MNCs and Indian industry.

**L – 45; Total Hours – 45**

SDG 17: Strengthen the means of implementation and revitalize the global partnership for sustainable development.

To inculcate knowledge and socialize youth in building participation, institutions and partnership for inclusive development for the implementation of sustainable development goals.

<b>SSDX 03</b>	<b>INDUSTRIAL ECONOMICS AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 8 and 9</b>	<b>MANAGEMENT</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To provide a wholesome idea about the concept of industrial economics and identify the classifications of firms based on ownership and control.

**COB2:** To impart theoretical and analytical knowledge on the different market structures, pricing practices and government policies.

**COB3:** To equip the students with the framework that will be useful for applying economic models in business strategy, competition policy and regulations.

**COB4:** To understand the importance of Industrial Policy in the development of Industries in India.

**COB5:** To elucidate industrial growth in India by examining its performance and problems in industrial sector.

**MODULE I INTRODUCTION TO INDUSTRIAL ECONOMICS 9**

Definition and scope of industrial economics - Concept and importance of industry; Concept and organization of a firm - Classification of firms based on ownership - sector (industries, formal vs. Informal) - size and use - based classification - Separation of ownership and control - Localization of industries .

**MODULE II MARKET STRUCTURE 9**

Perfect Competition – Imperfect Competition: Monopoly – Monopolistic – Oligopolistic Strategy, Cartels, Cournot Kinked Demand and Price Leadership – Measurement of economic concentration – Policy against monopoly and restrictive trade practices – Competition Law – Pricing Practices: Objectives – Determinants – Pricing Methods – Government Policies and Pricing.

**MODULE III PRODUCTION ECONOMICS AND THEORY OF FIRM 9**

Production and Production function – Types, Factor Inputs – Input-Output Analysis, Undifferentiated Products - Cournot, Stackelberg, Dominant firm model, Bertrand-Heterogeneous products - Chamberlin's small and large number case - Kinked demand curve theory - Bain's limit pricing – Production Possibility Frontier.

**9****MODULE IV INDUSTRIAL POLICY**

Industrial Policy: Industrial Policy in India -1948, 1956, 1977, 1980, 1990, 1991 - Industrial Performance after Independence.

**MODULE V INDUSTRIAL GROWTH IN INDIA****9**

Trends and prospects - Public enterprises; efficiency - Productivity and performance constrain - Small scale industries: definition, role - Policy issues and performance - Capacity utilization - Industrial sickness and Exit - Technology transfer - Privatization.

**L – 45 ; Total Hours – 45****TEXT BOOKS:**

**SDG 8** - Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all.

**SDG 9:** Build resilient infrastructure, promote sustainable industrialization and foster innovation.

A comprehensive and holistic approach towards the way for sustainable development and economic growth through the inclusive economic strategy and thereby to reduce the poverty, hunger among people by familiarizing them industry and its importance as survival strategy for earning decent standard of living.

<b>SSDX 04</b>	<b>DYNAMICS OF INDIAN SOCIAL</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 10, 16</b>	<b>STRUCTURE</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To provide knowledge on the components of the Indian social structure.

**COB2:** To learn the nature and contemporary structure of Indian social institutions.

**COB3:** To sensitize students about social stratification in Indian Society.

**COB4:** To create awareness about the social problems occurring in contemporary India.

**COB5:** To explicate the changing institutions, the processes, the agents and the interventions that brings about change in the Indian society.

**MODULE I INDIAN SOCIAL STRUCTURE 9**

Demographic composition - Racial, religious, ethnic and linguistic -Types of communities - rural, urban, agrarian and tribal - Social backwardness - OBC, SC, ST and EWS - Indian minorities- religious, ethnic, linguistic and LGBT.

**MODULE II INDIAN SOCIAL INSTITUTIONS 9**

Family - types, characteristics, functions of family - Joint Family- definition features, functions of joint family , dysfunctions of joint family, disintegration of joint family – Marriage - definition, characteristics, marriage as sacrament or contract.

**MODULE III SOCIAL STRATIFICATION IN INDIA 9**

Social stratification - Concept of hierarchy - inequality, meaning and characteristics - Social Stratification and Social Mobility - Functions of Social Stratification - Caste, definition, principles, contemporary changes, dominant caste - Caste - class interface - Religious minorities.

**MODULE IV SOCIAL PATHOLOGY 9**

Social Problem - nature, social disorganization - Population explosion-causes, effects, relationship with development - Child Labour- causes, magnitude and consequences – Unemployment - nature, types, causes and effects - Gender issues - social status of women, violence against women and women in work place - Contemporary issues - communalism, terrorism and corruption.

**MODULE V SOCIAL CHANGE IN INDIA 9**

Socio-cultural change - Sanskritization – Westernization - Secularization, Modernization - Processes of Social change - Industrialization – Urbanization – Globalization - Social movement - concept, characteristics, functions - New social movement-Women and Environment movement.

SDG 10: Reduce inequality within and among countries.

SDG16: Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels.

To sensitize and impart pertinent knowledge to youths to combat the contemporary issues and challenges facing Indian society in order to remedy its social pathos and injustices in the path of achieving sustainable development in India.

**HUMANITES ELECTIVES – VI SEMESTER**

<b>SSDX 11</b>	<b>ECONOMICS OF SUSTAINABLE</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 1-17</b>	<b>DEVELOPMENT</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:** To inculcate the knowledge base on sustainable development with a view to balance our economic, environmental and social needs, allowing prosperity for now and future generations.

**COB2:** To develop a capacity to undertake a theoretically grounded analysis of environment issues and identify and describe what the United Nations and other governing bodies are doing to assist in a more sustainable world.

**COB3:** To have an insight of the emerging debate about reconciling ecological sustainability with poverty alleviation in the context of globalization and development.

**COB4:** To establish a clear understanding of the policy instruments of sustainable development.

**MODULE I                      CONCEPT OF SUSTAINABLE DEVELOPMENT                      8**

Evolution of the Concept – Rio Summit and sustainable development - various definitions of sustainable development - Components of sustainable development: Social, environmental and economic components – Sustainable Development Goals – Quality education, Gender equality, innovation and infrastructure, peace and justice - Sustainable engineering practices.

**MODULE II                      NEED FOR SUSTAINABLE DEVELOPMENT                      6**

Need for sustainability – Global environmental challenges: population growth, resource depletion, pollution, energy use, climate change, pollution, growing water scarcity, other urban problems, loss of biodiversity, hazardous wastes disposal.

International responses to environmental challenges - Global policy such as Kyoto Protocol, Paris Agreement, Montreal Protocol, Basel Convention.

Community Participation in Sustainable Development, Common Property Resource Management, Innovation, Industry and Sustainable Development.

**MODULE III                      GLOBALIZATION                      AND                      ENVIRONMENT                      7**  
**SUSTAINABILITY**

Impact of Globalization on sustainable development, Co - existence of globalization and Environment sustainability - Globalization and Global Governance.

Green economy - Renewable energy, sustainable transport, sustainable construction, land and water management, waste management.

#### **MODULE IV POLICIES FOR ACHIEVING SUSTAINABLE DEVELOPMENT 9**

Principles of environmental policy for achieving sustainable development: precautionary principle and polluter pays principle – Business Charter for Sustainable Development.

Policy instruments for sustainable development: direct regulation – market based pollution control instruments such as pollution tax, subsidy, pollution permits.

**L –30 ; TOTAL HOURS – 30**

SDG 1: End poverty in all forms and everywhere.

SDG 2: End hunger, achieve food security and improved nutrition, and promote sustainable agriculture.

SDG 3: Ensure healthy lives and promote well-being for all at all ages

SDG 4: Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

SDG 5: Achieve gender equality and empower all women and girls

SDG 6: Ensure availability and sustainable management of water and sanitation for all.

SDG 7: Ensure access to affordable, reliable, sustainable and modern energy for all.

SDG 8: Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

SDG 9: Build resilient infrastructure, promote inclusive and sustainable industrialization, and foster innovation

SDG 10: Reduce income inequality within and among countries

SDG 11: Make cities and human settlements inclusive, safe, resilient, and sustainable.

SDG 12: Ensure sustainable consumption and production patterns

SDG 13: Take urgent action to combat climate change and its impacts by regulating emissions and promoting developments in renewable energy.

SDG 14: Conserve and sustainably use the oceans, seas and marine resources for sustainable development.

SDG 15: Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss.

SDG 16: Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels.

SDG 17: Strengthen the means of implementation and revitalize the global partnership for sustainable development.

The holistic understanding of all the 17 SDGs aims to end poverty, ensure prosperity, and protect the planet.

<b>SSDX 12</b>	<b>SOCIOLOGY OF INDUSTRIAL</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 8, 9</b>	<b>RELATION</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:**To familiarize sociological approaches and perspectives to understand the social relationship in manufacturing industries and corporate sector.

**COB2:**To highlight the structure and functions of industrial organizations

**COB3:**To explicate the dynamics of organizational behavior, leadership and communication.

**COB4:**To provide an overview in labour legislation and labour welfare

**MODULE I INTRODUCTION 7**

Sociology of Industrial relation - definition, scope and importance - Theoretical approaches- scientific management, human relations approach, theory of bureaucracy- Fordism and post-fordism - Production system- concept and characteristics of factory system - automation and rationalization -The Industrial Employment (Standing Orders) Act, 1946 Industrial conflict-strike, lockout and trade unions- Emerging role of trade unions in India.

**MODULE II INDUSTRIAL ORGANIZATION 7**

Formal organization- definition, features, utility - Informal organization- definition, characteristics, types and relevance - Structure of industrial organization- features and functions of line organization, characteristics and roles of staff organization, distinction- Industrial hierarchy-white collar, blue collar, supervisors and managers.

**MODULE III DYNAMICS OF INDUSTRIAL RELATIONS 7**

Group dynamics- Definition, Group behaviour model - Group decision making process, group cohesiveness - Leadership- definitions, style and effective supervision- Communication- concepts, types, model barriers - Job satisfaction- nature, employee compensation and job satisfaction. Grievance Handling and Disciplinary Action, Code of Conduct, Industrial Relations in changing scenario, Employers' organisations.

**MODULE IV LABOUR LEGISLATION AND LABOUR 9**

**WELFARE**

**Labour Legislation**-Objectives, Principles, Classification and Evolution. International Labour Organisation. Social Justice and Labour Legislation, Indian Constitution and Labour Laws- The Factories Act, 1948, The Inter-state Migrant Workmen Act, 1979, The Contract Labour (Regulation and Abolition) Act, 1970, The Child Labour (Prohibition and Regulation) Act, 1986. Labour welfare-Concept, Scope, Types, and Principles, Industrial Health and Hygiene, Industrial Accidents and safety, Occupational Diseases. Social Security-Concept and Scope, Social Assistance and Social assurance.

SDG 8: Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

SDG 9 : Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation

The holistic understanding of industrial relations leads to equal access to opportunity, and equal pay for work of equal value for male and female contributions is necessary for gender equality as well as for inclusive economic growth. Explore work opportunities, understand career processes and appreciate the meaning and purpose of work in people's lives which leads to decent work and safe working practices.

<b>SSDX 13</b>	<b>PROFESSIONAL ETHICS AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 8</b>	<b>HUMAN VALUES</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:** To render basic insights and inputs to the students to inculcate human values to grow as responsible human beings with a proper personality.

**COB2:** To create awareness on senses of engineering ethics.

**COB3:** To inculcate knowledge and exposure on safety and risk, risks benefit analysis and professional rights.

**COB4:** To instill social values and loyalty and to appreciate the rights of others

**MODULE I HUMAN VALUES 7**

Morals, values and Ethics – Integrity – Work ethic – Service learning – Civic virtue – Respect for others – Living peacefully – Caring – Sharing – Honesty – Courage – Valuing time – Cooperation – Commitment – Empathy – Self-confidence – Character – Spirituality – Introduction to Yoga and meditation for professional excellence and stress management.

**MODULE II ENGINEERING ETHICS 7**

Senses of 'Engineering Ethics' - variety of moral issued - types of inquiry - moral dilemmas - moral autonomy - Kohlberg's theory - Gilligan's theory - consensus and controversy – Models of Professional Roles - Theories about right action - Self-interest - Customs and Religion - Uses of ethical theories - Valuing Time – Co-operation – Commitment.

**MODULE III SAFETY, RESPONSIBILITIES AND RIGHTS 8**

Safety and Risk – Assessment of Safety and Risk – Risk Benefit Analysis and Reducing Risk - Respect for Authority – Collective Bargaining – Confidentiality – Conflicts of Interest – Occupational Crime – Professional Rights – Employee Rights – Intellectual Property Rights (IPR) – Discrimination.

**MODULE IV CONTEMPORARY ISSUES 8**

Globalisation-Multinational Corporations – Environmental Ethics – Computer Ethics – Weapons Development – Engineers as Managers – Consulting Engineers – Engineers as Expert Witnesses and Advisors – Moral Leadership –Code of Ethics-Ethics and codes of business conduct in MNC.

7. Subramanian. R, “Professional Ethics - Includes Human Values”, Oxford HED Publishers, 2017.\

**COURSE OUTCOMES:**

At the end of the course, the students will be able to

**CO1:** Apply moral and ethical values scrupulously that ought to guide the engineering profession.

**CO2:** Understand the ethical issues related to engineering aspects.

**CO3:** Assess safety and risk and execute risk benefit analysis.

**CO4:** Become responsible engineers, experimenters, researchers or businessmen

**Board of Studies (BoS) :**

4<sup>th</sup>BoS of SSSH held on 28.06.2021

**Academic Council:**

17<sup>th</sup> AC held on 15.07.2021

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12

CO3			M		M	H		H				H
CO4			L				H	H	H		M	M

**Note:**L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 8 :Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

Holistic understanding of professional ethics explores work opportunities, understand career processes and appreciate the meaning and purpose of work in people's lives leading to a decent work and safe working practices and environments.

<b>SSDX 14</b>	<b>GENDER, TECHNOLOGY AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 8</b>	<b>DEVELOPMENT</b>	<b>2</b>	<b>0</b>	<b>0</b>	<b>2</b>

**COURSE OBJECTIVES:**

**COB1:** To conceptualize what is gender and sex and draw a line of distinction between the two.

**COB2:** To develop students' sensibility to the difference in gender roles, responsibilities, rights and injustice.

**COB3:** To reflect critically on the ways in which new technologies have sharpened and/or blurred gender difference.

**COB4:** To develop an insight to the gender and development with the paradigm shift from time to time.

**MODULE I UNDERSTANDING GENDER 7**

Basic Concepts: Sex/Gender, Gender roles, Gender socialization, - Construction of Gender- Making Women, Making Men Gender stereotyping, Femininity and Masculinity, Patriarchy, Heteronormativity, LGBTIQ - Theoretical Background to gender and feminist thinking: Liberal, Radical, Marxist, Socialist, Post-modern Feminism.

**MODULE II GENDER ROLES AND GENDER INJUSTICE 7**

Gender Roles and Relations-Types of Gender Roles Gender Roles and Relationships Matrix. Health conditions, Sex Ratio, Education: Literacy & Gender Bias - Work Related Issues: Existing Prejudices, gender Related Violence, Gender Discrimination - Political participation: Lack of women's representation - Economic Conditions- Social Conditions: divorce, rape, domestic violence.

**MODULE III GENDER, TECHNOLOGY AND CHANGE 8**

A historical perspective – Technology as masculine culture – Household technology – medical technology: New Reproductive technologies – Impact of Technological Change on Women. The Digital Divide: Unequal Access, Unequal Effects – Outcome and impact of ICT's Policies and projects for women. How gender influences technologies and the social organization of scientific and technical workspaces.

**MODULE IV GENDER AND DEVELOPMENT 8**

Gender, Governance and Sustainable Development - Women's role in Development - Women in Development (WID), Women and

Development (WAD) - Gender and Development (GAD); Gender Mainstreaming and Gender Budgeting - Gender and Human Rights

**L – 30; TOTAL HOURS –30**

4. Jain S.C., Women and Technology, Rawat Publication, Jaipur Begh, 1985.

**COURSE OUTCOMES:**

At the end of the course, the students will be able to

**CO1:** Distinguish important concepts related to gender in contemporary society.

**CO2:** Interpret the gender discrimination works in our society and how to counter it.

**CO3:** Illustrate how the intersection of gender and technology involves gender shaping technology and technology shaping gender.

**CO4:** Apply gender sensitive perspective on development and human rights.

**Board of Studies (BoS) :**4<sup>th</sup>BoS of SSSH held on 28.06.2021**Academic Council:**17<sup>th</sup> AC held on 15.07.2021

SDG 5: Achieve gender equality and empower all women and girls

To imbibe gender concern and gender perspective in the invention, and application of technology, planning and designing production and innovating strategies for engendering gender equality.

**OPEN ELECTIVE COURSES – VI SEMESER**

<b>GEDX 201</b>	<b>APPLICATIONS OF FLUID MECHANICS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>IN EVERY DAY LIFE</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To introduce the basic concepts of fluid mechanics and its measurement methods.

**COB2:** To make the student understand the various clouds formation and its effects.

**COB3:** To understand the application of fluid mechanics in automobile

**COB4:** To understand the application of fluid mechanics in biological system.

**COB5:** To understand the application of fluid mechanics in sport

**MODULE I FUNDAMENTALS OF FLUID MECHANICS 9**

Definition of fluids, Types of fluids, Classification of fluid flows, Units and dimensions, Various properties related to fluid. Approaches of fluid statics and dynamics condition. Digital pressure measurement systems.

**MODULE II EFFECT OF FLUID IN ATMOSPHERE 9**

Circulation of Water in the Atmosphere, Foggy Weather, Classification of Cloud, Cloud Identification, Cloud Development and Precipitation, Weather Forecasting methods, Tools for Forecasting the Weather, Overview of global climate.

**MODULE III VEHICLE AERODYNAMICS 9**

Introduction to automobile aerodynamics- Performance of cars and light vans, Aerodynamic drag of passenger cars, High-performance vehicles, heating, ventilation and air conditioning of motor vehicles

**MODULE IV BIO-FLUIDICS 9**

Introduction to Bio-fluid Mechanics - Fluidics in living systems and mechanobiology - Pressure driven flows - Analysis of Total Peripheral Flow - Circulatory Biofluid Mechanics - Blood Rheology - Blood Composition and Structure - Flow Properties of Blood - Blood Vessel Structure - Applications of Poiseuille's Law for the study of Blood Flow

**MODULE V SPORTS AERODYNAMICS 9**

Factors influencing on running, Cycling Aerodynamics, Performance factors in bicycling: Human power, drag, and rolling resistance, Sports Ball Aerodynamics,

## Skin Suit Aerodynamics in Speed Skating

**L – 45; TOTAL HOURS – 45****TEXT BOOKS:**

1. Frank M. White, "Fluid mechanics", Tata McGraw Hill, 2015.
2. Ahrens CD. Essentials of meteorology: an invitation to the atmosphere. Cengage Learning; 2014.

<b>GEDX 202</b>	<b>BASICS OF MANAGEMENT AND ORGANIZATIONAL BEHAVIOUR</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 8</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** Familiarize students with the evolution and fundamentals of management

**COB2:** : Introduce various functions of management

**COB3:** Impart knowledge on different elements of individual personality and behavior manifestation

**COB4:** Facilitate closer understanding of organization dimensions for maintaining a working relationship

**COB5:** Examine different styles and best approaches for better workforce management

**MODULE I NATURE AND THEORIES OF MANAGEMENT 8**

Evolution of management Thought-Classical, Behavioral and Management Science Approaches Management- meaning, levels, management as an art or science, Managerial functions and Roles, Evolution of Management Theory-Classical era- Contribution of F.W.Taylor, Henri Fayol, Neo-Classical - Mayo & Hawthorne Experiments. • Modern era – system & contingency approach Managerial Skills.

**MODULE II PLANNING AND ORGANIZING 10**

Planning - Steps in Planning Process - Scope and Limitations - Forecasting and types of Planning - Characteristics of a sound Plan - Management by OBJECTIVE (MBO) - Policies and Strategies - Scope and Formulation - Decision Making - Types, Techniques and Processes.

Organization Structure and Design - Authority and Responsibility Relationships - Delegation of Authority and Decentralization - Interdepartmental Coordination - Impact of Technology on Organizational design - Mechanistic vs Adoptive Structures - Formal and Informal Organization. Control: meaning, function, Process and types of Control.

**MODULE III INDIVIDUAL BEHAVIOUR 10**

Meaning of Organizational behavior, contributing disciplines, importance of organizational behavior, Perception and Learning - Personality and Individual Differences - Motivation theories and Job Performance - Values, Attitudes and Beliefs - Communication Types-Process - Barriers - Making Communication

Effective.

#### **MODULE IV GROUP BEHAVIOUR 9**

Groups and Teams: Definition, Difference between groups and teams, Stages of Group Development, Group Cohesiveness, Types of teams, Group Dynamics - Leadership - Styles - Approaches - Power and Politics - Organizational Structure - Organizational Climate and Culture, Conflict: concept, sources, Types, Stages of conflict, Management of conflict Organizational Change and Development.

#### **MODULE V EMERGING ASPECTS OF ORGANIZATIONAL BEHAVIOUR 8**

Comparative Management Styles and approaches - Japanese Management Practices Organisational Creativity and Innovation - Organizational behavior across cultures - Conditions affecting cross cultural organizational operations, Managing International Workforce, Productivity and cultural contingencies, Cross cultural communication, Management of Diversity.

**L – 45 ; TOTAL HOURS – 45**

#### **TEXT BOOKS:**

1. Koontz Harold & Weihrich Heinz “Essentials of Management”, Tata McGraw Hill, 10th Edition, 2015.
2. Stephen P. Robbins., Timothy A. Judge. and Neharika Vohra, “Organizational Behavior”, Pearson, 18th Edition, New Delhi, 2018.
3. Fred Luthans, Brett C. Luthans and Kyle W. Luthans, “Organizational Behavior, An Evidence Based Approach”, McGraw Hill Education, 13th Edition, New Delhi, 2013.

3. Tripathy P. C. and Reddy P. N., “Principles of Management”, 5th Edition, Tata McGraw Hill, 2015.

#### **COURSE OUTCOMES:**

After the completion of the course, the students will be able to

**CO1:** Describe and discuss the elements of effective management

**CO2:** Discuss and apply the planning, organizing and control processes

**CO3:** Describe various theories related to the development of leadership skills, motivation techniques, team work and effective communication

**CO4:** Have a better understanding of human behaviour in organization

**CO5:** Know the framework for managing individual and group performance

**Board of Studies (BoS) :**

15<sup>th</sup> BoS of CSB held on  
15.09.2023

SDG 9 : Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

Statement: Understanding of the basics of functioning of management and people's behavior in organization help to improve the productive employment leading to sustainable economic growth.

<b>GEDX 205</b>	<b>CONSUMER ELECTRONICS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4,9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To discuss the fundamentals of audio systems.

**COB2:** To analyze the video systems and e communication systems

**COB3:** To adapt the fundamentals of electronics in consumer gadgets.

**COB4:** To compare the difference between CIoT and IoT

**COB5:** To choose the consumer electronics using IoT for an application

**PREREQUISITE:**

Fundamentals of electronic circuits, communication engineering, microprocessor and microcontrollers.

**MODULE I AUDIO FUNDAMENTALS AND DEVICES 9**

Basic characteristics of sound signal, Microphone: working principle, sensitivity, nature of response, directional characteristics, Types: carbon, condenser, crystal, electrets, tie- clip, wireless, Loud speaker: working principle, characteristic impedance, Types: electrostatic, dynamic, permanent magnet etc., woofers and tweeters, Sound recording: Optical recording, stereophony and multichannel sound

**MODULE II AUDIO SYSTEMS 9**

Audio system: CD player, home theatre sound system, Digital console: block diagram, working principle, Applications, FM tuner: concepts of digital tuning, ICs used in FM tuner TDA7021T, PA address system: speaker impedance matching, Characteristics, power amplifier, Specification.

**MODULE III TELEVISION SYSTEMS 9**

Composite video signal: horizontal and vertical sync details, scanning sequence, Colour TV standards, colour theory, hue, brightness, saturation, luminance and chrominance, Different types of TV camera, Transmission standards: PAL system, channel bandwidth

**MODULE IV TELEVISION RECEIVERS AND VIDEO SYSTEMS 9**

PAL-D colour TV receiver, block diagram, Precision IN Line color picture tube. Digital TVs: LCD, LED, PLASMA, HDTV, 3-D TV, projection TV, DTH receiver. Video interface: Composite, Component, Separate Video, Digital Video, SDI, HDMI Multimedia Interface, Digital Video Interface, CD and DVD player: working principles, interfaces.

**MODULE V CIOT AND ITS CASE STUDIES 9**

Introduction to Consumer Internet of Things (CIoT), difference between CIoT and IoT, Application of home appliances, Wearable devices and other case study of consumer electronic equipments.

**L – 45; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. R R. GULATI, Modern Television Practice Transmission, Reception and Applications, New Academic Science, 2021
2. Bali S.P., Consumer Electronics, Pearson Education India, 2010, latest edition.

7. Mourade Azrour, Azeem Irshad, Rajasekhar Chaganti, "IoT and Smart Devices for Sustainable Environment", Springer Cham, 2022

**COURSE OUTCOMES:**

On completion of the course, the students will be able to

**CO1:** Demonstrate the working of audio and television products.

**CO2:** Select suitable PA system for a specific scenario.

**CO3:** Apply the troubleshooting procedure of a typical TV receivers and video systems

**CO4:** Describe the troubleshooting procedure of audio devices

**CO5:** Illustrate the troubleshooting procedure of a typical TV camera

**Board of Studies (BoS) :**

**SDG 4:** Ensure inclusive and equitable quality education and promote Lifelong learning opportunities for all.

Statement: Provides quality education by understanding the fundamental concepts of home appliances and promotes research in the area of consumer electronic gadgets and electronic communication.

**SDG 9:** Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation

Statement: Basic of consumer electronics perseveres on safety measurement of e-gadget used by us. It helps to build resilient Infrastructure; promote inclusive and sustainable industrialization through various electronics appliances used in day to day to life.

<b>GEDX 207</b>	<b>CYBER FORENSICS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To inculcate the fundamentals of digital forensics from the viewpoint of courtroom legalities

**COB2:** To introduce the different types of cyber crimes.

**COB3:** To begin the policies and procedures to investigate cyber crime

**COB4:** To create forensics concepts and practices focusing on networks and internet

**COB5:** To gain the knowledge on digital investigations.

**MODULE I FORENSICS FUNDAMENTALS 9**

Introduction- Law Enforcement – Services- Benefits of Professional Forensics Methodology – Types of computer forensics technology.

**MODULE II FORENSICS SYSTEM AND SERVICES 9**

Internet Security Systems – Intrusion Detection System – Firewall Security System Storage area network security systems – Network disaster Recovery System – Satellite Encryption Systems – Fighting Cyber Crime with Risk Management Techniques- Computer Forensics Investigation Services – Forensics Process Improvement

**MODULE III DATA RECOVERY 9**

Live data collection – Forensics Duplication – Collecting Network based Evidence – Evidence Handling – Hiding and Recovering Hidden Data – Data backup and Recovery

**MODULE IV EVIDENCE COLLECTION AND DATA SEIZURE 9**

Collection Options – Types of Evidence – Rules of Evidence – Volatile Evidence – Collection & Archiving – Methods of Collection – Artifacts – Collection Steps – Reconstructing the Attack

**MODULE V DATA ANALYSIS AND DIGITAL FORENSICS 9**

Computer System Storage Fundamentals – Data analysis techniques – Analyzing network traffic – Investigating hacker Tool – Investigating Routers – Writing - Types of cyber crime-Credit card and cyber crime-Web hacking Digital Detective Work-Cell Phone Forensics - Email and Webmail Forensics

**L – 45; TOTAL HOURS –45**

**TEXT BOOKS:**

CO5										H				

**Note:** - Low Correlation M - Medium Correlation H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

Statement : The comprehensive understanding of analysis, design and implementation of secure and efficient cyber security features that leads to reduction of offenses.

<b>GEDX 208</b>	<b>CYBER SECURITY</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG - 8</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

- To know the impact of various cybercrimes and cyber offenses.
- To understand cybercrimes in mobile devices.
- To know the tools and techniques used to secure from cybercrimes.
- To understand the basics of cyber security standards and policies.
- To learn about the basics of cyber forensics and cyber laws

**MODULE I CYBERCRIME AND CYBEROFFENSES 9**

Cybercrime and Information Security – Cybercriminals – Classifications of Cybercrimes – Email Spoofing – Spamming – Cyber defamation – Internet Time Theft – Forgery – Web jacking – Hacking – Online Frauds – Software Piracy – Mail Bombs – Password Sniffing – Cyberoffenses – Categories – Planning the attacks – Cyberstalking – Cybercafe and Cybercrimes.

**MODULE II CYBERCRIME: MOBILE AND WIRELESS DEVICES 9**

Proliferation of Mobile and Wireless Devices – Trends in Mobility – Credit card frauds in Mobile and Wireless Computing – Security Challenges – Authentication Service Security – Attacks on Mobile Phones – Android OS - iOS.

**MODULE III INTRODUCTION TO CYBER CRIME LAW AND INVESTIGATION 9**

Basics of Law, Understanding Cyber Space, Defining Cyber Laws, Scope and Jurisprudence, Concept of Cyber Jurisdiction, Overview of Indian Legal System, Introduction to IT Act 2000, Amendments in IT Act, Cyber Laws of EU – USA – Australia - Britain, other specific Cyber laws. Proxy Servers and Anonymizers – Phishing – Password Cracking – Keyloggers and Spywares – Virus and Worms – Trojan Horses and Backdoors – Steganography – DoS and DDoS Attacks – Introduction to Incident Response – Methodology – Steps - Activities in Initial Response Phase after detection of an incident.

**MODULE IV SECURITY POLICIES 9**

Introduction - Defining User Policies – Passwords – Internet Use – Email Usage – Installing/ Uninstalling Software – Instant Messaging – Defining System Administrative Policies – Defining Access Control – Developmental Policies – Standards, Guidelines and Procedures – Basics of Assessing a System - Firewalls.

**MODULE V COMPUTER FORENSICS 9**

History of Forensics – Computer Forensic Flaws and Risks – Rules of Computer Forensics – Legal issues – Digital Forensic Principles – Digital Environments –

Digital Forensic Methodologies-Forensic Hardware and Software-Case study.

**Total Hours : 45**

**TEXT BOOK:**

1. Charles J. Brooks, Christopher Grow, "Cyber Security Essentials", Sybex Jons Wiley and sons, 2018
2. William Stallings, "Computer Security Principles and Practice", Third Edition, Pearson Education, 2015.

5. John Sammons, "The Basics of Digital Forensics", Elsevier, 2012.
6. Linda Volonins, Reynalds Anzaldua, "Computer Forensics for dummies", Wiley Publishing 2008.

**COURSE OUTCOMES:**

Upon completion of this course, students will be able to

- Know various cybercrimes and offenses.
- Identify cybercrime in mobile and wireless environment.
- Use relevant tools and methods in cybercrime.
- Apply security policies in cyber forensics.
- Outline the strategies adopted in computer forensics.

SDG 8 : Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all.

**Statement:** It enable better management of infrastructure roll-out and maintenance, increase agricultural productivity, and provide additional business opportunities and market intelligence through online services.

<b>GEDX 209</b>	<b>DISASTER MANAGEMENT</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 3,11,13 &amp; 15</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:**To impart knowledge on the concept related to disaster, hazard and risk.

**COB2:**To provide an understanding about the types of natural disasters and man-made disasters

**COB3:**To gain knowledge related to the different impacts of disaster on health and environment

**COB4:** To provide an understanding about the concept of disaster risk reduction and management

**COB5:** To provide exposure related to various environmental policies & programs for disaster management

**MODULE I BASIC CONCEPTS 7**

Concepts and definitions: Disaster, Hazard and its types - Biological, Chemical, Ergonomic, Physical, Psychosocial- Vulnerability and its types –Risks and its types, Factors influencing degree of risk- Risk severity, Frequency and its capacity – Risk impact, prevention, mitigation.

**MODULE II TYPES OF DISASTERS 10**

Natural hazards and Disasters - Volcanic Eruption, Earthquakes, Tsunamis, Landslides, Cyclones, Floods, Droughts, Cold waves, Heat waves and Fire, Land Subsidence, Coastal Disaster, Cyclonic Disaster & Disaster in Hills with particular reference to India - Man-made Disasters - Industrial pollution, artificial flooding in urban areas, nuclear radiation, chemical spills, transportation accidents, terrorist strikes, War etc.

**MODULE III IMPACTS OF DISASTER 9**

Disaster impacts - environmental, physical, social, ecological, economic, political, Health, psycho-social issues, demographic aspects - gender, age, special needs, hazard locations, global and national disaster trends, climate change and urban disasters.

**MODULE IV NATURAL DISASTER REDUCTION & MANAGEMENT 10**

Disaster management cycle –Disaster preparedness - Early warning systems - Post disaster environmental response (water, sanitation, food safety, waste management, disease control, security, communications) - Roles and

responsibilities of government, community, Local institutions, NGOs and other stakeholders - Applications of Satellite Communications, GPS, GIS and Remote Sensing in disaster management.

## **MODULE V ENVIRONMENTAL POLICIES & PROGRAMMES IN INDIA**

**9**

Environmental Legislations in India - Environmental policies & programmes- National Disaster Management Authority and its functions - Role of Panchayats in Disaster mitigations - Sustainable rural and urban development- Awareness, Conservation Education & training related disaster management.

**L – 45; TOTAL HOURS – 45**

### **COURSE OUTCOMES:**

At the end of the course the student will be able to

**CO1:**Elaborate about the origin, changes and management of environmental hazards.

**CO2:**Define about the natural disasters and man-made disasters.

**CO3:** List down the different impacts of disaster.

**CO4:** Apply the concept of disaster management and relief measures in the real-time situation.

**CO5:** Suggest solutions based on the National Policy on Disaster Management.

**Board of Studies (BoS) :**

18<sup>th</sup> BoS of CE held on  
05.04.2023

**Academic Council:**

20<sup>th</sup> Academic Council  
held on 13.04.2023

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2	PSO 3

SDG 3: Ensure healthy lives and promote well-being for all at all ages

SDG 11. Make cities and human settlements inclusive, safe, resilient and sustainable

SDG 13 : Take urgent action to combat climate change and its impacts

SDG 15: Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss.

Statement :

The knowledge on disaster management can strengthen resilience and adaptive capacity to natural disasters and make cities and human settlements inclusive, safe, resilient and sustainable.

<b>GEDX 211</b>	<b>ENTERPRISE RISK MANAGEMENT</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To understand the nature and scope of risk management.

**COB2:** To know the enterprise risk management's (ERM) benefits and regulatory standards.

**COB3:** To have a better understanding of ERM process's programming and analysis.

**COB4:** To know the ERM process's solution assessment.

**COB5:** To know the ERM process's decision and system administration.

**MODULE I INTRODUCTION TO RISK MANAGEMENT 7**

Nature of risk, terms and definitions - Organizing for Risk Management- Objectives of Risk Management - Scope of Risk Management - legal, financial and social benefits of managing risk.

**MODULE II INTRODUCTION TO ENTERPRISE RISK MANAGEMENT (ERM) 7**

Definition - Hallmarks of ERM - Goals, risk rulers and risk position - Influences and benefits of a risk management programme - Potential consequences of failing to manage risk. Risk management legislation, regulatory standards and compliance obligations - Risk management and the role of the Board and senior management.

**MODULE III ERM PROCESS – RISK PROGRAMMING AND RISK ANALYSIS 10**

Risk programming: vision, mission, values – Strategic planning and ERM – Role of Engineers in risk programming – Risk analysis: Identifying, measuring and analyzing risk – Identification methods - Risk description and expression methods - Role of engineers in risk analysis.

**MODULE IV ERM PROCESS – SOLUTION ASSESSMENT 10**

Risk response categories: prevention, mitigation, avoidance, resilience - Occupational health and safety: environmental risk and construction practices - physical and corporate security - Financial solutions: insurance and contract management - Claims and incident management - Role of engineers in risk solution assessments.

**MODULE V ERM PROCESS – DECISION PROCESS AND 11**

### SYSTEM ADMINISTRATION

Risk based decision making - Multi hierarchy attribute process - Role of engineer in risk decisions - Risk management structure - Board committees (audit, finance, HR), risk management function, internal audit and compliance function - Key risk indicators and risk position statements - Risk registers, dashboards, reports - Organizational Risk Management Maturity assessments - Risk monitoring and reporting obligations - Role of engineers in risk administration.

**L – 45; TOTAL HOURS – 45**

#### TEXT BOOKS:

7. Krishnamurthy N., "Introduction to Enterprise Risk Management: A Guide to Risk Analysis and Control for Small and Medium Enterprises", Patridge Publishing, 1<sup>st</sup> edition, Singapore, 2019.

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

**SDG 9 :** Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

Statement : The contents of the syllabus is intended to enable students to understand the enterprise risk management and it's process.

<b>GEDX 212</b>	<b>FUNDAMENTALS OF PROJECT</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 12</b>	<b>MANAGEMENT</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To gain insight into the basics of project management

**COB2:** To learn to manage project scope, time and cost

**COB3:** To establish measures to monitor and control project progress

**COB4:** To learn about the dynamics of project closure

**COB5:** To gain knowledge on recent trends in project management

**MODULE I INTRODUCTION 8**

Objectives of Project Management- Importance of Project Management- Types of Projects Project Management Life Cycle- Project Selection – Feasibility study: Types of feasibility Steps in feasibility study.

**MODULE II PROJECT PLANNING AND IMPLEMENTATION 10**

Defining Project Scope - Establishing Project Priorities - Creating Work Breakdown Structure (WBS) - Estimating Project Times and Costs - Developing a Project Schedule - Resource Leveling – Resource Allocation - Developing & Managing Project Teams - Project Risk Management - Risk Identification – Risk Assessment – Risk Response Development

**MODULE III PROJECT MONITORING AND CONTROL 10**

Project Monitoring Information System – Project Control Process – Monitoring Time – Gantt Chart – Control Chart – Milestone Schedules – Indices to Monitor Progress – Technical Performance Measurement

**MODULE IV PROJECT CLOSURE 8**

Types of Project Closure - Project evaluation - Project Auditing –Project Audit Process - Project Closeout Checklist - Guidelines for closeout reports.

**MODULE V RECENT TRENDS IN PROJECT MANAGEMENT 9**

Managing International Projects – Environmental Factors – Project Site Selection – Cross Cultural Considerations – Selection and Training for International Projects - Agile Project Management - Traditional versus Agile methods

**L – 45; TOTAL HOURS – 45**

**TEXT BOOKS:**

SDG 12 : Ensure sustainable consumption and production patterns

Statement : The understanding of the concepts of project management leads to the execution of a project within the time and cost deadline.

<b>GEDX 213</b>	<b>INDUSTRIAL ROBOTICS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>2</b>	<b>0</b>	<b>2</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To learn the fundamentals of robotic systems.

**COB2:** To study about various drives and control systems required for robot system.

**COB3:** To gain knowledge about the kinematics and dynamics of robots.

**COB4:** To familiarize with programming language and futuristic robot systems.

**MODULE I      FUNDAMENTALS OF ROBOTIC SYSTEMS      L:6  
P:6**

History and Terminology of Robotics- Robot anatomy: Definition, law of robotics, Accuracy and repeatability of Robotics-Simple problems - Specifications of Robot- Speed of Robot-Robot joints and links-Robot classifications-Architecture of robotic systems.

**MODULE II      DRIVES AND CONTROL SYSTEMS FOR      L:7  
ROBOTS      P:6**

Objectives –Motivation -Open loop control - Closed loop control with velocity and position feedback - Types of drive systems - Components of drive system: Lead Screws, ball Screws, Chain and linkage drives, Belt drives, Gear drives, Precision gear boxes, Harmonic drives, Cyclo speed reducers - General aspects of robot control - Basic control techniques - Mathematical modelling of robot servos -Error responses and steady state errors in robot servos -Feed back and feed forward compensations -Hydraulic position servo - Selection of robot drive systems.

**MODULE III      KINEMATICS AND DYNAMICS OF ROBOTS      L:8  
P:9**

Link coordinates -Denavit-Hartenberg(D-H) representation - The ARM equation - Direct kinematic analysis for Four axis, SCARA Robot and three, five and six axis Articulated Robots.

The inverse kinematics problem - General properties of solutions - Tool configuration - Inverse kinematics of four axis SCARA robot and three and five axis Articulated robot.

**MODULE IV      ROBOT PROGRAMMING AND FUTURISTIC      L:9  
ROBOT SYSTEMS      P:9**

Robot programming – Introduction-Types- Flex Pendant- Lead through programming - Coordinate systems of Robot - Robot controller- Major components –Functions-Wrist Mechanism-Interpolation-Interlock commands-Operating mode of robot - Jogging- Types - Robot specifications- Motion commands -End effectors and sensors commands.

Robot intelligence - Tele robotics– Mechanical design Features: Mobility, locomotion and Navigation -Robots for Industrial applications.

### **PRACTICAL'S:**

#### **List of experiments:**

##### **Robot Anatomy**

1. Robot Anatomy studies
2. Fundamentals of V-Rep and software control
3. Building Robot Environment in V-REP
4. Importing robot and virtual controller
5. Robot Jogging
6. Robot Programming
7. Motion Commands in RAPID
8. Path planning
9. Forward kinematics -1 DOF and 2 DOF
10. Inverse kinematics -1 DOF and 2 DOF

**L – 30; TOTAL HOURS – 30**

#### **TEXT BOOKS:**

**Note:** L- Low Correlation    M -Medium Correlation    H -High Correlation

**SDG 9:** Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The understanding of robots promotes automation and helps to improve work environment, ultimately achieving improved productivity in labor-intensive industries through technology.

<b>GEDX 214</b>	<b>INTERNET OF THINGS AND ITS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4,9</b>	<b>APPLICATIONS</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To discuss the basic concepts of IoT

**COB2:** To elaborate the vision of IoT from a global context

**COB3:** To choose different protocols for IoT design

**COB4:** To explain the security issues in IoT

**COB5:** To estimate the Market perspective of IoT.

**PREREQUISITE:**

Basics of embedded system and networking

**MODULE I BASICS OF IOT 9**

IoT & Web Technology, The Internet of Things Today, Time for Convergence, Towards the IoT Universe, Internet of Things Vision, IoT Strategic Research and Innovation Directions, IoT Applications, Future Internet Technologies, Infrastructure, Networks and Communication, Processes, Data Management, Security, Privacy & Trust, Device Level Energy Issues

**MODULE II IOT ARCHITECTURE 9**

A Basic Perspective– Introduction, M2M Value Chains, IoT Value Chains, An emerging industrial structure for IoT, The international driven global value chain and global information monopolies. M2M to IoT-An Architectural Overview– Building an architecture, Main design principles and needed capabilities, IoT reference Model, IoT Reference Architecture-Introduction, Functional View, Information View, Deployment and Operational View

**MODULE III IOT PROTOCOLS 9**

Wireless Technologies for IoT: WPAN Technologies for IoT: IEEE 802.15.4, Zigbee, HART, NFC, Z-Wave, BLE, Bacnet, Modbus. IP Based Protocols for IoT IPv6, 6LowPAN, RPL, REST, AMPQ, CoAP, MQTT. Edge connectivity and protocols

**MODULE IV IoT SECURITY 9**

Internet of Things Privacy, Security and Governance Introduction, Overview of Governance, Privacy and Security Issues, Contribution from FP7

Projects, Security, Privacy and Trust in IoT-Data-Platforms for Smart Cities, First Steps Towards a Secure Platform, Smartie Approach- Data Aggregation for the IoT in Smart Cities, Security

### **MODULE V APPLICATIONS OF IoT 9**

IoT Applications for Value Creations Introduction, IoT applications for industry: Future Factory Concepts, Brownfield IoT, Smart Objects, Smart Applications, Four Aspects in your Business to Master IoT, Value Creation from Big Data and Serialization, IoT for Retailing Industry, IoT For Oil and Gas Industry, Opinions on IoT Application and Value for Industry, Home Management, eHealth.

2. Pethuru Raj and Anupama C. Raman, "The Internet of Things: Enabling Technologies, Platforms, and Use Cases", CRC Press, 2017.

#### **COURSE OUTCOMES:**

On completion of the course, the students will be able to

**CO1:** Explain the various concepts, terminologies and architecture of IoT systems.

**CO2:** Apply various protocols for design of IoT systems

**CO3:** Use of Devices, Gateways and Data Management in IoT

**CO4:** Design IoT applications in different domain

**CO5:** Analyze performance of IoT application

SDG No: 4 - Quality Education

Improving lives through the advancement of learning.

SDG No: 9 - Industry, Innovation and Infrastructure

To increase the performance by providing scalable computing and storage resources.

<b>GEDX 216</b>	<b>IPR AND PATENT LAWS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To introduce fundamental aspects of Intellectual property Rights to students who are going to play a major role in development and management of innovative projects in industries.

**COB2:** To disseminate knowledge on Copyrights and Design with their registration aspects

**COB3:** To learn the requirement of patentability, learn how to read and interpret patent specifications

**COB4:** To inculcate basic understanding on patent prosecution

**COB5:** To know about the enforcement agencies and rights

**MODULE I OVERVIEW OF INTELLECTUAL PROPERTY 10**

Introduction and the need for intellectual property right (IPR) - Kinds of Intellectual Property Rights: Patent, Copyright, Trade Mark, Design, Geographical Indication, Plant Varieties and Layout Design – Genetic Resources and Traditional Knowledge – Trade Secret - IPR in India : Genesis and development – IPR in abroad - Major International Instruments concerning Intellectual Property Rights: Paris Convention, 1883, the Berne Convention, 1886, the Universal Copyright Convention, 1952, the WIPO Convention, 1967, the Patent Co-operation Treaty, 1970, the TRIPS Agreement, 1994

**MODULE II COPY RIGHTS AND DESIGN 9**

Nature of Copyright - Subject matter of copyright, Registration Procedure, Term of protection, Ownership of copyright, Assignment and licence of copyright - Infringement, Remedies & Penalties. Design: meaning and concept of novel and original - Procedure for registration, effect of registration and term of protection

**MODULE III INTRODUCTION TO THE INDIAN PATENT SYSTEM 9**

Patent Laws as Concepts; Understanding the Patents Rules, 2003; Statutory Exceptions to Patentability; Novelty and Anticipation; Inventive Step; Capable of Industrial Application; How to Make a Patent Application, What to include in a Patent Application, Types of Patent Applications.

**MODULE IV PATENT PROSECUTION 8**

Publication and Examination; Powers of Controller—Examination Stage, Consideration of report by examiner, Refuse or Amend Applications, Division of Applications, Dating of Application, Anticipation, Potential Infringement

**MODULE V PATENT LICENSING AND ENFORCEMENT 9**

Compulsory Licensing—Working of Patents, Grounds for Grant of Compulsory License, Revocation; Patent Licensing; Patent Enforcement, International Arrangements and Other Miscellaneous Provisions Intellectual Property Appellate Board; Declaratory Suits, Infringement Suits

**L – 45 ; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. Neeraj, P., & Khusdeep, D. (2014). Intellectual Property Rights. India, IN: PHI learning Private Limited.

**REFERENCES:**

SDG 9 : Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation

Statement : It is established that intellectual property touches different aspects of a country's economic growth and social development, so an engineer or technocrat should know the implications of their innovations

<b>GEDX 217</b>	<b>LOGISTICS AND SUPPLY CHAIN</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 12</b>	<b>MANAGEMENT</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To identify of the role of logistics in adding value to the final product .

**COB2:** To gain knowledge on warehouse and transport operations in logistics.

**COB3:** To learn the fundamentals of supply chain management.

**COB4:** To learn to locate the facilities, design network in a supply chain.

**COB5:** To get exposed to the latest developments in the field of Logistics and Supply Chain Management.

**MODULE I INTRODUCTION TO LOGISTICS MANAGEMENT 11**

Definition and scope of logistics management-Importance of logistics in supply chain management Evolution and trends in logistics management-Functions -In-bound and Out-bound logistics – Components of Logistics Management - Logistics Service Provides (LSP)-Role of 2 PL, 3 PL and 4 PL - Concepts and importance of reverse logistics

**MODULE II WAREHOUSING & TRANSPORTATION 7**

Warehousing Functions - Types - Site Selection - Decision Model - Layout Design - Costing - Virtual Warehouse. Transportation System - Evolution - Infrastructure and Networks - Freight Management - Vehicle Routing – FTL and LTL.

**MODULE III SUPPLY CHAIN MANAGEMENT 9**

Introduction to Supply chain management - Definition, objectives - functions of Supply chain and drivers – Drivers of supply chain performance –Material flow-financial flow- information flow-- Lack of supply chain coordination and the Bullwhip effect,VMI – CPFR.

**MODULE IV SUPPLY CHAIN NETWORK 9**

Distribution network design – role - factors influencing options, design options – network design decisions – factors influencing options - models for facility location and capacity allocation - network optimization models.

**MODULE V CURRENT TRENDS 9**

Logistics Information Systems - Need - Characteristics and Design – E  
Logistics - Structure and Operation - Logistics Resource Management -  
e- LRM Role of information technology in a supply chain – e-business  
and supply chain management – Green supply chain management and  
environmental sustainability of supply chain.

**L –45 ; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. Bowersox, D. and Closs, D., “Logistical Management: The Integrated Supply Chain Process”, Tata McGraw - Hill, New Delhi, 2010.
2. Chopra, S., Meindl, P. and Kalra, D.V., “Supply Chain Management: Strategy, Planning, and Operation”, 6th Edition, Pearson Education, New Delhi, 2016.

**REFERENCES:**

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG No. 9 - Ensure sustainable consumption and production patterns

Statement : The understanding of the concepts of supply chain management leads to the production and distribution of goods and services for the mankind with a focus on improving the overall supply chain profitability.

<b>GEDX 220</b>	<b>OPTIMIZATION TECHNIQUES</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4, ,9,11</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To introduce the basic concepts of linear programming

**COB2:** To educate on the advancements in Linear programming techniques

**COB3:** To introduce non-linear programming techniques

**COB4:** To introduce the interior point methods of solving problems

**COB5:** To introduce the dynamic programming method

**MODULE I      LINEAR PROGRAMMING      9**

Introduction - formulation of linear programming model-Graphical solution–solving LPP using simplex algorithm – Revised Simplex Method.

**MODULE II      ADVANCES IN LPP      9**

Dual simplex method - Sensitivity analysis – Transportation problems– Assignment problems-Traveling sales man problem -Data Envelopment Analysis.

**MODULE III      NON LINEAR PROGRAMMING      9**

Classification of Non Linear programming – Lagrange multiplier method – Karush – Kuhn Tucker conditions–Reduced gradient algorithms–Quadratic programming method – Penalty and Barrier method.

**MODULE IV      INTERIOR POINT METHODS      9**

Karmarkar’s algorithm–Projection Scaling method–Dual affine algorithm–Primal affine algorithm - Barrier algorithm.

**MODULE V      DYNAMIC PROGRAMMING      9**

Formulation of Multi stage decision problem–Characteristics–Concept of sub-optimization and the principle of optimality–Formulation of Dynamic programming–Backward and Forward recursion–Computational procedure–Conversion of final value problem into Initial value problem.

**TEXT BOOKS:**

1. Hillier and Lieberman “Introduction to Operations Research”, TMH, 2000.
2. R.Panneerselvam, “Operations Research”, PHI, 2006

3. Hamdy ATaha, "Operations Research –An Introduction", Prentice Hall India, 2003.

### REFERENCES:

2. Ronald L.Rardin, "Optimization in Operation Research" Pearson Education Pvt. Ltd. New Delhi, 2005.

### COURSE OUTCOMES:

At the end of the course, the student will

- CO1** be proficient in formulating and solving linear programming problems by employing graphical techniques and the simplex algorithm.
- CO2** solve intricate optimization problems through techniques like dual simplex method, sensitivity analysis, and solving transportation and assignment problems.
- CO3** solve non-linear programming problems using methods such as Lagrange multiplier, Karush-Kuhn-Tucker conditions, and various optimization algorithms.
- CO4** apply interior point methods, including Karmarkar's algorithm and Barrier algorithm, to solve optimization problems.
- CO5** acquire the ability to model and solve multi-stage decision problems using dynamic programming principles, including sub-optimization and backward/forward recursion.

### Board of Studies (BoS) :

19<sup>th</sup>BoS conducted on  
29.08.2023

### Academic Council:

21<sup>st</sup> Academic Council held on  
20.12.2023

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2
<b>CO1</b>	L	L	L	M	L	M	L	L	L	L	L	M	L	H

**SDG 4:Quality education**

Statement: Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all.

The syllabus contributes to providing quality education by teaching optimization techniques and problem-solving methods.

**SDG 9 : Industry, innovation and infrastructure**

Statement:Build resilient infrastructure, promote inclusive and sustainable industrialization, and foster innovation.

The syllabus covers advanced methods in optimization, which can contribute to innovative solutions in various industries and infrastructure development.

**SDG 11: Sustainable Cities and Communities**

Statement: Make cities and human settlements inclusive, safe, resilient, and sustainable.

Optimization techniques taught in the syllabus can be applied to urban planning and resource allocation, supporting the development of sustainable cities.

<b>GEDX 221</b>	<b>POLYMERS FOR DIFFERENT</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 8</b>	<b>TRANSPORTATION</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:**To introduce the changing structure of automotive industries towards usage of plastics, rubbers, composites, sealants and adhesives.

**COB2:**To impart knowledge of polymers used in interior applications.

**COB3:**To develop knowledge of polymers used in exterior applications.

**COB4:**To provide knowledge of composite materials for automotive applications.

**COB5:**To illustrate the usage of automobile rubber components.

**MODULE I      INCLINATION OF AUTOMOTIVE COMPONENTS      9**  
**TOWARDS POLYMERS**

Quest for a lightweight vehicle - Need for plastics – advantages and limitations of plastics – designing with plastics –the decisive properties – materials selection – requirements for different application areas – light weight nanocomposites – uses of adhesives in automobile and aerospace – phenolics, epoxies, acrylics, anaerobics, cyanoacrylates.

**MODULE II      POLYMERS FOR AUTOMOBILE INTERIORS      9**

Interiors – dominance of plastic – fashion and function – plastics surfaces: texture and fogging – emissions and interior air quality - plastic structure and panel application: sandwich concept, instrumental panel, other sensitive panels – structural and mechanical components: seating, door and window furniture, steering wheel, airbags, seat belts, pedals, instrumental and others.

**MODULE III      POLYMERS FOR AUTOMOBILE EXTERIORS      9**

Exteriors: Body panels and structure – Painting problems – Bumpers – Other exteriors: Grills, Spoilers, Mirrors, Door handles, Wheel trim, Road wheels, Sunroof components, Windscreen wiper assemblies.

**MODULE IV      COMPOSITE MATERIALS FOR ELECTRIC      9**  
**VEHICLES**

Low-cost carbon fibers – lightweight automotive materials - Barriers to Carbon Fibre Adoption in the Automotive Industry - Low-Cost Carbon Fibre - Precursor Materials - PAN-Based - Lignin-Based - Polyolefin-Based - Advanced Processing Techniques - Advanced Surface Treatment and Sizing - Application of Composite Materials in the Automotive Industry -

Composite Driveshaft and Spring - Recent Developments in Automotive thermoplastic composites

### **MODULE V RUBBER COMPONENTS IN AUTOMOBILES 9**

Rubber mounts – Spring design – Comparison with metallic springs –Seals for static and dynamic applications –tyres and tubes – timing belt – rubber – metal bonding

**L – 45 ; TOTAL HOURS –45**

#### **TEXTBOOKS:**

1. James Maxwell, “Plastics in the Automotive Industry”, SAE international, woodhead Publication, England, 1994.
2. Omar Faruk, Jimi Tjong, Mohini Sain, “Lightweight and Sustainable Materials for Automotive Applications”, CRC Press, 2017.
3. Ahmed Elmarakbi, “Advanced Composite Materials for Automotive Applications”, Wiley, 2014.

#### **REFERENCES:**

1. Kalyan Sehanobish, “Engineering Plastics and Plastic composites in Automotive Applications”, SAE international, Warrendale, 2009.
2. Automotive Plastics and Composites, Reinforced Plastic Magazine, Elsevier Advanced Technology, 1999.

#### **COURSE OUTCOMES:**

At the end of the course, the students will be able to

**CO1:** demonstrate the the changing structure of automotive industries towards usage of plastics

**CO2:** explain the plastics used in automotive interior applications

**CO3:** appreciate the plastics usage in automotive exterior applications

**CO4:** suggest composite materials for automotive parts

**CO5:** appreciate the usage of rubbers for various automotive applications

#### **Board of Studies (BoS):**

BoS of PE held on 07.02.2023

#### **Academic Council:**

20<sup>th</sup> Academic Council held on 13.04.2023

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2	PSO 3	PSO 4

SDG 8: Work opportunities for automobile and mechanical engineers in polymer and automotive part manufacturing industries

Effective learning of this course will lead the other department students to appreciate the usage of polymer materials in automobile applications which in turn leads to work opportunities

<b>GEDX 222</b>	<b>PROGRAMMING LANGUAGE</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 8</b>	<b>PRINCIPLES</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To learn syntax and semantics of programming languages

**COB2:** To comprehend data, data types, and basic statements

**COB3:** To explore call-return architecture and ways of implementing them

**COB4:** To gain knowledge about object-orientation, concurrency and even handling in programming languages

**COB5:** To write programs in non-procedural programming paradigms

**MODULE I SYNTAX AND SEMANTICS 09**

Evolution of programming languages – describing syntax – context-free grammars– attribute grammars – describing semantics – lexical analysis – parsing – recursive-decent – bottom-up parsing.

**MODULE II DATA, DATA TYPES AND BASIC STATEMENTS 09**

Names – variables – binding – type checking – scope – scope rules – lifetime and garbage collection – primitive data types – strings – array types– record types –union types – pointers and references – Arithmetic expressions – overloaded operators –type conversions – relational and Boolean expressions – assignment statements – control structures – selection – iterations – branching – guarded statements.

**MODULE III SUBPROGRAMS AND IMPLEMENTATIONS 09**

Subprograms – design issues – local referencing – parameter passing – overloaded methods – generic methods – design issues for functions – semantics of call and return–implementing simple subprograms – stack and dynamic local variables – nested subprograms – blocks – dynamic scoping.

**MODULE IV OBJECT-ORIENTATION, CONCURRENCY, AND EVENT ANDLING 09**

Object-orientation – design issues for OOP languages – implementation of object-oriented constructs – concurrency – semaphores – monitors – message passing – threads –statement level concurrency – exception handling – even handling.

**MODULE V FUNCTIONAL AND LOGIC PROGRAMMING LANGUAGES 09**

Introduction to lambda calculus – fundamentals of functional programming

languages –Programming with Scheme – Programming with ML – Introduction to logic and logic programming – Programming with Prolog – multi-paradigm languages.

**L – 45; TOTAL HOURS –45**

**TEXT BOOKS:**

1. Robert W. Sebesta, “Concepts of Programming Languages”, Tenth Edition, Addison Wesley, ISBN:9789332518872, 9332518874, 2014.
2. Michael L. Scott, “Programming Language Pragmatics”, Third Edition, Morgan Kaufmann,ISBN:9780124104778, 0124104770, 2015.

**REFERENCES:**

2. Jeffrey D. Ullman, “Elements of ML programming”, Second Edition, Prentice Hall, ISBN:9780137903870, 0137903871, 1998.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:**Identify syntax and semantics of programming languages

**CO2:**Define data, data types, and basic statements of programming languages

**CO3:** Design and implement subprogram constructs

**CO4:**Apply object-oriented, concurrency, and event handling programming constructs

**CO5:** Develop programs in Scheme, ML, and Prolog

**Board of Studies (BoS) :**

19th BoS of CSE held on  
28.12.2021

**Academic Council:**

18th Academic Council Meeting  
held on 24.02.2022

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PS01	PS02
CO1				H										
CO2	H

**Note:** L- Low Correlation    M -Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

Statement::By learning the Programming Language Principles, the student will be able to create robust real time applications.

<b>GEDX 224</b>	<b>PYTHON PROGRAMMING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG - 8</b>		<b>2</b>	<b>0</b>	<b>2</b>	<b>3</b>

**COURSE OBJECTIVES:**

The students will

COB1: understand basics of Python programming.

COB2: gain the knowledge in control structures, loops, functions and modules.

COB3: represent the data using lists, tuples and dictionaries.

COB4: acquire knowledge about the fundamental principles of Object-Oriented Programming.

COB5: discover the use of file and exception handling techniques

**MODULE I INTRODUCTION TO PYTHON 10+10**

Basic introduction to Python-Python Interpreter- variables and simple data types-strings-string formatting-Numbers-comments-Operators- Operator Precedence-Control flow-Conditional statements-Nested conditionals-Loops-Loop control statements.

**MODULE II DATA COLLECTION AND FUNCTIONS 10+10**

Data collection- Processing data with List, Tuples, Dictionaries -Function Definitions –Function Call and Returning Values – Parameter Passing – Local and Global Scope – Recursive Functions –Passing a List- Storing your functions in module.

**MODULE III CLASSES, FILE HANDLING AND EXCEPTION HANDLING 10+10**

Classes and objects – Inheritance - Multiple level of Inheritance– Encapsulation and Information Hiding- Python Standard Libraries–Packages-File handling- File Open-Read, Write, Delete-Exceptions - Exception handling

**L – 30; P – 30 ;TOTAL HOURS - 60**

**LIST OF EXPERIMENTS**

Students should develop and practice simple Python programs using the following concepts.

1. Data Types and variables
2. String formatting
3. Operators
4. Conditional branching

5. Loops
6. Collection and processing with Lists
7. Collection and processing with Tuples
8. Collection and processing with Dictionaries
9. Functions
10. Recursion
11. Modules
12. Classes & Objects
13. Inheritance
14. File handling
15. Exception handling
16. Mini Python project such as
  - Simple Quiz using python
  - Random Number guessing Game
  - Rock paper scissor
  - Countdown timer

**TEXT BOOK:**

1. Eric Matthes," Python Crash Course: A Hands-On, Project-Based Introduction to Programming" ,3<sup>rd</sup>edition, No starch Press, 2023.

**REFERENCES:**

1. Allen B. Downey, Think Python: How to Think Like a Computer Scientist', 2nd edition, Updated for Python 3, Shroff /O'Reilly Publishers, 2016 (<http://greenteapress.com/wp/thinkpython/>)

3. Paul J. Deitel and Harvey Deitel, Python for Programmers, First edition, Pearson Education, ISBN-10 : 9353947987, 2020.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

CO1: Write simple Python programs using data types, variables, operators and string.

CO2 : Interpret the use of conditional statements, loops and function calls to navigate program control flow effectively.

CO3: Implement data structures in Python.

CO4: Apply fundamental OOP principles for creation of Python programs through effective class creation, object utilization, and inheritance.

CO5: Discover the functionality of the file system in Python and handle exceptions effectively.

**Board of Studies (BoS) :**16<sup>th</sup> BoS of IT held on 18.08.2022**Academic Council:**19<sup>th</sup> AC held on 29.09.2022

CO5	1	1			3								2	

Note 1- Low Correlation    2- Medium Correlation    3-High Correlation

**SDG 8** : Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all.

Students can be equipped with valuable Python programming skills crucial for successful employment. Also students will be empowered to make significant contributions across various sectors.

<b>GEDX 226</b>	<b>SMART SENSORS IN HEALTHCARE</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4,9</b>	<b>APPLICATIONS</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To understand the basics of biosensors and its instrumentation

**COB2:** Provide knowledge on the various enzyme sensors in healthcare applications

**COB3:** To provide information to the students on application of bio sensors.

**MODULE I INTRODUCTION TO BIO SENSORS 8**

Introduction to Bio sensors, Classification of Biosensors- Based on Type of Transduction, Based on Biological Element, Instrumentation, Future Directions in Biosensors (Micro and Nano Technologies), Designing a Simple Biosensor

**MODULE II ENZYME SENSORS 10**

Enzyme Sensors: Principles of Operation, Theoretical Aspects, Transient response, Stability, Sensor Calibration. Potentiometric Enzyme Electrodes: Potentiometric Glucose Electrodes, Potentiometric Amino Acid Electrodes, Comparison of Potentiometric Enzyme Electrodes.

**MODULE III SEMICONDUCTOR ENZYME SENSORS 10**

Semiconductor Enzyme Sensor: MOSFET Sensors, ISFET Sensors, ENFET Sensors

**MODULE IV OPTICAL AND THERMAL SENSORS 7**

Optical Enzyme Sensors: Principles of Operation, Optical Sensors Based on Absorption- based on Fluorescence- Bio/Chemi-luminescence, Optical Fibers, Thermal Enzyme Sensors: Determination of Glucose, Determination of Urea, Piezoelectric Enzyme Sensors.

**MODULE V SMART SENSOR APPLICATIONS 10**

Electronic Tongue- Applications and Challenges, Electronic Nose- Applications and Challenges. Biosensors for Neurological Disease.

**L – 45; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. Hamida Hallil, Hadi Heidari, Smart Sensors for Environmental and Medical Applications, ISBN: 978-1-119-58734-7 May 2020 Wiley-IEEE Press

SDG 4,9: Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all and help in developing technological capabilities

Students will be able to apply the recent advancements in technology in the field of biomedical applications

<b>GEDX 227</b>	<b>TOTAL QUALITY MANAGEMENT</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To learn the basics of TQM.

**COB2:** To acquire knowledge on the principles of TQM

**COB3:** To familiarize with the various TQM tools and techniques

**COB4:** To gain knowledge about Lean six sigma

**COB5:** To be conversant with Quality management system.

**MODULE I INTRODUCTION L:9**

Definition of quality- Evolution of quality- TQM framework- Basic concepts of TQM- Dimensions of manufacturing and service quality- Principles of TQM- Contributions of Deming, Juran and Crosby- Barriers to TQM Implementation.

**MODULE II TQM PRINCIPLES L:8**

Customer focus – Customer satisfaction - Customer retention – Costs of quality - Leadership – Strategic quality planning - Quality Councils - Quality circles - Recognition and Reward - Performance appraisal – Supplier partnership – Partnering -Supplier selection - Supplier Rating.

**MODULE III TQM TOOLS AND TECHNIQUES L:9**

The seven traditional tools of quality– New management tools – Benchmarking - Continuous process improvement: PDCA cycle, 5S, Kaizen, Benchmarking Process, Quality Function Deployment (QFD) - Process – Benefits- Taguchi Quality Loss Function - Total Productive Maintenance (TPM) – Concept- Improvement Needs- FMEA – Stages of FMEA.

**MODULE IV LEAN SIX SIGMA L:11**

Concept of Six Sigma - Definition - Identifying project of importance from service and manufacturing sector- Developing project charter - Measure - Finalizing critical to quality (CTQ) characteristics – MSA - Analyse - Identification and confirmation of potential critical factors - Improve - Generation and evaluation of solutions to critical root causes - selection and optimization of best solution - Pilot implementation and validation of solution- Control - control plan.

**MODULE V QUALITY MANAGEMENT SYSTEMS****L:8**

Need for ISO 9000 and Other Quality Systems - ISO 9000:2000 Quality System– Elements - Implementation of Quality System – Documentation -Quality Auditing - TS 16949. ISO 14000 – Concept, Requirements and Benefits - ISO 22301:2019- Business continuity management systems.

**L – 45; TOTAL HOURS – 45****TEXTBOOKS:**

1. Total Quality Management(TQM) 5<sup>th</sup> Ed by Pearson Education– October 2018. By Besterfield Dale H. & Besterfield Carol.
2. Total Quality Control 4<sup>th</sup> edition Subsequent Edition 2004 - Armand V. Feigenbaum.

**REFERENCES:**

4. “Total Quality Management (TQM): Principles, Methods, and Applications”, Ashish Agarwal, Dixit Garg, Sachin K. Mangla, Sunil Luthra, 2020.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1.** Explain fundamentals of Total Quality Management

**CO2:** Describe the principles of TQM.

**CO3:** Select the proper TQM tools for continuous quality improvement process

**CO4:** Illustrate the lean six sigma concepts

**CO5:** Explain the Quality management system.

**Board of Studies (BoS):**

20<sup>th</sup> BOS of mechanical dept  
held on 08.08.2022

**Academic Council:**

19<sup>th</sup> Academic Council held on

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The comprehensive understanding of TQM principles and tools promote quality in process and products.

<b>GEDX 229</b>	<b>WASTEWATER MANAGEMENT</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 6</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To impart knowledge on the generation , type and characteristics of domestic wastewater

**COB2:** To give an insight on the principle of domestic wastewater treatment

**COB3:** To familiarize the characteristics of industrial wastewater and its treatment methods

**COB4:** To provide exposure about the cycle of sanitation and stages of septage management

**COB5:** To impart knowledge on the advanced techniques in sewage treatment

**MODULE I WASTEWATER GENERATION 9**

Wastewater generation - Types of domestic wastewater - Types of sewerage system - Storm water management - Flow estimation - Sewage characteristics –Impact of untreated effluents on land and water - Pollution Control Rules and Environmental legislation.

**MODULE II DOMESTIC WASTEWATER TREATMENT 9**

Onsite and offsite challenges in wastewater treatment – Stages of wastewater treatment – Principles and Functions of treatment process - Working of Septic tanks - Onsite grey water treatment - wetland treatment - Capturing nutrients - Stages in Sludge management

**MODULE III INDUSTRIAL WASTEWATER TREATMENT 9**

Sources and characteristics of industrial wastewater - Effects of Industrial wastes on sewerage system - Sewage treatment plants and receiving water bodies -Standards related to industrial wastewater - Pre-treatment - Waste volume reduction, waste strength reduction, neutralization, equalization and proportioning, Removal of Organic and inorganic dissolved solids

**MODULE IV SEPTAGE TREATMENT 9**

Full cycle of sanitation - Sustainable practices in capture and containment - Septage treatment using Drying beds, Planted drying bed, Anaerobic digestion - Disposal and resource recovery - Challenges in operation and maintenance of receiving and treatment

facilities

## **MODULE V ADVANCED TREATMENT METHODS AND REUSE 9**

Advances in sewage treatment – Microalgae based wastewater treatment technologies – Advances in membrane technology - Thermal hydrolysis technology for sludge treatment – Biogas generation - Wastewater Reuse and Recycle - Regulations Standards - Types of Reuse – Agriculture - Groundwater Recharge.

**L – 45; TOTAL HOURS – 45**

### **TEXT BOOKS:**

SDG No.6 :Ensure availability and sustainable management of water and sanitation for all

The knowledge on the Domestic and industrial wastewater management along with the sanitation would cater the development of infrastructure aiming to reduce pollution and safeguard the environment.

<b>GEDX 231</b>	<b>ELECTRONICS FOR MECHANICAL</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG 4 ,9</b>	<b>SYSTEMS</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSEOBJECTIVES:**

- COB 1** : To study the characteristics of semiconductor devices such as diodes, transistors and their applications.
- COB 2** : To study fundamentals of digital logic circuits.
- COB 3** : To study 8085 microprocessors and its interfacing with other peripheral devices.
- COB 4** : Classify sensors based on their operating principles.
- COB 5** : Recognize the significance of electronic sensors in modern technology.

**PREREQUISITE:**

**MODULE I SEMICONDUCTORS AND RECTIFIERS 9**

Classification of solids based on energy band theory-Intrinsic semiconductors Extrinsic semiconductors-P type and N type-PN junction and its application – HWR-FWR-BR-Zener diode. Bipolar junction transistor- Field effect transistor: Configuration and characteristic-SCR, DIAC, TRIAC, UJT.

**MODULE II DIGITAL ELECTRONICS 9**

Number systems- Binary Arithmetic Operations-Boolean Algebra-Logic gates Karnaugh map: SOP, POS.

**MODULE III COMBINATIONAL AND SEQUENTIAL CIRCUITS 9**

Combinational Circuits: Half and full adders- Magnitude Comparator- Multiplexer/ Demultiplexer- encoder / decoder Sequential circuits: Flip Flops: SR, JK, D and T FF- Truth tables and circuits-Shift Registers-Ripple Counters.

**MODULE IV 8085 MICROPROCESSOR AND APPLICATIONS 8 OF MICROPROCESSOR**

Architecture of 8085-Pin configuration - Instruction set-Addressing modes- Simple programs using arithmetic and logical operations. Applications – printed boards Arduino / Raspberry Pi.

**MODULE V SENSORS FOR ENGINEERING 10**

## APPLICATIONS

Overview of electronic sensors and their applications - Classification of sensors- Sensing principles- Sensor characteristics- Interfacing analog and digital sensors with Arduino / Raspberry Pi board- applications.

**L- 45;TOTAL HOURS- 45**

### TEXT BOOKS:

### COURSE OUTCOMES:

Students who complete this course will be able to

- CO1 : Working principles and characteristics of various semiconductor devices.
- CO2 : Different digital logic circuits: Combinational and sequential circuits. Architecture of 8085, its features and programming for specific application
- CO3 : Architecture of 8085, its features and programming for specific application
- CO4 : Evaluate and compare sensor selection .in engineering applications
- CO5 : Identify various applications where electronic sensors are used.

### Board of Studies (BoS):

25th BOS of ECE held on  
20.09.2023

### Academic Council:

21st Academic Council  
held on 20.12.2023

	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO 3

CO5	H	H	M	L	L	-	-	L	M	H	H	L	H	L	H

**Note:** L - Low Correlation M-Medium Correlation H-High Correlation

SDG 4: Quality Education

Statement: A fundamental concept of electronics properties and its characteristic provides a global impact on quality education.

SDG 9: Industry, Innovation and Infrastructure

Statement: This course plays a major role in electronic sensing and analyzing for IoT technology which modernize industry operations.

**OPEN ELECTIVE COURSES – VII SEMESER**

<b>GEDX 101</b>	<b>ADVANCED ENTREPRENEURSHIP</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 8</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** Realize the skills required to be an entrepreneur

**COB2:** Acquaint the students with challenges of starting new ventures

**COB3:** Enable them to investigate, comprehend and internalize the process of setting up a business by identifying the business opportunity

**COB4:** Identify the right sources of fund for starting a new business

**COB5:** Locate a business which contributes to the society at large

**MODULE I INTRODUCTION TO ENTREPRENEURSHIP 10**

Entrepreneurship: knowledge and skills requirement - characteristic of successful entrepreneurs - entrepreneurship process, factors impacting emergence of entrepreneurship - managerial vs. Entrepreneurial approach - National Policy on Skill Development and Entrepreneurship 2015 - Digital India and Make in India flagship programme of Government of India.

**MODULE II STARTING THE VENTURE 10**

Generating business idea – sources of new ideas, methods of generating ideas - creative problem solving, opportunity recognition - environmental scanning – competitor and industry analysis - Forms of ownership - procedure for registration in small industry - Overview of Government of India start up India Scheme – Journey of Sachin Bansal : From Flipkart to Navi's IPO

**MODULE III FUNDAMENTALS OF MANAGEMENT 10**

Overview of Marketing - Human resources, finance and Operation requirement for new venture - sources of funds – overview of venture capital and angel investment. Overview of project management. The role and Functions of Business Incubators and Accelerators in entrepreneurship Development – The secret sause of Nykaa : Story of FalguniNayar

**MODULE IV BUSINESS PLAN REPORT PREPARATION 7**

Understanding the value of a business plan - Developing an investor presentation - Preliminary Project Report - students' business plan presentation

**MODULE V IMPACT OF SOCIAL ENTREPRENEURSHIP ON SOCIETY 8**

Social Entrepreneurship: Definition, Types, and Issues, Static Impact of social Entrepreneurship, Impact of For- Profit companies Vs social entrepreneurship - case studies on social entrepreneurs.

**L – 45; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. Hisrich, Robert D., Michael Peters and Dean Shepherded, Entrepreneurship, Tata McGraw Hill,2014.
2. Rashmibansal, Arise awake: the inspiring stories of young entrepreneur who graduated from college into A Business of their own, westland books private Ltd,2015.

**REFERENCES:**

1. Barringer, Brace R., and R., Duane Ireland, Entrepreneurship, Pearson Prentice Hall, New Jersey (USA), 2012.
2. Kishore Biyani&DipayanaBaishya, It happened in India: The story of pantaloons, Big Bazaar, Central and the great Indian consumer, Rupa& co, 2011
3. Donald F Kuratko, T.V Rao. Entrepreneurship: A South Asian perspective. Cengage Learning. 2012
4. Rashmi Bansal: Take me Home: The Inspiring story of 20 Entrepreneurs from small town India with Big Time Dream, Westland, 2014
5. Moloy K. Bannerjee, SiddharthBannerjee, P. RanganathSastry Start-up City: Ten Tales of Exceptional Entrepreneurship from Bangalore's Software Miracle, Collins Business, 2014
6. The Portfolio Book of Great Indian Business Stories: Riveting Tales of Business Leaders and Their Times, portfolio, 2015

**COURSE OUTCOMES:**

**CO1:** Turn out to be an expert to recognize a business opportunity that fits the individual

**CO2:** Demonstrate the ability to provide a self-analysis in the context of an entrepreneurial career

**CO3:** Construct an appropriate business model

**CO4:** Develop a well-presented business plan

**CO5:** Start socially relevant new ventures

**Board of Studies (BoS) :**

15<sup>th</sup>BoS of CSB held on  
15.09.2023

**Academic Council:**

21st Academic Council held on  
20.12.2023

<b>GEDX 102</b>	<b>ARTIFICIAL INTELLIGENCE AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 8</b>	<b>MACHINE LEARNING APPLICATIONS</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:**To learn the problem solving methods and learning design of intelligent systems.

**COB2:** To comprehend the concepts of machine learning

**COB3:** To explore supervised and unsupervised learning and their applications

**COB4:** To build systems that learns and adapts using real-world applications.

**COB5:**To implement learning algorithms that can be applied to real-world.

**MODULE I INTRODUCTION TO ARTIFICIAL INTELLIGENCE 06**

Computerized reasoning - Artificial Intelligence (AI) - characteristics of an AI problem - Problem representation in AI - State space representation - problem reduction-Concept of small talk programming

**MODULE II SEARCH PROCESS 10**

AI and search process - Brute force search techniques, Depth first, Breadth first search techniques, Hill climbing, Best first search, AND/OR graphs, A\* algorithm - Constraint satisfaction - Knowledge Representation: Logic - Rules of inference - Resolution - Unification algorithm - Production rules - Semantic networks - Frames – Scripts - Conceptual dependency

**MODULE III SUPERVISED LEARNING 10**

Basic concepts and types of Machine Learning - Supervised Learning: Linear Models for Classification: Discriminant Functions - Probabilistic Generative Models - Probabilistic Discriminative Models - Bayesian Logistic Regression. Neural Networks: Feed forward Network Functions - Error Backpropagation – Regularization in Neural Networks - Mixture Density Networks - Bayesian Neural Networks - Kernel Methods - Ensemble learning: Boosting - Bagging.

**MODULE IV UNSUPERVISED LEARNING 10**

Clustering - K-means - Mixtures of Gaussians - The EM Algorithm in General – Model Selection for Latent Variable Models - High-Dimensional Spaces. Dimensionality Reduction: Factor analysis - Principal Component Analysis - Probabilistic PCA - Independent components analysis.

**MODULE V APPLICATION****09**

Linear Models for Regression - Linear Basis Function Models - The Bias-Variance Decomposition - Bayesian Linear Regression - Bayesian Model Comparison – Applications: Radar for target detection, Deep Learning Automated ECG Noise Detection and Classification, ML in Network for routing, traffic prediction and classification, ML in Cognitive Radio Network (CRN).

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:**Use appropriate search algorithms for any AI problem

**CO2:**Represent a problem using first order and predicate logic

**CO3:** Identify the apt agent strategy to solve a given problem

**CO4:**Design software agents to solve a problem

**CO5:** Implement applications for NLP that use Artificial Intelligence

**Board of Studies (BoS) :**

19th BoS of CSE held on  
28.12.2021

**Academic Council:**

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation

Statement: The implementation of technologies such as deep learning in the industry contributes to improving productivity, manufacturing efficiency and allows faster, more flexible and more efficient processes.

<b>GEDX 103</b>	<b>AUTOMOTIVE</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>TECHNOLOGY</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To understand the engineering principles that underpins the technology of an automotive vehicle.

**COB2:** Recognize the future direction of the sensors used within the automotive vehicle.

**COB3:** To gather knowledge about the role and use of advanced systems in automobile.

**COB4:** To learn in a vehicle accident reconstruction and deformation behavior of a vehicle.

**COB5:** To gain knowledge of the vehicle case study and in E-Mobility business.

**MODULE I                    VEHICLE TECHNOLOGY                    9**

Introduction - Electric and Hybrid Vehicle technology- LEV, TLEV, ULV & ZEV, Basic components of Electric vehicles, types - series and parallel hybrid, layouts, comparison, Power systems and control systems, Different modes of operation for best usage. Electric/hybrid vehicle features and system requirements, Battery Electric vehicle (BEV), Hybrid electric vehicle (HEV), Plug-in hybrid vehicle (PHEV), Fuel cell electric vehicle (FCEV), Comparison of Electric vehicles with different energy sources

**MODULE II                    SENSOR TECHNOLOGY                    9**

Connectivity Fundamentals- Navigation and Other Applications, Vehicle-to-Vehicle Technology and Applications, Vehicle-to-Roadside and Vehicle-to-Infrastructure Applications, Wireless Security Overview. Basics of Radar Technology and Systems -Ultrasonic Sonar Systems - LIDAR Sensor Technology and Systems -Camera Technology-Night Vision Technology, Use of Sensor Data Fusion, Integration of Sensor Data to On-Board Control Systems.

**MODULE III                    ADVANCED SYSTEMS                    9**

ADAS- Introduction to ADAS- Concept of Advanced Driver Assistance Electronic Systems, NHTSA-consideration, next generation of mobile-connected devices accuracy. Modern electronic and micro control systems in automobiles: Electronically controlled concealed headlight systems, Electro chromic mirrors, automatic review mirrors, Day time running lamps (DRL), Head up display, Travel information systems, On

board navigation system, Electronic climate control, Electronic cruise control, Antilock braking system, Electronically controlled sunroof, Anti-theft systems, Automatic door locks (ADL).

#### **MODULE IV          VEHICLE                  RECONSTRUCTION          9** **TECHNIQUES**

Safety and accident reconstruction- crash test techniques, offset frontal collision test and lateral collision test, Bharat NCAP, Euro NCAP, US NCAP, NCAP rating, vehicle crash Reconstruction - Principles and Technology- Reconstruction and Analysis of Motorcycle and passenger car Crashes- Reconstruction and Analysis of Rollover Crashes of Light Vehicles.

#### **MODULE V          E-MOBILITY    9**

E-mobility business, electrification challenges, Connected Mobility and Autonomous Mobility- case study E-mobility Indian Roadmap Perspective. Policy: EVs in infrastructure system, integration of EVs in smart grid, social dimensions of EVs, case studies- Emerging Technologies for Electric Vehicle Drives, Case Studies of Two Wheeler, Three-Wheeler, and Four-Wheeler Electric Vehicles.

**L-45; TOTAL HOURS – 45**

#### **TEXT BOOKS:**

1. John Wiley, Advanced Driver Assistance Systems (ADAS) Professional Engineering Publishing, 2020.
2. Robert Bosch GmbH Safety, Comfort and Convenience Systems, 2016.
3. Donald J Van Kirk, Vehicular Accident Investigation and Reconstruction 1st Edition, 2021.

#### **REFERENCES:**

2. SAE, Electric and Hybrid Electric Vehicles and Fuel Cell Technology, 2020.

#### **COURSE OUTCOMES:**

On completion of the course the students should be able to

**CO1:** Describe the characteristics and importance of energy sources in automotive design technology.

**CO2:** Identify relevant automotive sensor technology for the specified vehicles.

**CO3:** Design a vehicle advanced system based on automotive design standards.

**CO4:** Analyze the various crash techniques and reconstruction systems in an automobile.

**CO5:** Analyze vehicle E-mobility challenges and techniques for futuristic requirements.

**Board of Studies (BoS) :**

14<sup>th</sup> Board of Studies held  
on 22.08.2022

**Academic Council:**

19<sup>th</sup> Academic Council held on  
29.09. 2022

**Note: L- Low Correlation    M -Medium Correlation    H -High Correlation**

SDG 9: The subject will cover the fundamental understanding of how automobile technology has evolved.

Statement: Effective comprehension of cutting-edge systems, vehicle reconstruction, and e-mobility issues.

<b>GEDX 105</b>	<b>BUILDING REPAIR SOLUTIONS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 11</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

The objective of the course is to impart adequate knowledge on

**COB1:** materials commonly used in building construction including type of buildings

**COB2:** cement mortar and cement concrete manufacturing methods including quality control aspects

**COB3:** physical and chemical deterioration mechanisms acting on buildings in the real time conditions

**COB4:** materials used for building repair works

**COB5:** techniques for rehabilitating common distress in buildings

**MODULE I MATERIALS FOR CONSTRUCTION AND TYPES OF BUILDINGS 9**

Introduction – types of cement, sand and stone chips (coarse aggregate) – basic properties – water for construction – types of steel reinforcement rods & its basic properties – bricks – formation of wall with bricks and solid blocks – types of buildings – classification.

**MODULE II MANUFACTURE OF CEMENT MORTAR AND CEMENT CONCRETE 9**

Cement mortar – ingredients - mix ratio – manufacturing – application areas, cement concrete – ingredients – design of concrete mix – manufacturing methods – applications areas - quality control procedures, cement mortar and concrete – microstructure – influencing parameters.

**MODULE III MAJOR CAUSES FOR BUILDING DISTRESS 9**

Durable buildings - definition and significance in the current context, causes for building repairs - physical mechanisms - shrinkage, creep, thermal incompatibility, frost action, erosion, abrasion and fire exposure, chemical mechanisms - carbonation, chloride attack, sulphate attack, acid attack - mechanism of corrosion of steel reinforcement rods in concrete.

**MODULE IV BUILDING REPAIR MATERIALS 9**

Repair materials - factors influencing selection of repair materials – various stages of concrete repair - importance of surface preparation - bond coat - rust convertors - rust removers - protective coating to steel rebars -

superplasticizers - corrosion inhibitor admixed concrete - micro concrete - polymer modified mortar / concrete - crack sealing compounds - concrete coatings.

## **MODULE V BUILDING REPAIR TECHNIQUES 9**

Overview of repair techniques - techniques for arresting cracks – grouting – guniting and shotcrete – concrete / steel jacketing technique, procedure for arresting leakage and dampness in terrace, washroom and wall areas – case study.

**L – 45 ; TOTAL HOURS – 45**

### **TEXT BOOKS:**

1. Duggal, S. K., "Building Materials", 4<sup>th</sup> Edition, New Age International, 2012
2. Gambhir, M.L., "Concrete Technology", 5<sup>th</sup> Edition, Tata McGraw Hill Education, 2013

### **REFERENCES:**

7. Gahlot, P. S. and Sanjay Sharma, Building repair and maintenance management, CBS Publishers and Distributors, 2019.

### **COURSE OUTCOMES:**

At the end of the course, students will be able to

**CO1:** understand the various materials used for building construction, its properties and significance.

**CO2:** understand and visualize the manufacture of cement mortar and concrete used in building construction, and relevant quality control aspects.

**CO3:** recognize the physical and chemical deteriorating mechanisms detrimental to the buildings.

**CO4:** suggest materials for different repair works in a building.

**CO5:** identify the suitable repair techniques for rehabilitation of common distress buildings.

**Board of Studies (BoS):**

SDG 11 : Make cities and human settlements inclusive, safe, resilient and sustainable

<b>GEDX 110</b>	<b>DEEP LEARNING ESSENTIALS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 8</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:**To learn the machine learning basics

**COB2:**To estimate the deep learning networks

**COB3:**To describe the deep networks.

**COB4:**To expose the students to sequence modeling

**COB5:**To summarize the practical methodology and applications of deep learning.

**MODULE I                    MACHINE LEARNING BASICS FOR DEEP    09**  
**LEARNING**

Learning Algorithms - Capacity, Overfitting and Underfitting -Hyper parameters and Validation Sets - Estimators, Bias and Variance - Maximum Likelihood Estimation - Bayesian Statistics - Stochastic Gradient Descent - Building a Machine Learning Algorithm - Challenges Motivating Deep Learning.

**MODULE II                    DEEP LEARNING NETWORKS                    09**

Introduction – Historical context of Deep Learning – Classes of Deep Learning Network – Deep Networks for Unsupervised learning – Deep Networks for Supervised learning – Hybrid Deep Networks.

**MODULE III                    DEEP NETWORKS: MODERN PRACTICES        09**

Deep Feedforward Networks - Architecture Design - Back-Propagation and Other Differentiation Algorithms - Regularization for Deep Learning - Regularization and Under- Constrained Problems - Optimization for Training Deep Models - Optimization Strategies and Meta-Algorithms – Convolutional Network.

**MODULE IV                    SEQUENCE MODELING: RECURRENT AND    09**  
**RECURSIVE NETS**

Unfolding Computational Graphs - Recurrent Neural Networks - Deep Recurrent Networks - The Challenge of Long-Term Dependencies - Echo State Networks - The Long Short-Term Memory and Other Gated RNNs - Optimization for Long-Term Dependencies.

**MODULE V PRACTICAL METHODOLOGY AND 09 APPLICATION**

Performance Metrics - Default Baseline Models - Selecting Hyperparameters - Debugging Strategies - Example: Multi-Digit Number Recognition – Applications - Computer Vision, Speech Recognition and Natural Language Processing – Other Applications.

**L – 45; TOTAL HOURS –45**

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation

Statement: The implementation of technologies such as deep learning in the industry contributes to improving productivity, manufacturing efficiency and allows faster, more flexible and more efficient processes.

1. Development of sustainable infrastructure by understanding the physical and chemical deteriorating mechanisms during its life time.
2. Make the human settlements safe and resilient by implementing proactive measures for enhancing durability in new construction, and adopting suitable repair materials and techniques for rehabilitation of existing buildings.

<b>GEDX 111</b>	<b>DRONE TECHNOLOGY</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>2</b>	<b>0</b>	<b>2</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To give basic knowledge about the design and analysis of the controlled flights

**COB2:** To provide knowledge on the assembly of a designed controlled flight.

**MODULE I INTRODUCTION TO UAV/MAV 10**

History of UAV –classification –basic terminology- models and prototypes – applications.

**MODULE II BASICS OF AIRFRAME 10**

Airframe –dynamics –modeling- structures –wing design- engines types- equipment maintenance and management-control surfaces-specifications. Autopilot – AGL pressure sensors-servos –accelerometer – gyros – actuators - power supply processor, integration, installation, configuration, and testing.

**MODULE III COMMUNICATION PAYLOADS AND PATH PLANNING 10**

Payloads-Telemetry-tracking-Aerial photography-controls-PID feedback- radio control frequency range – Waypoints navigation-ground control software-Recent trends in UAV-Case Studies.

**PRACTICALS 30**

1. Introduction to various types of RPV/RC- Controlled flights
2. Introduction to various multi-copter configurations.
3. Wing Analysis using XFLR analysis
4. Weight estimation and components selection for drones.
5. Assembling of drone and inspection of various components.
6. Calibration of ESC and motors.
7. Binding of Receiver and Transmitter.
8. Introduction to various Flight controllers
9. Basic connection of flight controller and its calibration
10. Mission planner Introduction and calibration procedures
11. Machine-in-loop autonomous flight mission planning
12. Simulator training for drone flying
13. Test Flight and Ground flight.

**L- 30; P- 30; TOTAL HOURS: 60**

**TEXT BOOKS:**

5. Robert C. Nelson, Flight Stability and Automatic Control, McGraw-Hill, Inc,

1998.

6. Skafidas, "Microcontroller Systems for a UAV", KTH, TRITA-FYS 2002:51 ISSN 0280-31634, 2002.

SDG 9 : Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation

Statement : Holistic understanding of fluid mechanics in various filed of everyday life

<b>GEDX 112</b>	<b>ELECTRIC VEHICLE</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 8,9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB 1:** To study the concept of electric vehicles (EV)

**COB2:** To get familiarized with electric vehicle energy storage systems

**COB3:** To learn the basics of charging in EV's

**COB4:** To study about electric vehicle modelling

**COB5:** To understand about electric vehicle's ancillary system and its design

**MODULE I INTRODUCTION TO ELECTRIC VEHICLE (EV) 9**

A Brief History -Technology, benefits and challenges in comparison with IC engine –EV's and hybrid electric vehicle (HEV) – costs and emissions – autonomous cars – general and hybrid electric vehicle layout – working principle of an HEV drive train – concept of electric, hybrid electric and plug-in HEV – HEV drive train topologies – plug-in HEV drive train topologies – Case studies on recent EV's.

**MODULE II ENERGY STORAGE SYSTEMS FOR EV 9**

Battery parameters - Types of Battery : Lithium – Nickel – Sodium – Zinc – Lead Acid - Coin cell - Rechargeable – Battery sealing – Ideal model, Linear model, Thevenin model – Battery Cell Voltage Equalization – Onboard power electronics battery management – Equalizer chaining method. Electrical Modeling of Ultra capacitors, Flywheel Energy Storage Systems and Renewable Fuel Cell Power Sources.

**MODULE III EV CHARGING SYSTEMS 10**

Introduction to charging systems – Charging time – cost – Standardization – Methods – Modes of operation – Types of charging plugs – Vehicle to grid technology – wireless power transfer – Case studies.

**MODULE IV ELECTRIC VEHICLE MODELLING AND DESIGN CONSIDERATIONS 10**

Tractive Effort - Modeling Vehicle Acceleration - Modelling Electric Vehicle Range - Aerodynamic Considerations - Transmission Efficiency - Electric Vehicle Chassis and Body Design - General Issues in Design.

**MODULE V DESIGN OF ANCILLARY SYSTEMS****7**

Heating and Cooling Systems - Design of the Controls - Power Steering - Choice of Tyres - Wing Mirrors, Aerials and Luggage Racks - Electric Vehicle Recharging and Refueling Systems.

**L – 45; TOTAL HOURS – 45****TEXT BOOKS:**

1. Tom Denton, "Electric and Hybrid Vehicles" Routledge Publishers, 1<sup>st</sup> edition, March 2020.
2. James Larminie and John Lowry, "Electric Vehicle Technology Explained", John Wiley & Sons Ltd, 2<sup>nd</sup> edition, 2015.
3. M. Ehsani, Y. Gao, Stefano Lango, K.M.Ebrahimi, "Modern Electric, Hybrid Electric, and Fuel Cell Vehicles: Fundamentals, Theory, and Design", CRC Press, 3<sup>rd</sup> Edition, 2018.

2. Iqbal Husain, Electric and Hybrid Vehicles: Design Fundamentals, 2<sup>nd</sup> edition, CRC Press, 2016.

**COURSE OUTCOMES:**

At the end of the course, the student will be able to

**CO1:** realize the importance of electric transportation systems.

**CO2:** model battery system for any EV

**CO3:** design and choose a suitable charging system for EV

**CO4:** develop a model of EV considering design constraints

**CO5:** identify the opportunities and challenges in ancillary system design

**Board of Studies (BoS) :**

19<sup>th</sup>BoS of EEE conducted on  
29.08.2023

**Academic Council:**

21<sup>st</sup> Academic Council held on  
20.12.2023

CO5					H						H			M

#### SDG 8: Decent work and economic growth

Statement: The learners of this course can get descent work and earn financial benefits and they can work in interdisciplinary areas to promote economic growth.

#### SDG No. 9 Industry, innovation and infrastructure

Statement: The development of zero emission electric vehicles will meet out the desired needs such as new innovative systems for industry and establishing advanced infrastructure.

<b>GEDX 113</b>	<b>EMERGING TECHNOLOGIES IN MOBILE</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>NETWORKS</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To list the various technologies involved in mobile networks.

**COB2:** To describe the importance and research aspects of SDN

**COB3:** To apply the D2D, M2M, IoT and Vehicular networks in mobile networks

**COB4:** To differentiate LTE networks and Advanced LTE

**COB5:** To explain the concept of 5G technology in mobile networks

**MODULE I INTRODUCTION TO MOBILE NETWORKS 9**

Mobile Network Architecture, Basics of IP Networks, IPv6 Address, Format and types of Addresses and IPv6 Messages, Stateless Auto configuration, DNS, IPv6 Packet Headers , Base IPv6 Header ,Extension Headers, Migration to IPv6

**MODULE II SOFTWARE-DEFINED NETWORKING 9**

Need of Software Defined Networking, Conventional Routing, Computational Workload of Routers , Decoupling Control and Data Planes ,Architectural , SDN in Research, Programmable Networks , Global Environment for Networking Investigation , OpenFlow Protocol, OpenFlow Network Architecture, OpenFlow Operation.

**MODULE III OPPORTUNISTIC NETWORKING 9**

Opportunity in Networking, Opportunistic Channel Access, Cognitive Radio Networks , Channel Sharing: D2D, M2M and IoT, Mobile Relay, Vehicular Relays, Opportunistic Vehicular Communication, 802.11-Based Vehicular Networks, Challenges in Opportunistic Vehicular Networks .

**MODULE IV LTE NETWORKS 9**

LTE Network Architecture, Protocol Stack, Resource Grid, Frame, LTE Configurations, LTE-Advanced Networks, Coordinated Multipoint (CoMP), Carrier Aggregation.

**MODULE V 5G COMMUNICATION TECHNOLOGY 9**

5G Expectations and Limitations, UE , Device-to-Device , Modes of

Operation, Other D2D Technologies: Wi-Fi Direct, D2D Communication Underlying LTE-A ,Transmit Power Control, Resource Allocation.

**L – 45 ; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. Hasan, Syed Faraz. Emerging trends in communication networks. Springer International Publishing, 2014.
2. Hu, Wen-Chen, ed. Emergent trends in personal, mobile, and handheld computing Technologies. IGI Global, 2012.

**REFERENCES:**

1. Rodriguez, Jonathan. *Fundamentals of 5G mobile networks*. John Wiley & Sons, 2015.
2. Jan, Mian Ahmad, Fazlullah Khan, and Muhammad Alam, eds. Recent trends and advances in wireless and IoT-enabled networks. Berlin/Heidelberg, Germany: Springer, 2019.

**COURSE OUTCOMES:**

students will be able to,

**CO1:** Discuss various technologies of mobile networks

**CO2:** Summarize the necessity of IPv6, cognitive radio, IoT, LTE and 5G in mobile networks

**CO3:** Compare the various trends in mobile networks

**CO4:** Adapt the various network architectures.

**CO5:** Differentiate the networks based on the applications

**Board of Studies (BoS) :**

23<sup>rd</sup> BoS of ECE held on  
13.07.2022

**Academic Council:**

19<sup>th</sup> Academic Council held on  
29.09. 2022

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

**SDG 9:** Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation

Statement: Able to apply the theoretical concepts for the various application of image processing

<b>GEDX 114</b>	<b>FUNDAMENTALS OF DATA SCIENCE AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG:</b>	<b>MACHINE LEARNING</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To understand fundamentals of statistical concepts

**COB2:** To learn unsupervised learning algorithms

**COB3:** To acquire knowledge in regression models

**COB4:** To explain various classification algorithms

**COB5:** To understand deep learning concepts

**MODULE I FUNDAMENTALS OF DATA 9**

Importing – Summarizing - Visualizing Data - Statistical Learning - Monte Carlo Sampling - Monte Carlo Estimation - Monte Carlo for Optimization.

**MODULE II UNSUPERVISED LEARNING 9**

Introduction - Risk and Loss in Unsupervised Learning - Expectation–Maximization (EM) Algorithm - Empirical Distribution and Density Estimation - Clustering via Mixture Models - Mixture Models - EM Algorithm for Mixture Models - Clustering via Vector Quantization - K-Means - Clustering via Continuous Multiextremal Optimization - Hierarchical Clustering - Principal Component Analysis (PCA) - Motivation: Principal Axes of an Ellipsoid - PCA and Singular Value Decomposition.

**MODULE III REGRESSION 9**

Linear Regression - Analysis via Linear Models - Inference for Normal Linear Models - Nonlinear Regression Models - Linear Models in Python - Regularization and Kernel Methods.

**MODULE IV CLASSIFICATION 9**

Introduction - Classification Metrics - Classification via Bayes' Rule - Linear and Quadratic Discriminant Analysis - Logistic Regression and Softmax Classification - K-nearest Neighbors Classification - Support Vector Machine - Classification with Scikit-Learn - Decision Trees and Ensemble Methods.

**MODULE V DEEP LEARNING 9**

Introduction to ANN – ANN with 1 Input and 1 Output – Working with Any Number of Input – Working with Hidden Layer.

**L – 45; TOTAL HOURS –45**

**TEXT BOOKS:**

1. Dirk P. Kroese, Zdravko Botev, Thomas Taimre, Radislav Vaisman, "Data Science and Machine Learning Mathematical and Statistical Methods", CRC Press, 2020.
2. Ahmed Fawzy Gad, Fatima Ezzahra Jarmouni, "Introduction to Deep Learning and Neural Networks with Python: A Practical Guide", Academic Press, 2021.

**REFERENCES:**

2. Ian Goodfellow, Yoshua Bengio, Aaron Courville, "Deep Learning, MIT Press, 2016.
3. Sandro Skansi, "Introduction to Deep Learning", Springer International Publishing, 2018.

**COURSE OUTCOMES:**

On completion of the course, the students will be able to

**CO1:** recognize the fundamentals of statistical concepts

**CO2:** explain unsupervised learning algorithms

**CO3:** apply regression models to solve data science problems

**CO4:** apply the classification algorithms for the given problem

**CO5:** explain deep learning concepts

**CO6:** analyze complex data using machine learning algorithms

**Board of Studies (BoS) :**

16th BoS of IT held on  
18.08.2022

**Academic Council:**

19th Academic Council Meeting held on  
29.09.2022

	PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	PO 10	PO 11	PO 12	PSO 1	PSO 2

CO5				M									M	
CO6				M									M	

**Note:** L- Low Correlation    M - Medium Correlation    H -High Correlation

SDG 8 : Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all.

Statement: It provides deep knowledge on unsupervised learning, regression analysis, classification and deep learning concepts, which can add to productive employment.

<b>GEDX 116</b>	<b>GREEN DESIGN AND SUSTAINABILITY</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG 11</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:****The objectives of the course are**

- To impart knowledge on the concepts of sustainable development and fundamentals of socio economic systems.
- To understand the basics of green building and frame work for the attainment of sustainability.
- To enhance the student's interest in the design of green building and energy efficient measures in a buildings.
- 

**MODULE I CONCEPTS OF SUSTAINABLE DEVELOPMENT 9**

Objectives of Sustainable Development - Need for sustainable development - Environment and development linkages - Globalization and environment - Population, poverty and pollution- global, regional and local environment issues-Greenhouse gases and climate change.

**MODULE II SUSTAINABLE DEVELOPMENT OF SOCIO ECONOMIC SYSTEMS 9**

Demographic dynamics of sustainability- Policies for socio economic development- Sustainable Development through trade- Economic growth-Action Plan for implementing sustainable development- Sustainable Energy and Agriculture.

**MODULE III FRAME WORK FOR ACHIEVING SUSTAINABILITY 9**

Sustainability indicators- Hurdles to sustainability- Business and Industry – Science and Technology for Sustainable Development- Performance indicators of sustainability and assessment mechanism- Constraints and barriers of Sustainable Development.

**MODULE IV GREEN BUILDINGS 9**

Introduction to Green Building- Energy- Water- Materials and Resources - Sustainable Sites and Land Use - Indoor Environmental Quality- Life Cycle Assessment- Energy, water and materials efficiency - Elements of Green Buildings Design- Foundation, Electrical, Plumbing, flooring, Decking, roofing, insulation, wall coverings, windows, siding, doors and finishing, LEED certification for Green Buildings, Green Buildings for sustainability.

**MODULE V ENERGY CONSERVATION AND EFFICIENCY 9**

Energy savings- Energy Audit- Requirements- Benefits of Energy conservation- Energy conservation measures for buildings- Energy wastage- impact to the environment.

**Total Hours –45****TEXT BOOKS:**

1. Charles Kibert, J., "Sustainable Construction: Green Building Design and Delivery", 5th Edition, John Wiley and sons, 2022.
2. Peter P Rogers, Kazi F Jalal and John A Boyd "An Introduction to Sustainable Development" Earthscan, 2017
3. Kirby, J., Okeefe, P., and Timber lake, "Sustainable Development", Earthscan Publication, London, 2007.
4. Moncef Krarti, "Energy Audit of Building Systems: an Engineering approach" CRC Press, LLC, Florida 2020.

**REFERENCES:**

1. Handbook of Green Building Design and Construction: LEED, BREEAM,
2. Green Building Handbook: Volume 2: A Guide to Building Products and their Impact on the Environment Paperback 2000

**COURSE OUTCOMES:**

At the end of the course, the students will be able to

- Explain the objective, need for the sustainability and the link between the globalization and environment.
- Address the economic, environmental, and social concerns in the sustainable development.
- Acquire knowledge on the performance indicators, constraints and barrier for sustainability.
- Explain the relationship between sustainability and emergence of green building practices.
- Conduct the energy audit on green building design and suggest ideas for attaining sustainability in building.

**Board of Studies (BoS) :**18<sup>th</sup> BoS of CE held on 05.04.2023**Academic Council:**20<sup>th</sup> Academic Council held on 13.04.2023

SDG 11 : Make cities and human settlements inclusive, safe, resilient and sustainable

Statement : Green building and design with sustainable indicator will enhance the sustainable development.

<b>GEDX 117</b>	<b>IMAGE PROCESSING AND ITS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4,9</b>	<b>APPLICATIONS</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

- COB1** : To apply the fundamentals of digital image processing
- COB2** : To analyze the performance parameters of image processing.
- COB3** : To discuss the image enhancement techniques for remote sensing
- COB4** : To adapt the image processing techniques in medical applications
- COB5** : To adapt the image processing techniques for industrial applications.

**PREREQUISITES:**

Fundamental concepts of transforms.

**MODULE I DIGITAL IMAGE FUNDAMENTALS 9**

Elements of Image Processing System, Fundamental steps in Digital Image Processing, Image Sampling & Quantization, Spatial and Gray level resolution. Fundamentals of Color Image Processing, Color models- RGB,CMY,HIS

**MODULE II IMAGE ENHANCEMENT AND TRANSFORMS 9**

Image Enhancement-Basic Gray level transformations, Histogram Processing, Spatial filtering, Image transforms- 2D DFT , DCT, Hadamard and Haar transform.

**MODULE III IMAGE SEGMENTATION AND RESTORATION 9**

Segmentation: Point, Line and Edge detection methods, Image segmentation and its types, Restoration: Noise model, Inverse filter and Wiener filter. Unconstrained and constrained restoration.

**MODULE IV MEDICAL IMAGE APPLICATIONS 9**

Multimodal medical image processing applications -Ultrasound image processing application, Dental X-ray image analysis- Content-based image retrieval-Detection of parasites using image processing

**MODULE V      REMOTE      SENSING      AND INDUSTRIAL      9**  
**APPLICATIONS**

Satellite image classification, Satellite image restoration- Industrial applications– Fault detection in automotive systems, Cereal grain inspection.

**L – 45 ; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. Gonzalez and Woods, "Digital Image Processing", 4<sup>th</sup> Edition, Pearson Education, 2018.
2. Robert Sincovec, Remote sensing models & methods for image processing, 2<sup>nd</sup> edition, 2012
3. Geoff Dougherty, "Digital Image Processing for Medical Applications", 1<sup>st</sup> Edition, Cambridge University Press, 2009.

1. E.R.Davies ,“Image Processing for the Food Industry”,World Scientific Publishing Co Pvt Ltd, 2000
2. John R. Jensen, Introductory Digital Image Processing: A Remote Sensing Perspective, 4<sup>th</sup> Edition, 2015.

**COURSE OUTCOMES:**

On completion of the course, the students will be able to

- CO1** : Explain the fundamental concepts of digital image processing
- CO2** : Summarize the image enhancement techniques and transforms
- CO3** : Apply suitable image segmentation and restoration techniques
- CO4** : Select appropriate image processing techniques for medical applications

**Board of Studies (BoS) :**

23<sup>rd</sup> BoS of ECE held on  
13.07.2022

**Academic Council:**

19<sup>th</sup> Academic Council held on  
29.09. 2022

CO5	H	M	H	H	H	H	H	L	L	L	L	M	H	H	H

**Note:** L- Low Correlation      M -Medium Correlation      H -High Correlation

**SDG 4:** Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all.

Statement: This course enables the student to understand basic image processing techniques and helps for lifelong learning.

**SDG 9:** Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation

Statement: Able to apply the theoretical concepts for the various application of image processing

<b>GEDX 118</b>	<b>INDUSTRIAL AUTOMATION AND</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>CONTROL</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

### COURSE OBJECTIVES

**COB1:** Learn and familiarize with the technologies which typically exist in an industrial facility.

**COB2:** Study of components used in data acquisition systems interface techniques.

**COB3:** To educate on the components used in PLC, DCS and SCADA.

**COB4:** To introduce the communication buses used in automation industries.

#### **MODULE I          PROGRAMMABLE LOGIC CONTROLLERS          9**

Evolution of PLCs - Hard Relay Logic - Programmable logic controllers - Organisation - Hardware details - I/O - Power supply - CPU - Programming of PLC — relay logic — Ladder logic — Functional blocks programming – Programming Timers, Counters.

#### **MODULE II          PLC INTERMEDIATE FUNCTIONS &          9** **COMMUNICATION IN PLCS**

Program control instructions-Data manipulation Instructions-Arithmetic instructions - Sequencer instructions- Design of interlocks and alarms using PLC - Requirement of communication networks for PLC — connecting PLC to computer — Use of Embedded PC as PLC - PLC applications in Industrial Automation

#### **MODULE III          LARGE SCALE CONTROL SYSTEM - SCADA          9**

SCADA: Introduction - SCADA Architecture - Different Communication Protocols - Common System Components - Supervision and Control - HMI - RTU and Supervisory Stations - Trends in SCADA - Security Issues

#### **MODULE IV          DISTRIBUTED CONTROL SYSTEM          10**

Introduction to DCS-Evolution, Architectures-Hybrid, centralized computer control, Generalized DCS. Architectures-Comparison, Local control unit, LCU-Configurations, Comparison, Process interfacing issues, Communication facilities-

Low level and High level operator interfaces, Operator displays, Low level and High level engineering interfaces, Factors to be considered in selecting DCS

#### **MODULE V          INDUSTRIAL COMMUNICATION NETWORKS          8**

Introduction - Evolution of signal standard - HART communication protocol

and communication modes - HART and OSI model - Modbus - Profibus - Foundation field bus - Introduction to AS-Interface (As-i) - Device net and Industrial Ethernet

**L – 45; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. Petrezeulla, “Programmable Controllers”, tenth edition , Mc-Graw Hill, 2010.
2. Michael P.Lucas, “Distributed Control System”, Van Nastrand Reinhold Company, New York,1986.
3. Romilly Bowden, “HART application Guide”, HART Communication Foundation, 1999.

**REFERENCES:**

1. W. Bolton,” Programmable Logic Controllers “,(Fifth Edition), Newnes, 2009.
2. G.K.Mc-Millan, “Process/Industrial Instrument and controls and handbook”, Mc Graw Hill, New York, 1999.
3. Hughes T, “Programmable Logic Controllers”, ISA Press, 1989.

**COURSE OUTCOMES:**

At the end of the course, the student will be able to

**CO1:** Evaluate the hardware components of PLC and develop basic wiring diagrams.

**CO2:** Develop industrial automation system, identify the requirements of communications networks in PLC and analyze issues related to PLC applications in installation and trouble shooting.

**CO3:** Design a SCADA, HMI system for any industrial application.

**CO4:** Compare the different architectures of DCS and analyze the configurations of local control unit.

**CO5:** Distinguish between low level and high level operator interfaces in DCS and select DCS for specific applications.

**CO6:** Able to select and use most appropriate networking technologies and standards for a given application

**Board of Studies (BoS) :**

18th BoS of EIE held on  
12.07.2022

**Academic Council:**

19th Academic Council Meeting  
held on 29.09.2022

CO5	H	H	H	H	M	M	M		L		L	M	L		H

**SDG 9:** These technologies connect citizens around the world, monitor and track environmental impact, and optimize industrial inefficiencies

The technologies in Industrial Automation connect citizens around the world, monitor and track environmental impact, and optimize industrial inefficiencies

<b>GEDX 119</b>	<b>INDUSTRIAL SAFETY</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To learn the modern safety concepts

**COB2:** To familiarize with the safety in manufacturing industries

**COB3:** To acquire knowledge in construction and electrical safety systems

**COB4:** To be conversant with safety performance monitoring

**COB5:** To gain knowledge in safety education and training

**MODULE I INTRODUCTION TO SAFETY L:7**

Evolution of modern safety concept- Safety policy - Safety Organization - Line and staff functions for safety- Safety Committee- budgeting for safety -Safety education and training.

**MODULE II SAFETY IN MANUFACTURING L:10**

Safety in metal Working-Machine guarding -Safety in welding and gas cutting - Safety in cold forming and hot working of metals -Safety in finishing, inspection and testing – Regulations - Safety consideration in material handling devices: Ropes, Chains, Sling, Hoops, Clamps, Arresting gears – Prime movers.

**MODULE III CONSTRUCTIONAL AND ELECTRICAL SAFETY L:10**

General safety consideration in Excavation, foundation and utilities – Cordoning – Demolition – Dismantling –Clearing debris – Types of foundations – Open footings.

Electrical Hazards – Energy leakage – Clearance and insulation – Excess energy – Current surges – Electrical causes of fire and explosion – National electrical Safety code.

**MODULE IV SAFETY PERFORMANCE MONITORING L:9**

Permanent, partial and temporary disabilities - Calculation of accident indices: frequency rate, severity rate, frequency severity incidence, incident rate, accident rate, safety “t” score, safety activity rate – Problems.

**MODULE V SAFETY EDUCATION AND TRAINING L:9**

Importance of training - Identification of training needs - Training methods: programme, seminars, conferences, competitions - Method of promoting safe practice - Motivation – Communication - Role of government agencies and private consulting agencies in safety training: Creating awareness, awards, celebrations, safety displays, safety pledge, safety incentive scheme, safety campaign – Domestic safety and training.

**L – 45; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. Nasser Elahi, "Industrial Safety Management", Kalpaz Publications, 2006.
2. Jain.R.K., Sunil S.Rao. "Industrial Safety, Health and Environment Management Systems" Khanna Publishers, 2000.
3. Accident Prevention Manual, NSC, Chicago, 14<sup>th</sup> Edition, 2015.

**REFERENCES:**

1. Fulman, J.B., Construction Safety, Security, and Loss Prevention, John Wiley and Sons, 1979.

5. Heinrich H.W. "Industrial Accident Prevention" McGraw-Hill Company, New York, 1980.
6. Blake R.B., "Industrial Safety" Prentice Hall, Inc., New Jersey, 1973.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Describe the modern safety concepts

**CO2:** Discuss the safety in manufacturing industries

**CO3:** Elucidate the electrical and construction safety systems

**CO4:** Illuminate safety performance monitoring

**CO5:** Explain the safety education and training

**Board of Studies (BoS):**

20<sup>th</sup> BOS held on 08.08.2022

**Academic Council:**

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

Holistic understanding of Industrial safety fundamental norms enhances the safety of men and machines in industries.

<b>GEDX 120</b>	<b>INDUSTRY 4.0</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:**To gain knowledge about the need of industry 4.0

**COB2:** To familiarize with various technologies involved in Industry 4.0

**COB3:**To be conversant with the systems supporting Industry 4.0

**COB4:**To acquire knowledge in data and information handling in Industry 4.0

**COB5:**To learn about the maturity and readiness levels for Industry 4.0

**MODULE I INTRODUCTION TO INDUSTRY 4.0 L:9**

Various Industrial revolutions- Developments in USA, Europe, China and other countries- Digitalisation and the Networked Economy- Drivers, Enablers, Compelling Forces for Industry 4.0- Comparison of Industry 4.0 factory and conventional factory- Benefits.

**MODULE II TECHNOLOGIES OF INDUSTRY 4.0 L:9**

Internet of Things (IoT) - Industrial Internet of Things (IIoT) - Internet of Services- Smart Manufacturing- Smart Devices and Products- Smart Logistics - Smart Cities - Predictive Analytics.

**MODULE III SYSTEMS SUPPORTING INDUSTRY 4.0 L:9**

Cyber physical systems- Robotic automation and collaborative robots- Mobile computing - Cyber security.

**MODULE IV DATA AND INFORMATION HANDLING IN INDUSTRY 4.0 L:9**

Resource-based view of a firm- Data as a new resource for organizations- Harnessing and sharing knowledge in organizations- Cloud computing basics- Cloud computing and Industry 4.0

**MODULE V MATURITY AND READINESS FOR INDUSTRY 4.0 L:9**

Challenges – Gaps- Maturity levels- Readiness assessment – Opportunities- Future Trends - Case studies.

**L – 45; TOTAL HOURS – 45**

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The knowledge of various technologies and systems of Industry 4.0 will help in the development innovative industry setups.

<b>GEDX 121</b>	<b>INTRODUCTION TO ARTIFICIAL</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 1</b>	<b>INTELLIGENCE</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** Familiarize students with Artificial Intelligence principles and techniques.

**COB2:** Identify appropriate AI methods to solve a complex problem.

**COB3:** Formalize a given problem in the language/framework of different AI methods

**COB4:** To assess the applicability, strengths, and weaknesses of the basic knowledge representation, problem solving, and learning methods in solving engineering problems

**COB5:** Implement appropriate searching strategies for few real world environments

**MODULE I INTRODUCTION 9**

Importance of AI, Evolution of AI - Applications of AI, Classification of AI systems with respect to environment, , Intelligent Agents, Different types of agents, Problem-Solving Process – Formulating Problems-Problem Types and Characteristics- Problem Analysis and Representation, Performance Measuring-Problem Space and Search-Toy Problems- Real-world problems-Problem Reduction Methods.

**MODULE II PROBLEM SOLVING 9**

General Search algorithm – Uniformed Search Methods – BFS, Uniform Cost Search, Depth First search , Depth Limited search (DLS), Iterative Deepening, Informed Search-Introduction- Generate and Test, BFS, A\* Search, Memory Bounded Heuristic Search, Local Search Algorithms and Optimization Problems – Hill climbing and Simulated Annealing.

**MODULE III KNOWLEDGE AND REASONING 9**

Knowledge Representation-Knowledge based Agents-The Wumpus World, Logic-Propositional Logic-Predicate Logic-Unification and Lifting, Representing Knowledge using Rules-Semantic Networks Frame Systems, Definition of uncertainty, Bayes Rule – Inference, Belief Network.

**MODULE IV PLANNING 9**

**CO5:** Ability to apply knowledge representation, reasoning, to real-world problems.

**CO6:** Discuss current scope and limitations of AI and societal implications.

**Board of Studies (BoS) :**

16<sup>th</sup> BoS of IT held on

18.08.2022

SDG 1 : End poverty in all its forms everywhere.

Statement : AI Sector will produce new employment to peoples, thus providing them with salary and ending poverty.

<b>GEDX 122</b>	<b>INTRODUCTION TO ARTIFICIAL</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 4,8 &amp;9</b>	<b>INTELLIGENCE AND</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>
	<b>EVOLUTIONARY COMPUTING</b>				

**COURSE OBJECTIVES:**

**COB1:** To introduce students to the fundamental concepts, principles, and techniques in Artificial Intelligence (AI) and Evolutionary Computing.

**COB2:** To familiarize students with various AI algorithms, including evolutionary computing, machine learning, and natural language processing.

**COB3:** To provide students with a comprehensive understanding of problem-solving techniques and search algorithms in AI.

**COB4:** To explore the applications of AI and Evolutionary Computing in various domains such as robotics, computer vision, healthcare, and finance.

**COB5:** To foster an awareness of ethical considerations and societal impact associated with AI and Evolutionary Computing.

**MODULE I INTRODUCTION TO ARTIFICIAL INTELLIGENCE 9**

Introduction to the course and its objectives- History and evolution of artificial intelligence - Fundamental concepts in AI - Problem-solving techniques and search algorithms.

**MODULE II EVOLUTIONARY COMPUTING 10**

Introduction to evolutionary computing - Genetic algorithms - Genetic programming - Evolutionary strategies - Swarm intelligence.

**MODULE III MACHINE LEARNING 10**

Introduction to machine learning - Supervised learning algorithms (e.g., perceptron, feed forward neural networks) - Unsupervised learning algorithms (e.g., clustering, self-organizing maps) - Deep learning and neural networks - Reinforcement learning- Machine learning case studies using python.

**MODULE IV NATURAL LANGUAGE PROCESSING 9**

Introduction to natural language processing - Syntax and semantic analysis - Language models and text classification - Named entity recognition and sentiment analysis - Machine translation and language generation.

**MODULE V ADVANCED TOPICS IN ARTIFICIAL INTELLIGENCE 7**

Computer vision and image recognition - Robotics and autonomous systems - Ethical considerations in AI - AI in healthcare and finance - Future trends in AI-Generative AI and Prompt Engineering.

**L – 45; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. "Artificial Intelligence: A Modern Approach" by Stuart Russell and Peter Norvig. Pearson, 4th edition (2020)
2. "Artificial Intelligence: Foundations of Computational Agents" by David L. Poole and Alan K. Mackworth, Cambridge University Press, 2nd edition (2017)

3. "Pattern Recognition and Machine Learning" by Christopher M. Bishop, Springer, 1st edition (2006)
4. "Deep Learning" by Ian Goodfellow, Yoshua Bengio, and Aaron Courville, The MIT Press, 1st edition (2016)
5. "Speech and Language Processing" by Daniel Jurafsky and James H. Martin, Pearson, 3rd edition (2019)
6. "Foundations of Statistical Natural Language Processing" by Christopher D. Manning and Hinrich Schütze, The MIT Press, 1st edition (1999)
7. "Computer Vision: Algorithms and Applications" by Richard Szeliski, Springer, 1st edition (2010)
8. "Robotics, Vision and Control: Fundamental Algorithms in MATLAB" by Peter Corke, Springer, 1st edition (2011).
9. "Ethics of Artificial Intelligence and Robotics" edited by Vincent C. Müller, Routledge, 1st edition (2020).

**COURSE OUTCOMES:**

At the end of the course, the student will be able to

**CO1:** apply the key concepts of Artificial Intelligence and Evolutionary Computing.

**CO2:** apply problem-solving techniques and search algorithms to solve AI-related problems.

**CO3:** implement and analyze different machine learning algorithms for classification, clustering, and regression tasks.

**CO4:** utilize evolutionary computing techniques, such as genetic algorithms, genetic programming, and evolutionary strategies, to optimization and design problems.

**CO5:** analyze the ethical implications of implementing AI technologies in various domains

**Board of Studies (BoS) :**

19<sup>th</sup>BoS of EEE conducted on  
29.08.2023

**SDG 4: Quality Education**

The course contributes to quality education by providing knowledge and understanding of artificial intelligence and evolutionary computing, enabling students to acquire the skills and competencies needed in the field.

**SDG 8: Decent Work and Economic Growth**

The course prepares students for the growing field of artificial intelligence and evolutionary computing, which has the potential to drive economic growth and create new job opportunities.

**SDG 9: Industry, Innovation, and Infrastructure**

The course focuses on innovative technologies and computational techniques that are essential for advancing industries and improving infrastructure.

<b>GEDX 123</b>	<b>MOTOR VEHICLE ACTS AND LOSS</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>	<b>ASSESSMENT</b>	<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To understand the structures and function of transport authorities

**COB2:** To gain knowledge in penalty for offenses

**COB3:** To gain knowledge in vehicle insurance and policy

**COB4:** To understand the vehicle impact

**COB5:** To study the surveying procedure for insurance

**MODULE I INTRODUCTION TO TRANSPORTATION AND 9**  
**TRANSPORT AUTHORITIES**

Functions of Transport Authorities - Key terms used in Motor Vehicle Act- Classification and anatomy of different classes of vehicle - Importance of Permit - Provisions regarding permit - Special Provisions for State Transport Undertakings (STUs)

**MODULE II CONSTRUCTION, MAINTENANCE OFFENCES AND 9**  
**PENALTY FOR MOTOR VEHICLES**

Provisions regarding construction and maintenance of motor vehicles - Preparing rules for various mandatory components to be fitted in a vehicle. Manipulate the maximum limit for speed and weight - Reconstructing provisions for vehicles with left-handed driving vehicles - Planning the rules for driving motor vehicle keeping safety of passengers and occupants a public places - Outlining the punishments for law-breakings.

**MODULE III VEHICLE INSURANCE 9**

Purpose and need of Insurance- Role in economic development of the country - Insurance legislation and IRDA act - Market Structure - GIC Reinsurance company/ Tariff Advisory Committee - Principle of general insurance - Types of motor vehicle insurance - Types of motor vehicle policies - Zero Depreciation Policy -Terms and Conditions for motor vehicle insurance.

**MODULE IV ANALYZING VEHICLE IMPACT 9**

Reasons of occurring of accidents - Effect on vehicle during impact from: Any One Side, Head on Collision, Vehicle Topple – underwriting an insurance form – risk assessment in given circumstances.

**MODULE V SURVEYING AND INVESTIGATING MOTOR 9  
VEHICLE CLAIM**

Surveyor - Licensing authority and controller of insurance - Role of surveyor and loss adjustor - Empanelment of surveyor- Intimation - Site visit - Garage visit – Photography - Estimate and claim form - Passing of estimate - Cost of parts - Cost of repairing – Labour - Checking of documents (Paper pertaining to vehicle) - Important aspects of survey - Various types of loss assessment - Preparation of survey reports and submission - Fraud claims - Connected to Packet Policy- MACT

**L 45 ; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. R H Prajapati, "Motor Vehicle Acts and Loss Assessment", Atul Prakashan Publications, 1<sup>st</sup> edition, 2016.

### SDG No: 9

The motor vehicle act and the insurance policies are the topics that everyone must be aware of.

**Statement:** Better understanding of the insurance claim process is made accessible by having a thorough understanding of motor vehicle act and claim procedure.

<b>GEDX 127</b>	<b>SOFT COMPUTING TECHNIQUES</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To learn the basic concepts of Soft Computing

**COB2:** To become familiar with various techniques like neural networks, genetic algorithms and fuzzy systems

**COB3:** To apply soft computing techniques to solve problems.

**COB4:** To learn the basic concepts of genetic algorithms

**COB5:** To integrate soft computing techniques for complex problems.

**MODULE I INTRODUCTION TO SOFT COMPUTING 9**

Introduction-Artificial Intelligence-Artificial Neural Networks-Fuzzy Systems-Genetic Algorithm and Evolutionary Programming-Swarm Intelligent Systems-Classification of ANNs-McCulloch and Pitts Neuron Model-Learning Rules: Hebbian and Delta- Perceptron Network-Adaline Network-Madaline Network.

**MODULE II ARTIFICIAL NEURAL NETWORKS 9**

Back propagation Neural Networks - Kohonen Neural Network -Learning Vector Quantization -Hamming Neural Network - Hopfield Neural Network-Bi-directional Associative Memory -Adaptive Resonance Theory Neural Networks- Support Vector Machines - Spike Neuron Models.

**MODULE III FUZZY SYSTEMS 9**

Introduction to Fuzzy Logic, Classical Sets and Fuzzy Sets - Classical Relations and Fuzzy Relations -Membership Functions -Defuzzification - Fuzzy Arithmetic and Fuzzy Measures - Fuzzy Rule Base and Approximate Reasoning - Introduction to Fuzzy Decision Making.

**MODULE IV GENETIC ALGORITHMS 9**

Basic Concepts- Working Principles -Encoding- Fitness Function - Reproduction - Inheritance Operators - Cross Over - Inversion and Deletion Mutation Operator - Bit-wise Operators -Convergence of Genetic Algorithm.

**MODULE V HYBRID SYSTEMS 9**

Hybrid Systems -Neural Networks, Fuzzy Logic and Genetic -GA Based Weight Determination - LR-Type Fuzzy Numbers - Fuzzy Neuron - Fuzzy BP Architecture - Learning in Fuzzy BP- Inference by Fuzzy BP - Fuzzy ArtMap: A Brief Introduction - Soft Computing Tools - GA in Fuzzy Logic Controller Design - Fuzzy Logic Controller

4. Deepti Moyi Sahoo, Nisha Rani Mahato, and Snehashish Chakraverty "Concepts of Soft Computing: Fuzzy and ANN with Programming- Springer; ISBN-B07R6Z66LT,2020.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:**Apply suitable soft computing techniques for various applications.

**CO2:**Integrate various soft computing techniques for complex problems.

**CO3:** Analyze various genetic and hybrid systems.

**CO4:** Compare different Fuzzy and Neural algorithms

**CO5:**To design various Neuron model systems.

**Board of Studies (BoS) :**

19th BoS of CSE held on  
28.12.2021

**Academic Council:**

18th Academic Council Meeting  
held on 24.02.2022

**Note:** L- Low Correlation    M -Medium Correlation    H -High Correlation

SDG 9 : Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

Statement : By learning “Soft Computing” the students are able to develop methods to collaborate with fuzzy and Neural systems for various real time applications which leads to sustainable economic growth in turn providing productive employment.

<b>GEDX 128</b>	<b>VALUE ANALYSIS AND ENGINEERING</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:**To learn the basics of value engineering

**COB2:**To gain knowledge in value engineering job plan and process

**COB3:**To be conversant with orientation and information phases

**COB4:**To familiarize with the function analysis and creative phases

**COB5:**To acquire knowledge on evaluation and investigation

**MODULE I VALUE ENGINEERING BASICS L: 12**

Origin of value engineering - Definition of value engineering and value analysis - Benefits of value engineering- Problem recognition -Level of value engineering in organization -Value engineering activity - Difference between value engineering and value analysis - Types of value function - Basic and secondary functions - Creativity aspects in value engineering and analysis.

**MODULE II VALUE ENGINEERING JOB PLAN AND PROCESS L: 7**

Seven phases of job plan - FAST diagram - Behavioural and organizational aspects of value engineering - Principles of value analysis - Requirement of value engineering - Role of value analysis in engineering applications.

**MODULE III ORIENTATION AND INFORMATION PHASES L:8**

Launch of value engineering project works – Selection and evaluation of value engineering projects - Objectives and targets – Value engineering project work- Time-bound programme – Projects scheduling and teams - Time schedule - Technical data - Marketing related information - Competition profile - Cost data - Materials Management related information - Quality and reliability related information - Manufacturing data.

**MODULE IV FUNCTION ANALYSIS AND CREATIVE PHASES L:11**

Objectives - Function definition –Anatomy of the function – Approach and evaluation of function - Classification of functions - Higher level functions – Value gap - Value index - Cost Modelling -Progress in creativity - Promotion of creativity skills in firm- Obstacles in creativity - Mental road blocks - Creativity killer phrases - Positive thinking - Ideas stimulators - Creativity techniques - Brainstorming.

**MODULE V EVALUATION AND INVESTIGATION****L:7**

Paired comparison and evaluation matrix techniques - Unique and quantitative evaluation of ideas - Criteria for comparison - Function analysis system technique - Criteria for selection of value engineering solutions - Design – Materials – Quality – Marketing – Manufacturing - Preview sessions.

**L – 45; TOTAL HOURS – 45****TEXT BOOKS:**

1. Mudge, Arthu E, Value engineering – A systematic approach, Mc Graw Hill, 2000.
2. Kumar S, Singh R K and Jha J K (Ed), Value Engineering, Narosa publishing, 2005.

**REFERENCES:**

1. Park R J, Value Engineering: A plan for invention, St. Lucie press, 1999.
2. Heller D E, Value management, value engineering and cost reduction, Addison Wesley, 1988.

**COURSE OUTCOMES:**

After completion of the course, students should be able to

**CO1:** Describe the basics of value engineering

**CO2:** Elucidate value engineering job plan and process

**CO3:** Explain the orientation and information phases

**CO4:** Illuminate function analysis and creative phases

**CO5:** Discuss the investigation and evaluation reports

**Board of Studies (BoS):**

20<sup>th</sup> BOS of Mech held on  
08.08.2022

SDG 9: Build resilient Infrastructure, promote inclusive and sustainable industrialization and foster innovation.

Holistic understanding of value engineering helps to identify and eliminate unwanted costs and improve function and quality.

<b>GEDX 129</b>	<b>VEHICLE MAINTENANCE</b>	<b>L</b>	<b>T</b>	<b>P</b>	<b>C</b>
<b>SDG: 9</b>		<b>3</b>	<b>0</b>	<b>0</b>	<b>3</b>

**COURSE OBJECTIVES:**

**COB1:** To know about the various methods of maintaining procedure, vehicle insurance and basic problems in a vehicle.

**COB2:** The student able to impart knowledge in maintaining of engine components and subsystems.

**COB3:** The student able to impart knowledge in maintaining of transmission, driveline, steering, suspension, braking and wheels.

**COB4:** The student able to impart knowledge in maintaining of steering, suspension, braking and wheels.

**COB5:** The student able to impart carefully maintaining their vehicle wiring and air conditioning systems.

**MODULE I MAINTENANCE, WORKSHOP PRACTICES, SAFETY AND TOOLS 8**

Maintenance – Need, importance, primary and secondary functions, policies - classification of maintenance work - vehicle insurance - basic problem diagnosis. Automotive service procedures – workshop operations – workshop manual – vehicle identification. Safety – Personnel, machines and equipment, vehicles, fire safety - First aid. Basic tools – special service tools – measuring instruments – condition checking of seals, gaskets and sealants. Scheduled maintenance services – service intervals - Towing and recovering.

**MODULE II ENGINE AND ENGINE SUBSYSTEM MAINTENANCE 8**

General Engine service- Dismantling of Engine components- Engine repair-working on the underside, front, top, ancillaries- Service of basic engine parts, cooling and lubricating system, fuel system, Intake and Exhaust system, electrical system - Electronic fuel injection and engine management service - fault diagnosis- servicing emission controls.

**MODULE III TRANSMISSION AND DRIVELINE MAINTENANCE 8**

Clutch- general checks, adjustment and service- Dismantling, identifying, checking and reassembling transmission, transaxle- road testing- Removing and replacing propeller shaft, servicing of cross and yoke joint and constant velocity joints- Rear axle service points- removing axle shaft and bearings-servicing differential assemblies- fault diagnosis.

**MODULE IV STEERING, SUSPENSION, BRAKE AND WHEEL 12  
MAINTENANCE**

Maintenance and Service of Mc person strut, coil spring, leaf spring, shock absorbers. Dismantling and assembly procedures. Inspection, Maintenance and Service of steering linkage, steering column, Rack and pinion steering, Recirculating ball steering service- Worm type steering, and power steering system.

Inspection, Maintenance and Service of Hydraulic brake, Drum brake, Disc brake, parking brake. Bleeding of brakes. Wheel alignment and balance, removing and fitting of tyres, tyre wear and tyre rotation.

**MODULE V AUTO ELECTRICAL AND AIR CONDITIONING 9  
MAINTENANCE**

Maintenance of batteries, starting system, charging system and body electrical -Fault diagnosis using Scan tools. Maintenance of air conditioning parts like compressor, condenser, expansion valve, evaporator - Replacement of hoses- Leak detection- AC Charging- Fault diagnosis Vehicle body repair like panel beating, tinkering, soldering, polishing, painting.

**L – 45; TOTAL HOURS – 45**

**TEXT BOOKS:**

1. Panchal, Dhruv U., et al. Vehicle Maintenance and Garage Practice. India, PHI Learning, 2014.
2. Denton, Tom. Advanced Automotive Fault Diagnosis. N.p., Taylor & Francis, 2006.

2. VanGelder, Kirk T. Automotive Engine Repair. United States, Jones & Bartlett Learning, 2017.

**COURSE OUTCOMES:**

students can able to

**CO1:** Prepare maintenance schedules and procedures with appropriate tools.

**CO2:** Demonstrate the procedure and methods to repair and calibrate the engine.

**CO3:** Analyse the causes and remedies for fault in transmission and drive line systems.

**CO4:** Analyse the causes and remedies of steering, suspension systems, brake and wheel.

**CO5:** Demonstrate the procedure for maintenance in wiring and air conditioning systems.
